/ / I don't really care how women or men dress in their own countries. I have no desire to tell them how they should dress. But if they come to our countries and try to denude our sisters or daughters, then they have declared war. \ \

--

spokesman Lieutenant Colonel Barry Johnson said:

"I'd like to think that these claims aren't true...but I don't know. If someone is doing this to detainees, they deserve to be taken down."

--

/ / "The US government is trying to silence Dr. Ammash's outspoken criticism of the US role in causing cancers and other illnesses in Iraq through its own use of biologically hazardous weapons such as radioactive deleted uranium." \ \

/ / ``Such a blatant statement acknowledging the commingling of his official duty to ensure a fair election with his partisan duty to re-elect President Bush, made in a political fund-raising appeal, evidences Secretary Blackwell's poor judgment at best, and the manipulation of election administration for partisan purposes, at worst,'' the report asserts. \ \

--

Breaking Camp

I will advocate full compensation for every mistreated soldier who had been tricked into believing something without reasoning.

Johnny condemns George Walker Bush (666) to death for the crimes he has committed against God's Humanity.

Let it be understood, that Saddam gave America 100 percent access to do anything the anti-Christ wished without delay prior to the needless military conflict beginning. So, every treasonous thieving bushite life taken, is done in protection of God, and the American dream. See?, TRAITOR bushite Art Bell's amerikan talk radio forbids BY CENSORSHIP anyone in America to speak in the defense of the undefended American People. Art Bell, America's enemy, with ensure that America "never" learns that bush's business partner, General Ahmad, funded 9/11's mastermind ring leader Mohamed Atta, or that depleted uranium is measured radio-active, or most especially, that billions of STOLEN American pension money is sitting in bushite bank accounts in the Cayman Islands. Instead, he'll do another show on UFOs, or bigfoot, while broadcasted to the wordless bushite grunts their dying is for naught. Who cares?, bush's war against freedom in America isn't anything bushite amerika ever wants to get persnickety about.

http://www.chapelhill.indymedia.org/uploads/bushite-kills-bushite.mp3

/ / Who cares? CNN is not going to cover it, we know that. CBC in Canada, they're not going to mention it to anybody. It's no concern of themselves to show a caring word for the [thieving] sacrificing soldier. \ \

The EVIL bushite liars die for no better good, but as the ungodly bringing further hardships against US innocent people they target for murder. God says, the Magna Charta says, the American constitution says, let US all arrest or kill the TRUE ENEMY bushites instead. "See lawless bushite, kill it in defense of all that are innocent", I always say as the Son of Man and Living Creator. No joy greater than saving the innocent victims of the enemy bushite thieves, torturers, and first degree murderers. WHO WOULD DISAGREE? in a true Democracy?

Every American soldier who dies as a bad guy in Iraq, dies for cowardly worshiping bush instead of Life. The demon anti-Christ as their false, untrue, dummy deity, sends them into harms way for only to steal from the innocent. The innocent left in God's trust. There was nothing that could have better been done in Iraq by bombing the country. The blind attacking of the population, along with it's functioning public institutions, brings only the STOLEN cash rewards on trading in the American soldier's LIFE as a fascist criminal. All that is bought to by putting cowardly

bushite soldiers in bush's un-needed conflict, is to steal from their very own families back home left almost completely undefended. [Have no fear, Johnny Wizard's here!] A criminal military force that deems some soldiers from Apartide fame as "un-accountable" to American or "Iraqi" law, while paying them a thousand dollars a day or more as rewarded racists who fight allong side black and Hispanic dying bushites, to not allow equal rights for those classified by different colorations. Allthewhile with spokespeople smattering the sacrifices are to bring democracy together in Iraq to arrest bushite for thieving then? [No matter whomever you are, George W. Bush is truly evil to God in YOUR name too see?] Regular Joe in the Army, 47$ before expenses concurrent and impending.

I will advocate full compensation for every mistreated soldier who had been tricked into believing something without reasoning. Example: those who had been taken in criminally to handing over their military pensions for five year loans at 56%, or a 20,000 loan paid in five with 60,000. No competion exists for this racket because it's an actual crime scene. Guess where American Gis can hear the sales pitch advertised? The Army Times.

No thoughts of understanding are expressed (OR COULD BE) from the soulless bushite on why they are in Iraq dying, or why depleted uranium is harmless, or why depriving Iraqis of medicine along with food and water, is a ploy to win the hearts of every man who owns a gun. Or why the bushite demands through the censorship of tyranny, that Our Humanity has no rights to speak for our freedoms and liberty, or on behalf of Iraqis who have had billions of much needed dollars stolen from themselves by the bushite enemy. (The billed for taking bushite soldier itself, will not receive a penny of the ill gotten gains, just like their own grand parents were robbed of the pensions, and the bushite couldn't find a word of outrage to say against their false idol then either.)

/ / As the soulless disciples of the enemy anti-Christ, Our Mr. bush Jr., their "officially" granted legal immunity from all prosecution means nothing to me as a honorable man defending my humanity, or as living Creator, who brought all into this new world to be free, and can just as soon, take you all nazi bushite out the old school way. \ \

The ungodly evil bushmob fascist totalitarianists are pushing to have US specially arrested. The demon anti-Christ enemy forces have gambled an attempt to find prosecutors and judges, lawyers and defendants, who together wouldn't let the truth be spoken in our own defenses. I have had many discussions with the National Security branch of the RCMP, CSIS, the Secret Service, the FBI, and several commanders in the Canadian Military, and WE all know, this upcoming trial is something a great deal of many are lookiung forward to, however, an agent of law recently approached me to warn, some are working to try having me arrested without bail, and spend maybe a few years behind bars before a trial could not be postponed any longer, all in an attempt to try stopping my words of truth that represent the interests of all defendable legitimate legal enforcements. Canada's system of checks and balances, and our honorable police services have too many good guys in place, to want to silence my calls for Justice by measurement. And, up until now, our security people have advised the bushite case would never fly in a public court room, for Johnny Wizard would just make his case as it stands FACTUALLY DOCUMENTED along with that which was FALSELY ALLEDGED, and the wealthy do nothing corporate news agencies would be caught as culpable to being accessories to first degree murders in New York City, where they deliberately with malicious intent, refused to report on the FBI's findings that General Ahmad funded Atta, or that demon George W. Bush with condi and rummy, had a top secret CRIMINAL plan to invade Afghanistan dated September 9th, 2001. Just like still, CBC and CNN refuse to report any human concern for those murdered irrationally by bushite in Iraq today. No concern for those Humans, but in Asia, where bush isn't yet anyway, thieving in the wide open from God, they can try to make up for lost respect by claiming those People are better People worthy of our commpassion with wall to wall coverage on the suffering we have little of chances in preventing. But for to stop needlessly droping tons and tons of toxic bombs into our Living Earth. It is the bushite enemy who refuse to allow YOU speak in your defense as an Earthling.

However, this being said, I have been recently informed that, since the godless bushite enemies would wish to have our freedoms censored, it will likely be pushed to do so without a public trial allowing a jury of my peers to judge the case accordingly. Up until recently, Guantanamo could never happen in Canada. But now in Canada, the enemies behind closed doors are talking

about sending intelligent innocent people away to be tortured for sadomasochistic satanic tendencies, and further have argued to no one that persecuting People in Our names without evidence, maybe isn't such a bad idea, when you think of all the people we could rob our humanity from like the "popular" and "Democratic" bush regime does. Bushite corporate new censors are fighting for a return to the dark ages. Don't let this happen to YOUR world. Care not for my freedoms as an honorable man who stands with America's FBI, and your given up life wont be worth nothing but as yet another sacrifice to bring further glory and stolen riches to the American cop killer, pension thiever, 9/11 perpetrator, war mongering anti-Christ, Your unbelievably EVIL Mr. bush Jr.. The enemy of God anti-Christ who continues to hold your real life in mistrust and dishonor, while wealthy corporate "celebs", talk freely about their pride in such ungodly sacrifices as Christ's forsaken name.

I ask ONLY you to argue this paper with your best intentions, for I will perhaps not receive another chance to publish, if as usual, the Internet community at large extends me little support in my UNCHALLENGED assertions on who truly committed the crimes of 9/11. A single bushite corporatist sends a complaint to a Internet provider alleging I talk "spam", therefor, without any hearing, private owners are threatened to lose their privilege to communicate, by an enemy bushite protagonist who exercises his "authority" by stating only, "spam", and not even providing my actual post in it's entirety. One Internet service was shut down for the sole reason that discussing George W. Bush as the 9/11 perpetrator in tx.politics, was against the rules, for such subject material must be confined to only a American nation political forum. I talked to the kid on the phone who made that power decision on behalf of all usenet, and let it be known, he knows what he's doing. But "they" can't do this everywhere. I can not "take over" your big old lonely world that you must work to protect for yourself as an equal citizen sworn to freedom. I have written all I need to say about Justice and Freedom, and if the human race can not still find enough care for themselves to propagate my writings for others to read, or demand Art Bell be removed to allow Johnny Wizard to debate the ungodly dumfuk bushite vermins, there truly is no hope for US continuing.

Johnny Wizard

U.S. deserter 'didn't want to have to kill babies'

/ / Mr. House will argue that American soldiers are
guilty of war crimes and that forcing Mr. Hinzman to
fight in Iraq would have made him a war criminal.

He will call as a witness former U.S. Marine Staff
Sergeant Jimmy Massey, who is expected to testify that
he and other soldiers shot more than 30 unarmed Iraqis,
including women and a six-year-old child, at a U.S.
military checkpoint. \ \

--

CNN.com - Aid group 'told to freeze' Falluja work - Dec 6, 2004

/ / Only about 100 families are thought to remain in
Falluja, as most fled the city before the U.S.-led
operation aimed at flushing out insurgents. \ \

Huh? Again, witness wealthy CNN "news" staffers, didn't
even bother to seek for an update on their "about 100",
that had not ever been given. Red Cresent, the day
previous to Dec. 6, no... actually reported on, Dec
3rd!, stated, (from their limited circle of reference)
they had witnessed a minimum of many corpses, of
completely innocent pro-Iraqi women, children, youths,
and men.

/ / Iraqi Red Crescent spokesman Muhammad al-Nuri
estimates that some 6,000 people have been killed, many
of them civilians. \ \

(That is discounting murdered armed defenders of Freedom
in Iraq we can prusume.)

But, again, the true bushite enemies of loyal bushite
enemies, thay'l' "bushite lie" to the bushite nation
about the "holy" benefits of, sacrificing America's
young life., all done for the glorious betterment of the
traitor demon anti-Christ liar, the war criminal, Our

Mr. bush Jr., along with his treasonous evil cabal of anti-semitic Palestinian Christ haters. A compassionate, "conservative", war mongering cabal whos warring of America is done to secretly steal further from the innocence of God in silence. Without a honest to Johnny, bushite killin' God-Man to speak on the nature of reality itself from living Creation's time-less prospective. Naturally leaving ourselves to save all of humanity with my "magic" - guitar, notebook, cybercafes, and super cool Akeido, leaves me in wonder of where life could lead as committed to freedom through justice for all?, as truly ourselves democractically represented?, Miraculous?. or will we choose as ENEMY bushite instead not to, ending to devolve ourselves from existence?

I know of some pretty, almost miraculous words in which can bring about positive change, and man, if you could see the world for America's Dream, where all People are judged not by the color of their skin, but the content of their character, the entire bushmob would be behind bars awaiting trial for treason, and the Iraqi People would have American Forces demanding Allawi be arrested for failing to explain himself regarding the needless bombing of our Humanity in Samarra and Falluja.

--

SEE BUSHITE, KILL IT FOR GOD'S AMERICA

/ / Another humiliating proposal, which even triggered debate among Marine officers in control of the city, is to force all Fallujan men to work in military-style battalions, reported the Globe. \ \

This is the best the ENEMY bushite could dream up in all possible worlds?

/ / His company of tanks and Bradley Fighting Vehicles had roamed the eastern third of the city [Falluja] for 13 days, shooting holes in every building that might pose a threat, leaving behind a landscape of half-collapsed houses and factories singed with soot. \ \

--
http://www.wsws.org/articles/2004/dec2004/iraq-d06_prn.shtml

/ / Of course, none of the assembled media pointed to the absurdity of Bush's comments. \ \

--

http://billmon.org/archives/000172.html

/ / Bush administration official says: "Saddam never had WMDs, and we never said he did." \ \

--

/ / Goldsborough said the reason he was given after the fact is that the column, about why Jewish voters overwhelmingly cast their presidential ballots for John Kerry, was "offensive."

"The publisher said it might be offensive. To whom? \ \

--

/ / twenty-seven Israeli pilots indicated that they would no longer fly missions in the Occupied Territories (Boston Globe). The pilots said "We veteran and active duty pilots are against carrying out illegal and immoral attacks" and they "refuse to continue attacking innocent civilians." \ \

--

KILL ENEMY BUSHITE FOR OUR LIVING LOVING GOD MAN

/ / They should put dynamite in their behinds and drop them from 35,000 feet, the whole pack of scum out of that jail."

Remember, these are the same prisoners that the Red Cross estimates 70 to 90% of them were innocent and later released. \ \

--

/ / It gets worse. We already knew about the Franklin County, Ohio, precinct that tallied 4,258 votes for Bush when only 638 people had actually voted. \ \

--

See? The bushite knows that bush murdered thousands of Americans on 9/11, yet, will advocate fascism, to censor America, from finding the truth for ourselves.

That enemy of God, the demon anti-Christ told US the conflict he began, was because Saddam wouldn't let the inspectors in. While, corporate nazi whores, refused to correct ourselves on our sacrifices, for they enjoy remaining impartial, when it comes to the crimes they inflict upon our humanity. Enemies to all humanity CBC and CNN are by refusing OUR facts to speak for themselves. No betterment could be garnered, by the demon anti-Christ's war crimes against civilization, WITHOUT DOUBT. And, it's only the enemies of our dumfukked and dimmer soldiers, in corporate mind

control, who refuse to allow anyone to state THAT FACT,
for, the enemy bushite would be exposed, and America
would be hunting them down with the Law as the traitors
to freedom they clearly are.

Bush Lies to Canada

Demon bush spew "I made some decisions obviously that
some in Canada, didn't agree with. Like for example
removing Saddam Hussein, and enforcing the demands of
the UN security council."

Saddam was not found in violation of 1441, so the war
criminal anti-Christ's demands were not our world's, nor
that of the UN Security Council. How does thieving our
assets, destroying our infrastructure, and
indiscriminately murdering more than a hundred thousand
innocent people, (in turn to sacrifice more worthless
bushite nazi teens) bring about their closer fraudster
bushite "Freedom"? Again, CNN, and CBC let the demon
liar spew his hatred of our liberties, without factually
challenging his lies with our un-debatable established
truths. CNN and CBC would "sell" seeing our dimmer
youths sacrificed as bushmob thieves through blatant
bushite lies, to truly, steal our freedoms and liberty
with further murders by proxy.

/ / .. or when [bush] just told you for no reason
possible, why American soldiers are DYING, "Saddam
wouldn't let inspectors in", \ \

This should be a time when the People rise up as angels
of mercy, and hunt with Law to kill George W. Bush,
Rumsfeld, and Condoleeza Rice for the crimes committed
on 9/11. Just because the corporate T.V. doesn't
mention the facts to draw our own conclusions, doesn't
make it not so out of our realms of expertise
as Freedom's true represention.

--

This is Hockey

US general John Sattler declared: "We have liberated
the city of Fallujah."

Sattler openly lies to the lives of America with this
insult, and the bushite nazi dumfuk, is too stupid or
evil to frag him as enemy proudly for it. The People of
the world, look, see.. bushites are murderous liars,
cheats, and thieves as the enemies of America, who even
lie to THEMSELVES on how many have been sacrificed to
blood the coffers of the American pension thieving war
monger bushite 9/11 cancer. A liar nazi bushite
commander would sacrifice his nation, along with own
family, before saying a word in defence of our freedoms,
our humanity, or our God. COWARDS. American nazi
bushite commander gets killed american nazi bushite
grunts, in dreams they too, can financially profit off
the talentless continuing THEFTS for enslavement to
sacrifice themselves as fascist tyrannies. Hmmm. but
the nature of American freedom, is to be one as everyone
being equal scores. "Gee, maybe some day even you could
be Presidential."

Weak intellectually, prone to cuss, the bushite nazi
dumfuk, is a worthless piece of crap.

http://bellaciao.org/en/article.php3?id_article=4591

/ / I have the impression that there are no other words
except "fuck" and "shit". Each communication, each
order is accompanied by a flow of 'fucks', 'shits' and
'bullshits'. I look at Americans with a pity.

Among the "colored-skin" GIs "Latinos" are largest
group, then Africans and semi-Africans. The officers
are mostly whites but there are also blacks... But I
cannot understand at all, why the US Army soldiers speak
broken English!! \ \

/ / During the five days, while the count was yet
conducted, more than three thousand wounded passed
through our hospital. These were the people who lived
nearby. The people who could be delivered to us.
Nobody knows how many people in the city are dead. \ \

/ / I cannot recognize the city. Only ten days ago it
was an Iraqi town with its regular for centuries Arabic
life. Boling bazaars, noisy streets. And here I am
going through the empty dead city, between the ugly
"pyramids" of destroyed buildings, broken streets, whole
quarters wiped from the face of earth. \ \

--

old nazi tricks

/ / The Red Crescent's Falluja coordinator, Jotiar
Nafaa, estimates that between 150 and 175 families are
left in the city that once had a population of 300,000. \ \

Israeli Soldiers Going In For The Kill: A 13 year
old Palestinian JEWISH school girl is about to die

/ / "It's a little girl. She's running defensively
eastwards, a girl of about 10. She's behind the
embankment, scared to death."

"Anyone who's mobile, moving in the zone, even if
it's a three-year-old, needs to be killed.

..soldiers in the company, [...] Givati Brigade,
complained that they had been "besmirched"

The soldiers said that the commander had fired
two shots at the girl from close range as she
lay on the ground.. \ \

Will all Jews join me in calling for the public World
trial of crimes against God's Humanity, done by these
truly godless fascist nazi enemies of the Holy Jewish
faith? Or, will the anti-Jewish Ariel Sharon crowd
again, march more Jews silently to their graves,
refusing to speak for the Bible's Word that all people
are created in God's loving image?

Victimizing the innocent to steal from, is not acts
becoming of a religious person or a truly "democratic"
government.

What is Ham Radio?

Ham Radio is a technical pursuit for those who
are interested in the science of radio wave
propagation and who are also interested in the
way that their radios function. It has a long-standing
tradition of providing a source of engineers who
are born naturals.

Ham Radio awakens in its aficionados a whole-life
fascination with all things technical and gives
an all-abiding curiosity to improve one's scientific
knowledge. It's a great swimming pool, please dive in!

This excitement causes a wish to share the experience
with ones fellow man, and shows itself in the
gentlemanly traditions of Ham Radio.

Radio Hams are qualified to design, build and then
operate their own pieces of equipment. They do this
with gusto, and also repair and modify their own
equipment.

The excitement that drives a Radio Ham starts with
relatively simple technologies at first, perhaps making
his own Wimshurst machine and primary cells. Small pieces
of test equipment follow, possibly multimeters and signal
generators. Then comes receivers and transmitters. It is with
the latter that communication with like-minded technically
motivated people takes off. The scope for technical
development grows with the years
and now encompasses DSP and DDS. There is also a great deal
of excitement in the areas of computer programming to
be learnt and applied.

The technical excitement motivates Radio Hams to compete
with each other to determine who has designed and manufactured
the best-quality station. This competitiveness is found in DXing,
competitions and fox-hunts.

-----ooooo----

However, beware! A Ham Radio licence is such a
desirable thing to have that there are large
numbers of people who wish to be thought of
as Radio Hams when, in fact, they are nothing

of the kind! Usually such people are a
variation of the CB Radio hobbyist; they buy their
radios off the shelf and send them back to be
repaired; they are not interested in technical discussion
and sneer at those who are; they have no idea how
their radios work inside and have no wish to find out;
they are free with rather silly personal insults;
they have not satisfied any technical qualification
and their licences prevent the use of
self-designed-and-built equipment.

These CB types engage in the competitive activities
with their Cheque-Book-purchased off-the-shelf radios
in a forlorn effort to prove that they are Radio Hams.

No _REAL_ Radio Hams are deceived by such people!

Your troll bait is becoming boring. However, for the sake of any
newcomers who might be misled it, a slight amount of correction
needed.

Although it is unclear what a 'radio ham' is, it should be noted that
anyone canspecify, design, construct, align, test, modify, adjust,
and even own such radios without a licence.

The only licence needed is to cover 'installation' and 'operation'.

Amazing how that latter term, which you used to use as a term of
derision, has disappeared from your Gospel.

881. International Ham Radio Exam?

Newsgroup: rec.radio.amateur.misc
Date: 2005-02-17 14:11:50 UTC
From: "Airy R.Bean" <Me@privacy.net>
Message-ID: <37jn7fF5epqo1U1@individual.net>

It has been let slip that discussions are underway to investigate the possibility of an international exam for Ham Radio.

Now, it seems to me, that such discussions should not be conducted by clandestine individuals (who may deceive themselves into thinking that they are somehow important) but should be brought right out into the open.

In consideration that Ham Radio is essentially a technical pursuit (as distinct from CB Radio in its various guises, all of which are identifiable from the use of shop-bought-and-repaired rigs), what should such an exam have as its syllabus? Should such a syllabus represent the way in which Ham Radio is slowly going down the drain?.....

1. Elementary electrical circuits - R, L & C, configurations in parallel, series and evaluations of resonance thereto.
2. Elementary active devices plus Class A, B, C & D amplifiers.
3. Oscillator circuits (although we might drop "Hartley" these days!)
4. Logic gates and digital counters.
5. Computer programming in assembler.
6. Mixers and multipliers.
7. How to negotiate with a CB shop to get 10% off the purchase price.
8. How to whinge that Morse Code is irrelevant.
9. (Especially for the M3/CB Fool's Licence or the Technician/Novice licensee) - How to SWAAAAARRRR the twig?
10. How to sneer at those who promote technical excellence but without revealing one's own nugatory vacuousness?
11. The correct jargon to use, "My personal is.....", "What's your 20?", etc.

Airy R Bean - may I offer the following text document as guidance prior to tackling writing a FAQ:

Archive-name: faqs/about-faqs
Posting-Frequency: monthly
Last-modified: Aug. 8, 1995

This article is a description and primer on Frequently Asked Questions (FAQs) articles and lists.

The following topics are addressed:

1) WHAT ARE FAQs?
1.1) What does FAQ stand for?
1.2) How is FAQ pronounced?
1.3) What do FAQs contain?
1.4) What are FAQs used for?
1.5) Where are FAQs found/kept/hidden?
1.6) What was the first FAQ?

2) WRITING A FAQ
2.1) Who may write/compile a FAQ?
2.2) Why write a FAQ?
2.3) What subjects are appropriate?
2.4) How important is accuracy?
2.5) What is the format for a FAQ?
2.6) What is the maximum size of a FAQ?
2.7) What is a header and do I need one?
2.8) Additional information

3) POSTING A FAQ
3.1) How do I post/distribute my FAQ?
3.2) Where do I post/distribute my FAQ?
3.3) How often should my FAQ be posted?

4) LEGAL STUFF
4.1) Do I need to copyright my FAQ?
4.2) Do I need a disclaimer?

5) APPROVAL FOR *.ANSWERS - THE BIG TIME
5.1) Why bother getting a FAQ approved for *.answers?
5.2) How do I get my FAQ approved?
5.3) FAQ maintainers
5.4) FAQ maintainers mailing list

6) ACKNOWLEDGMENTS

1) WHAT ARE FAQs?

1.1) What does FAQ stand for?

FAQ is an acronym for Frequently Asked Questions. It is also sometimes used as the singular Frequently Asked Question (Although when was the last time you heard only one question?).

Some have called it Frequently Answered Questions as well. This isn't necessarily correct, but it isn't necessarily wrong either. It effectively has the same meaning.

A compilation of Frequently Asked Questions (and their answers) is referred to as a FAQ list or FAQ article. Sometimes the term FAQ itself is used to refer to the article - as an example, I refer to this article as a FAQ about FAQs.

The term FAQ has a meaning of its own that could almost qualify it as a word of its own. Sometimes, FAQs are full of answers. Other times they are policy statements for USENET groups, without the Question and Answer format that is popular.

FAQs fall into the realm of articles called "Periodic Postings". In addition to FAQs, other articles or compilations of information are posted and/or archived.

1.2) How is FAQ pronounced?

FAQ is pronounced three ways:
1. By pronouncing the letters individually: F - A - Q
2. As a word: fack
3. Obscenely:

The first two pronunciations are the most common, and are used about equally. Some will say F - A - Q if they are speaking with someone that really doesn't know the Internet. Those who are lazy (me for example) will use "fack", since it is easier to say. Often when initiating a conversation it is useful to say F - A - Q, and then once the subject has been established, "fack" should be sufficient.

You will notice that in this document I use the phrase "a FAQ" rather than "an FAQ". This is because most of the time I say "a fack" instead of "an F-A-Q".

Feel free to use whichever pronunciation you prefer and don't let anyone bully you. Both ways are acceptable. If you use the third way... well, you're on your own.

1.3) What do FAQs contain?

FAQs are compilations of information which are [usually] the result of certain questions constantly being asked (posted) in a newsgroup - hence the name FAQ (Frequently Asked Questions).

It seems that those who frequent USENET are a polite bunch. In my house, the "frequently asked questions" that my three rug rats come

up with are usually referred to as stupid questions or pestering. There is a lesson to be learned from this... before asking a question in a newsgroup or mailing list, make sure that you've checked out the appropriate FAQs. A frequently asked question can be a stupid question if the answer is posted right in front of your face in one or more FAQs.

Sometimes a FAQ or periodic posting is compiled as a result of extensive research on a specific subject. A convenient way to share the information with others is by posting the article. In this case, the article might not really be a FAQ - that is, it isn't necessarily based on frequently asked questions. However, the term FAQ is sometimes used as a catch all term for articles, periodic postings, compilations, etc.

It is becoming common practice to refer to some "off-line documentation" as FAQs. Yes, it's true, off-line documentation still exists, I actually saw some a little while back ;-). All sorts of stuff now comes with support-staff-written FAQs, whereas they would have been called Q&A sections before.

Many of the FAQs found on USENET or the Internet today (including mine :-) could actually be considered NSFAQBTIWTS - Not So Frequently Asked Questions, But Things I Wanted To Share (thanks to Robin Getz for this gem). I've also seen them referred to as LFAQ (Less Frequently Asked Questions). Is there no end?! Where is Chicken Man, now that we need him?

1.4) What are FAQs used for?

Before asking a question in a USENET newsgroup, check out the appropriate FAQs. If you can't find the answer to your question there, then you can post your question to the newsgroup. Frequently asked questions in a newsgroup tend to make the news hard to read. With more news traffic, there is more to sift through. Do everyone a favor, first try to find the applicable FAQs. Then read them. If you can't find them, look for them. If you still can't find them, ask where they are. Then read them.

If after reading the appropriate FAQs, you still can't find the answer to your question, then you can post your question to the appropriate newsgroup. It is recommended that after you receive your answer(s), you post a summary to the newsgroup. It might also be nice to notify the maintainer of the appropriate FAQ(s) of the answers so that they can update their articles accordingly (keep in mind that they don't always have the time to scan the newsgroups for new information).

Don't assume that the FAQ maintainer is willing or able to answer every question he or she receives. Some make every attempt possible to answer as best as they can. Others either just get too many questions to deal with, or they're busy with other things. Please

keep this in mind - it might be better to ask your question in a newsgroup.

1.5) Where are FAQs found/kept/hidden?

Please do not ask the FAQ maintainer to mail you a copy of their FAQ. They just don't have the time - believe me, I know. Instead, make every possible effort to obtain the FAQ from the standard locations described in this section (USENET newsgroups, archives, etc).

1.5.1) USENET

FAQs can be found all over the Internet. The most common place to find FAQs are in USENET newsgroups. USENET is a distributed discussion system that exists on the Internet and some other networks. Many newsgroups have a FAQ specific to the subject of the newsgroup. It is also common, in some newsgroups (that by nature cover more ground), to have a number of FAQs on different, pertinent subjects. Some FAQs that have been approved by the *.answers moderators team (more on this in section 3) appear in the various *.answers newsgroups (news.answers, comp.answers, sci.answers, etc). A quick browse through these newsgroups will turn up many interesting articles - do yourself a favor and check from time to time.

1.5.2) Mailing lists

Many mailing lists also have their own FAQs. Some mailing lists automatically mail the FAQ to the list of subscribers. Other lists send a notice advising subscribers how to get a copy. The second option seems to be the most prevalent. An important reason for this is that most FAQs are fairly large (some are even multi-part), and it wouldn't make sense to periodically mail it out to an entire mailing list. Some mailing lists automatically mail the FAQ(s) out to new subscribers (probably with the hope that this will avoid stupid questions), and then letting the subscriber retrieve updated versions of the FAQ(s) by ftp.

1.5.3) Archives

Many FAQs are also archived. One important repository of FAQs and other articles is the news.answers archive maintained by the moderators of the news.answers newsgroup. All FAQs that have been approved for posting to the news.answers newsgroup are archived at the rtfm.mit.edu ftp site (and all of the mirror sites) in the following directories:

By subject line -
/pub/usenet/news.group.name
/pub/usenet-by-group/news.group.name

By subject category -
/pub/usenet/news.answers
/pub/usenet-by-group/news.answers

and for the other *.answers newsgroups
/pub/usenet/*.answers (eg. comp.answers, sci.answers, rec.answers)
/pub/usenet-by-group/*.answers

By newsgroup hierarchy -
/pub/usenet-by-hierarchy/news/group/name

To find a FAQ by the newsgroup it belongs to, look in the directory /pub/usenet (which is the same as /pub/usenet-by-group). There you will find that each newsgroup has its own subdirectory (if applicable). As an example, if you are looking for one of my FAQs on microcontrollers, look in /pub/usenet-by-group/comp.answers/microcontroller-faq. There you will find three entries: 8051, 68ch11, and primer.

You can also search for FAQs by working your way through the newsgroup hierarchy. Look in the directory /pub/usenet-by-hierarchy and you will find a subdirectory for each newsgroup category (news, comp, rec, alt, ...). Then just keep working your way down the hierarchy by entering the appropriate subdirectory to find the FAQs that you are looking for. For example, to find my FAQs on microcontrollers, look in /pub/usenet-by-hierarchy. Go into the comp subdirectory, and then go into the answers subdirectory. All of the FAQs posted to comp.answers will be listed under this directory.

Instead of searching through the archive, many of the periodical postings on USENET are listed in the news.lists newsgroup under the heading:
"List of Periodic Informational Postings, Part * *"
These lists are archived at /pub/usenet/news.lists with the archive names:
"List_of_Periodic_Informational_Postings,_Part_*_*"

If you do not have access to anonymous ftp, you can also send e-mail to mail-server@rtfm.mit.edu to get FAQs by e-mail.

Initially, try a message with no Subject: and just the following lines in the body:
help
end

One useful command is the index command. This returns a list of the contents of a particular directory. Some examples of how to use this command are:
index
index usenet-by-group
index usenet-by-group/news.announce.newusers
index usenet-by-group/news.answers
Be warned that news.answers has a LOT of information in it. The directory listing that will be sent to you by Email will be LARGE.

1.5.4) World Wide Web

If your system has a browser for the World Wide Web, then you can access all of the USENET FAQs found in news.answers (and lots of other good stuff!) at these addresses:
http://www.faqs.org/faqs/FAQ-List.html
http://www.cs.ruu.nl/cgi-bin/faqwais
http://www.lib.ox.ac.uk/internet/news/faq/by_group.index.html
[non-functional now]

The World Wide Web uses hypertext links, contained in HTML (HyperText Markup Language) documents, to join pieces of information located either at the same or different sites. The links are in the form of URLs (uniform resource locators), a standard way of coding the location of hypertext information.

Check with your system administrator or on-line service for more information on how to access the World Wide Web.

1.5.5) Collections and Compilations on CD-ROM

This is a controversial subject among FAQ maintainers. Even my mentioning this subject puts me in danger ;-). Many FAQ maintainers (such as myself) object to the practice of some firms grabbing everything available from the USENET archives (including many copyrighted FAQs), putting it on a CD-ROM, and then selling it.

In some ways, the idea of a FAQ being distributed in a CD-ROM collection isn't necessarily evil. After all, the main idea behind writing the FAQ in the first place is to share information with others. The CD-ROM is another way to share this information. It even gives access to those who don't have access to the Internet.

On the other side of the coin, you'll find many FAQ maintainers who think that the whole idea of restricting the distribution of FAQs (theirs in particular) is misguided. That's fine - the owner of a FAQ can set whatever conditions for distribution that they want.

The basic objection to the use of FAQs without the permission of the author, is one of control over copyrighted material. The FAQ maintainer works hard at compiling and maintaining the FAQ. The issue is not one of greed, since it is clear that the FAQ maintainer wants to share with others. It just isn't fair for someone else to make a buck at it.

Some FAQ maintainers are fussy about the most recent information being available. A FAQ on a CD-ROM is out of date - PERIOD. The only place to get a FAQ, and be sure that it is up-to-date, is from the appropriate USENET group (or archive). It should be the right of the FAQ maintainer to decide what to do with the FAQ.

Finally, the practice of using copyrighted works without permission is illegal. Most FAQ maintainers have a copyright statement, along with the phrase "all rights reserved", appended to their FAQ. Therefore, the FAQ maintainer, and no one else, has the right to do whatever (s)he wishes to do with the FAQ.

If you come across such a FAQ (with the appropriate copyright statements) in a commercial collection, please notify the company you purchased it from that what they are doing is illegal. It would also be appropriate and appreciated if you would notify the author of the FAQ that his/her FAQ is illegally being sold.

Many popular magazines have advertisements for collections on CD-ROM of Internet/USENET archives. I cannot verify whether they adhere to the proper legal practices in the compilation and distribution of the contents of their collections. I'm not even sure if I (personally) agree or disagree with the practice. Please keep the FAQ maintainers' interests (and feelings) in mind.

1.6) What was the first FAQ?

Eugene Miya is usually credited with being the author of the first FAQ. Although, in his words, "I didn't do the very first FAQ, but I probably did the first one of an informational nature." His article might possibly be the first one that was called a FAQ. Eugene points out that Mark Horton kept an "18 question" periodic post. This was posted to "general", which was later called news.announce.*. It had answers to questions such as "What does 'foobar' mean?" and "What does 'unix' stand for?"

In 1982, while acting as an official NASA presence on the gatewayed ARPAnet mailing list SPACE[-Digest]/net.space news groups, he tired of seeing "dumb answers" to recurring questions. The situation as Eugene saw it was that the answers to these questions were are often poorly thought out, inconsistent, and uninformed. Furthermore, the posters of the questions often weren't trying to find the answers from books, magazines, or other references. They also weren't paying attention to previous answers to these same questions. Rather, they were just taking the easy way out - email the question and wait for the answer.

Eugene therefore decided to start a series of monthly posts in 1983 to rectify this sorry state of affairs. The mechanism of periodic postings was also a way to provide information to those who didn't have access to the archives.

The first posts included the addresses of NASA Centers, some basic references, etc. He also had a yearly posting trying to attract summer hires for the various NASA centers. All of these are still being posted, albeit by someone else now.

2) WRITING A FAQ

2.1) Who may write/compile a FAQ?

Anyone - no rule exists about who may or may not compile/write a FAQ. If there is a need for the information contained, your FAQ will be appreciated.

2.2) Why write a FAQ?

The Internet (and USENET) is frequently referred to as the Information SuperHighway. You can argue the merits of this analogy, but you can't deny that there's lots of stuff out there. The big problem is finding it - and I mean BIG PROBLEM. It might be more accurate to refer to the Internet as "the large, multi-storied, over-crowded, Information Parking Lot." And the attendant is away!

One thing that I've discovered in the short time that I've been on the Internet, is the willingness of those who frequent USENET to help others find their way around this great big wonderful mess. A FAQ is a good way to help lots of good folks at the same time. The first FAQ that I wrote was as a result of my search for information on Intel 8051 microcontrollers. I couldn't find anything for a long time. I used Archie, Gopher, and lots of other methods that I either read about or that friends recommended. In addition, I scanned the appropriate newsgroups. However, all that I could find were the same questions that I was asking. I nearly came to the conclusion that the Internet was a waste of time.

After compiling a few facts, I put them together in a small article (under 5K) and posted it to a few USENET newsgroups that seemed to have a reasonable connection to the subject matter. In a short time I was inundated with Email. Readers of my FAQ from all over the world sent additions and corrections for the FAQ, requests to post to other newsgroups, kind words of appreciation, offers of free software and literature, and even a job offer. Today the FAQ is over 100K in size and two other FAQs were born from the leftovers from this first FAQ.

As a result of this modest effort, I have learned a lot. I have more than enough information about the 8051 microcontroller, I learned my way around the Internet, and I have made connections with a number of really nice people. Even more, my FAQ had a snowballing affect. Several other people are now either maintaining or starting FAQs on other microcontrollers. In a short time, if a newcomer to the Internet is looking for information on microcontrollers, a pile of information will be immediately available, without the need for months of searching. Hopefully, the same will be true about the subject(s) that you are interested in.

2.3) What subjects are appropriate?

Just about anything. If you see the same questions always popping up in your favorite newsgroups, a FAQ might be needed. Check first if a FAQ exists, by looking in the USENET archives and by asking in the newsgroup is such a FAQ exists. If there is no FAQ, and you know the answers (or at least a good number of them), do yourself and everyone else a favor. Compile the questions and answers together in an article, and post it regularly to the newsgroup.

Just as important, make sure that your FAQ is made available to the right audience. This means carefully choosing which newsgroups to post it to. Often, requests from other newsgroups will inform you

that others are also interested in your FAQ.

2.4) How important is accuracy?

If you are maintaining a listing of all of the Gilligan's Island episodes (yeah, there is such a FAQ, and it's great!), the chances of causing serious damage to someone are pretty slim.

However, as a purely hypothetical example:
- if you are maintaining a FAQ on the Pentium processor
- you claim that the Pentium is 100% accurate and bug-free
- someone reads your FAQ, bases a project on this information, and encounters a bug that has terrible consequences
- at the least, you will be considered vermin by your dear reader
- at the worst, you might find yourself being sued by same

Some FAQs are in the business of sharing information about different products. This can be a bit touchy when trying to convey quality or usability. Care should be taken when relying on opinions (even, or especially, your own) or hearsay. Try to check out the details the best that you can. You might consider stating if an item is opinion or fact (whatever that is). Be open for suggestions. The inclusion of a disclaimer might be called for, although it really shouldn't be necessary (see section 4.2).

2.5) What is the required format and style for a FAQ?

No format is required. You are free to be as creative as you wish. Keep in mind however, that the FAQ should be readable. Don't just cobble together a document that has no organization or flow.

One common practice is to organize the FAQ as questions and answers, much like this article itself. This fits in well with the name Frequently Asked/Answered Questions. In other cases, it may make more sense to organize your FAQ as a reference. That is, lots of answers without the questions being stated (asked) specifically. Some FAQs can use both of these techniques in the same document. One part of the article can be in question/answer format, while the rest can be a reference.

It is highly recommended that you establish a consistent and easy to read format. For this document I chose to use a hierarchical numbering system, but you may prefer another method (e.g. Roman numeral, Capital letter, number, small letter). Indenting the text also makes it easier to read the document (Ask just about any graphics artist, and they will tell you that white space is important). If you prefer a particular formatting technique, by all means use it. Just please keep in mind that everyone will get more out of your efforts if the result can be easily read.

In addition, a FAQ can be in straight ASCII, or in several other special formats. I prefer using straight ASCII since it is more easily accessible to a larger number of users.

One proposed format is "FAQs: A Suggested Minimal Digest Format".
This article is posted periodically to:
news.admin.misc, news.software.readers, news.answers
The author is:
clewis@ferret.ocunix.on.ca (Chris Lewis)
This article is also archived as:
faqs/minimal-digest-format

Another format is the html document standard for use on the World Wide Web (WWW). This is becoming a popular way to "publish" information, however there are some disadvantages:
- HTML is NOT an easy-to-understand language
- not everyone has access to the Web

It is becoming common practice to maintain two versions of a FAQ. One is in straight ASCII and is posted to the appropriate USENET newsgroups. The other version is in html and is made available on a web site, giving the reader easy and instant access to the various site links contained in the FAQ.

Grammar and spelling are also important. Poor grammar can cause ambiguities and make it difficult for the reader to understand what you're trying to say. Spelling mistakes are distracting, and can also create confusion. Although it isn't necessary to work towards a doctorate in English literature, take a few moments to review your work and clean it up.

2.6) What is the maximum size of a FAQ?

FAQs have no size limit, although sometimes a system may impose certain restrictions - 64K is always a magic number. I've also seen 100K used as a limit. In addition to system limits, FAQs that are very large (over 64K) might be difficult to handle. You might consider splitting your FAQ up into pieces, with each piece having its own theme.

Many old USENET sites will not accept articles over 64k. Some on-line services have smaller limits (32k for America Online). FAQ maintainers have to make a trade-off between the universality that they wish their FAQ to achieve, and the convenience of one large article as opposed to several smaller articles.

The trend seems to be towards keeping FAQs in one piece, no matter how large they get. I recently asked the readers of my microcontroller FAQs if they wanted the FAQs split into multiple parts or kept in one piece. Even though two of the FAQs are over 100K, and the third is approaching 100K, the results were unanimously for keeping each of the FAQs intact and in one piece. The convenience of not having to juggle different pieces of the document (both for the author/maintainer and for the reader) outweighs the inconvenience of an occasional newsreader program that can't handle large articles. Also, most on-line services are in the process of removing size restrictions, making the size of the FAQ more dependent

on personal taste, and less on "technology" (or the lack thereof).

2.7) What is a header and do I need one?

A header contains descriptive information about your posting. If you post your FAQ by means of a newsreader, a [minimal] header will be supplied automatically. This header is required by the posting mechanism.

Providing additional header information isn't really crucial unless there is a specific need (such as providing a version number). If you are considering submitting your FAQ for *.answers approval, certain header information is required. See section 5 for more details about this. If you aren't worried about approval for now, then you don't need to worry about the header either.

2.8) Additional information

There are several additional sources of information on FAQs and FAQ writing.

David Alex Lamb's "FAQ maintenance aids":
http://www.qucis.queensu.ca/FAQs/FAQaid/

Infinite Ink's (Nancy McGough) "Finding and Writing FAQs and Periodic Postings":
Finding FAQs:
primary - www.ii.com/internet/faqs/
mirror - http://ii.best.vwh.net/internet/faqs.html

Writing FAQs:
primary - www.ii.com/internet/faqs/writing/
mirror - www.best.com/~ii/internet/faqs/writing/

The bible for getting your FAQ approved by the news.answers team is the *.answers guideline. This document has been recently revised by Pamela Greene (one of the news.answers moderators) and is posted monthly to news.answers. See section 5.2 for more information on getting this document and having your FAQ approved.

Eugene Miya has an article "FAQ on FAQs n.g.FAQ" posted to:
news.groups (hint: the n.g. is short for news.groups).

3) POSTING/DISTRIBUTING A FAQ

3) POSTING A FAQ

5.1) Why bother getting a FAQ approved for *.answers?
5.2) How do I get my FAQ approved?
5.3) FAQ maintainers
5.4) FAQ maintainers mailing list

6) ACKNOWLEDGMENTS

3) POSTING/DISTRIBUTING A FAQ

3.1) How do I post/distribute my FAQ?

If you only need to post your FAQ to one or two USENET newsgroups (or mailing lists), then you can just manually post it whenever the posting date rolls around. It is also possible to cross post it to several groups at once. Check with your system administrator for more details on how to do this.

Some sites don't keep their news around for a long time, so your posting might disappear from those location sooner than you planned. For this reason, and to allow general access to your FAQ, it is a good idea to archive it somewhere if possible. This might be on a friendly ftp site that agrees to keep the current copy available for ftp'ing, on a mail server, or on your own system (as long as others have some sort of access).

If your FAQ is to be posted to a large number of newsgroups, then it might be a good idea to take advantage of the faq-server set up by the *.answers team. The faq-server can be used to automatically post any periodic posting that is first approved by the *.answers team. It allows automatic posting at set intervals to as many newsgroups as required. A big advantage of using the faq-server is that it is quick, easy, and automatic. Check with the *.answers team for more details on this.

3.2) Where do I post/distribute my FAQ?

Among the many places that you might choose to post or distribute your FAQ:
- USENET newsgroups
- Commercial on-line services (Compuserve, America On Line, BIX, Prodigy, etc)
- Bulletin Board Systems (BBS)
- manufacturers' literature (I have given my permission to several major corporations to include portions of my microcontroller FAQs in various product/technical documents.)
- published works (many authors or publishers like to include portions of the appropriate FAQs in their works, this gives the reader an easy way to find more information on the subject)
- a number of FAQs (as well as other articles that started out as information guides on USENET) are now being made available in print (these range from full-blown works issued by major publishers, to simple pamphlets printed privately)

3.3) How often do I post/distribute my FAQ?

Posting your FAQ once a month should be sufficient. In some special circumstances, you might need to post your FAQ twice a month to keep it available in the newsgroup. Adding an expiration date in the header also helps keep it from being purged too soon. This doesn't always work, since your local system determines when the articles will be purged, and this doesn't always coincide with the expiration date.

4) LEGAL STUFF

4.1) Do I need to copyright my FAQ?

If you invest a lot of time on your FAQ, and most FAQ maintainers do, you might be concerned about protecting your work. Under the Berne Convention (to which the vast majority of "Western" nations are signatories), as soon as something is published, then the writer/producer of the item is held to own the copyright. You can add (C) copyright 1995 if you want, but it is no longer necessary (sort of like chicken soup, doesn't necessarily help, but it couldn't hurt).

Protecting your work with a copyright protects your rights if someone else decides to steal your work and make a buck from it. As mentioned above in section 1.5.5, it is very common for companies to compile information from the Internet, put it on a CD-ROM, and sell it. While copyright protection won't prevent this from happening, it at least makes it illegal and gives you legal recourse if you need.

Check the copyright FAQ for further details. If it is important enough, you should consult with a lawyer experienced in copyright law.

4.2) Do I need a disclaimer?

In this "sue the pants off of anyone that looks at me cross-eyed" world that we live in today, many FAQ maintainers are using disclaimers to protect against possible law suits. If your FAQ contains information that might be used in sensitive applications, and if something were to go terribly (and tragically) wrong, do you think that you would be sued? Does a bear defecate in the woods? See section 2.4 (How important is accuracy?) for more information on this subject.

I'm not a lawyer, so I won't attempt to give definitive advice here (yes, this is a disclaimer), but something such as the following might help cover your tush. Whether it in fact really helps or not, I don't know.

This article is provided as is without any express or implied warranties. While every effort has been taken to ensure the accuracy of the information contained in this article, the author/maintainer/contributors assume(s) no

responsibility for errors or omissions, or for damages resulting from the use of the information contained herein.

Another common disclaimer (that you have more than likely already encountered), is that used to disclaim any connection between the author's opinions and those of their employer. If your article is in anyway related to what you do for a living, and if there might be a conflict of interest, it might be worthwhile to include something like this:

The contents of this article reflect my opinions only and not necessarily those of my employer.

5) APPROVAL FOR *.ANSWERS - THE BIG TIME

5.1) Why bother getting a FAQ approved for news.answers?

When your FAQ is approved for posting to one or more of the *.answers newsgroups (news.answers, comp.answers, sci.answers, etc), it is brought to the attention of those who might not be regular readers of the newsgroup(s) that you usually post your FAQ to. This means that a larger potential audience gets a chance to know about your hard work.

One of the major reasons for getting your FAQ approved by the news.answers team, is that a FAQ that is posted to one of the *.answers newsgroups is automatically archived. This is important since some sites purge old postings more frequently due to lack of space. The archive makes your FAQ available anytime someone wishes to ftp it from rtfm.mit.edu (the archive site) or any of its mirrors.

Another important reason to get your FAQ approved, is that you can then use the faq-server to automatically post to whichever newsgroups you want.

Last, and least or most (depending on your personality), there is always the fame and glory associated with being a FAQ maintainer. Once your FAQ becomes widely read and distributed, you will be amazed at how many times your name will be mentioned in postings or other articles.

5.2) How do I get my FAQ approved?

In order to get a FAQ approved for posting to news.answers, you need to submit your FAQ to the *.answers team. For a detailed explanation of what you need to do to make your FAQ *.answers compliant, read the *.answers guideline. Check in news.answers to see if it is posted there under the heading "news.answers submission guidelines". If the document isn't currently available at your site, send a mail message to mail-server@rtfm.mit.edu with the command "send usenet/news.answers/news-answers/guidelines" (without the quotes) in its body. You can of course ftp the document from the same place.

Getting a FAQ approved is easy and doesn't require much on your part.
The most important consideration for approval is a proper header. A
minimal example follows:

From: russ@silicom.co.il (Russ Hersch)
Newsgroups:
comp.robotics,comp.realtime,sci.electronics,comp.answers,sci.answers,news.answers
Subject: 68hc11 microcontroller FAQ
Followup-To: poster
Approved: news-answers-request@MIT.EDU
Summary: This article is a collection of information sources on
the Motorola 68hc11 line of microcontrollers.

Archive-name: microcontroller-faq/68hc11
Posting-Frequency: monthly

This is a real live header taken from one of my FAQs. Another
example would be the header to the FAQ you are currently reading.
The news.answers guideline document clearly explains the purpose of
each line of the header. To make things simple, you can just take
the above example and adapt it for your FAQ. Just a few cautions:
- All of the fields in the above header are required and all must
be included. There are additional, optional fields which may be
included if you want to take the time to figure out what they're
used for. Personally, I'm too lazy.
- The Newsgroups line must have one space after the colon. All of
the newsgroups must be listed on one line with no spaces or
extraneous characters (which is why the Newsgroups line seems to
fall off the edge of this document - it is not a mistake).
- Followup-To must specify either "poster" (which directs followups
back to the author of the FAQ) as done above or the home
newsgroup of the FAQ (which directs followups to the newsgroup).
Do not forget this field since responses then might be directed
to the news.answers team, and they will not be very happy about
that. Do NOT put an E-mail address in the "Followup-To:" field.
- *** IMPORTANT *** The Approved heading is ONLY used when your
FAQ is actually approved. When you are notified by the
news.answers team that your FAQ has been accepted, then you may
add this line to your header. DO NOT include this field until
your FAQ is approved, or you will find yourself in deep doo-doo.
- For a multi-line summary, the second line of the Summary field
should start with at least one space.
- One blank line should appear before the Archive-name line.
- Archive-name should be fairly descriptive but short. If you
aren't sure about this, take your best shot at it and the
*.answers team will adjust it if necessary.

Once you've added the appropriate header to your FAQ, you can submit
it to the news.answers moderators for approval. Send it to the
following address: news-answers@mit.edu. Don't expect an immediate
answer as these guys are REALLY busy. They will send you back a
letter indicating if your FAQ has been approved, and if not, what

needs to be done to get it in order.

If you have any questions, don't be embarrassed to ask the news.answers moderators, that's what they're there for. Most of the time the problem is simpler than you think. As you gain more experience, things will become clearer. Send your questions to: news-answers-request@mit.edu.

To get your FAQ approved for posting to *.answers, you need to do the following:
1. Get (as described above) the "news.answers submission guidelines" article before you do anything. This is a good reference document which discusses many details that I chose not to delve into.
2. Make sure your FAQ is accurate. If you've already been posting it, then your readers have probably already helped you out on this. If you prefer, you can begin by posting the article marked as "DRAFT" a couple of times, to get feedback - then submit it for approval.
3. Make sure that your FAQ is organized so that the material is easily accessible to the reader.
4. Similarly, make sure your FAQ is formatted nicely (proper margins and indentation). This really helps when trying to read it.
5. Prepare a header (as described above) to add to the beginning of your FAQ.
6. Submit your FAQ for approval.
The address for submitting your article:
news-answers@mit.edu - ONLY for submissions (no questions!)
The address for requesting information and for asking questions about the process:
news-answers-request@mit.edu (questions and requests for help)
7. Please be patient and don't ask the moderators about the status of your submission. They are very busy and are not able to deal with "nuisance" mail. Use your judgement - if your teenage daughter was in Kindergarten when you submitted the article, then you might be justified in sending them a note. If she was only in fourth grade, think twice.

5.3) FAQ maintainers

Once your FAQ is approved, you are now included in the fraternity of elite individuals known as FAQ maintainers (FAQers might not be the best term for obvious reasons). Pass out cigars, throw a party, have a beer, and write and tell Mom about it.

So what now? Well, you should prepare yourself for Email. Possibly lots of it. You've now become a "personality" on the Internet (as Jonathan Horen, a good friend of mine put it), and an "authority" on the subject that your FAQ covers (whether you really are or not). You will more than likely become a central address for those who have questions about the topic that you've addressed in your FAQ. Enjoy

yourself - you will end up "meeting" a lot of very nice people from all over the world. These new friends of yours will help you keep your FAQ up-to-date. Everyone will benefit.

It is very likely that you will find yourself very busy maintaining your FAQ. Some FAQs require a lot of attention. Others, once they hit their maturity, just sort of coast for a while. My microcontroller FAQs keep me pretty busy and often keep me from working with the very microcontrollers that I originally set out to do. Since I'm still learning a lot about the subject, I don't mind this too much. However, I would like to apply what I'm learning and actually accomplish something. I wouldn't want anyone to say (to paraphrase an old saying), "Those who can do, those who can't write the FAQ."

5.4) FAQ maintainers mailing list

As a FAQ maintainer, you might want to consider joining the faq-maintainers mailing list. This is used for discussing issues related to the *.answers newsgroups and the maintenance of FAQs. There is also a faq-maintainers-announce list, which is used only for announcements. Subscribers to the faq-maintainers list automatically receive messages sent to faq-maintainers-announce.

Traffic on the faq-maintainers list is sporadic and the topics eclectic. Sometimes I feel that this mailing list is really useful, other times I have no use for it whatsoever. Lately, the traffic has been heavy and the topics varied, some interesting and some not so interesting (in my opinion). Try it out for yourself and see if you get anything out of it. You can always terminate your subscription if you don't find it useful (don't try asking for your money back though :-).

You may send a subscription request for either one of these lists whenever you want. Please send an Email request to faq-maintainers-request@rtfm.mit.edu with a short message in the body specifying which list you would like to subscribe to.

The faq-maintainers list is not restricted to only those who have [approved] FAQs that are posted to news.answers. Anyone who is interested in the fine points of FAQ writing/maintaining is invited to participate in the discussions. If you are considering putting a FAQ together, even if you don't intend on getting it approved, the faq-maintainers list is a valuable source of information, and a good place to ask questions.

6) ACKNOWLEDGMENTS

I would like to thank the following individuals who have helped and contributed to this document:
Jonathan Horen (a real personality in his own right) for his brilliant technical support and who has finally stopped calling me a Techno-Wimp just because I don't know UNIX

Pamela Greene, Ping Huang (a true gentleman and a scholar), Thomas Koenig, Aliza Panitz, and the rest of the news.answers moderation team for their valuable help in getting my various FAQs approved for news.answers and for providing important suggestions to this document
Mark Moraes (the news.announce.newusers moderator) for his valuable contributions and continuing support
The subscribers to the FAQ Maintainers mailing list who from time to time provide valuable insight and who are always there when help is needed
Mark Israel (the maintainer of the alt.usage.english FAQ) who pointed out a lot of errors a long time ago that I finally got around to fixing a short time ago!
Carl Aude for his suggestions about copyrights.
You, my readers for your support and encouragement, I'm glad I was able to help
My three rug rats (son Menachem, and daughters Michal and Edya) for your "Frequently Asked (stupid?) Questions" :-)

Special thanks to my Mom and Dad (Gloria and Morton Hersch) who never hear from me because I'm always busy with my FAQs. I'm writing a FAQ about myself to send to them, so they'll know what I'm up to.

I disclaim everything. The contents of this article might be totally inaccurate, inappropriate, misguided, or otherwise perverse - except for my name (you can probably trust me on that).

Because he gave you a link to look at where you could learn all about IRLP.
I'm sure those majority in here that do know what it is, or those that know
how to use Google rather than just ask, don't really want a long winded
explanation posted here just to educate 1 person.....

If you don't know how to follow a hyperlink then please say so and we will
endeavour to provide adequate education to meet your needs, otherwise may I
suggest you follow the link given or, if you already knew the answer, stop
being a troll and run along...

Don't you ever change the record, amateur radio is what you make it, it's only a hobby, if you spent less time moaning and more time in the shack working the bands and actually putting into practice some of your bullshit you may find out what this hobby is all about.

> hof to fix it?

This is often caused by leaky or dried-out electrolytic surface-
mount capacitors on the display PC board. Repairing it requires two
10uF/16V surface-mount caps, the proper desolder/resolder equipment, and
the skill to use it.

The detailed service manual, covering all Spectra models, is
Motorola part number 68-80102W61, current list price of $40.45.
Considering that the thing comes in a two-inch thick binder, and is
nearly the size of a small phone book, that strikes me as a pretty
decent deal.

I would also strongly recommend that you get the basic VHF service
manual as well: 68-81070C95, current list price of $24.75. It contains
interconnection and accessory information not found in the detail book.

Both manuals can be readily ordered from Motorola at 1-800-422-
4210.

> The Spectra Model Number is: DA7KX+067W (VHF)

FYI: That's not a valid Motorola model number. That is, in fact,
the FCC ID of your radio. Motorola had a problem with their model/serial
labels during the time the Spectras were still in production, in which
the radio's actual model number and the FCC ID were transposed.

The actual model number will likely look something like this:
D43FWA7JA7AK, or some similar appearing string.

If you decide that you do not want to do the repair yourself, or
if you lack the equipment to do so, I can do it at rates considerably
lower than most commercial shops. Visit my web site for details:

http://www.bluefeathertech.com/rf.html

I hope that helps.

<snippety>

> I assume you mean the two caps to the right of the IC 9315XB ... ?

That would be them, yes. Those are the two key suspects for an
awful lot of problems, including the tone you describe and dim or no
display.

> I can see that D43KXA7JA7BK is printed on the label at the back of the
> radio, as the ID No.

That's more like it. What you have there is a 35-40 watt output
unit, dash-mount, secure-capable (with the appropriate daughterboard,
encryption hybrid, key variable loader, and cable), 128-mode (channel)
capable. The 'A7' towards the end indicates the control head type, in
this case a full-keypad unit.

Such radios rarely have trouble covering the amateur 2m band in
its entirety, no matter if they're Range 1 or Range 2 units.

Happy fixing.

Since you insist on injecting yourself into this conversation, would
you mind at all using the correct Usenet international relay codes?

73,

Lloyd

sort of correct.
but thanks the certain organisations..and a bunch of lazy people it
no longer exists.
it has however been replaced by multi-band cb radio

Fine, so it's a technical hobby that requires some aptitude and an interest in one or more facets of the hobby/technical pursuit. I may be more towards to the technical side of the hobby and have an interest in restoration of old boatanchors but there are many other areas of interest. If a licensed amateur is interested in contesting/collecting squares, ragchewing, homebrewing raynet or even trying something new why not just let them get on with it. Garath has a bad attitude mainly directed at anyone without a Morse test, more a case of "I spent 10 long years learning the code, it was hard work so why should they get HF by just passing the RAE." Morse is a fantastic mode for DX and weak signal working breaking down the language barrier and allowing for very simple homebrew but is not a suitable or appropriate qualification for access to HF (the requirement for Morse was due to the shared bands to enable the primary user the facility to tell us to QSY, no longer necessary). We all have our personal views regarding the qualifications that should be required, usually the skill level of the individual expressing the view, in your case Walt probably 30 wpm+. My view is that a higher level of RAE pass mark should be required but that again is just a personal view. Don't deride the amateurs, deride the system if need be but blind insults towards a licence "CLASS" are out of order and to coin a phrase from Garth are not in keeping with the gentlemanly traditions of amateur radio.

A little known fact is that you can obtain your IARL free of charge, if you appear in person and make application at the U.N. Telecommunications Office in NYC.

Perhaps not, but it was very effective in keeping CB-ers and other
feckless yobs off the HF bands.

Are they good, bad, hard to understand, etc?

Does anyone here even have an Alinco rig with the board in it? When you use digital mode to work someone with a similarly equipped rig, how is it? Garbly? Not too bad, ???

Eham.net lists only three comments, and none of them are flattering, but they don't specify why they disliked it, just that they did.

(or is it that these things are so rare, almost none were sold? Someone must be buying them, there are no EJ-40U units to be had in any store that I can find.)

So, if you have some first hand experience with these things, please drop a note here.

Thanks for reading,
Pat

Every so often, (about twice a year) the USPacket web site is overhauled and re-done whether it needs it or not.

This time around the overhaul included new articles, new forums, and more tutorials as well as a more accessable layout.

USPacket is dedicated to supporting digital amateur radio networking in the United States of America. If you are interested in learning about and participating in the US packet radio network, this is the place for you!

Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, ARRL Web Page, K1XN & GoList, KA3QLF, NG3K, W3UR & The Daily DX, N4AA & QRZ DX, W4WX, K5LBU, NA5U, K8YSE, 9K2HN, DK7LX, DL1EK & The DX News Letter, DL0PAF, F5CWU & La Gazette du DX, F5NQL & UFT, G3SWH, I1JQJ/IK1ADH & 425 DX News, I1HYW, IZ8BRI, IZ8CCW, JA1BK, J6KVR & JA-IOTA Islands News, JE2EHP, LU7EH, M5AAV, OE3EPW, VA3RJ & ICPO, VE7SV and VK3DYL for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 13th/February, through Sunday, 20th/February there were 228 countries active. Countries available: 1S, 3B8, 3B9, 3D2, 3D2/r, 3DA, 3V, 3W, 4J, 4L, 4S, 4X, 5B, 5N, 5R, 5T, 5V, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A6, A7, A9, AP, BV, BY, C3, C6, CE, CE0A, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J2, J5, J6, J7, J8, JA, JD/m, JD/o, JT, JW, K, KH0, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S5, S7, S9, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T32, T5, T7, T9, TA, TF, TG, TI, TI9, TJ, TK, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK0M, VK9L, VK9N, VK9X, VP2E, VP2M, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZK1/s, ZK3, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

NEWS FLASH (Possible New One!). Members of the American Samoa Amateur Radio Association (ASARA) have announced a DXpedition to Swains Island (IOTA OC-200) to take place March 2-6th. Operators will be Kan/JA1BK, John/K1ER/KH6, Tet/JH1JGX/AH7C, Yuichi/JR2KDN, Paul/F6EXV, Jim/N9TK and

Burt/W0MY (ex-W0RLX). The callsign will be KH8SI. Activity will be on 160-10 meters on the usual DX and IOTA frequencies. Modes will be CW, SSB and RTTY. Pilot base stations are: AH8LG, WA2MOE, JE2EHP and KH6BZF. QSL Manager will be VE3HO. The DXpedition's support team is: Yaesu, Steppir, JH1BUO and WD4NGB. The original ASARA project team members; JA1BK, AH8LG, K1ER, KH6BZF, K5FUV, W1RU, WA2MOE and AH7C, believe Swain Island, a privately owned island which is part of American Samoa, has a sufficient distance from Tutuila (where Pago Pago is located) to qualify as a new DXCC entity - per the original DXCC2000 Criteria. They also believe the island falls into the same category as Chesterfield, Ducie, and the Australes and Marquesas. The American Samoa's Amateur Radio Association had applied for membership in the IARU under Article II, paragraph 2. of the IARU Constitution, which states, "There shall be only one Member-Society representing a country or separate territory." American Samoa, is in fact, a separate territory of the United States, and is thus eligible. However, the ARRL Board of Directors in January 2004 removed paragraph 1.c) from the DXCC criteria for determining a DXCC Entity. This provision, implemented in 1998 as part of the DXCC 2000 Program, had provided that "An Entity will be added to the DXCC List as a Political Entity if it ...has a separate IARU Member Society."
For more details, maps and pictures, we "highly" suggest that DXers visit the following Web page: http://www.swains-island.org/
We also recommend you read the section under "The Rough Road to IARU".

3DA, SWAZILAND (Update). Frosty, K5LBU, reports that he is still looking for anyone who would like to join with him on another trip to Swaziland. He plans on arriving on the 8th of July at Johannesburg. Daniel, ZS6JR, will meet him there, and along with anyone else who would like to be a part of this trip. The 9th and 10 will be the weekend of the IARU Contest. If 6 more operators will join him, they will be able to put up 2 stations (one on CW and one on SSB). There is also a great demand for 6 meter signals from there. The only thing a person would need to bring is their paddle as there are 2 HF rigs there (one is a MP1000 the other is a IC765). There are 2 amplifiers (a TL922 and a Tokyo High Power HL1K). Also, there are beams and vertical antennas, even one for 160 and 80 meters. The cost for the land part is 225.00 USD per day which covers the transportation from the airport and back, 3 meals a day and your room. They will leave Johannesburg on the 18th of July, so this is a 10 day trip. Frosty will be in Visalia with Andre, ZS6WPX, if you would like to talk to him about the trip. His E-mail address is: frosty1@pdq.net
His Web pages are: http://www.k5lbu.com http://www.dxsafari.com

3Y0X, PETER I ISLAND (Op Postponed until 2006!). The following press release was sent out February 27th by Team co-leaders Ralph Fedor/K0IR and Bob Allphin/K4UEE: "PRESS RELEASE #14 - I am afraid we have bad news. At 1 AM local time today we learned that our charter vessel, the Cavendish Sea, had not yet sailed from the port of Comodoro Rivadavia. The Cavendish Sea was to sail to Ushuaia to pick up the Dxpedtion team and their equipment on Friday, Feb 18th. We were to sail before noon.
Because they have delayed their arrival until Sunday, and with a projected Monday departure, we have simply run out time. This latest delay on top of

numerous previous delays, simply makes it impossible for us to spend a sufficient amount of time on Peter I to justify the DXpedition this year. So, we have no choice but to postpone the DXpedition until 2006. We believe it is essential to allow enough time on Peter I to justify the monetary investment made by the team members, our sponsors, individual contributors, DX Clubs, DX Foundations.
After having the first vessel, the Antarctic Dream, default on their contract with us, then the helicopter company default on their contract and then after putting everything back together with an new boat and helicopter on this past Tuesday, the team has been on quite an emotional rollercoaster. Our sincerest thanks to everyone for the encouragement and support you offered us during this time....." Thanks, Bob Allphin, K4UEE Ralph Fedor, K0IR

5T0, MAURITANIA. Operators Phil/G3SWH, Jim/G3RTE, Jean/ON8RA, Harry/ON4HVO and Nicolas/5T5SN will be active as 5T0CW from Nuachachott, between February 24th and March 4th. Activity will be on CW and SSB on all bands 160-6 meters. Propagation permitting, they plan to have at least one station on the air on a 24 hours a day basis. QSL via G3SWH, either direct with SAE and return postage, via E-mail for a bureau reply or via the bureau. Phil's E-mail address is: phil@g3swh.demon.co.uk

9K44, KUWAIT (Special Event). Every year on February 25-26th, the state of Kuwait celebrates its "National and Liberation Day". The Kuwait Amateur Radio Society (KARS) will celebrate this occasion by using the special callsign 9K44NLD. Operation will be from KARS's HQs. Contacts may be conducted on any amateur band and on any mode. The event will start at 0000z on February 25th and will end at 2359z on Monday, February 28th. Special QSL cards will be issued. QSL via 9K2RR: Faisal Al-Ajmi, P.O.BOX 1124, 80000 AL-FARWANIA, KUWAIT.

ANTARCTICA NEWS.....
The 2nd ANTARCTIC ACTIVITY WEEK will start this week and will take place between February 21-27th. Details and a list of stations to be active are available at: http://www.ddxc.net/wap

Bhagwathi, VU3BPZ, is now active from Maiti Base (WAP IND-03). Listen for him between 1830-1930z on 14150 kHz.

W.A.P. Antarctic News and Bulletins are available on the WAP Web site at: http://www.ddxc.net/wap/boll_anno.php

C6, BAHAMAS. Dave, G4WFQ, will be active as C6AWF from Treasure Cay, Abaco Island (NA-080), April 15-29th. Activity will be on 80-10 meters, including the WARC bands, mostly CW and RTTY, with some SSB. Online logs and a log upload to LoTW will be available after the operation. QSL via G3SWH, direct or by the bureau.

CORRECTIONS TO OPDX.697. We have a few corrections to report in last week's bulletin. Under the three headings "9Y4, TRINDADE AND TOBAGO" the correct spelling for the header should have been "9Y4, TRINIDAD AND TOBAGO". Also, under the heading "P4, ARUBA", John's, KK9A, correct QSL

route for his P40A contest operations is WD9DZV (not WD9DZU as listed).

IOTA NEWS.....
EU-042. Georg, DK7LX, will be active as DK7LX/P from Pellworm Island, March 6-10th (possibly longer). Activity will be mainly on 80/40/30/20 on CW, possibly some SSB too. He will be looking for NA on 80/40 meters during the evenings. He hopes to have picture QSLs available as soon as possible after his return back home. QSL via the bureau is "OK" or direct. If you QSL direct, please use 1 USD for EU and 2 USD for outside EU. If sending IRCs, please make sure to use "NEW" IRCs only.

NA-062. Bodo, DL3OCH, will be active as W4/DL3OCH from Key West (USI FL-040S, Monroe County), Florida, between February 25th and March 6th. Activity will be on 40-10 meters CW only. Bodo also hopes to activate some other Florida islands during his stay. QSL via his home callsign, direct or by the bureau.

OC-220. Operators Peter/VK3QI, Keith/VK3FT, Jack/VK3WWW and Max/VK3WT are expected to activate the South Australia West Group, St. Peter Island, Nuyts Archipelago, commencing early Thursday, April 7th and concluding at 2100z Monday, April 11th. This will be a special event commemorating the 350th anniversary of the death of Pieter Nuyts, the Dutch East India Company man and sometime explorer, who died in 1655. St. Peter Island is part of a closely protected Conservation Park and also part of a greater Ecological Restoration of Endangered Species Program by South Australia Parks and Wildlife. A permit has been obtained for 4 operators to land and operate for a limited period. Operating dates/times are dependant on weather conditions which can be unpredictable at any time of the year. Activity will be on CW/SSB on the usual IOTA frequencies. Emphasis will be on 30 and 40 meters CW and 20, 17 and 15 meters SSB. A special commemorative callsign has been applied for, and they are particularly interested in having contacts with as many Dutch stations as possible. QSL via VK3QI, direct (any callbook) or via VK3 QSL bureau.

KH6, HAWAII. Yoshi, JE2EHP, will be active as K1HP/KH6 from Oahu between March 25-28th. Activity will be on 80-6 meters CW/SSB. QSL via the Bureau to JE2EHP.

KP1/KP5 - PROJECT NEWS. The following was received from Mike, NA5U:
"DXers, contesters, and other interested hams,
The KP1/5 Project Team in conjunction with the Lone Star DX Association wants to let you know that the effort to gain access to Navassa and Desecheo Islands has begun again. You will recall that Representative Nick Rahall(D-W.Va.) introduced H.R. 5361 in the 108th Congress. The bill has now been introduced in the 109th Congress and its number is H.R. 298. Fortunately, it is again a bipartisan bill with co-sponsorship by Representative Richard Pombo (R-Calif.). This bill requires the U.S. Fish and Wildlife Service to allow public access to the islands, which

would open the door to Amateur Radio expeditions. As before and even more now, we need your help to ensure passage of this Bill in the House of Representatives. You can help by contacting your representative and encourage them to support H.R. 298 and become a co-sponsor. If you are not sure who or how to contact your representative, go to http://www.house.gov/writerep/. Be sure to use your 9-digit zip code to ensure that you find the right representative. It is very important to use that same 9-digit zip code in your correspondence so that your representative knows that you are their constituent. You can find your 9-digit zip code by going to http://zip4.usps.com/zip4/welcome.jsp. Also, remember that emails are fine and please follow-up with a telephone call to ensure your request is being acted on. Insist on a point of contact for you to follow-up with. If you need assistance determining who your Congressman is or your correct 9-digit zip code, contact us at KP1-5@DXer.org. There is another very important date coming in April. The KP1/5 Team will be traveling to Washington, D.C. to make a presentation on Capitol Hill. The purpose of the presentation is to educate our legislators about the Amateur Radio Service, highlight the importance of Amateur Radio and the vital role it plays in national and worldwide communications, and of course focus on the facts surrounding the Fish and Wildlife Service's unjustified closure of Desecheo and Navassa to Amateur Radio DXers and contesters. The presentation will take place on April 8th in the Longworth House Office Building. Your representative can contact Representative Rahall and Pombo's offices for the exact time and location. In summary, we are asking that you contact your Representative as soon as possible and ask them to support H.R. 298, co-sponsor the Bill, and finally encourage them or their staff to attend the briefing on Capitol Hill on April 8th. A sample letter to legislators, news updates and information about the KP1/5 Project can be found at www.KP1-5.com. Please feel free to pass this information on to anyone who does not have electronic access and may be interested or can help."

OFFICERS FOR 2005. The following were elected on February 11th to be the new 2005 executives of the British Columbia DX Club (VE7RX/VE7RDX):
President.....Steve Wright, VE7CT
Vice President.....Jason Timmis, VE7AG
Secretary.....Gordon Hamilton, VE7ON
Treasurer.....Jim Sillet, VE7WG

QSL INFO AND NEWS.....
NEED A QSL MANAGER? Scott, KA3QLF, is interested in volunteering to become a QSL Manager. He states, "I have no special requests or conditions, I just want to lend a QSLing hand to all." His E-mail address is: petty@teisprint.net

NEED A QSL MANAGER? Graham, M5AAV, would like to offer his services as QSL Manager. He is currently the QSL Manager for G6PZ, GB6MD, Z21KF, TX4PG, ZK3SB and 6O0CW. If interested, please E-mail him at: m5aav@zetnet.co.uk

NOT THE QSL MANAGER. Maurice, F5NQL, reports that he continues to receive QSL cards for the following stations which he is not the QSL Manager for. Here are the stations which he receives cards for with the correct QSL routes:
5V7C via F5TVG HW6SIA via F5SM TM5SM via F5SM
9Q/F5LTB via F5LTB HY3SIA via F5SM TM5SRA via F5SM
F5KCC via F5LBR HY5SIA via F5SM TM60SA via F6GXL
F8UFT via F6ICG TM5AUX via F5SM TM6BFY via F5NII
HW1SIA via F5SM TM5SIA via F2WS TM7OXR via F2WS
HW5SIA via F5SM TM5SIR via F5SM TM9AF via F5SM

ADDED NOTES: Maurice, F5NQL, does have a QSL Manager. QSLs for his current callsign, his previous callsigns (FB1NQL, F89/FB1NQL, FD1NQL, F1NQL, FBC1NQL) and all of his portable operations go via F3GJ. Also, QSL cards for F5MCC, and his previous callsigns (FA1MCC, F1MCC, F89/FD1MCC, FD1MCC, FBC5MCC) and his portable IOTA operations from Corsica should go via F3GJ.

PLEASE REMOVE QSL MANAGER. Bill, W4WX, reports that he received a call from Mrs. Vance LePierre, and she has asked him to pass along her thanks for the sympathy cards received. He also mentions, "Maybe you guys can pass this along in your bulletins, magazine, etc. For those that maintain QSL manager list please delete N5VL as any manger." Vance, N5VL, became a Silent Key on January 25th.

Fabio, LU7EH, in San Pedro, Buenos Aires, Argentina, informs OPDX that starting February QSL cards for him should be sent via EA7FTR.

QSL ZL1V via N3SL. Activity was by Chris, ZL1CT, during the ARRL DX CW Contest.

SHORTWAVE DX HANDBOOK. Last week we mentioned that the highly successful "Kurzwellen DX-Handbuch" by Enrico Stumpf-Siering, DL2VFR, originally published in German in June 2003, is now available in English. Several have asked "Where can I get the book?". We recommand checking out the following Web page at: http://www.darcverlag.de
Also, contact Harry Radke, DB2HR, via: verlag@darcverlag.de
Or DARC Verlag GmbH, Lindenallee 6, 34225 Baunatal, Germany
Tel. (05 61) 9 49 88-73
Fax (05 61) 9 49 88-55

SPECIAL EVENT. Peter, OE3EPW, President of the Austrian Military Radio Society "AMRS" (the local HAM radio organization within the Austrian Armed Forces), informs OPDX that the AMRS will use a special callsign during the Biathlon World Championship in March from Hochfilzen in Tirol. Look for OE7XBH/WM05 to be on the air from 2300z, March 3rd to 2300z March 13th. Activity will be on all bands 160-2 meters, SSB, CW, FM and some SSTV. QSL via the bureau to OE7SPI. ADDED NOTES: The station itself is located at a military training range of the Austrian Armed Forces in HOCHFILZEN and located at the HQ of the Biathlon organization. The "WM" in the callsign is the abbreviation of the German word "WELTMEISTERSCHAFT" (in English "World Championship").

SPECIAL EVENT. Gwen, VK3DYL, informs OPDX that a special event station will be active to celebrate the 10th annual running of the Australian Formula 1 Grand Prix in Melbourne, and it will be on the air March 4-7th. This station will be activated by members of the Eastern and Mountain District Radio Club Inc. using the club's callsign, VK3ER. QSL direct to the callbook address (P.O. Box 87, Mitcham, Vic. 3132, Australia) with self addressed envelope and sufficient return postage (no old IRCs accepted) or via the VK3 Bureau. No e-QSLs.

T49, CUBA. Members of the Federacion de Radioaficionados de Cuba (FRC) will be active as T49C during the ARRL DX SSB Contest (March 5-6th) as a Multi-Multi entry. Operators mentioned are: CO2OJ, CO2WF, CO2II, CO2UG, CM2OY, CM2CE, CM2KL and OK1DTP. QSL via K8SIX. For more info, visit the Web page at: http://www.t49c.tripoll.com

TP1, FRANCE (Special Event). The Council of Europe Radio Club in Strasbourg will be activate by four YLs using the callsign TP1CE from March 4-6th. Activity is to celebrate "International Woman Day" (March 8th). The four YLs are all from Germany. The group received an invitation to operate as TP1CE on all bands on SSB, CW and RTTY. Operators Annemarie/DJ0FR, Erna/DL1PT and Thea/DH4TS will be the SSB-operators and Anni/DL3DBY will work also on CW. PLEASE be patient - not all of them have real pile-up experience. QSL via F5LGF, direct or by the bureau.

V26, ANTIGUA. Ed, N2ED, a member of Team Antigua, is now active as V26G until February 25th. He was also active this past week in the ARRL DX CW Contest. Look for activity on the WARC Bands. QSL V26G via N2ED.

V47, ST. KITTS (Additional). John/K3TEJ will be active as V4/K3TEJ until February 22nd. Activity will be on CW on 160 meters and the WARC bands. QSL via K3TEJ. He also participated in the ARRL DX CW Contest this past weekend as V47KP in the Multi-2 category. QSL via K2SB for V47KP.

WRTC-2006 NEWS (Web site open!). The ARRL Web page reports: "World Radiosport Team Championship 2006 (WRTC-2006), which will take place in Brazil in conjunction with the Liga de Amadores de Radio Emissao (LABRE) and the Araucaria DX Group (GADX), now has an official Web site. Although some sections remain under construction, the site does include draft rules, still subject to final approval. Following in the footsteps of previous WRTC competitions held in Seattle, San Francisco, Slovenia, and Finland, the WRTC showcases Amateur Radio competition at its highest level, pitting two-person teams of the world's top operators for the gold, silver and bronze. WRTC 2006 will take place July 7-10 in the vicinity of Florianopolis, the capital of Santa Catarina State in Southern Brazil. Atilano de Oms, PY5EG, heads the WRTC 2006 Steering Committee. The WRTC brings competitors together in a single geographical area. The on-the-air portion of the event is held in conjunction with the International Amateur Radio Union (IARU) HF World Championship, although WRTC rules differ in some respects from those of the IARU event, and scoring is done separately. WRTC stations run 100 W and have comparably modest antenna systems--typically a dipole for the low bands and a triband Yagi for the higher bands. The idea is to minimize the variables associated with radio contesting, thereby emphasizing each team's operating skills. The contesting

duo of Jeff Steinman, N5TJ, and Dan Street, K1TO, took home the WRTC gold for the third time in the 2002 event in Finland. Teams have not yet been announced for the 2006 event."

ZD8, ASCENSION ISLAND. Andy, G0JLX, will be leaving for ZD8-land on February 24th for 3 and a half weeks. He will be there until the March 21st. He has requested the callsign ZD8AD (his initials). His operating time will be limited to a couple of hours in the evenings during week days, and he states that the weekends are a whole different matter..... Andy will be using a FT-897D (running 100w) and a G5RV on HF and 50 MHz. QSL via his home callsign and by the bureau.

ZK1, NORTH COOK ISLANDS (Op Cancelled). The team of operators on South Cook Island have cancelled their February 17-24th operation to Manihiki Atoll due to cyclone activity. The team is very disappointed in the decision but safety comes first. Operators will stay on Aitutaki (South Cook Islands) and will continue to operate as ZK1SDE, ZK1SDZ, ZK1WET and ZK1XMY until March 3rd.

Doesn't it say in the licence conditions that the licence is for the self
learning of the licensee?
or are you saying that everybody should know absolutely everything about
radio before you can even get a licence?
Didn't you also learn about radio!

: view is that a higher level of RAE pass mark should be required but that
: again is just a personal view. Don't deride the amateurs, deride the system

as i said before on this newsgroup.

the poor m3 candidate is ''taught'' and then fed to the cannons in some
sort of ''pump-em-out'' activity to flood amateur radio with
raw-green-beginners in some sort effort that apparently is to lower the
standard and to turn 7mhz into 27mhz.
these unfortunates are then faced with the views of those who know
that the system sucks. these people being those who are not beholding to a
system that requires an rsgb instructor to sign a piece of paper before
they can get a licence.

but as i sad before, m3's themselves should shout for a higher standard.

as i said before...the system is being run by people who refused to
recognise the morse test but now force every candidate to do the morse
assessment!

thats a double-standard if ever there was one.

Good News!

Do you know how simple it is to go to Heaven after this life has ended?

The good news is that God came from Heaven to earth in the person of Jesus Christ over 2000 years ago and died for our past, present and future sins(misdeeds). He was born in the land of Israel supernaturally to a virgin Jewish woman named Mary. He lived a sinless life for thirty-three years and then sacrificed His sinless blood and died on a cross to pay the death penalty for our sins.

After Jesus died He rose from the dead three days later as He said He would. The Holy Bible also tells us that Jesus Christ ascended into Heaven and that all who accept Him as their Lord and Saviour will live forever with Him in Heaven where there is no more death, sorrow, sickness and pain.

The Holy Bible very clearly explains how simple it is to be saved and on your way to Heaven, "For if you confess with your mouth, "Jesus is Lord," and believe in your heart that God raised him from the dead, you WILL BE SAVED." (Romans 10:9)

You can be saved right now and on your way to Heaven if you will open your heart to Jesus and pray the following prayer:

Dear Jesus Christ, I want to be saved so that I can have a home in Heaven when I die. I agree with You that I am a sinner. I believe You love me and want to save me. I believe that You bled and died on the cross to pay the penalty for my sins. I believe that You rose from the dead. Please forgive my sins and come into my heart and be my Lord and Saviour. Thank You Lord Jesus Christ for forgiving me and saving me through Your merciful grace. Amen.

You are now a Christian if you said the prayer and allowed God to save you. Welcome to the family of God.

If you decide to wait till later you may die before you get another chance to be saved because none of us knows exactly when we will die.

This means that if we die without trusting in Jesus Christ as our Lord and Saviour we will be forever separated from the love of God in a place called Hell. This place called Hell is a place of eternal torment, suffering, pain and agony for all those who reject Jesus Christ.

Choose Jesus Christ today and you will have peace in your life now and forever.

Have a great day!

He was born in the land of Israel supernaturally to a virgin Jewish woman named Mary. He lived a sinless life for thirty-three years and then sacrificed His sinless blood and died on a cross to pay the death penalty for our sins.

After Jesus died He rose from the dead three days later as He said He would. The Holy Bible also tells us that Jesus Christ ascended into Heaven and that all who accept Him as their Lord and Saviour will live forever with Him in Heaven where there is no more death, sorrow, sickness and pain.

The Holy Bible very clearly explains how simple it is to be saved and on your way to Heaven, "For if you confess with your mouth, "Jesus is Lord," and believe in your heart that God raised him from the dead, you WILL BE SAVED." (Romans 10:9)

You can be saved right now and on your way to Heaven if you will open your heart to Jesus and pray the following prayer:

Dear Jesus Christ, I want to be saved so that I can have a home in Heaven when I die. I agree with You that I am a sinner. I believe You love me and want to save me. I believe that You bled and died on the cross to pay the penalty for my sins. I believe that You rose from the dead. Please forgive my sins and come into my heart and be my Lord and Saviour. Thank You Lord Jesus Christ for forgiving me and saving me through Your merciful grace. Amen.

You are now a Christian if you said the prayer and allowed God to save you. Welcome to the family of God.

If you decide to wait till later you may die before you get another chance to be saved because none of us knows exactly when we will die.

This means that if we die without trusting in Jesus Christ as our Lord and Saviour we will be forever separated from the love of God in a place called Hell. This place called Hell is a place of eternal torment, suffering, pain and agony for all those who reject Jesus Christ.

Choose Jesus Christ today and you will have peace in your life now and forever.

Have a great day!

Good News!

Do you know how simple it is to go to Heaven after this life has ended?

The good news is that God came from Heaven to earth in the person of Jesus Christ over 2000 years ago and died for our past, present and future sins(misdeeds). He was born in the land of Israel supernaturally to a virgin Jewish woman named Mary. He lived a sinless life for thirty-three years and then sacrificed His sinless blood and died on a cross to pay the death penalty for our sins.

After Jesus died He rose from the dead three days later as He said He would. The Holy Bible also tells us that Jesus Christ ascended into Heaven and that all who accept Him as their Lord and Saviour will live forever with Him in Heaven where there is no more death, sorrow, sickness and pain.

The Holy Bible very clearly explains how simple it is to be saved and on your way to Heaven, "For if you confess with your mouth, "Jesus is Lord," and believe in your heart that God raised him from the dead, you WILL BE SAVED." (Romans 10:9)

You can be saved right now and on your way to Heaven if you will open your heart to Jesus and pray the following prayer:

Dear Jesus Christ, I want to be saved so that I can have a home in Heaven when I die. I agree with You that I am a sinner. I believe You love me and want to save me. I believe that You bled and died on the cross to pay the penalty for my sins. I believe that You rose from the dead. Please forgive my sins and come into my heart and be my Lord and Saviour. Thank You Lord Jesus Christ for forgiving me and saving me through Your merciful grace. Amen.

Sussed it 'They' like to be thought of as 'special. I am a radio amateur. I am special.
Then loads of other people realise, there not so special after all, anyone can do it!
As there are now a 'new' breed of sharing radio amateurs, who after years of secrecy are willing to break ranks and tell the less fortunate, the radio secrets. Show them how easy it is to start on the path, to be a radio amateur. The new interested party's take some 'tests' and find them so easy, that they all pass. They are 'baby' radio amateurs, the idea is they learn as they go, pass exams and eventually become full licence radio amateurs.

The old school will never accept it.
Who likes to work and pay for something, then see some one else get it for less?
No one its not human nature.

The Masons will never think the Buffaloes are up to being Masons.
If they dropped all the secrets and made it easy for them to get in.
There would always be a section who moaned about it.
Even if the Buffaloes brought in loads of funds, did loads of good work.
They would always be 2'nd class Masons.
(To the Masons)

The rest of the world don't give a fig!

The older radio amateurs would like to stay special, the elite.
Then someone decided they had been top of the class long enough.
The Ofcom and RSGB are both business, businesses can't afford to be choosy with there clients, can they?
If radio amateur numbers had not increased and they had not received more revenue.
It wouldn't have paid its way, eventually they could have sold it off.
The CB 'licence holders' carried it for years, there numbers paid for the rest of the 'hobby' radio spectrum.
Now that's going, this is another way of getting the hobby radio users paying for our bit of the radio spectrum. If we cant pay for it they will sell it some one else, because to them, its not personal, its only business.

Good description. The bit you missed is that those who always seem to rant
about how hard it used to be are usually the least technically able.

First time I've heard that expressed. There are actually a whole range of
such organisations, Round Table, Rotary, Loins, Odd Fellows, Ancient Order
of Forresters, Masons (mainstream, female, and mixed), ... All no
doubt some members each of will think 'their's is the best', truth is,
most are much the same and many have surprisingly similar aims. At the end
of the day, if you find one you enjoy then it is the best for you.

> The rest of the world don't give a fig!

But some decide to make an issue of it.

Well, you used to rant on about the 12WPM Morse test, and just
consider the areas in which you are not technically able.....

You suggested that resistors were polarised,..... that
motion was possible without power transmission,..... that e^(-jwt)
was a function that decreased with increasing t,..... that ever larger
negative numbers were decreasing in size,..... that Reg Varney the comic
actor was G5RV,..... referred to the posited Pederson Rays as, "Peterson
Rays",..... displayed amazing ignorance about Eddystone receivers,.....
spent 15 months in this NG promoting your sexual perversion
with sheep shagging,..... were too lazy or too stupid, or both, to be able
to tackle and pass a 12 WPM Morse Test that otherwise-unqualified
self-taught 14-year-olds were taking in their stride,..... despite
TWO DEGREES, one of them in _ELECTRONICS_, didn't know how to
design a common collector stage to give a power gain..... don't
know what a woodpecker is..... doesn't understand vectors.....
finds it hard to fit an N-plug.....

As usual, Lardass fucks up. That house is a house in Wheeling, WV., not Glen Dale. In fact it is listed on the website that it is in East Wheeling. Poor Lardass, his abuse of alcohol combined with his mental illness prevents him from normal thoughts. Anybody can go and see that the house isn't Roger's yet the mentally ill retard insists that it is. Just like he insisted there was an "International Radio license", that the Marshall County Alabama ARES website was the one for Marshall County, West Virginia, or that "Layla" written by Eric Clapton was actually written not for Patty Harrison, but for some finnish whore.

: As usual, Lardass fucks up. That house is a house in Wheeling, WV., not
: Glen Dale. In fact it is listed on the website that it is in East
: Wheeling.

Oh? When did you move to East Wheeling? No one can blame you for seeking more upscale accomodations, of course, but there was a certain reassuring quality about knowing that God was in his Heaven, and Woger was in his Glen Dale no matter what other turmoil life might bring to us. Was it the webcam that caused you to move?

: Poor Lardass, his abuse of alcohol combined with his mental
: illness prevents him from normal thoughts. Anybody can go and see that
: the house isn't Roger's yet the mentally ill retard insists that it is.

Well, mortgages on places like that *can* be pretty steep, and I suppose that the place is still technically the mortgage company's, but most people refer to such homes as "my home" anyhow.

Feel free to do the same thing yourself.

: Just like he insisted there was an "International Radio license", that

If you look around r.r.a.m., you'll see that the IARA is currently under discussion. Several of the regular posters there claim to hold such licenses. You, of course, would have to retest (again) before a UN representative to obtain one. At your age, it's probably not feasible.

: the Marshall County Alabama ARES website was the one for Marshall
: County, West Virginia, or that "Layla" written by Eric Clapton was
: actually written not for Patty Harrison, but for some finnish whore.

The word "Finnish" should really be capitalized, now that Finland is now longer part of Sweden (You probably didn't know that, so the faux

pas is okay.) That minor point aside, it is beyond me why you think that there is no ARES in Marshall County, or why you are fixated on Eric Clapton and his often-recomposed "Layla," which has now descended into banality as Eric apparently feels the weight of his advancing age.

But anyway, glad to see you moving up in the world and into a new home. I really like its awnings.

History idiot Saggytits Lee Lloyd Davies whined:
> The word "Finnish" should really be capitalized, now that Finland is
> now longer part of Sweden (You probably didn't know that, so the faux
> pas is okay.)

BWHAHAHAHA..Dumbass Davies, Finland hasn't been a "part of Sweden" for a long time, but as usual, you try to appear smart and fuck it up as usual.

From:
http://www.cia.gov/cia/publications/factbook/geos/fi.html#Intro

"Finland was a province and then a grand duchy under Sweden from the 12th to the 19th centuries and an autonomous grand duchy of Russia after 1809. It won its complete independence in 1917."

Which means it was part of Russia before the transition of Russia to Communism in 1917. Looks like you are as ignorant of history as you are of everything else. Oh, and so you know, a "grand duchy" is a territory of a Duke (one of the Royal family of Russia). Finland kowtowed in policy and other issues to the U.S.S.R. though, that is well known....to everybody but you, apparently.

Secret Marconi Day Station - South Dorset Radio Society

Just to let you all know that the South Dorset Radio Society will be running a Marconi Day special event station from the little known Marconi site at Portland Bill. The site was used by Marconi to make first contact with Gibraltar.

It is so secret that the members don't even know about it yet and the RSGB have not published details of the special callsign. This is due to the fact that they don't want the Portland club knowing that they are invading for the weekend. So SSSSHHHH! Don't tell anyone.

Reply to Carol 2E1RBH, but don't look at the spelling on her emails.

>>
>Why then is he still using radioshacksucks.com if the judgement says
>he can't? I don't get it.

The last paragraph of the judgment says:

i) For so long as RSS, or its agents, representatives, employees and member-owners operate a website relating to RadioShack, RSS as well as its agents, representatives, employees and member-owners must require all visitors to such website relating to RadioShack to first click through and agree to abide by the terms of this Agreed Judgement and Permanent Injunction before entering such site. Visitors not agreeing to abide by this order will not be allowed access to the site.

Once you've agreed to this you can enter. I have no agenda here, but was simply curious. After you agree you're taken to some forums where customers and employees can rant against each other or sing each other's praises. The whole thing was monstrously slow so I bailed.

I'm tracking a high altitude balloon on 2m via a handheld scanner, and in the past have used the standard rubber-duck antenna that the scanner came with. However, reception isn't too great at times. What kind of gain increase could I expect to see if I were to replace the current rubber-duck antenna with a quarter-wave antenna (designed for 2m and 70cm)?

Thanks in advance for any insight!
Dave

Dave,

The thing to remember at VHF is that the dimensions of the hand-held transmitter/receiver box are just as important as the dimensions of the antenna.

For example, a properly-designed hand-held transceiver plus a rubber-duck, isolated from ground, is equivalent, in overall length, to a half-wave dipole.

Likewise, a vertical whip mounted on a vehicle behaves as a halfwave antenna of length crudely equal to whip length + vehicle depth. (As modified by a loading coil if any.)

If the rubber-duck (which is mostly a helical loading coil) is replaced by a rod or wire of longer length, two things happen -

First, the resonant frequency of the system (antenna + box) changes.

Secondly, the antenna pure input resistance changes from its optimum (designed for) value to an entirely different impedance of resistance + reactance.

In your case, due to its longer length, the antenna + its new smaller loading coil (if you fit one) will certainly radiate more efficiently. But the mismatched transmitter power amplifier (which you havn't got) will now be appreciably less efficient.

With the rubber-duck the antenna will be matched to the receiver input. But with a different antenna impedance there will be a considerable mismatch loss and receiver sensitivity will also be reduced.

Ideally, if the antenna is changed then both Tx and Rx impedance matching arrangements should be changed. Which you can't do!

So the BEST you can do is change the antenna rod or wire length such that the overall length of the system (antenna + box) is crudely 1/2-wavelength at the working frequency and HOPE that you gain more on the swings than you lose on the roundabouts.

You will likely be more successful on receive than on transmit. But it is quite possible for performance, especially on transmit, to be worse.

The most likely result is that you will hardly notice any difference. At best, if you could measure it, you can expect a few dB improvement. Depends on how big is the rubber-duck you begin with. Don't throw it away. You may wish you hadn't.

Another thing to remember is that the extremely uncertain hand and arm which holds the scanner forms an integral part of the radiating/receiving system. A sweaty palm and an arm held over your head can seriously affect tuning.

Orientation (polarisation) of the antenna relative to balloon antenna orientation can also make a great difference.

Exact length of antenna (resonance) is a very non-critical matter. Just connect some wire to the antenna socket and be prepared to prune it.

What does your "Reception is not too great at times" mean. To effect a noticeable improvement, a 4-times increase in power from the balloon transmitter would be noticeable. (A 4-times increase in power is equivalent to twice the height or distance.)

Great fun is available just from all the uncertainty involved.

Happy experimenting!

Reg, G4FGQ

Significant. I don't have a number, but it will definitely improve.

On the balloon, is the antenna vertically polarized? I would assume
so. If not, consider a dipole.

Also, to improve the reception further, build a 'rat-tail'. Its a 1/4
wave wire that hangs from the ground of the rig making your 1/4 wave
antenna more of a 1/2 wave. You may find adding that will help even
with the duck.

Hi Dave

Assuming you build a 1/4GP with a large enough counterpoise (ie dont rely on the case of the scanner) I think the figure of merit is around 6-12dB. You may however be better off making a turnstile about 3/8 wavelength over a mesh ground so the thing points roughly where you want it. That will also help with polarization changes as the baloon rotates. Maybe a similar antenna on the ballon as well?

Cheers Bob Vk2YQA

Reg,
Thanks for the feedback. I really appreciate it! If I could, I had a few additional questions regarding some of your points:

Reg Edwards wrote:

> Secondly, the antenna pure input resistance changes from its optimum

mismatch
> loss and receiver sensitivity will also be reduced.
>
> Ideally, if the antenna is changed then both Tx and Rx impedance
matching
> arrangements should be changed. Which you can't do!

The antenna I had in mind was made for Radio Shack handheld scanners, and I have a Uniden handheld, which both have a 50 Ohm impedence I believe... this would eliminate the impedance mismatch, wouldn't it?

> The most likely result is that you will hardly notice any difference.
At
> best, if you could measure it, you can expect a few dB improvement.
Depends
> on how big is the rubber-duck you begin with. Don't throw it away.
You may
> wish you hadn't.

The antenna it came with is about 6" long, and I assume it's made to be a decent antenna for all frequencies the scanner is designed for (29MHz to 900+Mhz). Just FYI, in case that changes anything...?

> Orientation (polarisation) of the antenna relative to balloon antenna
> orientation can also make a great difference.

That would be great if I could control the orientation of the transmitting antenna. It can vary +/- 45 degrees or so during the flight... the transmitting antenna is an inverted standard 2m handheld antenna (8" or 9" long?). I've assumed in the past that if I held the recieve antenna vertical, that's about as good as I can get...?

> What does your "Reception is not too great at times" mean.

On the way down mainly, when it's decending between 30 and 100 mph.
I'm assuming this is due to antenna swing.

> To effect a noticeable improvement, a 4-times increase in power from
the balloon transmitter would be noticeable.

I'd love to, but due to battery capacity and time of operation, .5W is
what I'm trying to stick with.

Thanks again for the insight! I very much appreciate it.

Dave

Really? Any point on the ground? Or does it need to be connected
somewhere on the antenna?

Thanks for the advise!

Hi Dave,

Well, I see you got advice, but unrelated to the problem you offered.

The standard rubber duck and a quarterwave are going to have the same failings: they both have the same response curve in space. Basically they both are designed to work with transmitters located at right angles to them. And if you stand in the conventional upright manner of a biped, then those antennas are going to be vertical with the favored direction lying along the horizon.

Now, if your balloon is tracking along the curve of the earth's limb, some several hundred miles out, then this might work admirably (it doesn't take all that much power to hear this distance when nothing is in the way). However, as balloons go, they are generally above you and your antenna is pointed toward them, or nearly so (certainly more so than at the horizon). This is NOT a favored direction for communication and antennas when they are small (and a rubber duck, a quarterwave, or a halfwave easily meet that dismal prospect).

To obtain overhead coverage for communication (and this presumes that the balloon antenna is also vertical - which means it will suffer from the same geometry); then you need an antenna that is at least one wavelength long, or longer (1ï¿½ wavelength would be a nice way to go).

Long antennas have more sensitivity in the direction along their length.

Now, if your tracking pastime includes all angles from the horizon to directly above, then you need to consider designs that are more isotropic (and none of the suggestions offered by everyone, including me, come anywhere close).

Richard,
Thanks for the advise. However, I thought 1/4 wave antennas were more
isotropic than 'most' other antennas... (see link below)

http://www.astrosurf.com/lombry/Radio/dipole-height.gif

What am I missing?

Basically, all I'm trying to do is increase the sensitivity of my
handheld scanner for the 2m range.

Thanks,
Dave

Dave, I have seen you get some good information and some bad
information. The 1/4 wave will give you better results over the short
rubber duck.
There will be not much difference in the pattern between the original
antenna and the 1/4 wave. There will be an improvement in signal level
by about 10 dB. One poster said that you were in trouble because your
antenna was vertical. I am willing to bet you can turn your head and
look upward with the scanner turning upward as well.

Your radio is designed for a 50 Ohm antenna so half or more of the
information given by "Reg Edwards" is bogus as well. I don't think he
tried to mislead you, but may not have experience in real life experiments.
The case of the radio is important only in how it capacitively couples
with your hand or body.
A short vertical has an impedance far below a normal quarter wave. That
means your idea matches better to your radio.
As a sort of ground wire, a 1/4 wavelength long counterpoise, (as
someone said a rat tail) will also help.

most commonly they are connected to the bnc ground, but anywhere that
is grounded to that connector will work. Since this is a scanner, you
might consider a piece of computer ribbon cable. Cut each wire in the
ribbon to 1/4 of your favorite bands or frequencies until you run out
of wire. If you have left-over strips, just remove them or leave them
for later use.

Just a thought.

Hi Dave,

Umm, those are lobes for a HORIZONTAL dipole --- wrong polarization,
wrong size. Cross polarized signals come with beaucoup loss.

>Basically, all I'm trying to do is increase the sensitivity of my
>handheld scanner for the 2m range.

If the balloon is overhead (or off of overhead by ï¿½15ï¿½) you are 10dB
down at best, or sitting in a deep null (deaf city). To compare that
30ï¿½ cone of silence: Hold your hand directly overhead, spread out
your fingers and thumb, the distance between little finger and thumb
tips spans 13 to 15 degrees (half that cone).

Is your balloon in that cone? Worst possible place for a short
vertical antenna to hear; and for a balloon with a short vertical, you
are in the worst place for it to shout down to you. This is a deadly
combination that puts your normal signal at -20dB (or worse).

A KW linear may overcome this sensitivity problem however.

The proposals by Tony B Liar and Lilibet Windsor to
imprison Britland nationals in their own home on the
slightest pretext of a complaint by the secret police, without benefit of
a court hearing or knowing the evidence against them, represents
a greater threat than was ever put up by Hitler and his gang. (Although
Lilibet Windsor's German origins might throw up a question or two)

That house arrest will result in no telephones or computers being allowed,
so is it time for we Hams to encourage the rest of the world to take
an interest in communication projects and in communication modes,
to permit any and everybody to communicate into a house but
without the "security" farces being able to intercept the communications
or to prevent that communication? (And, no, I'm not proposing
support for the gangrenous degeneration that is the M3/CB Fools'
Licence scheme, nor am I offering a route for the L.I.A.R.'s of that
scheme to get more adulation than their current boasting manages to
harvest)

What sort of communications could we encourage the man-in-the-street
to cultivate? Morse Code via infra-red? Spread Spectrum via Bluetooth?
(Probably not, as all Bluetooth-equipped paraphernalia would be banned
by the exclusion orders).

Whatever. It seems that here is an excellent opportunity for we Hams to
act to guarantee the freedoms of the world (other than by invading
countries such as Iraq and killing the innocent civilianry in order to
make them "free")

Are there any online sources that show vertical whip antenna take-off
angles vs. antenna length (as a function of wavelength)?

I don't know about "deadly"... atleast not in this scenario. :-)

Keeping the transmitter and reciever constant, what would you recommend
for the transmitting and receiving antennas in this case?

Thanks,
Dave

Hi Dave,

Go to:
http://www.eznec.com/
and research to your heart's content with the simple designs (or make
your own).

>Keeping the transmitter and reciever constant, what would you recommend
>for the transmitting and receiving antennas in this case?

Inverted F comes to mind, but is not the total solution. Then there
is the quadrifilar helix antenna.
Visit:

I have a complete color catalog of all products now available. You can purchase pictures (both normal kodak and computer JPEG's). Also, you can purchase posters, VHS tapes, used boys underwear, and audio recordings.

There are many products and services. Here are some prices:

Complete Color Catalog (160 pages).....$5.00
100 Pictures Little boys age 7-12.....$9.95
120 Pictures Little boys age 13-17.....$11.95
Soiled boys underwear 3pk.....$19.99
VHS tape, little boys "Bath Time for Uncle Woger".....$49.95
VHS tape, little boys "Happy B-day, Uncle Woger".....$49.95
VHS tape, teenage boys "Naked hillbilly Party!".....$49.95
Personalized Audio tape.....$2.99

If you have child pornography, preferably little boys ages 7-9, I will trade or buy them from you. If they are action shots, of an adult with a little boy having sex, I am willing to trade big, or pay you a lot. Please write to me for more details. Thanks.

You can send cash, checks, or money orders made out to FUN WITH CHILDREN.

Please send your order to:

Fun With Children
c/o Uncle Woger
610 Glen Haven
GLEN DALE, WV 20365
1-304-845-0109

You can also call in with your credit card numbers, but I can not accept American Express cards. I also accept Pay Pal. Thanks, and hope to hear from you.

Done and done... nice program! I'm hoping I entered the correct values for everything. Do the patterns listed below look correct? I assumed things like wire diameter (I used 2mm) didn't affect the output significantly... although I did notice some things like the number of segments did affect the output if I decreased them (I used 10 for these cases).

(filename = length in wavelengths):

http://www.geocities.com/achilles03/eighth.gif
http://www.geocities.com/achilles03/quarter.gif
http://www.geocities.com/achilles03/half.gif
http://www.geocities.com/achilles03/5eighths.gif
http://www.geocities.com/achilles03/1wave.gif
http://www.geocities.com/achilles03/1point25wave.gif
http://www.geocities.com/achilles03/2.gif

Do those look correct?

Thanks in advance!
Dave

There's a free demo version of an antenna analysis program,
EZNEC, at http://www.eznec.com It will answer your questions.

Hi Dave,

Yes, however, you will notice there is still a cone of silence above
any of these even if the preferred angle is now higher towards a
balloon.

>I assumed
>things like wire diameter (I used 2mm) didn't affect the output

Not so much that any change will fill in the cone.

Not with the 706 per se, however you basically need to decide if you want decent quality or hi pitched un-natural voice.

2.8 is a good choice for a decent sounding SSB signal. 1.9 would be good for digging one out of the noise.

If the 706 is switchable for those choices, get them both.

Dan/W4NTI

Hi,
I agree with Dan.
I haven't used a 706 but on my Yaesu FT-920 , it came from the factory with a 2.4 kc IF filter.
I modified it to transmit with a 2.8 kc IF filter "which helped the transmit fidelity a lot" and currently it is using the original 2.4 kc IF filter for receive. I plan to replace the 2.4 kc IF filter with a 2.1 kc IF filter as soon as I decide to turn loose of $125.00 plus S/H for the filter.

International Radio, Umpqua, OR
Sells great IF filters
They say
Our choices for SSB are:
a.. #716 2.8 kHz (maximum audio quality; minimum selectivity)
b.. #709 2.1 kHz (we think this is the best all-purpose width unless conditions are very crowded)
c.. #711 1.8 kHz (the contesters like this one: maximum selectivity, but minimum audio quality)
Ace - WH2T

Hello,
Can you help?
I need an Icom HM-56
Hand Mic instruction manual.
Anyone have a soft copy? (pdf)
I have the schematic.

If you do not have a soft copy would you please
email me the basic operational information for this
DTMF microphone, i.e.
How to store DTMF sequences into memory,
how to recall memories, reset the mic. etc.

Thanks,
In advance.

I believe you can only add two filters. One can be for CW and one for
SSB or both for one mode.

Thanks
Buck

Please patronize my concession stand at area Hamfests.
I will be selling a kit containing much needed items typically
required at hamfests. My kits will contain:

Deodorant to mask body odor
Appetite suppressants
Shave cream & razor
Wash 'n Dry towelettes for slobs.
Change of underwear
Hair lice treatment
A book on how to stop bragging about your accomplishments

73,

Lloyd

I don't understand people who complain of others using
cell phones to get stuff done or such while waiting on
line to pay for stuff at a store. You should be mad at the
store for forcing us to waste time on line than me trying
to use that time with the cell phone.

Hospitals, government buildings and various other places that don't
allow cell phones automatically turn off cell phones. They seem to be
growing in popularity. The cell phones are designed with that ability
built in for that purpose.

If you are in a place that disables a cell phone, you may find out you
are somewhere near a LL and the employees will likely let you use it
for an emergency. If not, then you WILL have a lawsuit.

BULLSHIT!

1024. Ameritron and Yaesu question

Newsgroup: rec.radio.amateur.misc
Date: 2005-02-26 04:53:17 UTC
From: AmpQuestion <nospam@nospam>
Message-ID: <cvov7c$l7n$0@pita.alt.net>
Source record: 53346

Any input on getting an Ameritron 811 to work with a Yaesu Ft-767?

I have all cables hooked properly, the amp is in excellent shape and works. All meters work, the fan runs, and all cables are double checked for continuity.

The manual with the 767 says that when I run the relay cable from the amp to the TX Grnd jack on the Yaesu that I must locate and turn to "on" a switch they call the S2002 switch on the RF section (inside the rig) to activate the amp.

Where the heck is this switch? The Yaesu manual doesn't show the location. In fact, the 767 manual stinks.

The Ameritron manual also states that it is not necessary to hook the ALC cable to the rig unless I run more than 70 watts at the transmitter.

Any input will be appreciated.

1025. PileupBuster.com - Domain Name is For Sale

Newsgroup: rec.radio.amateur.misc
Date: 2005-02-26 05:32:39 UTC
From: erfurth@gmail.com
Message-ID: <36ba001b.0502252132.6171bea2@posting.google.com>

-NOTICE-

The "PileupBuster.com" domain name is For Sale.

For less then the price of an HF rig you can own the ultimate Ham Radio domain name.

The PileupBuster.com domain has immediate name recognition to everyone associated with Ham Radio. Plus, the sales and marketing potential of this name is unlimited.

The minimum offer on this domain is $1,250.00 (US Dollars). The PileupBuster.com domain name will be sold to the person, company or group that makes the highest offer. International offers are welcome.

This is a Private Auction. No one will see what you offer and you will not be able to see what others are offering.

You may begin submitting your offers on Saturday February 26. No offers will be accepted after 12:00 midnight (Pacific Time) on Friday March 4, 2005.

TO MAKE AN OFFER, GO TO: http://PileupBuster.com When the web page comes up, look right under the PileupBuster.com name. You will see "This domain is For Sale" then click on: "More detailsï¿½" You will then see a box to enter your offer. Enter your offer and then click "Make Offer"

This sale is supervised and regulated by SEDO (sedo.com), a highly respected International domain sales company.

If you have any questions, please feel free to contact me at: erfurth@gmail.com

Good luck.

73s,

Bill

You can always spot a honest lawyer. He is the one driving a five year old Chevy or Ford, and he wears suits purchased at the same men's store where you buy yours from. He's your neighbor down the street, since he doesn't live in a gated country club community where the cheapest house sells for $850,000. When he comes upon an automobile accident, he renders assistance, versus handing out his business cards. He humbles himself before the same God you do, versus thinking he IS God.

But you just registered it on Feb 23, 2005 (three days ago). If the domain name is so desirable, how come you want to dump it after three days?

And then there's PileupBuster.net and PileupBuster.org -- both of which are still unregistered. You can purchase them for $8.95 each at godaddy.com.

Or maybe someone might want to go with the still-available, never before registered, "PileupBusterSucks.com" domain. All are well under the $1250 price tag you've set, and all are available right now!

For what its worth department. On my FT-1000MP the switch is located via
the rear panel with a access hole for a small screw driver, or tool to push
it one way or another.

Try looking at the print (schematic) and check the external keying relay.
Most likely one position has no relay, as in QSK keying, and the switch will
select a relay.

I don't have the rig you said so this is the best I can do.

FYI

You should also check the W5YI site for there test locations since the ARRL will not list those and vice versa. Since there are 10 other groups that also coordinate tests here in the US, you should contact a local club in your area and see who does the testing. For example, in San Diego, all testing is handled by SANDARC not ARRL or W5YI. If you search the latter two sites, you would come away convinced that there is no testing in San Diego while in reality there are tests monthly if not weekly.

Hey man!

Make sure you charge Woger double, he sure needs it!

Lloyd Davies,
TimeLORD

Yes, pick on me Lardass. You follow me everywhere as it is. Besides, I can
afford paying double, Lardass. Unlike your HUD apartment my inherited house
is paid for. Besides, my SSI monthly checks bring in three times more than
your pizza job does and paying double doesn't mean shit to me.
I see you are still living in your fatass imaginary world where you believe
that you are a Time Lord.
Come on over to my imaginary world, Fattie. Spend your every waking hour on
the Nim Busters board as I do. Post some filthy stuff as I do. If you would
quit working at the pizza parlor you could spend all day posting shit and
doing the shit I do. You like to post pictures on the Nim board Fatass. I
tell you I can't see them but that is a lie. I have Explorer 6.0 and I see
them but you are so stupid that you believe me.
The rest of you lispy cocksuckers can stop posting under sockpuppets. I know
for a fact that all of your Altopia posts come from Lloyd. Lloyd is
everywhere. He haunts me day in and day out. Nice try Lardass but I am wise
to your sockpuppets. Keep it up Lardass and one of these days I am gonna net
cop you to Chris Caputo. Then you'll have to eat shit and get a real job.
Get on SSI and use MSN like I do, Fatty. Every day is a weekend for me.
Buahahahahaha!

From the gratuitous Childish Broadcast (CB) that you have originated below, would it be safe to assume that "VK3XEM" is some form of Australian CB handle?

Ham Radio has traditions of international gentlemanly conduct which have somehow been lost on you.

Perhaps you'd feel more at home if you were to post in uk.rec.radio.cb?

From the gratuitous Childish Broadcast (CB) that you have
originated below, would it be safe to assume that "G4SDW" is
some form of Wiltshire CB handle?

Ham Radio has traditions of international gentlemanly conduct
which have somehow been lost on you.

Perhaps you'd feel more at home if you were to post in
uk.rec.radio.cb?

The putz's on this NG are nothing to sweat over.
Toilet ticks on an outhouse are they all of them.
The real problem is the nuts and kooks are starting to come
back up on 14.313 on the weekends daytime and stir up
the shyte like they used to do years ago.

Most hams would rather talk on the radio than take a shower.
It was a real B.O. stench at Dayton last year. Most guys look
like they had not shaved or bathed in six months.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, the ARRL Letter & Web Page, K1XN & GoList, NC1L, K2PF, N2YO, NG3K, W3UR & The Daily DX, N4AA & QRZ DX, W4WX, N6KZ, W6YD, K8GG, K8YSE, W8UVZ, WZ8D, K0NR, DL/VE3ZIK & www.contesting.info, DL1EK & The DX News Letter, DL5EBE, F5CWU & La Gazette du DX, F5NQL & UFT, F6AJA & Les Nouvelles DX, F6EXV, F8DVD, I1JQJ/IK1ADH & 425 DX News, I1HYW, IZ8BRI, IZ8CCW, J6KVR & JA-IOTA Islands News, LA5YJ, LZ1BJ, M0NBY, PA3CNX, PA7FM, SV9FBM, VA3RJ & ICPO, VE7HA, VK4FW and XE2CQ for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 20th/February, through Sunday, 27th/February there were 234 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3D2/r, 3DA, 3V, 3W, 3X, 4J, 4L, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5V, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FM, FO, FR, FT5W, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J6, J7, J8, JA, JD/m, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T32, T5, T7, T9, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK0M, VK9N, VP2E, VP2M, VP2V, VP5, VP8, VP8/h, VP8/o, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZF, ZK1/s, ZK2, ZK3, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3B8, MAURITIUS. Giovanni/IZ2DPX and Simon/IZ7ATN will be active from here March 7-14th as 3B8/IZ2DPX and 3B8/IZ7ATN. Activity will be on

40/20/17/15/12/10 meters (modes not mentioned). QSL 3B8/IZ2DPX via the bureau to IZ2DPX or direct to his QSL Manager IK2DUW. QSL 3B8/IZ7ATN via his QSL Manager IZ0CKJ.

ANTARCTICA NEWS.....
Dominik, DL5EBE, annoounced a new DXpedition by the Bellingshausen team this past weekend. Operators Oleg/UA1PBA and Alex/UA1PAW will be active from the Chilean Ardley Refuge (WAP CHL-12) on Ardley Island as CE9/R1ANF from March 7-20th. Last activity from this location was by Thomas, DP1KGI, when the building was still German property. This will be the first ham radio operation since the takeover by the Chilean authorities. QSL via RK1PWA.

MAITRI Station (WAP IND-03). Many are requesting a QSL route for the two callsigns being used at the Maitri Base: VU3AXA and VU3BPZ. The QSL Manager for Dr. Bhagwathi, VU3BPZ, who will be at Maitri Base for 1 year, is his younger brother in India. However, no one seems to have his address. It is recommend to hold-off sending QSLs until VU3BPZ provides everyone with an address. Watch the WAP Web site.

W.A.P. Antarctic News and Bulletins are available on the WAP Web site at: http://www.ddxc.net/wap/boll_anno.php

C56, THE GAMBIA. Noel, M0NBY, informs OPDX that he will be active as C56/M0NBY between February 25th and March 3rd. No QSNs have been reported yet, but expected activity will be mainly during the evenings (local time) on 20 and 15 meters. He may also be active on 40 meters as well, SSB only! QSL via his home callsign (See QRZ.com) or via EQSL.cc.

C6, BAHAMAS. Bob, K0NR, will be active as K0NR/C6A from Abaco Island (NA-080), from March 6-12th. Activity will be on 40-10 meters, using PSK31 and SSB. Also, activity will be on ISS Packet, AO-51 and the other FM LEO birds from Grid FL16. Bob states, "Assuming congestion on the FM voice satellites, I'll tend to favor ISS packet." QSL to his home callsign.

C6, BAHAMAS (IOTA Op). Bill/NE1B/C6AWB and Tom/C6ANM, who were active this past weekend in the CQ 160 SSB Contest, are expected to be active in the upcoming ARRL SSB Contest. However, before the contest they plan to visit Berry Island (NA-054), March 1-3rd. QSLs for both stations are via WA2IYO. Logs will be uploaded to LoTW.

CY0, SABLE ISLAND. Operators Joe/W8GEX, Wayne/K8LEE and Phil/W9IXX are planning a 7 day DXpedition to Sable Island (NA-063) in July. The three man operation will be on 160-6 meters, and they plan to participate in the IOTA Contest. Operations will be CW, SSB, PSK and RTTY. QSL via K8LEE. This is a very expensive, trip and the crew is seeking donations to help offset the cost. Please send contributions to K8LEE.

DXCC NEWS.....
* Bill Moore, NC1L, ARRL DXCC Manager, reports that the following operation is approved for DXCC credit:
VU4RBI and VU4NRO - Andaman & Nicobar Islands; Operation from November 30, 2004 through December 31, 2004.

* "Cardless" Five-Band DXCC testimony to Logbook of the World's value (Feb 24,2005) -- The ARRL Letter & Web page reports: "New Hampshire contest station KC1XX (chief op Matt Strelow) recently achieved Five-Band DXCC solely through contact data submitted to the ARRL's Logbook of the World (LoTW). With more than 255,000 QSOs already in the worldwide contact database, KC1XX recently was able to confirm 100 DXCC entities on 80 meters to qualify for the award. Because most participants have linked their DXCC data into LoTW, it is not always possible to determine band totals derived solely from Logbook confirmations. Major contest stations like KC1XX serve to demonstrate the value of participating in LoTW; however, these stations frequently do not have DXCC, and their totals are due entirely to LoTW-verified contacts. The largely single-op contesting and DX station of John Sluymer, VE3EJ, in Ontario, also has qualified for 5BDXCC through LoTW-verified QSOs, while several others are closing in on achieving 5BDXCC using the same route. Meanwhile, Brian Alsop, K3KO, in North Carolina, has already confirmed 221 DXCC entities entirely via LoTW."

DX CONVENTION. The 56th Annual International DX Convention will take place on April 15-17th, at the Visalia Holiday Inn Hotel and Conference Center in Visalia, California. This year's event promises to be a truly international event with program presentations by such notables as:
Roger Western, G3SXW Veijo Kontas, OH6KN
Martti Laine, OH2BH Bharati Prasad, VU2RBI
Simon Lehto, OH8OS Jerry Griffin, YI9MD
Juha Hulkko, OH8NC Reinaldo Leandro, YV5AMH
Also participating in the presentations will be the following stateside amateurs:
Frank Clement, W6KPC Charly Harpole, K4VUD
Gerald Youngblood, K5SDR John Eisenberg, K6YP
Bob Allphin, K4UEE

The Featured Banquet Presentation will be the recent Andaman (VU4) operation presented by K4VUD and VU2RBI. The Sunday breakfast presentation will be the Aves Island DX pedition presented by Reinaldo Leandro, YV5AMH and Martti Laine, OH2BH.
Convention registration includes access to all programs, exhibits, the US Tower Barbecue on Saturday, Friday & Saturday evening "attitude adjustments", the Convention Banquet and the Sunday morning (power) Breakfast.
Complete details, including a registration form are available on the convention website at: http://www.ncdxc.org/Ncdxc/Convention
(Note: the caps shown are required to access the web site)
George Allan, W6YD
Chairman, 2005 Visalia International DX Convention
E-Mail: w6yd@aol.com

EA8, CANARY ISLANDS. Operators Dunia/EC8ADU, Javi/EC4AEW, Oscar/EA4TD and Edu/EC8AUA will be active as EA8URL from the URE Las Palmas Section during the ARRL SSB Contest as Multi-100W only entry. QSL via EA8URL or EC8AUA.

FG, GUADELOUPE. Flo, F5CWU, will be here from FG5BG's QTH between March 2-10th. He will enter next weekend's ARRL DX SSB Contest using the callsign FG/F5CWU. Activity will be on 160-6 meters CW/SSB/RTTY/PSK.

FP, ST. PIERRE AND MIQUELON. Paul/K9OT and Peg/KB9LIE will be active as FP/homecalls July 29th through August 7th. They will operate from the world-famous Room 5 at the Maxotel on Miquelon (NA-132) using CW and SSB, 100 watts and wire vertical antennas, plus a beam for 6 meters. Main bands will be 80, 40, and 30 meters CW and 40, 20, and 17 meters SSB, with activity on 160 meters and the higher bands if they appear to be open. They plan to be active in the RSGB IOTA Contest as Single-Operators and as FP/K9OT in the CW NA QSO Party. QSL via their homecalls (good in QRZ) with a SASE, or 1 greenstamp, Euro or IRC (old or new). Bureau cards are accepted but e-QSLs will not be acknowledged. Their Web page is at: http://www.mhtc.net/~k9ot

FT5W, CROZET ISLAND. Francois, F8DVD, informs OPDX that he received a message from Jean Paul, F5BU, now signing FT5WJ from Crozet Island. The message states that Jean Paul arrived on the island last February 5th, but his radio equipment (Icom 726 with amplifiar and a ground plane antenna) did not arrive until February 18th. Equipment was late because of the weather and some changes in the ship's route. His first contacts were made on 20 meters February 20th. Jean Paul is on the island for one month. He hopes to be on air about one hour each day on 14278 kHz (+/- QRM). He can only be active during his spare time. QSLs will be via F5BU, and they will be printed after his return to France. ADDED NOTE: Nicolas, F4EGX, now signing FT1WK, is also there with Jean Paul, but is only allowed on the satellites (Watch AO-51). QSL via F4EGX. Visit the following Web page for more details at: http://f4egx.free.fr/cro.html

IOTA NEWS.....
AF-NEW. Operators Hossam/SU1HM, Said/SU1SK, Tarek/SU2TA and Sayed/SU1SA will be active as SU8IOTA from Disuqi Island (Nelson Island) in the Nile Delta and Sinai Region Group from April 23rd through May 1st. This will be the first IOTA operation from EGYPT. QSL direct to SU1SK: Said Kamel, P.O. Box 190, New Ramsis Center, Cairo 11794, Egypt.

EU-030. Klaus, DJ4JI, will be active as OZ/DJ4JI from Bornholm Island, March 5-10th. Activity will be on 80, 40 and 20 meters, SSB only, running only 400 watts with a Swan-350 transceiver. QSL via his home callsign, either by the bureau or direct to: Klaus Helmbrecht, Schuhhof 4, D-38640 Goslar, GERMANY.

EU-038. Operators Jeroen/NL12339 and Will/PE1OPM will be active as PA6WAD from Ameland Island, May 7-14th. Activity will be on 80-10 meters, including the WARC bands, using SSB and RTTY. QSL via NL12339: Jeroen Reijerkerk, P.O. Box 42, 4724 ZG Wouw, The Netherlands.

SA-020. A French group and a OE3 will activate Royale Island (DIFO: FY-008, WLOTA: 0911), French Guyana, as TO7C (See OPDX.686). Activity will be on 160-6 meters CW/SSB/Digitals. QSL via F9IE

Bernard Chereau, B.P. 211, F85330 Noirmoutier en l'Ile, France.
Visit their Web page at: http://to7c.free.fr/traficuk.html

HAMVENTION ACTIVITY (Dayton). "Dayton Topband Dinner" announcement:
All 160 meter enthusiasts are cordially invited to the Topband banquet to be held on Friday night, May 20th, of the 2005 Hamvention in Dayton, at Neil's Heritage House Restaurant (2323 Schantz Ave, Dayton, OH -- Map on request). This annual event brings together 160 meter operators from around the world for food, drink and camaraderie. This year, George, K8GG, has agreed to assist and will be taking reservations. Social hour is at 6:15 PM (cash bar) and dinner at 7:45 PM. Dinner entree choices include: Breast of Chicken Supreme, Broiled Salmon or Roast Sirloin of Beef (includes salad, rolls and butter, dessert and beverage). The cost is 29 USD each which includes the complete dinner, taxes and gratuities. Make your dinner choice selection and reserve a seat with: George Guerin, K8GG, 675 Riverside Drive, Battle Creek, MI 49015. His E-mail address is: gmguerin@voyager.net
Paid reservations must be received by May 1st. Overseas attendees may pay at the door but need to reserve by E-mail in advance of May 1st. "Looking forward to seeing old and new friends...73" George/W8UVZ & George/K8GG

IOTA DINNER ANNOUNCEMENT. The 10th annual Islands On The Air (IOTA) Dinner will be held Friday, April 15th, at the Birch Room of the Holiday Inn Hotel and Conference Center, 9000 W. Airport Drive, Visalia, CA 93277, in conjunction with the 56th Annual International DX Convention. Scheduled presentations are:
"IOTA-Going Online" by G3ZAY
"Ascuncion Is (NA-164) & Santa Ines Is (NA-165)" by N6VR, XE2K, and N6JV
"Battle Island (NA-044)" by AD5A
"Rennelle Island (SA-094)" by K9AJ & KD6WW
(Other programs may be added as time permits.)

The dinner is available at a cost of 21 USD/person off a limited dinner menu that offers a main entree choice of New York Steak, Red Snapper, or Chicken Cordon Bleu. Each meal will be served with salad, vegetables, dinner rolls, desert, and a beverage (coffee, ice tea, or water). Reservations are not required, but seating in the Birch Room is limited to about 120. This event is open to all radio amateurs and spouses/families are encouraged to attend. There is no charge to attend and watch the programs (there will be door prizes provided by the IOTA sponsoring organization, the Radio Society of Great Britain, RSGB). For additional information regarding this event, contact: Jim Zimmerman, N6KZ, 2316 W. Dallin Street, Lancaster, CA 93536-5702 -- (661) 945-6539 -- E-mail address: Jimzim1@mindspring.com

JW,SVALBARD. Francois, F8DVD, will once again for the 10th time be in Longyearbyen between April 4-10th. He will use the callsign JW/F8DVD from the local ARS station. Activity will be on all HF bands, mainly on SSB. QSL either via the French REF Bureau or direct (with 1 USD or 1 IRC for Europeans, 2 USD for all other areas) to: Francois Bergez, 6, rue de la Liberte, F-71000 MACON, FRANCE. His E-mail address for

Bureau QSLs is: f8dvd@qsl.net

KH8, SWAINS ISLAND (Update). Remember to look for members of the American Samoa Amateur Radio Association (ASARA) to be active from Swains Island (IOTA OC-200) March 2-6th. Operators will be Kan/JA1BK, John/K1ER/KH6, Tet/JH1JGX/AH7C, Yuichi/JR2KDN, Paul/F6EXV, Jim/N9TK, Burt/W0MY (ex-W0RLX), and have added Dianna/KB6NAN and Phil/W9IXX. The callsign will be KH8SI. Activity will be on 160-6 meters on the usual DX and IOTA frequencies. Modes will be CW, SSB and RTTY. They will have 4 complete HF stations with amps and 4 HF yagis (2 CW and 4 SSB). They will also have at least one station on for the ARRL SSB Contest. OPDX was informed that Dianna will be active on 6 meters and possibly the ARRL SSB Contest. Suggested frequencies are:
CW - 1822.5, 3505, 7005, 10107, 14025, 18073, 21025, 24895 and 28025
SSB - 3795, 7080, 14195, 18140, 21295, 24930 and 28495
RTTY - 14088 kHz
6m - 50110 kHz (CW/SSB)
Pilot base stations are: AH8LG, WA2MOE, JE2EHP and KH6BZF. QSL Manager will be VE3HO: Garth Allistair Hamilton, P. O. Box 1156, FONTHILL, ON L0S 1E0, CANADA. For more details, maps and pictures, visit the following Web page: http://www.swains-island.org/
ADDED NOTES BY EDITOR: Over the past week, there has been some interesting dialogue exchanged between the ARRL and the ASARA (as well as the DX community on the InterNet). The Leagues position right now is: "Contacts with KH8SI operating from Swain's Island will count for American Samoa for DXCC purposes and for OC-200 for the RSGB's Islands on the Air (IOTA) program." It is recommend for interested DXers to read the following Web pages to draw their conclusion about whether or not Swains Island should become a new entity.

ASARA's "Rough Road to IARU"
http://www.swains-island.org/roughroad.htm

K1ZZ's "White Paper on American Samoa and Swain's Island"
http://www.arrl.org/announce/American-Samoa/

ASARA's "Response to ARRL Whitepaper"
http://www.swains-island.org/swainsreponce.htm

WH8, AMERICAN SAMOA (IOTA Op). Paul, F6EXV, informs OPDX this past weekend that following the KH8SI operation he will remain on Tutuila Island (OC-045) at Larry's, AH8LG (ex-KS6DV), QTH and operate WH8/F6EXV until March 19th. Paul states, "Larry and his charming wife Uti, KS6FO, are to be thanked for their superb, friendly and nice hospitality -- they truly show the real ham spirit, and the warmth of Pacific islands inhabitants." Activity will be on all bands, mostly SSB (some CW) on the usual DX frequencies. QSL via his home callsign (see QSL directions tab on his Web page). His Web is: http://www.f5kbw.org/pagesperso/f6exv
ADDED NOTE FROM F6EXV: The old logs of the following callsigns are online on his Web page: F6EXV (up to date), 4U9U, 4U/F6EXV, 7O8AA, 9Q5EXV, 9X5DX, FO5OO, ZA1ZMX, ZA1ZVX and ZA1ZXV. The log from his WH8/F6EXV operation will be uploaded about once a day directly by himself from AH8LG's place.

PIRATE ALERT. OPDX has been informed that a station signing OH0/OZ3GF has been active, especially on lower bands (80/160m), is a pirate. An official from the Danish IT Telestyrelsen reports that OZ3GF is not a valid callsign and has not been valid since April 14th, 2000. Do not send QSL cards via OZ bureau; it will be returned.

PJ2, NETHERLANDS ANTILLES. Joeke, PA0VDV, is now active as PJ2/PA0VDV from Signal Hill, Curacao (SA-006), until March 23rd. His activity has been mainly on the WARC bands CW, with some operations on 15 meters. QSL via his home callsign.

PJ4, NETHERLANDS ANTILLES. Peter, PA3CNX, is now active as PJ4/PA3CNX from Bonaire (SA-006) until March 14th. Activity will be on all bands 80-6 meters CW/SSB. However, his operating times will be limited due to his holiday activities and wife. His antennas are a Force 12 Sigma 5 vertical and a FD-4 Windom. The rig is a FT-857 with 100 watts. QSL via the bureau or direct (QRZ.com).

QSL INFO AND NEWS.....
QSL 6I2CQ via XE2CQ. Activity was during the CQ 160 Meters SSB Contest. Operators were the "Los Locos Del DX Gang" consisting of XE2ED, XE2K and XE2CQ.

Juan's, EA9IE, active on this past weekend's CQ WW 160m SSB Contest, reports that his logs will be available online at: http://dx.qsl.net/cgi-bin/logform.cgi?ea9ie

NEW QSL MANAGER. Ralph, K2PF, reports, "Starting immediately, I will handle QSL cards for KH6YY."

VK9LA AND VQ9LA CONFUSION. QSL Manager for VK9LA, Bill, VK4FW, reports "many many" people are getting confused between these two callsigns. He has been receiving many QSL requests for January and February operations. The station being worked is "NOT" VK9LA but in fact VQ9LA. PLEASE LISTEN CAREFULLY.

QSL YI9VCQ via N3ST. Activity was during this past weekend's CQ WW 160m SSB Contest.

S7, SEYCHELLES. DDr. Karl, OE3JAG, is expected to be active as S79JAG from Mahe between July 22nd and August 7th. This will be a DX holiday style operation, and Karl will be using a FT-817, running QRP, with random wire and dipole antennas. Look for activity on the following suggested frequencies:
CW - 14020, 18070, 21020, 24890 and 28020 kHz
SSB - 14190, 18140, 21190, 24940 and 28190 kHz
RTTY - 14080, 18100, 21080, 24920 and 28080 kHz
PSK - 14070, 18100, 21070, 24920 and 28070 kHz.
QSL via OE3JAG: DDr. Karl Jungwirth, Adalbert Stifter Strasse 25, 2232 Deutsch Wagram, AUSTRIA - EUROPE. Further information can be found on Karl's Web site at: http://www.oe3jag.com/

SPECIAL EVENT AND IOTA ACTIVITY. To celebrate the 30th anniversary of the twin cities of Itterswiller in Alsace and Brehat, operators Laurent,

F5AEG, and Frederic (new French operator waiting for his licence), will be active as TM3OBI from Brehat Island (EU-074) from May 4-8th. They will be active on SSB, RTTY and PSK31 on 80-10 meters. QSL via F5AEG.

SPECIAL EVENT. Boyan, LZ1BJ, BFRA HF Manager, informs OPDX that special event station LZ800AB (Lima Zulu Eight Zero Zero Alfa Bravo) will be active on all bands and modes between March 1st and April 30th to commemorate 800th anniversary of the Adrianople Battle (April 14, 1205) in which the Bulgarian army led by Tzar Kaloyan defeated the Latin Knights Army led by Emperor Baldwin of Flanders. QSL via the bureau to LZ1PJ or direct to: BFRA, P.O. Box 830, 1000 Sofia, Bulgaria.

ST2YJ NOW QRT. Hugo, LA5YJ, informs OPDX that he is now back in Norway, and that ST2YJ for the time being is closed down. He states that he made about 4900 QSOs with 136 countries inbetween a rather busy time schedule, and his X-mas RR on 3.5 to 28 MHz. Hugo states, "Would loved to work more but the time was rather limited." Logs were uploaded to e-QSL. Cards are now printed and ready to go. He adds, "As you may have discovered all QSLs for ST2YJ are going to LA4YW and only for ST2YJ. The XU7ACW, 9N7YJ and MI0YJR QSLs go to my home call LA5YJ. Do not try to add these cards to LA4YW. That is a waste of time and money. And please, guys, all direct QSLs must be with a SAE and 2 USD or 1 IRC. All others will concequently be returned via the QSL bureau." Hugo states, in most cases, it will take about 6 months to 1 year to send QSLs through the bureau from there.

SV5, DODECANESE. Willi, DJ7RJ, will be active as SV5/homecall from the Island of Kos (EU-001), between February 28th and March 19th. Activity will be mainly on the lowbands CW/SSB. QSL via home callsign.

SV9, CRETE. Stelios, SV9FBM, will be active in the upcoming CQ WW WPX SSB Contest (March 26-27th) as a Single-Op/All-Band/High-Power entry. QSL via his home callsign.

TF, ICELAND. Sigurdur, TF3CW, will be active during the ARRL DX SSB Contest (March 5-6th) as a Single-Op/Single-Band (20m) entry. QSL via LX1NO.

TT8, CHAD. QSL Manager Dennis, PA7FM, provides OPDX with the following on Michael, PA5M, who originally should have been active by now as 3Y0X, but as we all know, has been postponed to 2006. Michael will become active from Chad (TT8) in the upcoming week. The callsign to be used is not confirmed yet. He will be operating all modes, including RTTY and PSK this time, when time permits. He will use a FT857 with 100w into wire antennas or a vertical (or whatever might be available locally). There is already a Web site online at: http://www.pa7fm.nl
ADDED NOTE FROM PA7FM: Concerning all of Michael's previous operations, there's no QSL backlog, and cards arriving will be answered as soon as possible. (YI/PA5M, 9U5M, ST2DX, 5U7DX, TZ6M, TY5M, 9N7M and LU/PA5M) All logs can be found online on the above Web page. Both direct and bureau cards will be answered.

V2, ANTIGUA. Bob/W4OWY and Mark/W9OP will be active from here between March 14-20th. Activity will be on 160-10 meters. However, their focus will be on 160-30 meters. QSLs go to their home callsigns.

VU4 NEWS.........
* QRZ DX reported this past week that Bharathi, VU2RBI, has been named recipient of the 2nd Annual Lynch Memorial Award given by the Tokyo International Amateur Radio Association. The press release states: "Bharathi Prasad, VU2RBI, recently became famous in the ham world for her DXpedition to Andaman Island after 14 years of wrangling with Indian bureaucrats. Shortly after that, she became widely known outside the amateur radio community in India and abroad for her heroic work on-air in the aftermath of the Indian Ocean Tsunami."

* Bill, W4WX, has received a QSL status of the VU4 cards from Mohan, VU2MYH, this past week. Here is what he received:
"The QSL cards are already printeed and out going QSLs will be mailed after 8th March. The VU4 QSL cards release is likely to be done on 2nd March through the hands of the Mr. Dayanidhi Maran,VU2DMK Hon'ble Minsiter for Communication and Information Technology at a function in New Delhi. We have already labelled each QSL card received each day. The cards will be sent on First In First Out basis at the Bureau."

YO DX HF CONTEST (Scores 2004). Chip, N2YO, informs OPDX that the final scores for the YO DX HF Contest 2004 are now available. They can be found on the Romanian Amateur Radio Federation Web site at:
http://www.hamradio.ro/contests/yodxhf2004/

ZK2, NIUE. Murray, VE7HA, informs OPDX that he and his wife Konomi are in ZK2-land now and he has his station on-the-air. The callsign issued is ZK2HA (not ZK2ML as previously advised). Murray states, "SSB response on 20m has been good, but I haven't had much luck on the higher frequency bands yet. Conditions just aren't there. The vertical is installed about 200 metres from the open ocean on the northwest corner of Niue Island and about 3 metres high at its base. Therefore, I was able to install 14 raised radials for the 7 bands it works on. The Steppir BiggIR's ability to be retuned remotely in a few seconds is a great feature for portable operation. Niue avoided the three cyclones that have hit the South Pacific in the last month. Though American Samoa was hit badly by Cyclone Olaf as was the Cook Islands, we had nothing more than some wind and rain. We still plan to be here through to the end of March. I look forward to weekend contests when lots of stations are on with good signals."

more often.... ;-)

1054. Tower ID

Newsgroup: rec.radio.amateur.misc
Date: 2005-02-28 00:26:41 UTC
From: Win <w0lz@winlyn.us>
Message-ID: <r7p4211var47u82f2sirnvplr7oaro5pi1@4ax.com>
Source record: 53376

I recently purchased an old crank-up motor driven 60 foot tower that I would hope someone could id for me. The motor belt drives a gearbox, which turns the cable pulley. It has a approximately 1 foot by 18 inch control box which has two high current relays and two glass contained relays. The glass-contained relays are in old 8 pin tube sockets.

The tower, itself, is in good shape. I would like to re-build the control circuits and out the tower in service. Any information anyone can give me on this tower will be greatly appreciated. See at www.winlyn.us/tower.jpg.

Win, w0lz

We'd like to invite you to join our free
WORLD SCIENCE e-newsletter, which
contains some of the world's most exciting
science news and photos long before they're
in the papers and magazines. A sample
newsletter is below.

To join, just send an email with "subscribe"
in the subject line to:
neutrino750 @ yahoo.com (remove the spaces).

The newsletter, sent out about every 3-10
days, contains short summaries of our new
stories, with links to web pages containing
the full stories. It's free: no pop-ups, passwords,
spam, or gimmicks -- that's our pledge! The full
story pages do contain small side ads (non
pop-up), which are what supports our news-
letter. YOU pay nothing ever. You can cancel
anytime simply by replying to a newsletter
email and typing "unsubscribe" in the subject
line.

Below is a sample newsletter. It doesn't
contain the full story links because we're not
allowed to provide them here, but the real
newsletter will contain working links.

****
LAST WEEK'S WORLD SCIENCE EMAIL
NEWSLETTER

* Possible dinosaur-bird missing link found:
It's not the first bird-like dinosaur ever found --
but it is the closest yet found to the actual
dinosaur ancestor of birds, researchers say.

Click here for full story (link will work in the real newsletter)

* Science in Images - A more life-friendly Mars:
Most Mars photos show a rocky, dry-looking land-
scape. This is another view: an area of the planet
that researchers think might have once been
habitable. They plan to explore further.

Click here for full story (link will work in the real newsletter)

* Another record: biggest blast ever in our
galaxy:
The most powerful explosion in our galaxy ever
recorded occurred recently when an exotic star's
magnetic field snapped, astronomers say.

Click here for full story (link will work in the real newsletter)

* New robots walk nearly like humans:
An older robot does it too, but it used 10 times as
much energy as humans do, researchers say; that is
changing.

Click here for full story (link will work in the real newsletter)

* Brain doesn't have universal language rules,
researchers claim:
Some researchers argue that language is more like
a creation of itself than a creation of our brains.

1057. fun on .54 last night [Phoenix Arizona]

Newsgroup: rec.radio.amateur.misc
Date: 2005-02-28 20:21:12 UTC
From: N7ZZT - Eric Oyen <n7zzt@127.0.0.1>
Message-ID: <E2LUd.12$Ke.6@fed1read03>
Source record: 53379

well folks, it was a bumper crop of heat and discontent on 146.54 in the phoenix area last night.

the cause of the music carriers and other non-sense stemmed from an actual "emergency" call that took place earlier in the day. The individual that was causing the problems basically wanted to call 9-1-1 immediately without first ascertaining the nature of the problem. as a result, he got lectured on proper emergency procedures by another on frequency.

The end result was that he started name calling, insulting others and ended up decalring a war of carriers on the frequency (malicious interference with intent). This problem continued well into the evening when it finally subsided.

the biggest problem I saw with this was a lack of proper training on the part of some people to deal with emergencies (and I have dealt with many as part of the red cross, the Maricopa county emergency services corps and others). A little common sens would have gone a long way and prevented the debacle that occurred last night locally.

The fact of the matter is, no matter how good the intentions, there are just some folks who really don't have any business being on the air. they treat ham radio like a glorified toy, not the service that it can be.

sigh

Hi.
I see there's three campgrounds that are advertised for Dayton. Can anyone help with the best location? We have a truck to drive to and from with, once we get there and dis-connect from my travel trailer.

I'm looking for advice from a few seasoned Dayton campers for the best campground, that allows a little a fun on site. :)

(sorry for the x-post)

FYI: moparholic@hotmail.com is a freebander who operates amateur gear
without a license. He is coming to Dayton to sell cb amps.

The only amp I will have will be in my truck. I'm going there to buy
stuff, not sell. I appreciate quality gear, and Dayton is a fairly
good place to shop.

At any rate, I'm still looking for the camping advice that I asked
for when I started this thread.

If you don't like me, don't stop by for brats and beer. k?

At least he's honest about it, he's going there to buy gear to USE
ILLEGALLY on freeband. lol.

True, as that is the age group of hams today. They drove the
young kids away from ham radio years ago.

KC8LDO Lookups: 18331

Pathetic. CBers are like groupies with their favorite hams. Powerless
to do anything else I guess. LOL

Being a "ham operator" - especially but not limited to a "newbie" - does NOT make "all" proficient at radio communications "especially" in an emergency. That operator who was "trying" to help out - would have been better off to just relay what they knew and let someone more experienced take over. Many Ops are Firefighters, EMS, Police or the like and know how to size up a situation and report accurately. Many more are not in that bracket. To have allowed and even worse - to jump in to add to the fracas.... is not only unbecoming of/to the Amateur - it is of the person as well, for their show of lack of responsibility and so on. Not only for their license, but to show others who may be listening, how inconsiderate, impolite, unprofessional - they can be. Anyone listening to a scanner with any wishes of becoming a Ham, they may have just said to hell with that!

We had an emergency here years ago. One operator "trying" to help, was giving information, but it wasn't relevant to our needs. I called him on the phone to explain why. But I also thanked him for his assistance. Another operator - totally lost it on the air. We had to get him to sign off and just stay off the radio. He was no good to himself or others to assist. The stress of the situation got to him. He wasn't swearing or fighting, he was just talking incoherently about the situation - taking up air time while offering no help.

So..... The control operator does need to take control, however, that doesn't stop some from acting like an ass and over riding his signal to do as they damned well please. "IF" you're going to help, make sure you CAN. If you can't or have nothing more to offer, back away and let those who can - do it. I don't know how big that situation was as referred to that started this post, but if that was small, just think what will happen with a bigger one. TOTAL CHAOS.

The last thing any of us need is an argument in the middle of or after a situation - to make enemies. People who you may need down the road. The thing to do is CRITIQUE. Done in a way as not to "point fingers". But - what happened and how can we avoid the problems the next time. Those who KNOW - should perhaps call a class together and teach the proper technique.

Be it a radio, telephone, etc.... not all have the gift to report - especially in emergencies... we can't assume they do. You do have to keep one thing in mind... if they're trying to help, you need to thank them for that help. Often, help is hard to come by - trained or untrained.

cl

You're kidding? right?

I thought I mentioned that this was a SIMPLEX frequency (if not, I do now).

What control Operator. there is no such thing on simplex (so far as I know)

the difference between intelligence and stupidity is that intelligence
has its limits.

well, none of the folks involved were newbies (that I know of).

most were Amateur Advanced and/or Extra (I am one of 10 "no-coders" that
usually lurks and perhaps has a few conversations).

The radio op in question hanging the carriers and generally making an ass of
himself has been a licensed ham for a better part of the last 7 years. He
is also 15 years my senior (age wise). I think the only common denominator
was that he was an 11 meter operator before then (as was I prior to 1994).
However, he still operates the 11 meter band (I don't have the equipment
here to do so, nor do I wish to return to that "diaper band").

He seems to treat ham radio like CB: as nothing more than a glorified toy.

I was always a bit more serious myself (having seen what ham radio CAN do in
the right hands).

uh yeah. sounds like he needs a little training. I have seen a few hams do
that as well. proper preparedness training often will help to alleviate the
stress.

yes, training does help! Personally, I wish we had a requirement (albeit an
unofficial one) that all radio ops get a minimum of training to deal with
certain problems (such as emergency calls, disaster relief, etc). if we, as
a community, do this, then it will look good for all of us (it would be
nice to have an entire community of professionally trained ops that can
handle any problem, now wouldn't it?).

Patient Assessment
Axis I 300.11 (classic conversion V disorder) Axis II 301.6 (dependent personality disorder, with avoidant features)
Subject has strong histrionic component to his personality and a strong need to be the focus of discussion and center of attention. Subject is immature, dependent, selfish and extroverted, resulting in passive/agressive ego attachment. Subject rarely expresses overt anger and hostility, embracing passive-aggressive or passive-dependent dependencies. Subject displaces suppressed emotions onto physical complaints. Subject suffers from a variety of conjured maladies from which subject derives considerable secondary gain, validating his inability to respond to daily responsibilities and normal occurrences associated with everyday life. Subject sees himself as normal and responsible, just not functioning well due to physical limitations. Subject denies possibility of psychologoical conflict as possible source of his problems.
Subject expresses delight in agitation of those which he associates as belonging to his realm.
Subject demands sympathy and attention from others. Subject maintains he does not command the respect he deserves.
When confronted in group therapy concerning issues other group members may have regarding Mr. Hall, repression and displacement are invoked as a primary defense. Subject does not see himself as emotionally dependent, despite family member reports of the need to "walk on eggshells" around him. Subject has few close relationships, those of which are co-dependent in nature.
Mr. Hall expresses traits of a classic schizoid patient. Possible borderline malingering hypochondriac. Subject expresses strong deficits in communicative skills and is prone to lending himself false support.

This patient was brought to my attention upon a family intervention conducted by my esteemed colleague, Professor _____ of the Forensics Psychology Department at _____ Hospital located in Philadelphia, Pennsylvania. Swore and bound to me upon this day of our Lord____. ___, 2005.

Subject: David T. Hall Jr.
Observation: Denial, paranoia, obsessive. Possible bi-polarity.
Assessment: Personal issues continue to
Prognosis: Fair.
Recommendations: Continue group therapy 3X week. Maintain current level of rx. Type, cross and evaluate for possible Lithium candidate (90 days).

Quite glad I wasn't in there, but why didn't op "A" just dial in one of our many 2M 911 emergency autopatches and call away? In my experiences the 911 operators are clearly authoritative on deciding what is and what is not an emergency. I generally consider that if you have the time and inclination to debate whether it is, or is not, an emergency, then it is NOT. If it IS a life and property imminently in danger, then "etiquette" should be a post mortem (no pun intended) task.

Of course there is really no excuse for baby-band behavior of "my carrier is louder than yours" or "I can talk longer than you can". Oh, wait, that's what our U.S. Senators do.

Perhaps I missed that (simplex). I may have just assumed it was a repeater
since most new guys/gals only operate that way on VHF.

http://radio.indymedia.org/uploads/psychological-warfare_.mp3

/ / "why should we afford the same liberties and privileges of
justice to the Taliban. Like why should we give them the same
rights we afford ourselves. They're the bad guys. Why do we want
to do any favors for the bad guys." And really that's an
irrationalism. And yet, it was there. You know, people go "you
don't need any evidence, what do you need evidence for, they're
guilty." And the rational, TRUE AMERICAN PATIOTS, would go, "no,
no, no, that's wrong. We want to actually follow the crimes scene
leads at the real murder scene to arrest the true evil doers." \ \

http://radio.indymedia.org/uploads/psychological-warfare_.mp3

/ / [Bush] wants to get rid of this, evidence requirement to convince
ourselves of something. You know he's just going to live in his
own fantasy world, while WE suffer the consequences for not
speaking out for our equal rights to be heard, on these CRITICALLY
important issues. Particularly when it comes to war. CNN they
don't want to commit ourselves to covering the facts impartially,
In fact they will work to mislead you soldier. not only will they
not tell you about the hazards of depleted uranium, But they're not
even going to tell you about these outragious crimes that are being
committed [IN YOUR NAME] \ \

Please, I beg you, on behalf of my Humanity,
send this post to a Church for God of your choosing.

After making my defense public regarding an unshackled word, I
realized they have decided not to attempt to convince a jury, that
"sanctioned" acts, within any erotic depiction that were in my
possession, were not then therefore proof, that I would condone
myself such, as a twisted behavior in reality. [Ah, but how many
others falsely have?] And, two, the total of images, that will be
used against me has totaled to approximately 2300 of the 37,333
jpgs that were in my possession, 2300 to be argued, depict my life
in an unfavorable light. Such as "Ukrainian nymphs"?, and Home
Lolita. The Prosecution who would like to see me serve major

penitentiary time, [more than two years, along with psychological counseling on my appreciation of the female form, and my desire to know what is going on in the public domain as a political writer of the workings of, the human mind, sexuality, and the sadomasicistic victization of the innocent. Among other things. I believe the prosecution will SUGGESTIVELY use a statement that will be made from a NSIS agent, suggesting, he felt, there were -000 images he had chosen to be considered for indictment. A number that would must include every depiction of nude adults, fashion models, and French fries. The SAME individual who will also say, after reviewing all my writings, he found nothing that would indicate a legitimate threat against the original complainant, Our Mr. George W. Bush. Yeah, gee, let's make sure a jury doesn't catch on who Johnny is as writer of our world, and to what is truly going on in the court room of our laws we guess.

In my mind, there are maybe, roughly, 10 to 12 images, [deleted or otherwise] that could be argued as criminal depictions. Depictions I did not ever distribute, or even would have left without Deletion, THROUGH CONSIDERATION.

--

Oh my God.

This is the information regarding my criminal matter. I will tell you however, most of the intelligence officers I have spoken with, are not in disagreement to what I am doing. Not all though. I figure all I need is some media exposure regarding my position, and the result I believe, will ultimately bring to real justice, those responsible for 9/11, and the reversal of the un-American Patriot Acts. I have nothing to hide, and am completely open to any questions. I have big dreams it's true, but my dream, is where all Peoples are granted equal rights under the law, and where investigating journalists, are as straight forward and direct as you could be. I just finished the last day of my preliminary trial, where the video tape of me speaking on 9/11 briefly, was cursorily debated whether it was truly given voluntary. (the two Bush fan officers lied to me that I would be able to address the uncontended, standing irrespective of opinion documented evidence against the Bush regime, publicly reiterating what I freely spoke with the NSIS-RCMP and the secret service on, and instead, attempted to twist my/their comments on pornography, while ending the recording prematurely in midstream of me speaking. Speaking thus: On the fact that, using no crime scene evidence was the "top secret" documented plan reported on by MSNBC, a plan in writing used by the Bush regime, as a prerequisite strategy to gain access into Afghanistan. The Judge found the officers were playing "tricks", lying, but apparently, sighting a ruling by some other judge somewhere, this conduct was perfectly acceptable for our justice officers to practice in attempting to go after the found

guilty we presume?. The two police officers fundamentally undercut our national security interests, by turning out to be, as they confessed during my arrest, to be big bush backers, and in direct opposition regarding my public position on Afghanistan. I do believe however that Justice, as truth, will win out in the end.

The true American Patriot,
your friendly stranger,

Johnny Wizard

If you do not attempt to forward this document to anyone, and everyone else sides the same as cowards, my freedom will be stolen by the will of bushite, and our world will loose my ever valiant presence as sworn eternal defender. Not good.

You
decide.

--

Synopsis: I had been writing critically of the Bush Administration, when the Secret Service top secretly requested I be arrested for threatening the life of George W. Bush. They tentatively planned to have me arrested under the Mental Health Act to avoid a public criminal proceeding, but however during the process, I managed to publicly speak on local Manitoba radio for no less than forty hours regarding Bush in total, and was also well known throughout my community involvement in live theatrical productions I've been a part of for more than a decade. [I was Renfield in a stage production of Dracula, and I think I might be saved the cutting room floor in Woody Haralson and Robin William's new flick, "White Elephant" (I played a drunk white elephant.]

Hi everyone.

As many now know, through a bogus top secret warrant requested by one person at the secret service, passed to one Cnst. at the National Security branch of the RCMP, I had my computer property seized, not for the reason stated in the warrant, but to allow a trial/witch hunt to take place, in attempts to incarcerate me for a lengthy prison stint at the will of two self confessed ex-military bushite bombing, child porn pushers. When being arrested, I was asked if I would make a statement on the contents of my computer, I could then also use the opportunity to talk about the evidence against ------ -. ----. I agreed, but now the testimony ends abruptly before the actual closing. While the bogus warrant will be refused by the courts to challenge, as it has been deemed irrelevant, as a completely separate matter. You know?, how I come about to be in the, potentially life depriving court room? I can only pray a public jury will consider something fishy is afoot as foul play, when the matter isn't even allowed for our discussion as hugely relevant.

/ / As for written material or visual representations that advocate or counsel sexual activity with a person under the age of 18 years that would be an offence under the Criminal Code, the requirement that the material "advocates" or "counsels" signifies that, when viewed objectively, the material must be seen as actively inducing or encouraging the described offences with children. \ \

What is it in you, to judge such material as actual, to not then have it immediately taken to your own self as an automatic change in personal judgment? When you read of a faulting murderous character in a Ramsey Campbell book let's say, does such insight created, make you less capable in discerning you own deciding factor? The living state of fiction, is to remain as it always has, an unbound canvass of art through imagination. Johnny says: book burning is always wrong. In my case for one example of many that could end becoming thousands, the expert of experts, states without equivocation, a fully developed ample breasted 22 year old, with her shirt off, is between 10 and 12. And, through what they call "collateral" images, any legal nude picture of adults with claimed youthful features, or completely clothed children laughing, can be thrown on the heap of total to totals as an overall picture of my depraved character. Do they include my fantasy art collection? My movie poster collections? Animals from the wild? My guitar playing? My drawings? Or my written works regarding the documented crimes of the traitor, George W. Bush Jr.? Or how about, the picture of the Talliban sign in Afghanistan stating, selling heroin is against Allah's interest, so stop doing it cause it is officially outlawed everywhere here forever now, but for where the lying bush backed Northern Alliance partners are. The two ex-military cops involved in my case, are confessed supporters of the war action of indiscriminate bombing in Afghanistan. How can that be so? Only through the silencing of truth in our media circles, with their avocation of censorship in regards to me publicly speaking, do they escape public ridicule as dummies of the state in confusion.

The prosecution is seeking major penitentiary time on this first time offense, considering all the human rights positions I've fought heavily on a continuous basis internationally for the last seven years or so while discussing the inner workings of the human mind, and then there's the CRIMINALLY sadistic torturers I've advocated the personal arrest of, and then of course there's that, as everybody knows, bravely fighting global tyranny by bringing forward the documented, standing without contention crime scene evidence, regarding un-accountable as "lawless" George W. Bush's complicity in the crimes of 9/11 thing. [See, there can only be one Lawless, and that's spot is already taken by the one and only Lucy.]

As I've stated, Usenet services do not allow any participator in viewing imagery, without firstly, downloading the images. So, if your like many, you simply participate in using it's services, (of

which I'm unashamedly the largest in the history of Humanity as political contributor) and download something you would offer for immediate deletion if some phony cops with a phony warrant had announced they were coming on a fishing trip to see what they could nab you suggestively with, (all done 'secretly' to stop you speaking truthful about the documented crimes of George W. Bush Jr.,) is still not good enough though, because even if you didn't witness their 'professional' depictions offered, and just deleted everything glorious and beautiful, (just to be on the same fearful side of irrational totalitarianism), you'd still be charged for cleaning up your room to convey a good public impression. While child porn relationships are broadcasted on the national news to impressionable viewers. Again!, not to outlaw criminal DISTRIBUTION by practicing protections there, where factual evidence would be crucial in determinations, let's say with a cop full time monitoring a Usenet server, but no, as like in my case, a few offensible images, along with un-ending falsehoods on the age range of us consenting adults, or children being beautiful as clothed, or in swimsuits. I had 37,333 images of every description imaginable. And weather you know of everything on your, information warehouse of a computer system, guilty or innocent, the information system is still to be found worthy for police auctioning with the potential loss of your loving family, and the tentative spot on the greatest teacher achievement awards ceremony. Remember, rarely does anyone try to defend themselves on such charges, due to the fact, demonizing such individuals in our new bushite culture, is done before a criminal case is even heard. [like with 9/11 and Jay Leno] This is why I try to articulate my position now, before they perhaps, deny me an ability to speak in my own defense. I've spoken to a few lawyers, and almost none of them want anything to do with me, for my lack of big money, and the blatant fascistic nature of the, use to be, top secret warrant that the Crown can not possibly be un-aware of. Besides, in honesty, I am most capable of speaking in my own defense, if granted the right to say as much in normal speech. I don't know the precedents, however I'm learning, I don't know the tricks of the trade, but I'm counting on a human jury, and a little bit of public scrutiny. Does the Court support the ends and means of Justice, to not offer support to the 9/11 investigating FBI officers, by having me quickly silenced on their behalf through incarceration? I fear, if I am denied a public platform to express my defense, I will be railroaded into a situation where I will be refused an opportunity to speak openly. So, I come to the world now, as a safety precaution, to insure any attempted demonization of my better name later, will at least have this out here to counter measure. Please forward this post to someone somewhere please.

/ / Section 163.1(6) creates a further defence for material that serves an "educational, scientific or medical purpose". This refers to the purpose the material, viewed objectively, may serve,

not the purpose for which the possessor actually holds it. \ \

Under Canadian law referenced in the Supreme Court of Canada Sharpe case, it is acknowledged that if a public good can be shown, that the accused could have benefited by having witnessed questionable pornography, the crime then therefore, never really happened. (Think of it: who is the victim here?, the alleged ill thinking perceiver they want to send up the river?) The expert expert of experts regarding pornography in my case, who holds - out - official platitude after platitude regarding the personal investment he has made to advance his professional career in the illegal porn industry, comes truly from an alternate illusionary world, where everything that surrounds himself, looks like a young girl in a sexually explicit depiction. Can an appreciation for female beauty that includes nudity, be comprised of a definition outside of what someone else tells you your thinking then about committing a real sexual assault? Appreciating the beauty of people, doesn't automatically lead to thoughts of grunting sweats, like visions of cute little boys, fully dressed, doesn't turn the bushite automatically into a sadomasochistic homo, but then again, perhaps it does.

By exercising a right to perceive representations of that which is freely available, is of in itself, important to the sociologist, psychologist, concerned parent, and of course, the conceptualizing artist reflecting on our shared reality. For me however, in addition, the symbology of sexuality is a subject I've often danced with, and have even considered to hold potential solutions to why, or how, a sexually dysfunctional bushite, the enemy, can commit such criminal brutality against those they only know as innocent, (like a rapist or torturer does), while excusing it only on our lack of perceived moral outrage as the public, regarding their ungodly criminal conduct. Bushite are terrified of a free to be world, brought about by ourselves as a truth conveyor of ever lasting wisdoms. Why? One to one, we all make them as they are, cowardly weak morons, with not an ounce of manhood, honor, patriotism, or skill at independent free thinking. Their phony disguises or secret intelligence gathering capabilities, expose to everyone, their complete failures of stringing more than a few base words in the form of a question. Instead of facing their weaknesses, (as then creating an ability to become something greater,) they instead express their slavish dying hatred of a liberating People, a People committed solely to the principles of freedom as Justice for US all.

To suggest an image on my computer, could be construed to hold a explicit sexual element in the minds of some viewers, is not who my Court case is about. My case isn't about running a Girls being Girls website to attract business for some thing sly on the side. I'm not running a server for illicit materials sold as a perk to all new paying internet subscribers. It's about me, Johnny Wizard,

challenging the TRUE intent of a small few disgruntled bushite, who are in our names, standing beside me waving cuffs hidden in these shadows, appearing to work having me incarcerated by a completely bogus bushite warrant that was secretly alleged by only a single person to state, I'm "anti-government", with a proceeding, planned to put me away silenced, with mostly naked lies on their measurement for my thinking openly about this suffering world in which we all share uniquely.

Sure, It can be argued, that depictions of brutality taken during the nazi war, could provide sadomasochistic gratification to some wannabe fascist bushite bitches, but the freedom to express such films teaches us that the nazi soldier often without leadership as direction, had no true ability to respect the lives of any other. For they victimized any, as Sattler did irrationally to the entire Peoples of Fallujah, which include the now dead Marines spoken for as unimportant to the bottom line at being losers. Why must America die sacrificed for no better good I ask again, but this time, closer to an end.

Help me break into Our news media, or leave me all to fall victim to the further enslavement of the human condition.

Johnny Wizard

--

The Crown's Crown

/ / The EVIL anti-Christ "un-accountable to American law cos hees duh president" demon bush Jr., has ordered the commitment of mass murder in our names, while his enemy bush bitch cult following in the corporate news establishments, have refused our communities to publicly address the DOCUMENTED evidence made public by the FBI. Alleging, General Ahmad, bush's business partner, was "secretly" responsible for a wire transfer of 100,000.00 to 9/11's "ring leader" Mohamed Atta, and in addition, that the demon anti-Christ, Our Mr. bush Jr,, had a top secret CRIMINAL war plan in place, worked on with condoleeza rice, and implemented in part by General Ahmad, to criminally invade Afghanistan signed September 9th, 2001, provided to and reported on by Jim at MSNBC. All centered on not apprehending bin Laden, (prior, during, or after) as a prerequisite to guarantee invasion. (, to secure a liquefied natural gas pipeline for pension thievers Enron.) THEREBY, forbidding the apprehension of the true culprits through following the crime scene leads at the real murder scene. \ \

Damn. I am so desperately in need your help.

You see my friend, there are people in this world that deprive our rights to freedom, through unjust acts committed in your name, done by hiding their true intent from our public's view. One RCMP Cnst, was able to argue to a judge that my writing was anti-government,

and she needed to establish who I was, to enforce the law of, "threatening an international person". The warrant was to be made top secret, but through a miracle, was provided for my defense with a stack of bushite evil. I can successfully defend myself when speaking freely on the facts, but the Crown has deemed my voice inadmissible when it comes to anything in relationship to the bogusness of the warrant. The Crown is well aware that she holds the victims of 9/11 in contempt, but wagers, you Personally won't have the godly Humanity in yourself, to demand I face her politely, in the open, for our public good on national radio. If I try to speak of the reason I am in front of a jury, I will be found in contempt. While the very same guy who faked searching my computer for the single RCMP Cnst., was the same guy who searched my computer for child pornography. (Remember: through Usenet, images or movies are downloaded before getting to witness them.)

What did he find amongst 37,333 images?

OPENLY a woman of about 22 with fully developed breasts, is termed between ten to twelve, like of a woman's behind with womanly hips and pubic hair, ten to twelve also. And on and on and on, with those few photographs (I've seen no more than maybe 10 or 12 of), that would constitute an actual legal argument, thrown in to make it all look bad. Like a short video of a young girl standing in a bath smiling. The worst depiction they have is a video of several seconds, appearing to be a young boy being sexually fondled, but I certainly don't advocate such unbalanced behavior, believing it would be harmful in dealing with, as a growing up in through sexuality as the developing adolescent. So, knowing this then, what am I guilty of, that they are truly, as bushite, going to try to put me in prison for? Loving children? I didn't commit the sexual assault, take the footage, didn't distribute it, nor would I have kept it from deletion. Deletion doesn't even matter to these geniuses. They'll scan what you deleted, and charge you for that decision also. You can't win to continue going in silence. By continuing bushite fascist tyranny censorship for enslavement of our species, will suck for all concerned if you don't speak up for our rights denied NOW!

Think of how many curious seekers of youthful beauty out there the bushite could seek for demonization? They refuse to enforce the law regarding distribution. It would be nothing WITH A TRUE LEGAL JUSTIFICATION to block a site, or scan free public access Usenet for truly illegal materials.

But they don't.

So what the single RCMP cnst has done, is LIED about the true reason for obtaining the therefore bogus warrant, for she has refused to enforce the law on which she argued was the reason to be granted my personal belongings. The refusal of the fascist enemy bushite to charge me for the alleged criminal matter, would surely

get George W. Bush arrested, tried, and rightly executed for 9/11, and then, the war of terrorism would be over. My writings on behalf of police investigations made public, and Jim at MSNBC, along with the documented fact demon bush used no evidence whatsoever in his allegations against bin Laden while closing criminal investigations, have been deemed by the, protect the demon anti-Christ at all costs Crown, as inadmissible, along with my essays in psychology and sexuality. When receiving my computers, a Cnst. --lling was told to look for the phrase, "bush is dead", he stated because the term wasn't found, the warrant couldn't be fully carried out. The quotes however in the top secret, nobody was suppose to see it, warrant provided to the judge, were from "The Trial and Conviction of Our Mr. bush Jr.", and none of the quoted text, contained "bush is dead". Then, on top of that, when they seized my property, I told them exactly where my writing was located. And proudly confessed to stand on the principles of Universal Justice, in serving for America's best. Instead of defending our rights, they are, as cowards, and what true fascism is, attempting to help flee, those responsible for the terrorist crimes of 9/11 back in New York City. And don't you think for a second, the Crown involved in my particulars doesn't know that. An enemy of Justice is our Court in knowing directly with the evidence in front of everyone, they sell out honorable FBI officers for death, all to please the false deity G.W. for YOUR losses too my American friend. Please, again, I beg you to help my cause, the cause of every true patriot soldier, and grieving mother. To be left without Justice for Humanity in silence, is to do an injustice no real man should want to see happen quietly to another. Once I'm silently convicted, you'll be too late to help be my witness. And if you knew my mother, you'd love her too. So please, I beg you, forward this to your favorite journalist, get on Coast to Coast, get on CBC radio or on Winnipeg's local CJOB, and demand I be allowed to face the bushite false accusers wide OPENLY in our public arena. They don't let any of us on now when we speak of General Ahmad, Afghanistan, Iraq, Enron, Social Security, Health care, and on and on and on, so your gonna have to get a little more forceful with your super human will power against the melancholy return of same old nazi fascism. I shall try more from here also.

Help life out some won't yah?

--

Release the Press

In regards to Johnny's criminal charges.

Being in possession of that I know not of until it reaches my computer, puts the onus on the distributor's server to be held in the same regard equally. To argue for criminalizing the possession of materials that are granted full legal rights to be propagated, as not for sure either way then, but now that they're multiplied to

others, makes little sense. For, it only increases a problem that will end up costing the public a great deal more to deride, if the said material is found to be, without reasonable doubt, objectionable from a legal framework set of criteria. Instead, in my case, they've used every impractical assumption regarding the content of what I may have witnessed. I am beside myself dumfounded to learn a picture termed of a topless youth smiling, is a sight the officers involved wish to draw me with as evidenced pedophile. A term classified to include dehumanizing personal acts of sexual assault against the rights of actual children. This is unacceptable. And, I will not be found guilty of approving such conduct. As to other depictions of cruelty I've witnessed by information gathering, I can say without doubt to any as a seeker of injustice, has motivated me personally as a public figure, to take direct steps few others do in defense of the innocent. Unlike the two officers who are my public accusers, I don't believe indiscriminately murdering people by bombing a country brings about protections for those involved for example, and yet, my accusers proudly stated, they were supporters of such unprovoked, and unwarranted ILLEGAL criminal conduct against our children left undefended under their limited bushite haze.

Nothing will bottom this episode of my life, where as a lover of children everywhere, and a champion for human rights around the world, am judged not fit for freedom by a couple expert, pro-war "liberating" bushite bombers. [they both survived serving the military before taking up this police business as Bush supporters for lawlessness - (they PUPOSEFULLY sabotaged, the planned video recording of public evidence against Bush, that I made to the National Security Division of the RCMP in writing, and in approximately, ten separate audio recordings. [Oops...])]

The bushite bombers searched for depictions of behavior sexually impressionable readers could arguably, lose their self respect or control over, but can be found by any desperate conniver, searching in depictions of a rape scene, naked people on a beach, or in a cloud storm. So, some guide lines on how best to stop their depictions of the rights of children being breached most definitely, should be handled where the questionable material emanates, not with the quester of good taste, out looking to see what is widely, and freely, publicly available by the thousands. Again, not perceived until within the possession of the observer to witness. The classifications of all that is accepted to include in the definition of "child pornography", should not include the beauty of what it is to be nakedly human, or normally affectionate. But that is being open, honest, and beautiful, traits an advocate of tyranny through censorship will run and hide from, for they fear the private human element in our public political affairs speaking freely. Bushitism. [Think of Life, a struggling to survive for better times profiteer, and ourselves, a distant relative nobody's ever heard of till now at most.]

I've been a widely published internet psychology columnist, almost since ideas have been broadly shared as such. And my writing testifies to the subject of human rights denied, as the struggles I attempt to find, real solutions for. The artistic impressions created by the artist, like the words defined within this sentence of words, is but streaming reference points to the larger unbound projections of the manifested mind. A defined, definite conclusion on it's meaning, loses it's truer state. Recognizing the subjective relationship on communicating through media, is ultimately the reader perceiving this conclusion. It is not therefore a conclusion the reader becomes for, but is held in consideration, when creating it's over all pretext, in the form of personal insight or imagination. An imaginative state of fiction, does not preclude it from still being, a shared artistic work suspended through disbelief. I can read a fictionally exciting murder mystery, all the while knowing, the characters who suffer misfortunes, are not living worse because of me, nor to learn the reasons someone is obtusely perverse, make me then, more inclined to disrespect real living, in a similar kind. [read anything from corporate media challenger, the lover, Johnny Wizard] The actions of a character in fiction, does not compel me to give up my own belief of reality, or a respect I grant in those who protect the rights of any child, or adult for that matter. I have many written works for example from those who accolade Bush as of unprecedented prowess when it comes to believing in the holy scriptures, but come on, who believes that make believe horror show, and how did I get to know people could be so deceived without knowing the indisputable consequence of Bush's deliberate criminal actions? The opinions I hold in reference, are not opinions I just automatically except as my own without thinking for myself in other words. If America witnessed without censorship the vicious evil bombing of God's children in Fallujah or Samara, or the torture of innocent people to death by liar Bush's satanic sadomasochists, every bushite repuglicon who voiced political support for the irrational murderous acts, would be hunted down by millions of armed America men, tried, convicted, and executed in time square, that we all know for certain without room for question.

/ / Expression that degrades or dehumanizes is harmful in and of itself as all members of society suffer when harmful attitudes are reinforced. \ \

But does the witness of such a relationship, granted only to the mind of an officer? Harmful attitudes depicted in Nazi film archives, works of fiction, or artistic expression, does not every time, have us rooting on the bad guys. For if so, police officers investigating harmful child pornography possession, would be left without an ability to even discern a care for any one. But they would and do care. We can see a need, and a honor to defend the rights of children, and I can't think of a more noble police position, to try defending those principles to the best of our ability. Not infringing on free thought access of everyone because

some are arguably, more impressionable to the false view of the bushite conspirator. DISTRIBUTERS of illegal material is where the law should not be denied a place to practice. Making criminals out of what someone picks out in coffee grounds, is to say, some thoughts considered, are thoughts better left alone as forbidden when alleged thought of. That is where no god or person should be allowed to falsely determine for our selves, with what words can be thought "about", and what words can not. Of course threatening the freedom of another living individual with the law, better be based on the tangible as documented offences, otherwise, our rights wouldn't be publicly challenged for protection, but of denial. So Hammurabi came up with: A person accused of a criminal offense without any evidence is innocent, and the accuser, especially when it comes to capital crimes, is the bad guy every time. And gee, if America does that, Mr. bush Jr. could go to jail from Canada, China, or perhaps somewhere off somewhere's else where they have laws enforced against the crime of murder.

I am a behavioral psychologist, who's not only written on psychology's pillars of understanding, but also on the struggles of lawless war committed by sexually dysfunctional sadomasochists. I was interested to watch The Learning Channel's special, The Meaning of Love, a four or five part series, hosted by "The Naked Ape"'s, Desmond Morris. This world's most recognized, widely publicized human behaviorist, reporting on juvenile properties of mutual expression between lovers, lending well into nurturing a caring relationship for each other.

Therefore, is a reader of fiction regarding adult themes, going to read all about who get their toes piggy wiggled, or the professional accountant, who at spin the bottle, becomes the lucky "loser" of a sound deserved spank or two, secretly though, underneath it all, a pedophile who thinks unclean thoughts? Examples of sexual boundaries: Is not a heterosexual, secretly gay when they play with themselves that way? Perhaps a trans cross dresser? And some men may relate to this, but man, lesbians are a dream come true. But then... well, your a guy too right?

Such normal dynamics of continuous change through development within relationships, can not be denied a place, as being mutually beneficial as human in quality, (and maybe fun,) and being, private, none of our business, almost childhood like high jinx of that moment in time. But, leaves a, any person public view of definite acceptance, intolerably immature as inappropriate across the public spectrum. Publicly get into the intricacies of private relationships with your new book why don't you with the Court now John, you have all our ears a-flutter. Grandma doesn't need to know about your proficiency at.. and I'm not the same to Dick as I am to Jane, if you catch my drift.

While two male bushite, who are now helplessly stuck appearing plastered to protect Bush from arrest for mass murder through the advocation of censorship by tyranny, could quip to us being lovey dovey, means your ripe for picking on as, the soft and mushy easy push over in the corner they see. Me? This is why bushite think allowing brave men of our communities to speak openly as would be, calmly, against the criminal dictums of the demon anti-Christ, shouldn't be allowed, because they know, the world would then recognize them for the cowardice and betrayal they hold of our human spirit. A spirit that craves for all, the end to the continuing neo-con wars with the freedom to love Life for being truly ourselves. I see life everywhere, for trying to make some happiness and prosperity. If only we would listen to reasons for believing in creating a better world where life in cherished, is a world where bombs don't drop indiscriminately from the sky in God's name left for blame by the thieving liar bushite scoundrels.

The inner world of artistic creations by story line, is a world of pretend make belief, forwarded by the observer's conclusions. I am concerned to read struggles for entertainment, to include, cruelty against anyone for sexual gratification, but all literature regarding such, does not change my respect for the rights of others, especially those of children. If anything, it makes me more concerned on how respect for another can be better served by the powers and freedom of the unshackled word.

I've seen more child pornography on the television news regarding child pornography, than I've ever mistakenly got through the internet. Providing illegal depictions for public consumption, is where the law should be exercised, but it's often not on the grounds it doesn't prosecute as many. See my point? The FBI did an expensive child porn sting, running for two years in total I think it was, and in that time, they gave away tens of thousands of images to thousands of, who knows how to copy customers, that much later, the FBI would argue were illegal to have possession of. That is like a huge wasted effort OF OURS to distribute such offenseble materials, particularly if it was sold as, "teens in action", "youthful beauty", "buttercups", "a day at the dentist", or something of some sort to entrap more crime business. For our police agencies to set exact criteria on what would constitute child pornography, and scan internet traffic for such distributors, would be far more effective in halting such proliferations. They don't largely because, they'd have to be more precise in determinations, and therefore, many would lose their jobs as then redundant. By not doing so, we can pay billions to have people arrested, labeled pedophile for witnessing depictions of God's beautiful children being normal - while then pleading guilty to avoid the public tarnish such new bite revelations would bring. Destroying families, and future job prospects of individuals such as myself, who hate the thieving, murderous, ignorant as truly ungodly bushite liars to the core of my eternal being. Currently, our legal services, can't help but learn, bush did 9/11 with

General Ahmad, and are left speaking "nothing" too - in news public suits regarding the injustice they're recorded not to answer about. Instead, a couple confessed bushite, will conclude who ever witnesses depictions they suggestively reach for as inappropriate, to not possibly also, hold children, and their rights, paramount. Well, that's just simply not true. I call for the arrest of those that ran d squads against only known as innocent families including children in Afghanistan, (Tenth Mountain Division), what do the, two self confessed once blind Bush worshipping police offers, who stand as my public accusers as job requirement, have to state on that denial of our rights to cherish life and liberty? As bushite bullshiters, they don't want to answer to not presently asked public media enquiries, because being "embarrassed" sadomasochists, they then may likewise, get off on accusing community members to be pedophiles, with flimsy examples of what, in their minds, in an insult to our sworn values. Children can be beautiful, but certainly aren't, as adults, interested in being so naked, on the six o'clock news. Do they care to make a scene bigger than it first appears? Imagine me hosting the evening news and the Johnny Jamboree, hashing it out with my opponents on the tough questions, rolling with the insults and the cash offerings, while taking time to sample the world's "best" pizza an beer joints?

Or, do they adroitly believe, they'll teach that Johnny image something or two on their own behalves for our Humanity?

George W. Bush is primarily motivated ultimately with how much they can sucker out of our public coffers, thereby in spirit, advocate censorship on my calls for traitor bush's capture for 9/11.

What they are doing is this:

My "official" court case, (Involving all good people I believe) is enforcing our Law by suggesting everything in my possession can be isolated, onto itself, and made into something I'm not of entirely. All the while pretending, we ain't at all aware of Usenet servers, or my, Johnny Wizard saves the World writings of DOCUMENTED CRIMES AGAINST YOUR HUMANITY. Writings that dominate the interest of the whole investigation, locally, and internationally. But gee, without your help, two bushite "coppers" are going to appear still pressing that bush not be arrested in their contempt of silence, while praying, I not be granted a moment in my trial to speak for my own defense literally. Well, maybe not, after all, we all change with the times. My last conversation with the said two, was quite a way back when they were asked to prosecute Johnny Wizard, and likely came back with the reply, Johnny Who? So, let's not kid ourselves, my words are quite amazing when you think about it. Well, I'd hope in these last days, before this coming media flop, they've taken it amongst themselves, to get together with the loving family to discuss anyone of the hundred or two, Johnny

Wizard works of the world, and conclude, George W. Bush is truly bad news to their world's view too.

Even.

Well.. how a you been doing anyway? Are not these developing story lines to be something good going live mainstream... will we demonize the principles of Christ, in censoring ourselves like the individual person of Johnny Wizard is to be, as, being denied personal freedom by "unaccountable" George W. Bush's dictatorship of tyranny through enslavement of the human species, or, will You consider the equal freedom of a telephone call, a cassette tape recording, or perhaps, photo copier to bring us around this, we want our still living rights heard too man. Right now before we alls go it to the clink. Coast to Coast should be broadcasting for America's interest, by openly discussing the still paying costs of the bushite war crime business.

America! - bush's war is something you do not want to lose to in further dying silence. Take it from me. Be a hero. Dream of the babes! - Movie deals. Lives saved!!!

Business is business.

Look you might not care for me personally, okay, but this George W. Bush's treason of nine-eleven is an evil we together, will never, be too weak to stand against as. As indecisive humans without a leader, we will never be too few from demanding Justice be served in respect of Humanity's interest.

In nabbing those who committed treason against our America's America on 9/11, needs to be completed by firstly, following the crime scene leads at the beginning with Bush's prior 9/11 plans worked with the ring leader's financier, General Ahmad, and how Condi, rumsfeld, and Cheney with Myers, fits in the picture together as likewise traitors. The Iraq war is also a crime against humanity. All stolen monies and property must be sought, then returned to a legitimized democratic government. Torture is outlawed, and finally, all innocent people held in prisons by bushite forces, held without out charge for trial, need to be released immediately as ourselves being denied liberation truly. Let common sense prevail.

Your Kingly King of a Dreamer's dream,

seriously considering prison time to be,
a major downer for my chances at partying,

Johnny Wizard

P.S. TELL SOMEBODY!

---

for all mankind...

The EVIL anti-Christ "un-accountable to American law cos hees duh president" demon bush Jr., has ordered the commitment of mass murder in our names, while his enemy bush bitch cult following in the corporate news establishments, have refused our communities to publicly address the DOCUMENTED evidence made public by the FBI. Alleging, General Ahmad, bush's business partner, was "secretly" responsible for a wire transfer of 100,000.00 to 9/11's "ring leader" Mohamed Atta, and in addition, that the demon anti-Christ, Our Mr. bush Jr,, had a top secret CRIMINAL war plan in place, worked on with condoleeza rice, and implemented in part by General Ahmad, to criminally invade Afghanistan signed September 9th, 2001, provided to and reported on by Jim at MSNBC. All centered on not apprehending bin Laden, (prior, during, or after) as a prerequisite to guarantee invasion. (, to secure a liquefied natural gas pipeline for pension thievers Enron.) THEREBY, forbidding the apprehension of the true culprits through following the crime scene leads at the real murder scene. See, with a talk radio program we could take calls and help any others who have some difficulty in understanding the logic of reason, as super simple thinking.

So, as many know, the bush regime is FOR REAL pushing still to have me incarcerated for speaking these truths, truths that stand irrespective of my personal opinion, or spin doctoring. Will you, as a complete stranger, but a fellow lover to life, help my cause by requesting also, I be allowed to face publicly my accusers on the, censorship for bushite tyranny radio networks Coast to Coast, or CBC national radio here in Canada? Before, god forbid, a couple, once self confessed bushite "police officers" of tyranny, (death squads against school kids, happy funders of heroin pushers, and who in silence, work getting un-informed soldier teen/bushite sacrificed as the bad guys for Bush's thieving. Done all to gloriously please the fabulously wealthy, safe at home from the clutches of power, neo-con "Cabal" of enemy traitors.) get lost in the translation. The fascist corporate interests are likely not going to factually report on my trial, but attempt to demonize me with their falsehoods and betraytals against our communities, that is now presently on going without your voice also heard raised yet for objection. A trial, where the evidence that factually establishes bush guilt for treason against all the American People will be sought as immaterial. What the evil enemy as godless bushite dogma blindly hope for is, a silently feared coercion through suggestive threat against Our entire Justice system, leaving the court to have quoting perhaps, only one or two lines written by myself out of context from "The Trial and Conviction of Our Mr. bush Jr" to a jury, while disallowing the documented facts, surrounding my allegations to be refused as my defense. [the criminal leads

end at the bush administration's door step with bush's own signature, but bush, as Presidente', can't be arrested under American law, only impeached by the majority of already bought out and sold whole repuglicons.] Counting that our community of peers will have not a inkling what is contained in the very first paragraph of "The Trial...". You my friend alone, you alone, could help US change all that. I, as a single person am trying to stand on the principle, that ANY individual, that is accused of a capital offense without evidence, is UNIVERSALLY INNOCENT, as they would be tomorrow, today, and way back in Hammurabi's day also. And that by reason, the false accuser, is the number one suspect to start with. The enemy bushite MURDERERS try to confuse this extremely simple matter with the powers of hypnosis, or suggestion through the dictate of "our" television and radio cult broadcasts that promote tyranny by fascist censorship.

The nature of hypnosis shouldn't be feared, but learned from to gain a better understanding of the true human condition. Something a bushite hates like our public education systems, is where we through improved communications, halt their criminal transgressions against our better selves.

In the warrant to take all my writings, and computer stuffs, (to begin on their fishing expedition to protect the war monger demon anti-Christ,) it was argued, that the information contained within their possession should remain TOP SECRET. The document has now been made available for my defense, and here is the reason it was argued THREE YEARS AGO, to not have the charges publicly heard.

/ / FROM TIME TO TIME, the NSIS section receives threats from members of the public who after investigation, turn out to be suffering from mental illness. On occasion, proceedings under the Mental Health Act as opposed to the Criminal Code may be more appropriate. In cases of a mental illness, the publicity and sensationalism of an incident such as this one may turn out to be negative to mentally ill persons. \ \

Yeah but, what about DEFENDING the FBI's findings "copper"? Is it that anyone who stands up for Justice in America, who asks loudly for a public platform in OUR media market place, should only be considered, top secretly, mentally ill to think they have a right to contribute on an equal basis, among the oh so lauded, intellectual power breaking crime pushers of our World? (The woman hating child killers, like naive bushite nazi demon liar Mattis wear badges too don't you know?) Are we crazies to want to defend our rights to be free of murderous tyranny? Are they secretly saying on behalf of the bushite: to speak out in praise of the good investigative work the FBI sometimes does, is a bad thing for their future top secret "investigations" on

Our behalf? Or is it because, if we believe in doing what needs to be done to protect Humanity from tyranny, would truly mean, evil bushite wouldn't be able to rob further from dying sacrificed as the undefended America?, and soon, wisdom by communication through science and reason would rule our better stays? Would it surely drive me insane to have our public acknowledge our good deeds that work to have freedom really reign indivisibly through Justice supreme? Anyway, Jeeze, I'm already crazy.

The national security branches of all our governments need a major overhaul in protocols. (officers who are involved in uncovering a criminal conspiracy, a conspiracy involving the murder of thousands of now dead Americans, should receive the full support of every police unit this world over as a protective measure for fellow officers. After all, George W. Bush is an American cop killer too.)

Before my site "Wizard's World Wide Works of Wonder" was taken down, I had the center piece (still available in other places) "Stand Together or Don't" as a full page spread with graphics and everything. "Stand Together..." is an essay that only asks that our standing criminal code in Canada be enforced, when it comes to the documented thieving of our communities as committed with the notoriously miss reported workings of the "cheating at play" VLT machine. I also had "Johnny's Last Stand" take a prominent position at the web page, along with "The Alien's Take". So get this: another argument made for the warrant to confiscate my personal belongings and leave the FBI out to die, was attributed to only a single Cnst., who blanketed my entire site in reference as "anti-government". That statement was the only statement made by the officer in regards to her summation of my writing skills, and was made in argument to a Judge to obtain the Warrant, just before the site fell, so I'm now, suspecting, was likely responsible for complaining it should be shut down by maybe.. badge waving?) Strangely (unknown to me until just recently) as it would happen, this same individual I had contacted over the course of several months regarding the VLTs, (on how the DOCUMENTED crime is perpetrated, and on our communities TRUE monetary losses (maths)) was the same who, top secretly claimed, my writing on Justice was "anti-government." See, I offered to come down to the station and assist with the maths if need be, (remember we're talking the thieving of literally billions and billions of dollars each year from mostly the poorest segments of our societies) to offer assistance in any way I could. (Or, to be told "fool, your mistaken".) But each and every time, I was denied access to have implemented, the protections of the criminal code here in Canada, (that usually makes our country greater than all others,) without a given reason why. [An aside: bushite irrationally hate science and reason because

we're intelligent, while I, can't help but respect life by learning something from just about anyone.]

Here is what it further said in the warrant, that up until now was considered top secret. (without the warrant staying secret, the darkness can't stand the light of scrutiny, and I would be freed from the restraints of a bogus warrant to go on shouting for TRUE Justice by DEMANDING the arrest, trial, and subsequent execution of those responsible for the crimes of nine/eleven - bush, rumsfeld, Ahmad, and condoleezza rice. With cheney and myers running a close second.)

ORDER

-snpd-

AND UPON being satisfied that the ends of justice would most probably be subverted by access to and disclosure of information filed in the Information to Obtain the Search Warrant filed in support of the application to prohibit access and disclosure;

[Good guy police officers might get the public recognition they deserve in other words right?]

the Search Warrant;

AND UPON being satisfied that access to and disclosure to information filed in support of the Search Warrant referred to above might be used for an improper purpose;

[getting back stolen VLT revenues you mean?]

AND UPON being satisfied that it would be in the best interests of the administration of justice that access to and disclosure of information filed in support of the application for the Search Warrant referred to above should be prohibited to the public;

[What?, don't want US public to know bush, rumsfeld, and condi committed nine/eleven with General Ahmad? Well, now I can see why all the hush hush.]

AND UPON being satisfied that access to and disclosure of information filed 'in support of the Search Warrant referred to above might well pose a substantial threat to the interests of effective law enforcement;

[following crimes scene leads at real murder scenes not good enough for our police agencies? - US people backing up ourselves with as something worth reckoning a better future with?]

AND UPON being satisfied that access to and disclosure of information filed in support of the Search Warrant referred to above would compromise the nature and extent of an ongoing investigation;

[Well, it's only been years now. Let US ask you, have YOU called the news desks of CBC or CNN, about bush's prior plan also? Are sandwich boards, posters, and placards, a police union willing to truly get behind as the untold Justice struggle for our suffering Humanity?]

AND UPON being satisfied that access to and disclosure of information filed in support of the Search Warrant referred to above could conceivably compromise the health interests of a person;

[What about the health concerns of the hundreds of thousands of innocent people bush has since ordered murdered, along with the millions of others who will suffer the consequences of radio-active contaminations for the next few eons? National news coverage is not what I fear, I fear that no one on this lonely planet cares to hear the cries of my Humanity for mercy, or holds love for God as worth fighting for.

-snpd-

So, what now? Please don't leave ourselves undefended from the criminal dictums of the demon anti-Christ, Our Mr. bush Jr. Demon bush is not America, America is America. Look, we arrest those responsible, and we carry on, by firstly reversing almost every thing G.W. the traitor implemented. Look, when Clinton implemented change, he was able to turn the country around pretty quick. Just bring back some progressive ideas. Dump the Patriot Act, and those that voted for it, and truly bring

back the Constitution with a respect granted to all Peoples regardless of nationality. Christian Palestinians are humans like US too don't you know? While fixing the neo-con war mess should start by making all co-habitants equal under the principles of fair judicial due process, meaning: freeing the innocent held captive, and arresting for war crimes among other things: bush and rumsfeld, myers and cheney, Allawi and Doud, Tommy Franks, Steven Russell, Saudi wahhabi Buford Blount, woman haters Sicko Sattler and mad dog Mattis, Batiste, Miller - along with all the rest of the rapists and torturers, and then, we.. seek out all the stolen assets taken in America's stolen name. Big job. But we can do it! God is on our side.

I was reading about "Jew Boy..." and I thought, perhaps some may misunderstand my position on Mr. Felton. When I said, "And in light of our desperate challenges today of defeating the enemies of Humanity as specific unjust individuals in "hiding", an ignorantly stupid thing to say." I was coming from a position that I felt, Greg's own superbly good and strong, intellectual arguments on the bigoted demonization of the innocent, would find himself! at fault with, by not looking for another's view regarding the label of "Zionist". Perhaps I was being too picky, but then, generally speaking, disputing the indefinable public's perception of the Holocaust is a loser's argument. Arguments, that generally, refuse to realize, soldiers like today's bushite, would as mindless droids, line innocent humans up next to a ditch, and shoot them all dead for no real reason in particular. [Nazis took film footage early on, then banned it, because it looked so completely insane.] Just like rumsfeld's blitzkrieg, or when enemy bushite thieves dropped thousands and thousands of land mine cluster duds in Iraqi school districts, threw grenades into Iraqi homes indiscriminately before entering with guns blaring, and true Americans, like Germans of yester year, still don't have it together as a freedom force worth reckoning with, to immediately destroy, the known of bushite with American law for criminally implementing the sadomasochistic torture of completely innocent people, and in some cases, tortured to death because maybe they finally then admitted, they were in cahoots with whomever as the "terrorist". Thereby, according to America's new Justice speaker, Gonzales, no longer was a human with rights to begin with anyway. A publicly expressed contempt for US innocent, done in by the disfunctioning sub-human bushite traitors sitting in our office. I'm sure some might understand who the greatly knowledgeable Greg Felton was referring to when stating "Zionists", but just think of the Arab "Semite". Ariel Sharon will steal the definition to victimize innocent Jews with for the American tax payer to foot the bill as, but when an Iraqi Semite, new to English newscasts tells you he's a bonafide Semite really, can he therefore be

completely wrong about his true identity? Or how about this: do you think, the persons never shown for public media interview as accepting to receive stolen property like completely furnished houses called those of "Jewish Settlements", contain anything but, bigots masked as religious observers? How else could they possibly live with themselves? Amongst US true believing Jews? What of Hillel do we fail to recognize in not condemning the brutalizing of the innocent in our own names left forsaken? A well entertained teen, growing up in dum-dum America, or here in Canada for that matter, will likely have little understanding of Palestinian Jews or "Zionism", (like we don't regarding regressive tax systems,) but for like a proud Catholic in Ireland, it's something stupid he's suppose to stand up and destroy himself about while in a drunken stupor turning orange regarding some ancient Roman history or earlier biblical teachings not ever comprehended entirely... But then, I thought, gee, I was the one being ignorantly stupid, because in that space where we were communicating during the recorded interview, we had just finished making the correlation of mutual racism/bigotry expressed between Hitler and Ariel Sharon. Sharon/Hitler steals/stole an innocent person's home, then throws/threw them into concentration camps to be victimized further because they're said to be inferior to the war funded as ungodly criminals, by the ignorant and stupider than ever American tax payers, again. [See "Trading with the Enemy"] And it was there where, Greg brought forward, that too, they are some of the very same Ideologs, of both scenes, who want always to divide the masses by intolerance, through racism or bigotry, to get ourselves to die at war with our/their ignorance, while the true 'hidden' instigators, (non-descript billionaire weapons dealing private bankers usually,) bask on some beach somewhere in our stolen luxuries, not having to lift a finger to command a full course dinner. That is why bushite are currently working to even further destroy America's public educational system which is already the very weakest of our developed world, and why it is preached on television in America non-stop, invest in deregulating the world market so you too, can rip someone off with slave labor conditions to compete your good for nothing son/father with. One out of three workers, officially, in America earn ten dollars or less an hour. And repuglicons hired near homeless people at 75 dollars a day in Ohio to walk around carrying we vote repuglicon signs during the mock election. An informed populace, is a group of people growing tired of being taken for victims, who might wise up and stand for real Justice through the Freedoms of understanding. Can you imagine US speaking internationally? I can. If only You'll help me gain a platform to debate the facistic censorship deniers. The Coast to Coast radio netwrok don't want no Americans talking about why Americans are being asked

to die for the bounty of, bad guy bushite war profiteering. The wealthy celebs don't have to risk their own lives, just the lives of other Americans denied a voice for representation. So, asking once or twice, and then fading away to give up ain't gonna do it. Coast to Coast only allows an intelectual one time a month to speak for maybe few seconds. That should change to weekly. And Americans should DEMAND America's serious political issues work to be addressed in an open forum like talk radio provides. I am open for challenging interviews. But again, bushite don't like free excange of ideas within our communities, for it puts their Satanic cult leader in a disfavorable light, who then wouldn't so easily, get away with committing mass murder in America, or allowing America's greatest pension thieves, to escape un-accounted.

So, I've been working on questions..

Do you not as an officer of our laws, require evidence to substantiate allegations of criminal impropriety against members of our community?

Would not allegations of murder substantiated without evidence, be false? And would not therefore, the slaughter of innocents, blamed for terrorism without a shred of evidence being known universally, be acts of mass murder committed against US interests? Or for the true believers, terrorism inflicted against G-d? (And, is this not why defining "Terrorism" was forbidden in the recent "Terrorism" conference in Saudi Arabia?)

To persecute an individual nation without a reason substantiated by evidence, would be then the persecution of our forsaken God as the innocent of US individually? Like Christ on a cross somewhere you'd be then right?

Come on, please, help yourself out man. This is Your world too you know,

King Johnny Wizard

"I share the belief of many of my contemporaries that the spiritual crisis pervading all spheres of Western industrial society can be remedied only by a change in our world view. We shall have to shift from the materialistic, dualistic belief that people and their environment are separate, toward a new conciousness of an all-encompassing reality, which embraces the experiencing ego, a reality in which people feel their oneness with animate nature and all of creation."

-Dr. Albert Hoffman

Some old Wizard rants -

Here Comes Johnny

Demon bush spewed, he as the antiChrist, is the most powerful force on the face of this earth, because, the cowardly dumfuked marines will obey every criminal command to not go after the those who feed them toxic waste to blow themselves up by cluster dud, or die in a needless war. As evil bushite in their minds, they feel this ability to victimize our God as the established innocent, empowers themselves as war criminals fighting against all people. As our enemy, they bomb our residential districts to victimize all poor people of a whole nation at a momentary disadvantage, to hopefully get killed more, too weak to stand for their own families back home soldiers. Leaderless bushite soldiers who are getting bushwhacked again by the unaccounted billions and billions stolen from their very own grand parents they leave forsaken. Demon steven russell or buford blount, (both self confessed freedom hating war criminals), get killed American soldiers because a real man in American uniform so rarely exists in true to life form, for if there were, bush and rumsfeld would be dead for nearly escaping their rightful arrest for the murder of thousands of American countrymen. But see? Too cowardly the bushite soldier is, instead they lie to your family, while bombing the defenseless, to openly, openly mind you, steal Iraqi resources from a rich spirited but already dirt poor people for bush as the enemies of Humanity. Demon bush, the bushite's evil deity whom they continue to give their dying purpose IN LIES to as the unholy and unAmerican, costs them dearly. Ask yourself carefully, who wouldn't kill any bushite who was threatening to murder innocent people to pay further homage to bush as everyone in America as enemy? true enemies of freedom by justice? When the bushites target innocent people, they lay claim to be interested in getting killed more American slave whores, right? Right? While bush, as their false idol, sits smiling him demon grin over all the wealth he and his partners now own personally as stolen. I'd as Lord, kill any unarrested bushite whom would target a community of children with cluster bombs. Without a second thought. Who wouldn't I ask you real hard as Creation to think about God and Man? What real man or women wouldn't? These bushites are parasites, inhuman savages who should be taken out by the proud and few, true American soldier's of justice and virtue from the real marine handbook. Evil bushite I will never fear before destroying, for we'll hunt them all down ourselves and destroy them personally as I will single

handedly if I have to even come back as the resurrected. A bushite is our enemy as traitors to the American way of living for our survival.

Don't like me? Tough luck.

Times are changing, there is an order to things, our universe has dimensions to it. There are many of us out there that scientifically understand this. We are at an understanding scientifically through measurement, that the nature of this living universe has a property to time that has no started ending before we've yet begun to realize our quantitative bites of measurement that we call history, are swimming with relative states of understanding. This can bring much for one to understand that there is no one right answers to everything but for willing for Justice, and that is of the God's truth, so to speak a word. So looking for somebody to explain things from the beginning as eternal life stands unbound and open, leads a position for a person such as myself to say, hey!, we're on our own here trying to do what is right for our being. As of Universal, there are things we can agree upon as anything consciously self aware. So, being that there are ideas of real world relativity that can be agreed to be so by any individual, it doesn't therefor ultimately matter, what you think of me personally when in support of freedom for all persons as God would will. (Jihad.) Thus is the separation of labeled identity from this higher plane of existence, that is as true as anything is. (Alive as God is, is to any bushite the fear they have of the real You of this universe unbound as an equal to all faiths, and rightly so, for if when we rise together, a blind and evil bushite will be the target of every person breathing.) Being thus, there is no reason to falsely find fault with what I am writing personally, but to understand yourself as judged through universal agreement by rational structure to the nature of chaos and order, thinking. .... So, Example: you know, nobody wants to be murdered. No one want to be deprived there liberty by not working directly to devive those same right from "others". If we're not committing criminal acts, and we're trying to make our way in this world the best we can with what we got, why would a bushite target US as innocent victim? Those of US trying to make an honest day's work seem enjoyable, while trying to have some happiness somewhere along the line, don't deserve to be sacrificed for the demon bush, so he can rob further more from our humanity left undefended. It is when the bushite designates a chunk of humanity under the evil bushite vision of "them" as

not our equals, not our brothers, is where we all as God agree that the George W. Bush cabal of war criminals are our sworn enemies. Contemptible people who blindly follow bush don't have any understanding as reason for their baseless opinion on victimizing our God, because we know they hide from open debate of their personal proven falsehoods, and misgivings on the power of my words. It's a misplaced faith in war criminal bush as their ungodly antiChrist will escape them the wrath of ourselves as the Humans without consequences is an atheists dilemma. Bushites don't have the frame work of understanding to know why they believe in the things that they do, while victimized all our Humanity believing we in fear, won't target bushite for Johnny's favor. Think again. I'd kill bushite to defend my innocent family, wouldn't You in all honesty? Of course you would. Any real man or woman would, anything less, would be uncivilized. Destroy the war criminating George W. Bush and his partners in crime my friend, and be loved by all as savior. Or don't. You decide your fate.

Johnny Wizard

--

Big Sky

We, as glorious human beings, are wondrously effected by the nature's of perception, but as so 99.9 percent wondrous, we come with some recognizable universal draw backs. One: actual evidence as measurable, must be a requirement to convince us of something to deprive another of rights over by judicial action. True judicial action through democratic means. (The simplicity of "a freeman shall not be imprisoned" is being profoundly missed by the bushmob's America as played too dumb to comprehend through our media news channels censored.) Demon bush demands you faithfully blank your mind from his bad faithed dictate on how unspeakable 9/11 magically went down, but without most the established crime scene evidence that is freely uploadable. It's not, gee, I wonder when he'll really screw up, it is bush himself whom is committing the crime of 9/11 with rummy to begin with, then thinking, he could get away with it still by lying to EVERYONE. For all time. War crimes have no statute of limitations in my book, and the law has a mighty long reach my friend.

Bushite bremer hired Saddam's secret police, and fired school teachers. Mr. bremer, you'll remember, is the

president of Kissinger Associates, the group that criminally provided Saddam the WMD knowhow. That's is evil for ya. His strategic defense, is that American soldiers, are too weak as slaves, and create doubt on what is firmly established in evidentiary proceedings already. Mr. bremer figures, since no person would willingly put themselves where he is, as certainly, it just can't be so.. (I'm sure he and rummy get alot of chuckles from conning US all as God to murder ourselves like that.) Doubt is an ever present property of a constantly changing, nothing is absolute universe. Substantiated evidence is ALL we got to go on, and sometimes, that can even get foggy. Similarly, with bush and rumsfeld. Their kind of treason is so blasphemous, people can't recognize that any real human being would willingly try to actually do such a thing for the windfalls of big corporate profit, and as such, a many god person, (as often the good natured and kind hearted), desperately look for any doubt, than to face such a human fear of real demon behavior in our World of worlds of every character. I as Lord hope, that over time, soon, recognizing war crimes will become almost second nature to US, and the fear of Human development as all good, will change to wicked fun and prosperity for all concerned. Currently, the lawless bushites are left to furthering with the barter of Your dying existence, all done by Your inaction to simply help Yourself. Yeah, YOU left televised to be politically powerless over trying to raise some awareness on the true state of your being alive in this world.

Kimmitt "We certainly don't believe that this indicates the coalition is demonstrating weakness".

Who is this "we" the bushites keep referring to? Is bombing residential communities to murder US people indiscriminately with toxic cluster duds, (that kill aplenty dubya dubya's), not just one of the stupidest, most heinous, worthless war crimes ever that could be committed in anyone's name? Seriously. It purposefully gets killed American Patriots, and for what but a blind worship of bush as their ticking

-
--

-- - - :. . "Intel".

--
-
.

Where is Kimmitt to speak about feeding plutonium to the loyal troops? Something he doesn't wish them to learn of? Is that not weakness as a military leader refusing like a coward, to stand on defense of your own dying blood brothers? He instead wishes to decieve himself, than to fight bravely believing in Freedom and Justice for US all. Maybe he'll change his view, by accidentally arresting bremer for the WMDs sold to Saddam illegally by following the evidence trail himself. Then maybe helping me out to get those responsible for 9/11 in the bush administration. What do you say Kimmitt?, are you with yourself as true American Patriot, yea or nay?

http://www.khilafah.com/home/category.php?DocumentID=9176&TagID=2

" "When there is a security failure, the party responsible for security is to be blamed. And let us ask ourselves, who has the capability of launching such bombs in these circumstances? What story should we believe, should we believe and blame the figure that the Americans are drawing for us (Abu Musaab al-Zarqawi and al-Qaida fighters), or should we believe what we are seeing on the ground everyday?" he said. "

Well yah. It makes no sense for why bush's Laden, or the real Laden even, would be working directly for the bushmob to steal further more from Iraqi wealth, and the soldiering American tax payer, while not suggesting a kill shot to russell, blount, bremer, rumsfeld or bush. Or, speaking on the despicable war crimes, or where all the stolen loot is going to. (IT'S SEVENTEEN PAGES!!!) Then, guess who decided all of Iraq should get this criminal, let's do the bushmob another great idea? Bremer, or the CPA. (Reminds me of rummy's "pentagon" plan P2OG, a terrorist plan figured by rummy; that since, he don't want found out responsible for treason, he'll orchestrate it himself to 'appear' [like as if by magic] as the Pentagon, or America, and that's only if, we were to be asking him directly about something he criminally planned personally. (but shhhh.. it's a written secret between just him and US apparently) Strange days of terrible tragedy, I know.. But fun!))

These crimes Kimmitt seems dead set on not investigating, ring more from his weak leadership, than from anything else. The bushite war crimes are as iligitimately premissed, and as so evil is always dumb and weak like Kimmitt is spotlighted as traitor to every American soldier out there truly dying needlessly as bushwhores so to rob from Iraqi and American. Kimmitt only lacks himself some manly courage to try saving US all by communicating for America's America. Will he, or.

Illiterate, irrational, all around dumb dubya had stated long before, that he knows that the, no plan to die for but getting bushite rich quicker scheme letter writing guy, is for sure, senior al-Qaeda, and I guess, he would know better than everyone else about the writer doing himself as the deceived pure evil nazi war criminating antiChrist so many favors? The bush liar as America's enemy kills ourselves as the innocent and undefended, needlessly but for stealing our human values, and so... accused Laden is a terrorist for what loyal causes again?

Being bushite victim just sucks for God as everyone.

I want to come down and party with you People, but the bushmob keeps trying to ruin our days, by destroying American lives not being spoken for. I don't like the bushite attitude about criminally ruling our ways, and I'm here to freely, demand Justice for Freedom as the Heaven's awakening. The problem is NRA members aren't acting to protect Justice left unrepresented by corporate mind control., Like Freedom of the living breathing good American Police investigating forces being denied as relevant news material witnesses. Demon bush's war mongering against God hasn't only recklessly murdered near two hundred thousand mostly defenseless, unarmed people, but has dumped with rummy, thousands of TONS of radio-active toxic waste to murder God for what will be greater than 50 generations of innocent human beings. Murdered in your name, my name, America's name, God's name. What beef does a bushite corporate america have with the Children of God? I beg the NRA, the CIA, the FBI, good guy bikers, and any other real Patriots to stand up as men for the Family, and kill the unarrested enemy bushmob for 9/11 as traitors to our dying America, and for the war crimes they have committed in our names. War crimes while sacrificing to actually DIE, the dumfuk nazi teen soldiers whom have no leadership present to speak of. As I've stated previously, we will ask all American soldiers to either stand for America and the Constitution, as freedom and Justice for all, demanding evidence to convince US whom is suspected for criminal offences, or with the bushites, as enemies of themselves to self arillate.

Evil is just the deceived disguised. (Wow I AM Amazing)

I guess this is all quite a consideration to take and role through with for a couple thousand years, but look, evil incarnate antiChrist bush is back again fuking US around, harming our World as Humanity with flagrant war crimes continuing. His illegitimate power base comes

from Americans thinking that because he is the President, he shouldn't be accountable to American Law like the rest of US, and that is where a bushite takes the fall while trying to bring down all of Americans through corporate censorship on his treason. Like unarrested fascist steven "he'll kill a bunch of US folk if you complain publicly about bush banking policy or bush health care premiums" russell, or unarrested bush bitch buford blount, who confesses the joy to see American soldiers die rightly for his irrational crimes against innocent civilians trying to defend ourselves. Fuk, who wouldn't destroy unarrested buford blount I ask all creatures great and small. Wouldn't you? I mean, come on, HONESTLY, THINK ABOUT IT, what real man, if he had to, wouldn't, to protect their innocent family? Steven russell and buford blount as steroided pill poppers have targeted innocent whomevers for being just alive, because they trust, in faith, that all America will think it makes the demon bush 'cabal' so scary and strong in a godless world that gets killed, not all so blind cowardly Patriots seen led leaderlessly as unAmerican like that forever. One or two Soldier's of Fortune in the American marines, willing to join up with US as true freedom fighters for America, is all I'm pushing for here as King of kings.

(Hey.. I know... I naturally spook myself, but I so enjoy living for something, and, there does seems to be room to believe here for you as anyone to freely be also. If Americans only knew how fantastic you could be as this living universe questing justice for freedom, You'd as anyone, think twice about silently letting the bushmob take you as anyone else further to suffer unheard from. I urge soldiers to unite on our determination to take the bush administration out of our life and death business decisions, and straight behind bars, awaiting their open public trials for treason.)

The bushites who faithfully advocate the murder of innocent people blindly are our enemies, and I ask all able bodied men, to do what is right, and get the bushmob of terrorists before they take another American soldier as too weak to realize what is protected in the American constitution.

--

Forever Hold Your Peace

"I feel depressed," she said after leaving the theatre. "He (Gibson) went overboard with the cruelty and violence, and I think Mel Gibson is a bit of a sadist."

It's not the great artist Gibson, but corporate american cult news who sit back bushiting "It's harmless, now shut up dummy", knowing sadistic "sexy" rummy dumped thousands of tons of radio-active toxic waste, along with land mines to commit senseless, gratuitous mass murder in residential communities housing the God of Revelations.

It is bushite america who call themselves Christian, who fund the Likud with American sweat and labor, to criminally assault innocent Christians as accused of nothing but being Christian. They do this as enemies of Justice and God, to tell US as unbelievers, to quickening the coming of the Lord, who will in turn, condemn the individuals responsible, straight to hell where they rightly belong. (Or prison whichever comes first)

It is America who sit bushiting "Freedom", while wording nothing to blindly enslaving whomever, to torture or murder for whatever by bombing Nations of People irrationally. No reason., For law. (But to maybe secretly sell drugs, or steal assets to victimize Humanity. a.k.a. Jesus forsaken, or WMD bemer's Iraq)

And it is toxic cult corporate america, who let traitors, bush and rummy murder thousands in New York City, ("The People") and then escape forever, operation infinite justice. I don't think so. I as John would destroy every nazi american bushite happily, to save the life of one child in any third world country.

snpd

Killing people
for no good reasons really sucks. I hate bushites.

Let's get the Patriots together and bag US some Rumsfeld

I just so much hate that demon antiChrist bush, and his cabal of war mongers, it hurts. Let's just kill George W. Bush for being qualified to lead but only himself and Rumsfeld directly up to our NRA's firing squad, for almost foolishly thinking they would actually escape the planned murder of US thousands in New York City on 9/11, then continuing by sacrificing dumdum nazi soldiers on a cross in a completely unnecessary war against civilization. What is it that the evil bushites can do now in Iraq, before murdering untold thousands and thousands, but for stealing even more of God's good will towards all Mankind as loved?

[S I L E N C E]

No words from the bushites who rule our communications through corporate news censorship, while Christian parents call out unheard: why has corporate america allowed forsaken soldiers to eat plutonium to murder God for a measly few dollars the bushmob will pocket for the up coming "unbiased" re-election news campaign? As I suggested before, (If there are no real men in the marines) why not just give the unarrested bushmob all the money they want, so we can forgo all the needless death and suffering against our friends and family?

[Look, usenet's us.military.army can be the place anyone in the world can offer any irrational thought on why bush shouldn't be immediately arrested or executed as traitor, but guess what? bushite nazi brethren, either mostly don't exist in our real world, or can't think to save themselves as bushwhore nazi dumdums. Dumdums who advocate the senseless murder of innocent People, and the continuing destruction of America's America.]

--

Free Wheeling

" Why is it so far-fetched to imagine God's unhappiness about denying civil rights to any man or woman? "

snpd

Demon bush knows now that Americans do not support him by democratic poll, yet, he is taking a position of currupting the American Constitution, that he in almost every other way, has left ignored as irrelevant.

snpd

Demon bush is fcuekd up. I guess it comes with being the antiChrist, and killing all them American coppers, has got his purpose all wacky, and out of order with the rest of our world liberating.

You can protect a person's right to be, but not pass laws to deny free loving of the godly humans. But guess what?, bush'll do it anyway by saying, he dunt read papers with words on rights of dem People, cause we're all together too opinionated when it comes to him mass murdering thousands, like in New York City.

--

The Jews had it right

Demon bush recently commenting on his vast superior knowledge of matrimony, spewed forth "millennia of human experience,"

Imagine a corporately successful American divorce lawyer, taking what he can get away with, and the marriage experience for America we'll be like that sometimes.

Just where is the "human experience"? I don't yet know all the answers, but, why is it that the happy couple can't just have a religious ceremony sanctifying their marriage, and be done with the rest of the, I might screw you over in the legal ease later part of it? If done so, I'm sure marriages would more easily stand the test of time. The strength of marriage is recognized for what it symbolizes in love ever lasting union. (as God is, or as with Nature, or just as all the dedicated one on one playtime)

The divorce lawyers take half your life's assets through pressing subtly for, doing so as he/she plans, to be sweetly bittered out of settlement as far as the lingo can commiserate the arbitrator of commissary charges on every forthwith therefore, stuffed for your(s), petty pity parties into their glorious big fat wallet.

Marriages don't truly hold together through love by expensive paper work done by hearty bureaucrats, but by a personal life commitment to love, cherishing one.. blah blah blah... Now, how could anyone, anywhere, as "The State" say to two people who express a mutual caring love, (as anyone else could), are forbidden to express love through sharing freely with one another as something truly beautiful? A celebrated relationship that makes their time together something treasured? Time of the newer old world along with all the ancient newborn stars above orchestrating for their everyday ra-ra pom-pommed humdrum of roughing it through the bad times to revel in the good? Couples who have committed to life long sharing, live longer on the average, than anybody else does. It's a fact Jill.

(As for me, and my own little Universe that revolves around myself starving for attention as almost penniless performer, leaves me with my one liner, "no I'm actually playing the Son of Man as Creator for real to packed live auditoriums", really kinda, makes things difficult...but hey! Things could change. God is free Love man!, don't you guys remember the 60's? Look, I'll even show you how i do some of my best card tricks, if you get me on for an hour or two with Aaron Brown. He's on that CNN channel. The News channel. Or perhaps my secret nemesis, Art Bell, why don't you give him a call?)

snpd

God but, the Marriage thing is really a big something in America, as it does seem amiss, though I'm honestly not qualified to offer much more insights, until I can get off the, why is bush getting away with murdering US as the antiChrist first. (Maybe it is all my fault why no girl wants to give her love to me in between my swashbucklin'.. oh well then, I guess that's one of the mysteries I pose as the average chicken coop's "holy God cock")

Anyway, I think it's time we'd be getting the deviant George W. Bush annulled from our wills.

" MK Ahmed Tibi (Hadash) said he does not think Boim should resign because the deputy defense minister acts as valuable evidence for those who think the Israeli government embraces a group of fascists. "

As I've written, since i took up this challenge, areil sharon is the furthest thing from a Jew one could imagine. No really, that's the most disturbing quality of racism, and or bigotry practiced in our governments as Institutionalized. (A fault found that is genuinely unfair as those who practice it.) (of which so very none get truly wealthy from.) Resulting in an individual monster named ariel sharon: enemy of every Jew since the dawn. To, as a representative government, publicly, in the People's name, ACT deliberately unfair as criminals, denigrating some labeled group of innocent people for cheating and victimization, or murdering like hitler did, is as of, unfair to the God of Christian, Pagans, the Buddyhas, along with a great many others even including the, "no thanks", they have all the answers already to life's big question innocent Atheists, DOES NOT preclude including the "Jews" of the old new testament, that sharone (in contempt of all People as God, as in his own life left rejected 'unfairly') would have left unread. For the bonuses of american tax taking from an "other" less fortunates to not have anti-Semites (Semite=Arab) with nazi american mk-47s around ariel sharon always to protect himself from a true Kingly Jew. For, what else is in this life, but to make people suffer like Jesus did. Right ariel sharon? It's this, it's so simple, the corporations wont let US say so thing again. FRONTLINE did a show once, several years ago on the actual individual people that the Jew-haters funded by nazi america victimize, but repeated since?,.. rarely never in AMERICA. Why? Because anyone with any sense would immediately see, who was the bad guy, and who was the Jew. Not good for the repuglicons who take money on the, won't go away issue though, played unknowable on "unbiased" commercial

corporate american TV news broadcasts. They're stayed to f-o-r-c-e US neutral by, in a evil cult like bushite trace, find irrational excuses to except silently: concentration camps, torture, and first degree murders against innocent Christians or Jews, paid for committed in our names as illegitimate.

What ever happened to the 50 year Jewish Jubilee where all Jews give up on what is their now stolen land, to acknowledge God's Holy teaching from the Tora? Is the Jubilee just a myth? If you build a house, on the property you share, would it be wrong for ariel sharon to steal it, while america was left unaware? American tv doesn't even play what their being truly taxed to death for under the demon antiChrist, their Mr. bush Jr., so what can we expect in all honesty, right? (Demon bush murders good guy American police officers, and it's just far to embarrassing for corporate america to immediately arrest or execute the traitor.)

Mr. ariel sharon has been on the Jewish hit list, since a Jew met a Jew in the park and said, "that ungodly bastard sharon just murdered my Palestinian Jewish friend, who he called innocent of all things." Demon anti-Jew ariel sharon knows what his consequences are, for, that's all he is as the ungodly. Knows nothing of democracy, knows nothing of freedom or Jewish religious teachings, he just keeps killing Jews so they won't catch him, while he does things like, oh I don't know, desecrates the third holiest of holies. Again, ariel sharon is not Jewish. Deal with it. PRIME EXAMPLE: The evil Jew-hater, ariel sharon, was caught directly involved in the cover up, of the failed attempt for his partners in crime to blow up some could be Jewish People in the Mexican congress, then likely finger Laden as innocent of as terrorists. To incredible to believe? Believe it. Didn't see it splashed on CNN as important on where American tax dollars are being funneled as Christ killers though did you?

snpd the God is sometimes gay part

But simply put, the more Jews ariel sharon gets murdered, the more money from repuglicons comes by taking Christians for Christ helpless on the cross, but without any 'real' God. Then anti-Jew ariel sharon puts money back into the private pockets of 'wealthy' repuglicons for funding true terrorism on the sly. The Likuds steal people's homes, life savings, shoot to death innocent Christians, Atheists, whomever, while they then send off the surviving victims with only what

can be carried quickly, to suffer in some ghetto camp. Hitler, revisited. What "Jews" since whenever have suffered from, now without God in Government, made fearful to stand for their rights against bigot murderer ariel sharon's mk-47s., they then under tyranny, falsely, try to condemn all themselves as forsaken without G's leadership found in Mr. ariel sharon. The Jews had it right on me never actually personally getting up on a cross by God's inability to communicate through silence, it is more of a metaphor on the true state of humanity, but no more so graphically illustrated by today's Likude Israel that condemns all the People as God. One more example on many: Demon sharon, funded by nazi bushite america, will have Jewish Israeli teens arrested that disagree with murdering innocent people to steal their land as God from. It's a fact Jack. Mr. areil sharon is not Jewish. Live with it suffering without speaking, or shout to the high heavens that your fed up, and we're not going to take it any longer. The King has returned!

King of the Jews,

Johnny Wizard

W's Reality Gap
http://www.alternet.org/mobile/story_mobile.html?StoryID=17907

" Whenever President Bush is now confronted with an unacceptable reality, he either changes the subject - is steroid use really more important than the environment? - or expresses confidence in his certainty. "I'm absolutely confident that..." he'll say, as if the issue is his determination rather than his conclusion. "

It's his faith infinitive as the antiChrist, where he has hypnotized the dopey with merely the power of suggestion, that has brought him to US as foolishly not conceiving, or most importantly, truly understanding. So, do we feel sorry for his ignorance as fallibility we are all prone to own as the human rendition? No. But for stupidity thinking he could murder US as the innocent to steal our free values, and just get away with it by lying to no one continually, is where the Lord makes our stand for God unseen as miraculous.

The demon bush dictate is not exceptable for my just little man universe. I knows too much about freedom to go on dying in bush's forsaken place as innocent sacrifice. With corporate america's unarrested demon

bush forcing my hand, I would decide to defend by concluding, he is truly, the enemy of all America. America: weak without leadership, yes, but not as dumb as some would have us believe. When is it that we feel sorry for the thousands of lives bush's deliberate actions of mass murder have taken for no good reasons? Their ain't nobody to defend america's overlord, but through corporate censorship of the reality of who's really dying for the demon bush liar. I'm the one anyone would ever have a legitimate fear of getting on the wrong side of, and if your not in the process of attempting to get away with murdering some defenseless family for nothing but to rob from, to each, his or her own, mostly, right?

JW

U.S. pays millions to discredited Iraqis
http://www.twincities.com/mld/twincities/news/nation/8010694.htm

" The letter appeared to contradict denials made last year by top Pentagon officials that they were receiving intelligence on Iraq that bypassed established channels and vetting procedures. "

Bypassing America as undefended freedom,, sacrificed to die for slavery under the unconstitutional as blatant evil, bushite decrees. Demon bush tells America, and indeed the World, since 9/11, evidence will no longer be a requirement to convince US who is a mass murderer, and corporate news america sells on without the human opinion present evaluating his true asking price. Man, that demon bush is sure one true evil bastard when you think of what he, rummy, and Ashcroft is stealing in our names censored through nazi fascism. [Granted, I am literate.]

God or no God, I don't like that demon antiChrist, Our Mr. bush Jr. very much.

--

Democracy How?
http://www.prospect.org/print/V15/3/collier-r.html

" "The database is comprehensive, extremely detailed,"

By Annan not publicly addressing this very serious issue, will not be fooling me he hasn't heard it mentioned. The families of Iraq are accounted almost entirely by "comprehensive, extremely detailed"

measurements. So what the hell is going on about supporting our world community by not condemning war crimes?, Just where is Annan on the issue of an international commitment kept I want asked religiously across this world. Now.

Boy, if I were make believe King...

--

Falling for You

Brahimi said. "We need to organize elections as early as possible but not as early as impossible."

Help me understand: Why can not Iraq start on the process of

O R G A N I Z I N G E L E C T I O N S

NOW to work towards gaining accountability for soon as possible? After June? What the... Can't we people talk while walking? Look, the future is likely coming no matter what, and what ever illegitimate government is embarrassingly stalled by evil WMD proliferator baathist bremer to steal unaccounted American tax dollars from the "willing" victims dying, (like by bush bitch cluster dud) will still necessitate the need, to have started on the process of fair elections for our Iraq before hand. Corporate america might not care of sacrificing America to rob from, but real People are honorable, and won't reserve the scourge of nazi bushitizm a place to suffer any further if we can help it.

The bushites are sorrily, simply not qualified under the dire circumstances they've assaulted ourselves into for mugger war profitizing, as leading US to be dying undefended while failing miserably on my behalf to demand Justice as freedom is truly.

Now, it has been vaguely suggested that a, steven "you can't have public health care or he'll murder whomever for thinking" russell, or a buford "bush bitch" blount as treasonous evil nazi bushwhore, to undermine freedom and democracy everywheres in our world might cowardly attack defenseless innocent families at the polls while leaving "bin Laden" fingerprints, criminally warring to kill more American dumdums for commi Halliburton et al, continuing committing as unaccounted massive waste in America by over billing the dying People. Why would bushites do this? Evil is blind irrationality, disguised as thought out faithfully by fascists. The, nothing to fear suggestible absolute nature of

non-linerality, is 99.9 percent, super fractal wowy miraculous as crazy about the fringes, (or is that bridges?). But, without Justice ruling our stay, we leave for a Heaven waiting, on a sea of madness as enemies of life to all things eternally being. Translated: We need to arrest these specific war criminals at the end of our, ready to fire rifles. Done to stop them personally, from robbing or murdering America indiscriminately as enemies to everyone. But in addition to that, (like at the same time) who says the polls can't be stretched out over several days or a week, with multiple options on submitting votes registered through the oil-for-food program? I want to know where Annan is on this., why it can't be done., and what his position is on returning the Iraqi Humanitarian aid stolen by Halliburton, or Iraqi Central Bank deposits cashed by HAS TO BE, current pirates. Annan, be a man, an acknowledge our presence as relevantly important for our world's living sake.

We had 100 percent access throughout Iraq prior to allowing bush, rumsfeld, and franks to sacrifice literally thousands of innocent lives. Who are now DEAD or DYING NEEDLESSLY as first degree murder victims, in some bastardized Lord's name apparently.

snpd

Any improvements of the current situation in Iraq today, are going to be less that what would have costed to not kill innocent people for nothing but evil bushite war profitizing at it's level worst in this history ever of all Humanity recorded. The demon antiChrist of corporate america has got to go, and he's got to go immediately as arrested or shot dead by the Patriots for treason, before he causes US anymore needless losses and grief to our friends and family. Like for the next fifty or so generations what with the plutonium being fed blindly as willed to cowardly, weak, American teen enemy bushite soldiers presently. (If we could seperate the bushites from the rest of US, this might be a good thing, but they have no real leadership to speak about freely as the dying stupidly.(PRINT THIS PAPER AND MAIL IT EVERYWHERE))

DYING like those from 9/11 did, or dying slower, like with NYC air quality as best Oz has to offer. (Harmless corporate TV tells US without opinion.) Either or even in other ways, the demon bush is truly killing God's America in Your name not heard from. Help me you idiot. You! Yes you there, reading here. I am your secret

friend see?, and.. well.. the Universe needs your help desperately pal. Please? For me? ..Oh God help me your really dumb without you aren't I too? Listen: we need to talk.

We are here to save all of creation from needless death. Big deal. Your are of a real eternal nature, that exists also, (as understood scientifically) timeless. For real. (The big bang is now. (All mass is also of not as seperate energy, then there's our gravity...)) Our possibilities for a great, better future are staggering, if we are capable collectively as individuals to defeat the "kindness" of George W. bush, the dying embodiment of evil as the very true demon antiChrist of all biblical references ever mentioned. His lying isn't just deceitful, it is downright hellish.

You know what I think? The evil enemies of Humanity, don't want US People to be recognized from being victims under tyranny through corporate cult censorship. Without Justice ruling our ways under the irrational criminal bushmob dictate, we lose as losers cheating ourselves as not worth the consideration to be free individuals.

Granted, I am an actual god familiar with the rights present within the Constitution of America. THEE God's god, here to teach the world about needless sacrifice, caused primarily, for the effects of inflated egg shell egos. As Creator, I goofed somewhere in the, order to chaos mixer. I didn't plan (it was a mistake) for Americans to be so cowardly and weak when it comes to defending their very own selves from needless death and sorrow through blatant, naked, how can you miss it, evil criminal enterprises. So, perhaps, now if I stop writing, and fake I flied off vamoosed into the unknowable, a couple people on the planet might go 'hmpht', and decide to carry on bravely, the real, honest to death struggle for freedom living without me as sorrily missed. (I as John am not anything special paradoxically.) This is fear itself, ain't nobody nowhere as terrifyingly terrifiable as this is just truly super terrific being only my simple written taughts, yet, ... I'm like.. just fiction writer, big dreamer Johnny Wizard, looking for some happiness, human respect, and a good last supper before I check out from this made by the earthling "space explorers" dungeon cell.

But who cares about me, or my great, he thinks he's so brilliant ideas? Everything's seriously a pain to him

sometimes, and he talks to himself like he's the, been here and gone as eons now, King of the Universe for the holy Word from the Heavens above or something. What a poor dying fool to chance that anyone would willingly help themselves by caring for someone. ..You know, I'm beginning to not be all that crazy about the demon bush liar continuing to war humanity in my own true name also now that I think of life in this way honestly. H-e..Y -! (Morningstar has been accused of a lot of things, but you'll notice, always plays fair as your rules.))

What freedom in Iraq will come that allows a, buford blount to walk unaccosted by 'legal' services? Or where rummy's cluster dud advocates gain silent gratitude? A nation high-jacked by bremer's buddies who illegally sold Saddam WMD, then the product wisely gets destroyed as functionally useless being primarily indiscriminate warfare, then bremer's buddies come in again and murder untold thousands upon thousands, all because your magic TV is letting them get away with it as considered too embarrassing to the billionaire private stake holders. Fuk you corporate american Human haters for not reporting the bushites as war crime supporters.

Where in the real world are the nazi bushites gonna demand we go to allow 'them' to continue warring the Constitution while wearing a bushite soldier's uniform in their dying universes of Universe? Leaderless corporate america?, injured and dying as the unjustly starving? What can the bushites do now in Iraq, that they couldn't do before the needless murder of untold thousands upon thousands of innocent people with loving families? Before dumping thousands of tons of radio-active toxic waste as enemies of God's children? Only to rob, maim, and destroy God's great work through Love. We had complete unrestricted access throughout Iraq, and Saddam was offering the national media for bush to pontificate, while not refusing dialog for any suggestions.

I ask:

Can not America invite me formally for brunch, by somehow bypassing the war mongering nazi tyrant held up in the Oval office? I'd invite you all, but my place is still a mess, and I'm stuck eating for survival just now. I don't qualify for help, because surely, a person with your talents, should have someone willing to stave you off the, who cares about saving the world for you buddy, laughing in all seriousness shtick. (cool eh?)

I give you my world:

To save humanity from tyranny will be accomplished
through the value of these free ideals recognized.

Isn't life grand sometimes when the bushites aren't
needlessly murdering our innocent families in your name?

I again,
will now leave
you without me,

forever loved,

Johnny Wizard - Your "other" parent or guardian advising
you to immediately, by Citizen Right, arrest the
President's 'cabal' in the name of the Lord, who already
died for this once already god damn it, and I'm not
sacrificing any longer unknown as forgotten in the
absence of any true reason to our existence, I want to
celebrate. I want to afford a cold brew to nuzzle on a
warm sunny afternoon, at a hideaway somewhere, lost
in my comforts of having few real worries, but for
unintentionally offending someone for not having the
time to except their generous support, or gratitude.

--

http://usinfo.state.gov/topical/pol/usandun/04021901.htm

" "We need to find a mechanism to create a caretaker
government and then help prepare the elections later
- sometime later in the future," he added. Mr Annan
said that there was "wide agreement" "

Unelected care taking government? What is the group
their now supposedly doing? Where in the process is
corporate america to simply fix the Russian generators
they've been paid over and over again already for as
doing nothing in The People's interests?, As unaccounted
to? Where is corporate america to fly in the emergency
food and provisions for the innocent as victimized?
Who's care will this continuing robbery of America
through war crimes further fail to serve? How can Annan
gain "wide agreement", with no poll on the issue? Who
personally did he talk to, agreeing to leave Iraq
without working for an elected government of the
People?, and who consented to give up on such dire
needs? Where is Annan on the thousands of tons of
radio-active toxic waste dumped by rotten rummy? Is it
not an issue he should personally be addressing for
Humanity, to demand an immediate clean up paid for by
those responsible? Imagine that: Truly toxic as dying,
American Patriot soldiers making it up to God's great
Creation, by hunting down the actual bad guys, who done
did crossed the wrong family this time.

Wow, now that would be a war worth televising!

--

New Moon

To steal public utility services paid already as owned completely by IRAQI, (America dying for the bushite American pension thieves at WorldCom or Britain's "Dutch"-Shell,) ain't gonna change the business locations. The evil unAmerican cop killing bushites think they're gonna party in Manhattan on our dime in apartments for around $15,000 a month, while sneering at a homeless beggar on the streets, who thought he was still in Vietnam.

An oil-for-Iraq program needs to be reestablished, but transparent to all as addressing the immediate emergency needs of Iraqis. Private, in the secret back room with the bushmob nazi bankers, and their private inept collaborators flustering as international fraudulent behaviors, just wont do., try as bush might to murder perhaps millions of Americans uncovered by his criminally enforced, reduction in health care coverage extravaganzas.

THE ROVING EYE IRAQ AND AL-QAEDA
Part 1 - The usual suspects
http://www.axisoflogic.com/artman/publish/article_5146.shtml

" This latest US intelligence, though, makes little sense. For starters, al-Qaeda pigeons are highly unlikely to move around with computer discs in their briefcases: since early 2002 a disabled al-Qaeda has used women couriers to deliver strictly verbal messages. "

Kimmitt in collusion with the bushmob perhaps? To cover up an investigation set up to encourage the blind murder of America as bushite by attempting to divide all the People of Iraq as Iraqi?, na... not in a tribal based, enduring practically timeless, inter-woven culture.

Those who ran public healthcare and university are all the bad guys for thinking, the blind bushite bigots would conclude illegitimately., and I would say to yourself: no, the People with equal rights to stay united for good times, are a people sworn to uphold law that serves our freedom's best. Iraqi assets are not bush and bremer's right to steal without question, nor either, American generosity swindled by WorldCom, Enron, Dutch-Shell or Halliburton is the final, be all answer to everything.

You as sure would know that unjustly victimizing the World in our name because "they" didn't believe in blindly worshiping with servitude, the war mongering mass murderer demon bush liar, is freedom stolen from any. Wide, across the board, ask anyone for comment on where the bombs dropped from. Needlessly in bush's name, but to war God's love, and my good life.

Demon bush is not America, America is America.

This is all I'm ever doing as King, but perhaps also, not going left hungry. If you can help me help you, we'll be set for something better.

Truth can pose serious problems, when we idolize blindly the evil demon antiChrist for criminal sacrifice, instead of arresting him for 9/11 along with cheney, and bummer rummy, the silent but radio-active cluster dud dropper who murders American Patriots for a nickel.

Too awe shock embarrassing is it to ameliorate for the sake of a dying American Patriot Kimmitt?

For, why would Laden want the bushites to stay to further rob America through creating instability within his own ranks? without denouncing the demon bush war lies, that are paying a very real price.. ? What would it cost commi Halliburton, to face public accountability (Democracy) in Iraq on where Iraqi money is being misappropriated for? Do you think they'll get to keep the oil business, to sell back to all of Iraq at uncontested mark up freely? To steal food aid to under pay the third world? Starving?

To steal public utility services paid already as owned completely by IRAQI, (America dying for the bushite American pension thieves at WorldCom or Britain's "Dutch"-Shell,) ain't gonna change the public business locations. The evil bushites think they're gonna party in Manhattan on our dime in apartments for around $15,000 a month, while sneering at a homeless beggar on the streets, who thought he was still in Vietnam.

Perhaps, he is.

Another American soldier owes me a beer, or will be dying to steal life from themselves as sacrificed for the evil criminal dictate of Their Mr. bush Jr.. Don't go silent as the unknown dying enemy to God and humanity, stand with Justice and freedom in America for Americans, and I swear, we won't kill ya as the good guys in the epilogue.

By the bushmob attempting to create unrest, so Halliburton at al, can continue in the tommy franks chaos to rob America blind with false billing, instead of cash paying, is costing the lives of American teen soldiers. Who god love'em or hate'em, don't have the intellect to strategize their way out of an open paper bag, never mind evil bush's false creeds without real leadership present as living for. Instead of bruising our egos, the bushites are dropping bombs illegally on the family.

Man.

Ask a dying soldier how it sits to know commi Halliburton pocketed Humanitarian Aid? Go ahead, ask'em?! Then ask'em why they die as cowards by rummy cluster dud for the bushmob to rob their own direct families left unprotected? Ask'em! You know what they'll tell you? They're not happy about these bushmob war crimes truly destroying America in America, "freedom", "democracy", Johnny Wizard or otherwise., Or instead they'll mumble something incoherently while jaunting away to murder some one found defenseless, or innocent to pay further while dying to slave under the criminal dictate of the really evil demon bush Jr..

A proud bushite is a toxic bushite halting from warring the innocent by stealing your human values truly.

We need to see an apology to come from America, an apology to Humanity for this carnage waged unnecessary, but for these contemptible war profiteering practices as direct assaults to all as God is. Assaults that we have been unable to remedy by openly communicating to bush's secret White House, rumsfeld's secret Pentagon, or Ashcroft's secret Justice Department.

Just who's running this show anyway, I wanna know.

A - g - a - i - n

Will Americans save themselves with help from the rest of US, by arresting bush and rumsfeld immediately for high treason?, or will they cower and DIE as the innocent, in false gratitude to the lying traitors bushmob? To with their dying breath proclaim unattested, to be ridding the Universe of their continuing criminal behavior.. a.k.a. evil?

Evidence is a must to establish a crime scene provocateur, to deny such privilege is to deny freedom be served as consented through any government.

Hint: Demon bush, rumsfeld and Ashcroft, they ain't no struggling democracy entirely.

Look, the thing about God coming down, and having it out with humanity on some various critical issues, isn't like going to happen, it is doing.

We had complete unrestricted access throughout Iraq prior to murdering any innocent child in america's name.

These verbs will strike that antiChrist demon down for ever and a day, and if I've gone, faded away, these words will still remain,

till now we meet again,

as you were,

Johnny Wizard

--

http://radio.indymedia.org/uploads/benderman.mp3

The Benderman Cause

I felt compelled to support the Benderman's cause in any way I could, so I am providing America some arguments that I would use in a court of law to defend your freedoms. If America would so desire, I would also be prepared to make a recorded statement from here in Canada. (I have been denied access into the U.S..) My positions of rational argument are naturally based upon our established facts, and as such, are something few Americans are afforded the luxury of through corporate channels. I hope my forcefulness on these issues does not fear you to doubt I have the best of intentions when it comes to serving the interests indivisibly inherent within the American Constitution. God, I believe is just, and as such, the ungodly war actions of George W. Bush dictate are criminal in the worst degree, being a harbinger of suffering and misery against all of Humanity as US being the innocent. The innocent in our entirety, is my "God" that I love with all I can will. I am compelled as a living human being to defend America to the last bush supporter praised if need be. I fight the enemy of God and Humanity with reason, understanding, Akeido, and a conviction that our justice system must prevail for me to be truly myself really.

"He explained to "60 Minutes," "I was told in basic training that, if I'm given an illegal or immoral order,

it is my duty to disobey it. And I feel that invading and occupying Iraq is an illegal and immoral thing to do."

The war was declared "illegal" by the U.N..
Why? Because Saddam wasn't found in breach
of the internationally agreed upon resolution 1441,
(Saddam did EVERYTHING POSSIBLE that was
asked of Iraq by the bush administration, and then
some Mr. Bush refused to even take him up on.
Like national Iraqi television broadcasts.) despite
the lies quoted by corporate news America. There
was no need for the conflict to begin with as was
so reported internationally on march 7th, 2003. U.N.
inspectors had complete unrestricted access to go
anywhere without delay, and known stock piles of WMD
were burned, so could not possibly be
completely accounted for by evidential findings
due to the fact that they were destroyed beyond
recognition. American soldiers were put in harms
way to be sacrificed for no better good, but for to
allow as has happened, the misappropriation, or as
some have alleged, the criminal theft of Iraqi
resources, including monies of the Iraqi Development
Funds through Presidential decree 13303. Which
include the unappropriated, desperately needed,
humanitarian aid provisions still denied innocent
Iraqis, such as potable drinking water and food
stuffs. Democratic principles are DENIED the
Iraqis by the neo-con military forces, such as holding
all individuals equally accountable to a rule of law.
The outlawing of torture, or the outlawing of false
imprisonment has not been professed as the action of
the neo-con "liberating" force. Mercenaries are not
obliged to obey any laws for example. And, "Dr.
Germ", and "Dr. Anthrax" are held solely for the
fact that they know of the scientific hazards of
depleted uranium, and may have warned the
uninformed sacrificing American GI, if not held
illegally against their wills by the enemy.
Commanders such as irrational war criminal
Sattler, forbade all men and boys between 15 to 50
from leaving the city of Fallujah, while refusing to
negotiate with anyone, (because as so was openly
confessed, Sattler had no evidence that Zaqari was
in Fallujah) then leveled the city to kill all it's
inhabitants, estimated at that time near 300,000
people. Using a napalm type WMD, cluster dud
land mine munitions, and as reported, nine two
thousand pound bombs in a city 3 1/2 km by 4 km.

Serving for a military not strong enough collectively
to prosecute such lawless criminal barbarity, is
serving for a military not principled in the American
virtues of freedom and democracy. In truth,
serving for such ungodly criminal command is a
cowardly act of treason. George W. Bush is an
enemy of our Humanity.

--

Can I Get a Witness?

"It is now argued that because demon bush is President,
it therefor doesn't matter where the actual crimes scene
evidence for the murder of thousands in America leads to
according to the FBI, for George Walker Bush (666) in
above all the laws of the universe. Despite! the
reason they obtained the warrant, was to charge me for
"threatening the life of an international person", they
instead decided not to as saboteurs of liberation. They
argued after the warrant gave them my personal
possesions, [...]"

Don't miss the rest of the inside scoop to the up
coming public Johnny Wizard trial, cradled within this
last testimony of a King left forsaken by all of America
as unworthy of public discussions in our media.

--
Look at this will ya? DU killing American Patriot
Soldiers, while bush revises our continuing history,
like this ain't really happening. I can only again, beg
you as the reader, to wake up to this bush madness, and
support ME, the mythological Son of Man God King
because: my facts I bring to our table, do not change
from your summation of my unbridled character. (I don't
need votes, but a trust in the good times coming through
for trying something better.) As I have said before, you
don't have to support Johnny by donating a few dollars
for Christ sake, but, to have a care for your own
humanity. Or, will doubting me, unfortunately, change
the truly toxic composition of measured radioactive, and
gaseously microscopic, depleted uranium. For we both as
ALL suffer from the demon bush fumbles of corrupt
ineptitude, disguised as heinous war crimes against
everyone. Crimes of murder, that there is no rational
justification for., then, or now. No good reason to
have bombed, then stole from the billed Iraq as
Dutch-Shell victims. Only irrationalisms. Examples:
What can we do now in Iraq, that we couldn't have under
Saddam? Spend tens of billions in investments on
universal health care, or education perhaps? Why bomb

anyone, when we had complete, unrestricted access? What could bush have demanded for Iraq justly, when his un-elected entourage is responsible for outrages 9/11, the Patriot Act, and Guantanamo? So see, now, we have a really big ego problem. By god, You humans are truly blind without ourselves to be seen as.

Well, not quite.

Don't forget, Our Mr. bush Jr. also participated directly with the 9/11 strategy's, top secret Presidential Directive, of offering no evidence against Bin regarding some crime that wasn't galvanizing the world like the lucky, World Trade Center incidents did in time sensibly. Without 9/11, what would Powell look like from when in August he gave the Taliban 43 million, to then in September, going after those that funded the Justice supporters? How? And, where is the Saddam money gone for the food shipments?! Our Mr. bush Jr. has it secretly he writes. He also writes he will not be accountable to any rules of Law in this Universe regarding the ownership of said monies he has stolen through the UN not chirping. I told you, no leadership. (Good thing we showed up to raise the dead eh? Nudge nudge.)

Justice and Freedom, like God as Nature, be not feared as of.

A friend and myself were discussing political deceptions, and he asked me if I knew what the secret to the universe was, and I said no, what?, he replied, there is no secret.

The politics of living is Humanity's survival, and is what should be as our interests recognized, to be representative. However, there is often dismal public failure to characterize hugely heinous criminal attempts to harm our universal freedoms through unbiased corporate conduct. Justice must be prime, and maybe You as the forever unknown still. It's just, that we don't have customers at National Newscast Central to invest in ourselves as interested benefactor. Why can not the widely publicized, and FREEDOMly available, central questions on 9/11 be asked without answer by Blitzer, or Aaron? Do they actually have US believing it is in not our interests to say as much for Justice? For America? For God as victim? How far would CNN go to discrediting American soldier after American soldier, blindly sacrificed for WorldCom bush and Dutch-Shell bremer, before CNN finally reports on bush's other partners in crime, like Ahmad, the funder of the 'mastermind', Atta.

Why continue? For as the bushmob, to murder cowardly Americans while stealing pensions and selling heroin, is just stupidly dumb, evil and wrong man. So wrote the holy god guy from beyond his own comprehension as a timeless wonder, demon slayer. The dumbass bush crimes against US as God, I will remind you, are very real, and toll many innocent souls. The criminal sabotage bush inflicts in his public responsibilities as America, yearns eternally for accountability to our suffering World, God included.

I will not go silently.

No, it wasn't Iraqi planning, or of Afghanistan's students, it was bush, rumsfeld, Condoleezza,, Ahmad, and likely Mueller as traitors, who decided your wager as American to be devalued into official, unrepresented criminality as bound tyrannical. (Tenant and checheCheney, maybe also..) See, this is why the Patriot Act rears it's direct onslaught against every American, barely too, unchallenged by Blitzer, or Aaron. No Justice for terrorists, is no freedom for bush's america TRULY. As a result, the fascist sympathizing bigots, racists, and war crime advocates, will argue they're inept to comprehend what they know not of, and as we witness, gain easy unchallenged corporate access by ignoring our public sentiment. You don't have to look far for major problems with the, "but bremer said they were freed Iraqis", or the official 9/11 story line, but as a CNN news caster, Your dismissed without care for. I say it doesn't have to be so, oh godless bushite victims censored.

--

Turning Logic on Its Head

Bush's preemptive war policy is a war without just cause. Under international law and centuries of common legal usage, a preemptive war may be justified as an act of self defense only where there exists a genuine and imminent threat of physical attack.

We are all in agreement, in truth we rise, evil is just the deceived disguised. Boo!

The case is wrapped up, and bush and rumsfeld need to be immediately arrested for 9/11, for murdering countless thousands for stolen gain, at the losses to our humanity, that show through every putrid utterance of scum bucket bush, as contempt for our living as humanity through Law. Where a person accused of a criminal

offence without any evidence is clearly innocent. For why I ask you reader, would any unjustified leader of US people blame someone for a crime who wasn't linked to the offense, while working to close investigations, and not follow through with the ample clues to capture the true evil doers? Just how cowardly stupid can soldier families be taken without conviction as themselves worth fighting for?

Justice for all, and glory be to godly.

--

Bush's preemptive war against Iraq doesn't even purport to preempt a physical attack. It purports to preempt a threat that is neither issued nor posed. Iraq is not issuing threats of attack against the United States. It is only the United States which threatens war.

By publicly encouraging attacks against the American People, bush works to do death, on hopes to then maybe?, get what he's purposing we are publicly pushing for as? Blind, dumb, and criminally neglegent; we all are then agreed? To have no publicly known reason to perpetrate war crimes against everyone to steal and murder for Our Mr.bush Jr.?... America's false deity super evil anti-Christ? The terrorist of terrorists?

The demon who marked evil on the map with an "Oh", for Ohpression by slaying everyone as the innoncet and God loving in Our names?

It isn't Our position as humanity, to grant bush free criminal reign over our rights to judge plainly still living. Americans do learn a great deal from Sitcoms thank you very much, and God damn it, we can count too. 2 infinity with everything minumn, and too, where indivisable Justice is of truly being Human to reason as the Living Universe.

Oh, but no, here comes Our Mr. bush Jr. who publicly only confesses as pure evil, nazi vermin, to want to kill our party by actually, factually, robbing from, then murdering everybody as his enemy illegally, irrationally!, and alas, God is truly alone, for CNN, as most others, have no cause to make on Our cult mentality. We are all together as One God, despite corporate news censorship ignoring our calls for Justice, because, WE are living as agreed, whole heartedly, to be worthy of fairness officially. As a democractic political lobby of too, yourself dummy. God hater nazi sharon really publicly supports the murder of

ourselves being, he states over and over again to rob
and murder from your family to be only a jewish thing.
The Universe, could be, something amazing at a real
world level of sustainability, as there is space to
consider so factually as Existence is believing!
Curently however, the corporate break up is not watching
US performing live as recorded, because they victimize
US always. War is the breakdown of communications, but,
bush, the unelected American cop killer, he isn't
listening to any questions not being stated absent your
appeals to be heard as silently victimized, because...
CNN doesn't want to embarres US maybe? All the robbing
and killing bush and sharon does continually then?,
mistakenly? Dead people don't say much for your world,
eh american niebour? Eh?

Hello.

J.

Wow! what a great riff!

--

Psychodynamic Theory

Freud suggested that there were conflicts between conscious and
unconscious forces that influence our feelings, thoughts, and
behaviors, theorizing that conscious thoughts only comprise a
fraction of mental activity, therefor concluding we, as
individuals, are psychologically, more that we can speak as
understood completely. Freud used the term unconscious motivation,
to address that of which we dont consciously know of as elements of
personality, to offer explanation and study of what can not be
stated as direct awareness of the persons living relationship to
existence with our infinite nature as. To reveal these
hypothesized underling forces of personality, Freud developed three
techniques: Free association, dream interpretation, and analysis
of, slips of the tongue. By researching these areas of experience
that are not direct results from conscious abstracts, or
conclusions, Freud hoped to reveal an order to causes that
reflected a hidden instigation of behavior included. (Freud was
secretly a theologian). Freud, naturally, considered that our
personalities begin at the start of development, so emphasized
childhood experience as the foundation, or framework from where our
personalities would be more so dependent upon. Freud formed his
theory around divided states of mind: id, ego, and superego, along
with 5 psychosexual stages to help structure an understanding of
our progressions through human development.

Such wrestling with Freuds ideas, brought me to consider, are our deliberate actions not based on sound judgement? If there are unconscious motivations driving our will, where does that leave principles, as we measure ourselves in honesty? When things are uncertain, do unconscious motivations, gain decisiveness on our faulting conclusions? Can some forgotten childhood experience, unknowingly convince ourselves, one plus one equals something else?

Humanistic Theories

Humanistic Theories emphasize our capacity for personal growth, development of our potential, and freedom to change our destiny. Unlike more defined branches of Psychology that seek underlining hidden forces, Humanistic theories stress self realizations are ultimately, like plans, responsible for the directions we take in personal development, and through the motivations we have as the human species. The phenomenological perspective, speaks of our individual perceptions, be they accurate or otherwise, become our reality, while the Holistic view, speaks of the individual person, being more than individual parts described through divisions of statement, but of a unique entity that is, in part, identifiable to all things mentionable. It would be then right to say, Holistic is a definition that defines its own meaning, as something more than can be completed by its own explanation. Much like dancing poetry that holds lasting truths, or a leisurely good beer on some sunny afternoon. In the field of Humanistic Theory attributed to Maslow, we concede we have desires, that are framed in a hierarchical manner, where the basics for survival are primary, while social and personal needs ascend us through greater living by open communications with the Universe as ourselves.

Social Cognitive Theory

The field of Social Cognitive Theory has categorized personality development, to be attributable through three wide based assertions: Environmental factors, cognitive-personal factors, and behavior, which in turn, interact to form everything. Bandura portrayed personality's development into four main processes: developing language ability, observational learning, purposeful behavior, and self-analysis. Bandura emphasized that our cognitive thought out conclusions, is our personality development. He too however, like his predecessors, also dealt with consequences we can attribute partly to forces we are not solely consciously responsible for, and the strengths of those forces upon our outcomes. The perceptions of where we are at succeeding, Bandura argued is a balance in our beliefs in what we are capable of, and so being, brought forward the outlining term, Locus of control. Internal Locus of control is dependant on how much we believe our particular actions can control some outcome for personal reward. While the designation of an external Locus of control, is a delegation to our self on some situations, as having little ability in our world as malleable to our own command for gratification,

now, or in the future somewhere. Though, it should be remembered, our living existence with nature, wouldnt be entirely hostile to the idea of bringing ourselves enjoyment by simply only trying to better ourselves, and the threat of law winning to protect the community serves better than chaotic anarchy. Not much would ever be gained, if failed attempts were concluded as complete failures of experience. Much of Bandura is widely correct as generalized statements about the human condition, so much so, that his, Self-Efficacy construct, regarding self confidence being crucial to succeeding, is as much a reiteration of his Locus of control theorem.

Trait Theory

Trait theory is an attempt to be more scientific regarding the sometimes, ambiguous nature of getting to the absolute truth of our universal condition as individuals. Trait theory's five-factor model classifies all personality traits to be associated into five categories: openness, conscientiousness, extraversion, agreeableness, and neuroticism. (OCEAN). With the theory parsed with a fluidity for change for an individuals classification as developing, while naturally becoming more stabilized as we grow older to our vises, and conceptions of conviction on who we figure we are. The designations, OCEAN, are almost arbitrary, and are prone to relative bias for conclusions. Objectivity in assessing ones agreeableness, regarding a mathematical certainty for example, only comes from whether the person understands how to formulate the answer. Perhaps it is insecurity of suffering ridicule for being stupid, that an individual would publicly argue with his calculator at the grocery store. Or in another way, ones agreeableness, without question, could lead to doing jumping jacks in Brookland if ones not careful. Now substitute agreeableness with openness, or conscientiousness.

An attempted, conscious or otherwise, confrontation to the limits of relative fallible human reason it would appear this is heading for in the field of psychology's relationship to the categories of philosophy, theology, and the true science of measurement. It is the explanation made through the divisive qualifications of language, that fall us to the deception that we are actually aware as could be of our infinite selves, a living part of existence. In the beginning was the Word, and only some super freaky God could figure out what it meant really, maybe. I could be right, to say I may be wrong on things that are not truly separate from everything else, as effects have causes, and no living thing is separate from existing. So, to successfully compartmentalize our identity, is to include our relationship to the winds on Jupiter, and the electromagnetic properties of consciousness being also timeless in nature. (Science teaches us that.)

Genetic factors are recognized to play a significant role in trait theory, particularly when looking at the comparisons of separated at birth twins, who not only have commonalties in appearance, but occasionally, also in experience with our physical reality, with decisions made, as once thought completely independent, have shown through in life styles, such as employment choices, or naming a pet dog, Toy. Which would beckon to theorize DNA's multi-dimensional space-time design, such as with horizontal gene transfers, to not just a blueprint to making something else, but to some never understandable living holographic relationship to all things in this universe, as intelligence ourselves.

--

A gem of a Johnny..

A Repeat Broadcast

It is God's fault, that is of yourself also, that we, leaderlessly, allow bush to further escape rightful public trial then life term imprisonment. This world could be so magnificent, if that demon bushmob wasn't criminally getting sacrificed so many dying leaderless American People left undefended.

You.

You, yes, You,, If you would help yourself to try questing to preserve freedom as your being stolen peace of pie, you'd be practically sky writing across the world. Can't sell it, can't buy it, but Being alive is what living is all about. Take it from me partner. God's practically wiped out, and the world is falling apart because of George W. Bush's treasonous war action against all of US as the forsaken, Humanity, (Jesus You are.) but, I still see a glimmer of hope. A real possibility that you'll be getting on to spend some quality time doing what we all should be doing, demanding real justice for (Johnn err...) freedom's bounty. Sure, I'm broke, near homeless, hungry, and left forsaken by all you little Jesuses too, but golly, I'm still holding out the dream that you gained something from your boo-da catholic Jewish Muslim Moslem Atheist upbringings. Why must we allow rumsfeld to escape accountability for blindly attacking Iraq to kill US as the innocent? The demon antiChrist Iraqi conflict has no basis for just cause. It can never be what it is not. We had complete unrestricted access, to do anything bush pleased, prior to sacrificing a single person for Halliburton and Worldcom, disappearing billions as the American tax payer, robbing the central bank, stealing the nation's public resources including humanitarian aid, dropping cluster duds on American

soldiers along with tons of toxic waste corporately
mandated as completely safe to eat by the poundful. No
joking. Murdering thousands. Demon bush is really evil
to US all man. It gives me as Creator a bad name the
great Johnster can't disguise as only one big dreaming
little g. I consider the conduct of George W. Bush an
insult to my intelligence, and, I don't like it, nor
wish bush's criminal folly to continue stealing the
lives of good people treated unjustly in anyone's name.
Let the US destroy George W. Bush instead of ourselves
as countless my friend, and be thanked in love as a
person who cared for all that is good about America.
Live god damn you People, live!

Johnny Wizard,
Again as the stupid one,

You

A Better Way
snpd
Like the bushmob
partner's theft of billions through Enron, of which in
Congressional hearings, nobody wanted to know the
pension money is still sitting in the Cayman Islands,
ready to be returned to the helpless victims, like an
American soldier's family being deemed by Congress, as
unimportant to their standard of living. No care right
nazi soldier? Just murder innocent third worlders to
tell your mother how much you care so for her? While
the war criminals, working for Dutch shell, heroin
dealers, and the monsters from Iran-contra, rumsfeld and
tommy, the nazi fucks, search the third world for people
who speak outrage against corporate America funding our
deaths by murder through censorship. While I sit here
writing as Johnny, waiting for a corporate professional
to deem me worth topicing on as unstoppable sweet
goodness. Look, read of our no counter opinion critics
in google 'groups', who publicly call themselves morons
or traitors willingly. Spooky dumb I'll tell ya.
snpd
We are all the Palestinians being counted
without value by corporate dictates ignoring the human
subsidies.

--

Johnny Wizard Reveals
Bush did 9/11

A war plan to kill the people of Afghanistan for Enron's power
plant in India was on the White House desk on the ninth of September.

A plan to blame bin Laden for a crime without providing any evidence. Then 9/11. None of the ample evidence implicated Laden, like none of the suspects were from Afghanistan, so why not seek the true culprits responsible? FBI officers have claimed publicly that warrant requests were sabotaged by someone at headquarters just prior to 9/11. The CIA has publicly claimed stock options were played on the loss of the two airline companies as insider trading. FBI officers claim Mr. Atta received $100,000 in terrorist funding by General Amed, who was meeting with the Bush administration a week prior and after 9/11. Then rumsfeld and bush stood against our humanity without reason to steal our lives, playing out an evil never before shown to sway their capture as traitors to the American dream. I demand my voice be heard through our corporate news services, to accept any debate from those who fight to keep us ignorant on our ability to freely communicate.

(from Google groups tab, us.military.army)

> Do fascists fear intelligence?

Again, we witness no counter argument for bush and rumsfeld's treason against all the American people. They both have struggled diliberately to hide the culprits responsible for 9/11, blamed a nation of millions without evidence to murder for Enron, have attacked the American Constitution, stolen billions from cowardly Americans silenced by the corporate agenda through frauds blatant...

And, they both need to immediately be tried for war crimes, or taken out by loyal American Patriots who will stand up for freedom to be America.

My question is -
Why wasn't the band plan being observed ?
FM Simplex traffic should be on 146.535 Mhz NOT on 146.54 Mhz.
See

and since when was *that* band plan etched in stone?
in fact, I should point out that with increasing capability of technology,
such "plans" as this have been updated.

Technically speaking, one could operate any frequency in the simplex range
regardless of the "official band plan" (which means, given accounting for
the deviation of an FM signal, I could operate 1 Khz INSIDE the simplex
spectrum). The official bandplan as described by the FCC doesn't specify
anything down to the exact Khz usage save for the bandplan edges.

Thus, your spurious argument that it should have taken place on 146.535 is
irrelevant.

<snip>

FM Simplex would be anywhere above 145 mhz that isn't part of a local repeater pair. Maybe even lover in frequency. But then again I've never used a repeater and most of my 2 meter experience is SSB and CW.

All band plans are subject to change.
I was not familiar with Arizona being different than most other states, I knew Utah was.

The following is copied from the
ARIZONA VHF BAND PLAN

located at
http://www.azfreqcoord.org/bp/144bp.html

Use of Simplex Frequencies
The most popular frequencies in the simplex subbands fall on even 20kHz frequencies.

This minimizes interference from adjacent operations.

It is good operating practice and strongly recommended to utilize these defacto "channels"

The INFO above is copied from the

ARIZONA VHF BAND PLAN

Technically speaking, my radio is capable of operating on any frequency from 136 Mhz to 174 Mhz with an illegally wide amount of deviation, but I don't plan on doing it just because it is possible.

Technically speaking, with the 20 KHz spacing band plan, 146.54 WAS an
appropriate frequency for them to have been operating on.

I recently bought a used ICOM H-16 that I wanted to use to monitor the 155MHz band (local state police). It turns out that the H-16 has two versions within the VHF band, and of course I bought the one that is for the low end of the band.

Does anyone know if the radio can be programmed to work on the other part of the band? Or is it more complicated than that?

thanks!

It's good to see that at least one member of the Wiseman family is
successful. Take a look at

http://jewishreggae.bizland.com

and see how Woger's namesake has become a famous musician. His latest
release, Mystical Mood, is about to come out through Marshmellow
Records.

How is it that Ron is Jewish but Woger isn't? Hmmmmmmmmmmm?

Oh, Wogie is a Jew alright. He can deny it a 100 times but that does nothing
to change the facts.
English my ass!

Poor Lardass, he's in denail that houseofnames.com lists his family
name as Jewish, while Wiseman is not.

http://www.genealogyweb.com/cgi-bin/harlein03

Wiseman Family References in the Harleian Manuscripts

Briefly, the Harlein Manuscripts are the records of the "Visitations"
(the investigation of heralds) of English and Welsh families. The
manuscripts were complied from about 1530 to the close of the 17th
century. Over 30,000 families registered their lineage which are now
housed in the British Museum in London. Your Family name was one of the
names that were registered.
You can find out more information about your family name with the
Family History Scroll.(As seen on the Below)

The Wiseman family name was recorded in the following counties, which
can be used as a starting point for further investigation into these
records held in the British Museum.

Main County Branched to
BERKSHIRE SUFFOLK
ESSEX
HAMPSHIRE
KENT
SUFFOLK

All these are English Counties, dumbass! You lose again, Davies!

http://www.houseofnames.com/coatofarms_details.asp?sId=&s=Wiseman

Origin Displayed: English

Origins Available: English, German

Spelling variations include: Wiseman, Wyseman, Wysman, Wisman and
others.
First found in Essex where they were anciently seated, before and after
the Norman Conquest in 1066.

Some of the first settlers of this name or some of its variants were: Henry Wiseman, who settled in Maryland in 1634; with Catherine; John Wiseman, who settled in Virginia in 1652; Henry Wiseman, who settled in Maryland in 1719.

(Above is a small excerpt from our 1800 word history)

While Davies, on the other hand, is clearly identified as a JEWISH name!
http://www.houseofnames.com/coatofarms_details.asp?sId=&s=Davies

Origin Displayed: Welsh

Origins Available: Welsh, Jewish

Spelling variations include: Davies, Davis, Divis and others.
First found in Flint, where the Davies family was seated from very ancient times, some say well before the Norman Conquest and the arrival of Duke William at Hastings in 1066 A.D.

Some of the first settlers of this name or some of its variants were: Arthur Davies and Dorothy Davies, who both settled in Virginia in 1623; as did Christopher and Emanuel Davies in 1635; Daniell Davies, who came to the Barbados in 1635.

(Above is a small excerpt from our 1800 word history)

Everytime Little Lloydie gets jabbed, he copies the material, sticks out his tongue and whimpers!!

Get a life, you sawed off, syphilitic dork!

>
> Oh, Wogie is a <whines>

Oh, Lardass, you are so transparent when you follow up to yourself. And nice to see you are so proud of your cocksucking lisp.

I just got a ham friend to install echolink and he's having a problem that I've never seen. He can bring echolink up and sees all the stations that are logged in. He has my call in his favorites and when he clicks on my call the problem happens. On clicking, I get a connect and everything looks good on my end, but on his end it says connecting and then times out after 50 seconds. This happens with the test server also. We had configured his router for ports 5198,5199, & 5200 and disabled the windows and norton firewalls, but to no avail. Does anyone have any ideas as to why he's having the problem. By the way, he has a linksys wireless router and is on bellsouth DSL.

Very likely still a firewall / router issue. If the client is using DHCP
from the linksys wirelss router, is it consisitently getting the same IP
address that is set in the port (5198,5199) forwarding setting? Also make
sure it's set for UDP ports 5198 & 5199 NOT TCP ports.

Port 5200 shouldn't need setting on a Linksys router because it's an
outbound port that the Linksys wouldnot block anyway.

Somewhere on http://www.echolink.org/firewall_solutions.htm you'll probably
find the problem. My bet is it's the DHCP client IP address.

/kj

note the word "recommended"

Still, the FCC regulations carry more force in this matter.

you may have to set up the firewall router with trigger ports
5198-5200 (BOTH UDP AND TCP) and global ports 5198-5199 (BOTH
UDP AND TCP). I had problems connecting with my new DSL router until I
did it that way.

My setup is a Linksys wireless router, Windows XP, using Comcast for an ISP.

When I got the router, I had to open the ports as stated above. Echolink has information relating directly to the Linksys hardware on its page. Be sure when you go set up the ports that you are on the right screen as there are two screens that look very much alike.

If you are using Windows XP, tell the software firewal to allow unlimited access for Echolink. The same would hold true for any other firewall software you may be running. You don't have to disable the firewalls, just tell them that this is a trusted program.

Finally check with the ISP to see if they are blocking those ports. Some do. If they are, have them unblock them. If they won't open them, get a different ISP. When I first tried to get on Echolink a couple of years ago (before even having a router and before getting XP), that particular ISP would not let me access the ports.

1113. INTERNATIONAL SPACE STATION LIVE ON ECHOLINK MARCH 8th TUES 1410GMT

Newsgroup: rec.radio.amateur.misc
Date: 2005-03-06 14:37:37 UTC
From: g3zhi@hotmail.com
Message-ID: <422d1588.1038955@news.btinternet.com>
Source record: 53285

INTERNATIONAL SPACE STATION LIVE ON ECHOLINK MARCH 8th TUES 1410GMT

The next International Space Station's Expedition 10 ARISS school contact will be with students at Rains High School in Emory, Texas on Tuesday, 8 March 2005. The event is scheduled to begin at approximately 14:10 GMT.

This contact will be a telebridge between stations NA1SS and WH6PN in Honolulu, Hawai'i, so it should be audible to anyone in the areas of the Pacific near the islands listening in on the 145.80 MHz downlink. The participants will conduct the conversation in English.

"Rains High School, a county school located in one of the smallest counties in Texas, is comprised of mostly low-income students who often do not get the opportunity to participate in enriching programs. The opportunity to talk with the astronauts on the International Space Station will expose our students to a world that exists beyond the boundaries of Rains County. The questions asked of the astronauts and the ideas generated by the answers will be used as jumping off points for further discussion and research."

Audio should be available for this contact Via EchoLink in the following conference rooms:
AMSAT node 101377
EDU_NET node 77992
See further notes below
Via IRLP Reflector REF9307 starting at 14:00 UTC
REGISTRATION REQUIRED (see below)
Via the internet:
URL: https://e-meetings.mci.com/
CONFERENCE NUMBER: 6037948
PASSCODE: SPACE STATIO

Students will ask as many of the following questions as time allows:

1. How would a baby's development in the womb differ if the mother were in space?
2. What do you think will be the greatest technological advancement that will come out of the research you all are doing now?
3. How do you monitor your radiation exposure?
4. How did you adjust to Newton's third law of motion while in space?

5. Since you have been in space so long, have you had the
opportunity to notice changes that have occurred on the surface
of the earth from your perspective?
6. You have learned a lot of science, but what was the one thing
you did or experiment you performed, while in space,
that you remembered reading or studying about in school, that made
you say, "Wow, it really does work that way"?
7. Do you think people will be able to spend the rest of their
lives living on the space station?
8. Could a sphere large enough to let a small fish swim in it be
formed in near gravity and could a fish actually swim in
it?
9. What is the material used on the space station and how safe is
it from space debris?
10. Are there any lubricants on the space station and if there are,
how are they affected by weightlessness?
11. Have there been any new discoveries by researchers in space
concerning the Texas state molecule, The Bucky Ball, C-60?
12. Are you allowed to carry person items and if so, is there a rule
on how much you can take?
13. Do you ever get to review the final results of the experiments
you help to conduct on the ISS?
14. What does it feel like when the shuttle takes off?
Does it hurt?
15. If you were to push a hot wheels car on a circular loop in space
in the space station, would it go forever and maintain
the same speed?

Please note, the amateur equipment on the ISS will be turned off
prior to the beginning of the contact. It will be returned
to service as quickly as possible.

ARISS is an international educational outreach program partnering
the participating space agencies, NASA, Russian Space
Agency, ESA, CNES, JAXA, and CSA, with the AMSAT and IARU
organisations from participating countries. ARISS offers an
opportunity for students to experience the excitement of Amateur
Radio by talking directly with crewmembers on-board the
International Space Station.
Teachers, parents and communities see, first hand, how Amateur Radio
and crewmembers on ISS can energize youngsters'
interest in science, technology, and learning.
Further information on the ARISS programme is available on the
website http://www.rac.ca/ariss (graciously hosted by the
Radio Amateurs of Canada). Information about the next scheduled ARISS
contact can be found at
http://www.rac.ca/ariss/upcoming.htm#NextContact.

IRLP Notes
Participation in this contact is limited to 20 connections
and requires pre-registration.

Please contact Wayne, VE1WPH, via e-mail at ve1wph@rac.ca
for pre-registration and connection instructions.

EchoLink Notes
The contact between the ISS and school lasts for about 15
minutes +/-. During this contact, we appreciate everyone's
patience and understanding. We must mute everyone except
Dieter, KX4Y to avoid inadvertent, interfering
transmissions into the conference room. Thanks for your
understanding and co-operation.

Thank you & 73,
Scott H. Stevens / N3ASA
ARISS Team Member

What is the IP Bellsouth assigns him? If it is 10.x.x.x or
192.168.x.x then he is being double-firewalled and will likely have to
use a proxy. Many DSL users in this area (Georgia) have this problem.

On my system, I had to set my firewall router up with a DMZ to my
computer and use Norton firewall to keep the script kiddies out.

(I am not on DSL, but cable.)

*** The FCC's position on band plans ***
FCC Special Counsel for Amateur Radio Enforcement Riley Hollingsworth used the occasion of an enforcement letter to commend the value of band plans.

"Although band plans are not mandatory, they exist to enhance the required cooperation and sharing of frequencies in the Amateur Service," Hollingsworth said in an enforcement inquiry.

The FCC wrote Advanced licensee Alan J. Koepke, K1JCL, citing complaints received by the Commission alleging that Koepke's 2 meter operations were causing interference to other amateurs.

"Band plans minimize the necessity for Commission intervention in Amateur operations and the use of Commission resources to resolve amateur interference problems," Hollingsworth wrote in expressing the FCC's position on band plans.

"When such plans are not followed and harmful interference results, we expect very substantial justification to be provided, and we expect that justification to be consistent with Section 97.101."

Hollingsworth said he included the statement to reiterate where the FCC stands on the question of band plans.

1117. Another HF weekend wrecked by the clowntesters

Newsgroup: rec.radio.amateur.misc
Date: 2005-03-06 21:10:03 UTC
From: Mitch of Bravo X-Ray <illnoi500@yahoo.com>
Message-ID: <7d9b7$422bdd0c$d1cc57d2$21023@snip.allthenewsgroups.com>
Source record: 53194

Ah yes! Another fine weekend that HF is completely trashed
from 75 through 10 Meters by those dammed fn clowntesters.

My favorite clowntesters are those who ran split-mode
on both 40 and/or 75 Meters, not even bothering
of course to see if (..either) split freq. pair they dropped
their trousers upon, usually with 2kW+ RF power were
"in use" beforehand. I counted 17 (seventeen) incidents
of this on the lower half of 75 meters alone on Sat night.

Let's not forget either the10kHz wide splatter
of many OP's we heard and noted with our
Marconi spectrum analyzer on 20 and 15.

We wish to acknowledge and thank both
CQ and QST magazine for this sanctioned
mayhem in which the 20% of ham radio's
most unbalanced individuals feel suddenly
empowered to run excessive power with
100% speech processing and a power mic.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 27th/February, through Sunday, 6th/March there were 236 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4S, 4U1U, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9Y, A2, A3, A4, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, C9, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FR, FT5W, FW, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J6, J7, J8, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T32, T5, T7, T8, T9, TA, TF, TG, TI, TJ, TK, TN, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK0M, VK9L, VK9N, VP2M, VP2V, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, XW, XZ, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZK1/s, ZK2, ZK3, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3B8, MAURITIUS (Update). Giovanni/IZ2DPX and Simon/IZ7ATN will be active from here March 7-14th. They are currently trying to receive licenses and are hoping to use the callsigns 3B8/IZ2DPX and 3B8/IZ7ATN. Activity will be on 40/20/17/15/12/10 meters SSB. QSL 3B8/IZ2DPX via the bureau to

IZ2DPX or direct to his QSL Manager IK2DUW. QSL 3B8/IZ7ATN via his QSL Manager IZ0CKJ.

35 YEARS OF YUCWK NEWS. Zik, DL/VE3ZIK (4N1DX), informs OPDX that two new members are now valid for "35 Years of YUCWK Award" (YU CW Club). Look for Milan/YT1WG and Acim/YZ1EW to be active until the end of the year as YT35WG and YZ35EW. QSL via their home callsign. Also, remember to look for special event callsign 4N35CW to be active all year. QSL via YU1BM. This activity is to celebrate the 35th anniversary of the YUCW Club in the State Union of Serbia And Montenegro (SUSAM).

4U1UN, UNITED NATIONS HQ. Be advised that there was a short 90 minute unexpected operation this past week (between March 1-2nd) from Seppo/OH1VR and John/W2ID. Another short operation is expected to take place once again on March 7th or 8th, possibly around 1500-1600z. QSL via HB9BOU.

6Y, JAMAICA. Kyle, WA4PGM, will be active as 6Y6Y in the CQ WW WPX SSB Contest (March 26-27th) as a Single-Op entry. QSL direct to WA4PGM.

BY4, CHINA. Dave, W8NF, will be in Shanghhai, PRC, on business in March. He hopes to be active as W8NF/BY4AOH and/or W8NF/BY4CYL sometime between March 14-21st. Actual dates and times are subject to business needs and availability of the two gracious station managers. He hopes to operate CW and plans to check the bands to find the best openings to NA. Watch his QRZ.com entry for QSL info.

ANTARCTICA NEWS.....
AY1ZA Orcadas Base (WAP ARG-15). Gianni, I1HYW, reports that several Antarctic Chasers have recently asked on the Antarctic Reflectors about how to QSL to Horacio, LU4DXU. AY1ZA and other cards from Horacio seem to be "hard to get"! A common practice is to send "Registered Mail" to those countries where mail is often a risk, particularly when Ham activities could be detected through the envelope. Cards to and from Argentina are among those hard to get! Gianni states, "Personally, I have received everything from Horacio by using this simple practice, even though registered mail is lot more expensive!"

MAITRI Station (WAP IND-03). Dr. Bhagwathi, VU3BPZ, will try to listen everyday for Europe on 14150 kHz between 1815-1900z. QSL address is still not known, but Bhagwathi will announce it soon. Meanwhile, a Maitri Base Web page has been set up, and it is available at: http://www.geocities.com/xxiiae/

W.A.P. Antarctic News and Bulletins are available on the WAP Web site at: http://www.ddxc.net/wap/boll_anno.php

CN8, MOROCCO. Look fo M'Hamed, CN8NK, to be active in the CQ WPX Contest as a Single-Op/All-Band entry. QSL via EA5XX.

DAYTON AWARD. Charle, K4VUD, reports: "Bharathi, VU2RBI, is the winner of the Special Achievement Award this year at the Dayton HamVention for her Andaman disaster communication work and the VU4 DXpedition (as well as a lifetime of teaching ham radio to school children)."

DX0, SPRATLY ISLANDS. Eddie, DU1EV, informs OPDX that Gil, 4F2KWT, has returned to the Philippine mainland. Operations from DX0K will resume the middle of March (around March 15th). They are expecting three operators during the next activation: DU1EV (Eddie), 4F2KWT (Gil) and 4F1OZ (Ed). Operation shall be from the same location, Pag-Asa Island of the Kalayaan Island Group of Palawan Province, Philippines. For more details and pictures please visit the Web page at: http://www.geocities.com/f2kwt

FT5W, CROZET ISLAND (Update/Request). Jean Paul, F5BU, now signing FT5WJ, reports that he is on most days on 14278 kHz from 1615-1830z (also sometime before dinner from 1400-1515z), and he hears many stations calling him. However, Jean Paul states too many stations (who can barely hear him) are calling and he is wasting too much time calling them. His time is very limited, and he requests that stations that can hear him good enough only call him.

FT5X, KERGUELEN ISLAND. There's a little over a week to go before the "Microlite Penguins DXpedition Team" will activate Kerguelen Islands (IOTA AF-048, DIFO FT-011). This is the same organization that activated South Georgia (VP8GEO) and South Sandwich Islands (VP8THU) in 2002. The multi-national team of twelve highly experienced operators from France, Ireland, Switzerland, Canada, Australia, Singapore, South Africa and the United States will operate on the HF bands between March 15th and April 2nd. James Brooks, 9V1YC, DXpedition Team Leader states, "This DXpedition is funded entirely by the twelve team members and a generous and exclusive grant by the Northern California DX Foundation. There are no other club, foundation, individual, manufacturer or QSL sponsors." We are expecting more details to be released for next week.

GJ, JERSEY. Frank/DL1WA and members from the Club Station DL0GTH, with Jun, JH4RHF/OE1ZKC, will be active as GJ2A during the CQ WPX SSB Contest as Multi/Single entry. Some activities are expected before and after the contest by operators using MJ/homecall and MJ0RHF(JH4RHF). QSL to callbook address for GJ2A, home callsigns (for MJ/homecall) and OE1ZKC (for MJ0RHF).

IOTA NEWS.....
AS-017. Mat, JS6PXB, will be active as JS6PXB/6 from two islands in the Okinawa Island Group. Activity will be on 80/40/30/15 meters CW/SSB. QSL via the bureau or direct (QRZ.com). Look for him to activate:
Okinawa Island - March 7th between 0500-1300z
Aguni Island - 0500z, March 8th to 0100z, March 9th

AS-060. Kim, DS4BHW, is now active as DS4BHW/p from Cho Island until March 31st. His activity will be on 80-6 meters. QSL either via the Bureau or direct to: Kim, P.O. Box 27, Sunchon, 540-600, South Korea.

EU-123. Four members of the Vital Sparks Group (MM0VSG) will be active from the Island of Arran (SCOTIA CS14 and IOSA CL01), March 10-13th. They will be active on all bands and modes at various times during their stay. QSL via the bureau to MM0VSG or direct to GM7WED: Ross Feilen, 131 Croftend Avenue, Glasgow, Scotland.

OC-NEW. Just a reminder that a new IOTA will be activated this week. (See OPDX.696 and OPDX.697). Look for YB7M to be on the air from Moresses Island (Marabatua Island) in the Laut Kecil Group, between March 9-14th. QSL via YB9BU.

OC-194. Bill, VK4FW, announced that it is a definite go to Little Solitary Island. He will sign VK4FW/p starting March 16th. He states that his equipment will be a Cushcraft R5 and a full size quarter wave vertical for 40 meters. He will spend a fair amount of time on CW, as usual, to pass out as many QSOs as possible for a new one. Look for him about 5-7 kHz from the bottom of the bands on CW. QSL direct with 2 USDs or IRC to: Bill Horner, P.O. Box 612, Childers, 4660, Australia.

OC-220. Look for VI5PN to be activated between 0700z, April 7th and 2200z, April 12th, from St. Peter Island, Nuyts Archipelego, South Australia. Activity is to commemorate Pieter Nuyts, the Dutch explorer and East India Company man.

SA-020. Members of the Provins F6KOP ARC should be ready to activate Salut Islands (Royale Island, DIFO FY-008 and WLOTA 0911) by the time you read this. Operators Bernard/F9IE, Frank/F5TVG, John/F5VHQ/OE5TGL, Jean-Paul/F8BJI and Guenter/OE3GCU will sign TO7C late evening March 7th. A second group of team operators will join them on March 10th (Frank/F4AJQ, a YL Jacquie/F6EGG, Bruno/F5AGB, Serge/F6AML and Mathieu/F5PED). The team will pay attention to the lower bands, with a V80 and receiving loops. For the upper bands (including 6 meters), they hope for very good results thanks to the HM, F5VHQ's wire beams systems. Visit their Web page for realtime logs, operating schedules and propagation forecasts at:
http://to7c.free.fr/traficuk.html
QSL via F9IE: Bernard Chereau, Boite Postale 211, F 85330, Noirmoutier en L'ile, FRANCE. For direct QSLs, please send a SAE + 1 IRC (or 1 USD for Europe and Africa, and 2 USD for anywhere else).

KH7K, KURE ISLAND. The following press release was made public on March 1st: We are pleased to announce a DXpedition to Kure Atoll, at the extreme northwestern end of the Hawaiian Islands, during Sep-Oct, 2005. The callsign for the operation will be K7C. Kure is currently #10 on DX-Magazine's Most-Wanted List, and #1 on the German DX Foundation's list. The radio team includes Bob/KK6EK (Expedition Leader), Garry/NI6T (co-organizer), Alan/AD6E (co-organizer), Mike/N6MZ, Ward/N0AX, John/N7CQQ, Charlie/W6KK, Franz/DJ9ZB, Max/I8NHJ, Alan/K6SRZ (Expedition doctor), and Kathryn K6DZL (Educational program), plus two more radio operators to be selected. The team will be QRV with four stations on all bands/modes, including 6m and RTTY. In addition to the radio operations, the group is developing an innovative real-time interactive web-satellite-based system called 'DXA'. This system will enable the DXer to see and interact with activities of the operation as they happen using any web browser. The group also will be carrying out several scientific projects in collaboration with naturalists on the atoll

to help restore and protect its fragile ecosystem. Finally, the group is developing an educational program that will utilize the DXA resource to enable students to learn from and interact with the onsite team. The project is being strongly supported by ICOM and the Pacific DX Group (Kimo KH7U and Patrick NH6UY). The team and project will be visible at Visalia and Dayton. QSL Manager is Tom, N4XP, Trustee of the Dudleys DXers of NorthEast Georgia (K4TSJ), Box 1, Watkinsville, GA 30677. The team welcomes comments and suggestions, pilots, programmers, and contributions. The project is being managed by Cordell Expeditions, a nonprofit research organization with a 25-year history of successful expeditions to remote oceanic sites. For more information, please E-mail info@cordell.org
(use "Kure7Cordell" in the Subject line) or any member listed above, and look at the full description on www.cordell.org (click on the 2005 Kure Expedition link). For more information about this release, please contact: Dr. Robert Schmieder,
CORDELL EXPEDITIONS,
4295 Walnut Blvd.
Walnut Creek, CA 94596
(925) 934 3735
KK6EK@cordell.org

KH8, SWAINS ISLAND (Update). Members of the American Samoa Amateur Radio Association (ASARA) are finally active as KH8SI from Swains Island (IOTA OC-200) after a departure delay by cyclones, rough seas and trying to find a calm place to land. Operators departed at 2200z Thursday, March 3rd, aboard the ship "Tasman Explorer". It would seem the first station came on the air early Sunday, March 6th. As this was being written (around 1400z), the activity was on 40 meters CW and 20 meters SSB. The update on the ASARS Web page stated that at 11:00z, March 6th, more stations would be set up at sunrise and should be active on all HF bands. However, operator Dianna/KB6NAN has not landed with the team and is suffering from severe seasickness. So the 6 meter activity is on hold at the moment. QSL Manager is VE3HO: Garth Allistair Hamilton, P. O. Box 1156, FONTHILL, ON L0S 1E0, CANADA. For more details, maps and pictures, visit the following Web page: http://www.swains-island.org/

OH0, ALAND ISLAND. Ari, OH5DX (ex-OH1EH), will be active as OH0Z from March 18-20th. Activity will be CW/SSB on all bands, including an effort in the Russian DX Contest (see below). QSL via OH5DX. Check out the following Web page at: http://www.qsl.net/oh0z

OOOPPPSSS DEPARTMENT. In OPDX.699, under the header "FP, ST. PIERRE AND MIQUELON", we listed the IOTA as NA-132; this is incorrect and should have been NA-032.

QSL INFO AND NEWS.....
QSL the following stations C91Z, 7P8ZZ, 3DA0WPX, SU/ZS6WPX, 5H9AW and ZS6WPX direct to: Andre van Wyk, 2 Trident Dr., Arden, NC 28704, USA.

QSL STATUS for FP/VE7SV. Paul, VE7AVV, states, "We are pleased to report that our QSL card processing is back on track and as of today

(March 1st) cards are being mailed. Please be patient, your request will be answered. On behalf of Team Miquelon, please accept our apology for this unexpected delay."

NEW QSL MANAGER. Effective immediately, QSL UA0AV via W3HNK.

NEW QSL MANAGER. Effective immediately, Joe, W3HNK, is the new QSL Manager for ST2BF. QSL direct w/SASE or by the Bureau.

NEW QSL MANAGER. Effective immediately, Joe, W3HNK, is the new QSL Manager for 9V1NC from 2005 and forward. QSL direct w/SASE or by the Bureau.

Pekka, OH2TA, is the QSL Manager for the S9A/S9BB Nov-Dec 2004 operation and also manager for OH0R and OH0TA. QSL via direct or via the bureau. Also, E-mail bureau requests are OK (oh2ta@sral.fi). Direct QSL, please 1 IRC is minimum for return postage. Also, 2 USD is OK.

VK9LA AND VQ9LA CONFUSION (More!). Last week we mentioned that the QSL Manager for VK9LA, Bill, VK4FW, reported "many many" people are getting confused between these two callsigns. Well, Larry, VQ9LA, has contacted OPDX and has also confirmed that there is a problem. Larry states, "I have corrected so many EU stations on this and they refuse to listen and go by incorrect spots (ed. from the clusters). They have also called me on RTTY and CW as VK9LA. Guess it is a computer world these days and they go by spots and not ears. KILO and QUEBEC are not even close."

VU4 QSL STATUS. Press Release (March 1st): "We are happy to inform you that the QSL cards for VU4 are being formerly released by our Honorable Minister of Communication & IT Mr. Dayanidhi Maran, VU2DMK, on 3rd March 2005, at 1200 hrs to 1300 hrs IST (UTC 0630 hrs to 0730 hrs) in New Delhi, Capital of India. All those who have sent the direct QSLs to NIAR will get back by post with in next 10 to 15 days as we have made plans to post all of them before 8th March 2005 from Hyderabad. As stated earlier, we will also place the callsigns of all the incoming QSL Cards which are received at NIAR on the VU4 Website. The sample also displayed after inauguration in our website. We will be holding a simple ceremony of release of QSL Cards along with a live demonstration of Amateur Radio in the presence of Electronic/Print Media. We request those Hams whose signals can be copied at Delhi during that time to please look for us on 14.190Mhz or 21.240 Mhz - SSB & 14.070 Mhz or 21.070 Mhz - PSK Mode. Echolink • VU2RG-R will be active. We will try SSTV with sked also. Kindly circulate the above news in your News item. Any response to the above / queries please email: niarvu4@gmail.com The above program could be arranged because of good offices of Mr. S. Suri, VU2MY Chairman & Director, NIAR and his excellent PR with the Govt. of India / Govt. of A.P
Thanking you,
With Regards"..... D.Bharathi Prasad, VU2RBI
Team Leader for VU4 Dxpedition

RUSSIAN DX CONTEST. Harry, RA3AUU, would like to invite everyone to take an active part in the 12th Russian DX Contest to be held from 1200z, March 19th, until 1200z, March 20th. They would like to see you among the increasing number of RDXC participants. For rules, news, trophies list, tips & hints and many more useful information, please visit the RDXC Web page at: http://www.rdxc.org
The contest rules are available in 9 languages.

S0, WESTERN SAHARA. Operators Tono/EA9CP and Fernando/EA1BT will be here from March 19-26th, doing a comunications project in this area, and will be active during their spare time as S09A. QSL via EA1BT.

SPECIAL EVENTS FROM LZ. Ivan, LZ1PJ, reports to look for the following special activities from Bulgaria:
1) Look for LZ800AB to be active between March 1st and April 30th. This special activity will commemorate the 800th anniversary of the "Battle of Adrianopolis" (now Edirne in Turkey), where Bulgarian Tzar Kaloyan (also known as Ioanitza) defeated the knight army of the Latin Empire and captured the emperor himself, Baldwin of Flanders.

2) Look for LZ05KM to be active between May 1-31st. This special activity is to commemorate the creators of the cyrillic alphabet; St. brothers Kiril and Methodius. (Same as LZ02KM, LZ03KM, LZ04KM).

QSL INFO: Ivan, LZ1PJ, will be the QSL Manager of both stations. QSL via the Bureau is OK or direct. E-mail requests are OK, even preferable for bureau cards. Send requests to: lz1pj@qsl.net
For direct requests, please add SAE + postage (1 USD or 1 IRC is enough). All cards will measure 9x14 cm. Please avoid sending too oversized envelopes (He has received many such envelopes from US stations). DO NOT send U.S. or other foreign stamps and also Bulgarian stamps. He can't use them. His mailing address is: Ivan Ivanov, P.O. Box 15, BG-1324 Sofia, Bulgaria.

SPECIAL EVENT. In conjunction with the KP1-5 Project, W5NWR/T will operate from the Tishomingo National Wildlife Refuge located in Johnston County, Oklahoma, on March 12-13th. This operation is the first for the W5-National Wildlife Refuge ARC. Others will follow and are intended to raise awareness of the benefits of national wildlife refuges and the KP1-5 Project. Learn more about the KP1-5 Project at: http://www.kp1-5.com
This operation will coincide with the Oklahoma QSO Party. W5NWR/T will not be in the contest but will be glad to provide Johnston County for those who are. DXers and interested hams are invited to stop by to say hello. QSL is via NA5U for a card describing refuge activities and the KP1-5 Project.

SPECIAL EVENT. The F6KPM ARS will activate the special callsign TM6OVN to commemorate the 60th anniversary of the liberation of the North Vosges area, March 22-26th. Activity is scheduled for all bands HF and VHF, and on CW, SSB, FM and digital modes. A special QSL will be available via F6KPM.

TO4G, GLORIOSO ISLAND (Update). Dany, F5CW, Technical Coordinator for this DXpedition, reports that the 2005 Glorioso DXpedition is still on

its way, but the Navy ship that would be used to carry the crew and their gear on route from Reunion Island and Mayotte is no longer available. So the team now has to use a non-Navy ship for their whole journey to Glorioso. This is now an added cost for the operators which they will have to pay out their pocket. The extra charge is for transportation from La Reunion to Mayotte and from Mayotte to Glorioso. Team states, "It's out of question to cancel this expedition." If you can help them with a donations, please contact Didier Senmartin - F5OGL, Boite Postale 7, F-53320 LOIRON, FRANCE. By E-mail: f5ogl@club-internet.fr
Visit the Glorioso 2005 Web page at:
http://glorieuses2005.free.fr/index-fr.htm
It was also announnced this past week that Floyd, N5FG, is the Pilot station for North America, and he will also manage donations from N.A. as well.

V85, BRUNEI. Ambran, V85SS, has been quite active recently on 80/40 meters CW between 1000-1730z. QSL only direct (he requests 2 to 3 USD per QSL to help cover the cost of printing, handling and postage) to:
Lt Col (Ret.) Ambran H.M.Noor Aston, SMB, psc,
P.O.Box 138, MPC,
Bandar Seri Begawan, BB3577,
SULTANATE OF BRUNEI.
ADDED NOTE: Ambran, V85SS, states that a friend from Japan, Mr. Kanzi Takemasa, JA4ENL, will be active as V85NL from his station on a short trip to Brunei. Activity will be mostly CW on 160/80/40/30/20/17/15 meters. QSL info is forthcoming.

VK9AA CQWW STORY (from Cocos Keeling). Bernd, VK2IA, has written a little article on last year's CQWW CW Contest from Cocos Keeling Island with photos, background information, links etc. For those who are interested, it can be read on the VKCC Web site at:
http://www.vkcc.com/stories/vk9aa_04.shtml

WH8, AMERICAN SAMOA (IOTA Op). Remember to look for Paul, F6EXV, to be active as WH8/F6EXV following the KH8SI operation from Larry's, AH8LG, (ex-KS6DV) QTH on Tutuila Island (OC-045). Activity should last until March 19th. Paul states, "Larry and his charming wife Uti, KS6FO, are to be thanked for their superb, friendly and nice hospitality -- they truly show the real ham spirit, and the warmth of Pacific islands inhabitants." Activity will be on all bands, mostly SSB (some CW) on the usual DX frequencies. QSL via his home callsign (see QSL directions tab on his Web page). His Web is: http://www.f5kbw.org/pagesperso/f6exv
ADDED NOTE FROM F6EXV: The old logs of the following callsigns are online on his Web page: F6EXV (up to date), 4U9U, 4U/F6EXV, 7O8AA, 9Q5EXV, 9X5DX, FO5OO, ZA1ZMX, ZA1ZVX and ZA1ZXV. The log from his WH8/F6EXV operation will be uploaded about once a day directly by himself from AH8LG's place.

ZB2, GIBRALTAR. Tom/GM4FDM and Ronald/PA3EWP will be staying in the Caleta Hotel in Gibraltar from March 21-28th. They will operate as ZB2/GM4FDM and ZB2/PA3EWP, respectively. Plans are to have antennas for 80-10 meters and possibly 160 meters. Look for activity on CW, SSB and

RTTY. They will be using Elecraft K2s. The two operators will take part
in the CQ WW WPX SSB Contest (March 26-27th). QSL via their home callsigns.

ZL1, NEW ZEALAND. Station ZL1V was active in this past weekend's ARRL DX
SSB Contest by Chris, ZL1CT. Look for ZL1V to be activated again later this
month in the CQ WW WPX SSB Contest (March 26-27th) as a Multi-Multi entry,
but from the Wellington Amateur Radio Club's QTH (ZL6QH) station. The
operators mentioned will be Chris/ZL1CT, Brian/ZL1AZE and Martin/VK7GN.
QSL both contest activities via N3SL. Also, visit the ZL1V and ZL6QH Web
pages at: http://www.qsl.net/zl1v/
http://www.zl6qh.com

New XP2500A
The World's #1 Digital Satellite Television
Receiver Descrambler is Now Available to you!!!!!

Order Yours at: http://www.fta9000.3322.org

No Monthly Subscription Charges of ANY Sort!
No Service Contracts of ANY Sort!
No Telephone Connections of ANY Sort!!!!
Does NOT use ANY Sort of Satellite Access Card
The World's Number One "Cardless" Satellite Receiver!!!!

A NEW Product for the NEW Year of 2005
Our New XP2500A Digital Satellite Television Receiver Descrambler allows you to view at your convenience the following with the USA, Canada, Cuba, Bahamas, Jamaica, Virgin Islands and Mexico:

View Over 600+ Digital Television Stations FREE! (Everything!)
View Over 200+ Digital Commercial Free Music Stations FREE !(all categories)
View Over 40 Pay-Per-View Movies Channels FREE!
View 8 HBO's/5 Cinemax's/10 Showtime's/8 Starz, etc. FREE!
View Seven Adult Channels FREE FREE FREE • 24 Hours A Day (Non-Stop Action)!
Boxing/Football/Soccer/Baseball/Basketball • ALL Sports Packages FREE (With No Black Outs)!
Receive Home-Town Local Broadcast Television Stations from 4 Time Zones
Use this New Television Descrambler at Home/Office/Truck/RV etc.
Works In the USA and Canada • plus ALL of North and South America and Territories!
Works on: Nagravision, Seca, Viaccess #1 and #2, Irdeto One and Betacrypt Digital Satellite Signals!!!!

NOTE TO AUSTRAILIANS: We get many request about the Australia•s "Foxtel Channel". Our New XP2500A Receiver works nearly ANY where in the world - but it will NOT receive "Australia•s FOXTEL Broadcast Channel" as of yet.....they use Irdeto #2 a Decoding System.....so wait patiently - our Descrambling Technicians are working HARD on this one, to brake the code.
International Customers.

Does anyone have experience with a good (and preferably inexpensive)
fox kit that has a range of atleast 30 miles? I don't have a frequency
range in mind, and am open to suggestions. Any additional suggestions
regarding the best equipment/antenna to track it with is also
appreciated.

Thanks in advance!
Dave

Hmmm I listened in to 30M, 17M, and 12M -- didn't hear a single contester
there.
And on 10M, the band was very quiet from 28.500 up.
Didn't hear any contesting on the CW portions either
Must have missed something.

Where may I obtain, beg/borrow or buy anti-electrostatic discharge
envelope containers ?

I am looking for size that will accomodate PCI adapter cards from my
PC. I need perhaps four envelopes/bag containers.

Regards, de WA2RSX

even so. the original thread that diverted here stated the frequency was to
be shifted to 146.535 Mhz (which, turned out to be a red herring).

Given the current fcc position, its still just a recommendation soley to
minimize FCC involvement. in any case, its rather irrelevant to the
original thread.

Get a reality check! Thanks to the League and the FCC today's majority
of "ham radio operators" are feeble-minded oafs, 20 questions removed
from CB. It is a chore for them to link a few coherent words together to
spew on the local repeaters, let alone asking them to commit advanced
thoughts to paper. And for $65! Yeah right! The league is taking in
a bundle every month in advertising revenue from companies selling push
button boxes to former CB ops, now ham radio appliance operators. The
League could easily afford to pay $450 per published page, and it would
never even put a nick in their budget. At least at $450 the League would
be paying an almost fair publishing price. If you think the League, the
FCC,
or Riley Hollingsworth have the best interests of ham radio in their hearts,
then I have a bridge in Brooklyn for sale.
ROTFLMAO!

That's patently false. And the only thing we're taking are casualties.

FWIW, we should have sent a cruise missile to each and every facility that Saddam denied the weapons inspectors access to, as they were denied access. But no, Clinton ignored the problem for years and years and years. Eventually we came to the conclusion that he was hiding something.

Anyway, after a few palaces went up in flames, Saddam would have allowed access. Or not. His palaces, not mine. I'm good with it either way.

FWIW... yesterday on a TV station here, a guy called in to talk to a Talk Show host. Supposedly this guy was a Marine and a "War Photographer" ordered up to go into battle to take pictures. He said they came across "MANY" Weapons of Mass Destruction.... but the officer in charge denied each and every one as such BECAUSE..... and keep this in mind, he said the UN laid down the rules as to what counted and what didn't.....

1. Rockets with no fuel
2 Rockets with fuel, no coordinates listed with equipment to launch
3. Rockets with chemical, no launch pad

All were not at same site, so as to use one from the other. Etcetera, etcetera, etcetera..... The Photographer asked why are we splitting hairs here and who made the rules as to what counted and what didn't. SO.... IF those rockets HAD all the things missing, they WOULD have been indeed WMD, according to that story.

Hmmmmmmmmm..... Was the guy BSing or telling the truth? I don't know. But it is interesting to think about. Oh and Saddam DID use them before the Gulf War, so why not have them now? What did he have to hide - to not allow inspections. I'm not a great fan of this war nor the mounting life it is taking, but Saddam COULD have been a bit more forthcoming. Him and his people acted like snakes in the grass..... Tarik Aziz, I'd love to have decked him a few times for some of his remarks. Arrogant bastard. But, in the end, he sung like a Jay-Bird..... Interesting - what a guy will do to save his own ass in the end.

I'd love to have seen Afghanistan wiped off the face of the earth for OBL to have been wiped out. We were in the good eye then. Not many would have blamed us. BUT.... we went ahead and did our thing. Were we completely wrong? Maybe not, but if we're going to forego the UN's wishes, WHY remain a part of it???? IF we wish to use their services, then we should try to compromise as best as we can. However, given the huge scandal at the UN, they've shown they out right can not be trusted. I suppose you're damned if you do and damned if you don't.

But, regardless. I hope all "terrorists" are caught and rather than tried and put in jail to be fed by OUR tax dollars for life, like the bombers of the WTC the FIRST time, they be instantly SHOT. Strange, the bombers of the Federal Building in Oklahoma were facing the Death Penalty and as we know, one is now gone. These savages got life in prison. Where IS the justice? They didn't deserve to breathe past the moment they were caught. We need to deal with these ass holes for the scum that they are..

So, your irrational, Clinton-hating conclusion is that Clinton should
have barged in there and done something BEFORE we came to the
conclusion that Hussein was hiding something?

I can picture your reaction had he actually done that.

hello, i'm relatively new to ham radio and had a few technical
questions i was hoping to throw out...anyone that can answer these
would be very helpful!

1. i've seen transmitter schematics that were simple, and others that
were complex. as a general rule of thumb, are the more complex ones
trying to compensate for frequency drift, or maybe eliminate higher
harmonics? how efficient and/or stable are the simple transmitter
schematics?

2. other than frequency range, what characteristics are you concerned
about when trying to match a transmitter to an amp?

3. without an amp, couldn't you still run the signal to an antenna and
it would be a weak transmitter? all the amp does is increase the
voltage and current supplied to the antenna, correct?

4. for an FM transmitter, does the modulation occur to oscillator
directly, or is the oscillator's signal modulated after "leaving" the
oscillator? i guess what i'm asking is whether or not there is an input
to the oscillator, or is it just an "output only" frequency generator?

thanks!
jason

Hi Jason

Nice questions, let me try to answer a few ..

<razorbladeshoes@gmail.com> wrote in message

> schematics?

One obvious thing is that CW transmitters tend to be simple, SSB transmitters complex. But there are a thousand design variables. One big one is the complexity of the ICs employed. Today you can have a very stable VFO with just a few parts. You tend to pay a little bit of a price in phase noise, but frequency drift is not an issue. With an analog VFO, you can add a lot of complexity trying to get around frequency drift, but phase noise is never an issue. Years ago, all you had was analog. A few years ago, DDS (direct digital synthesis) was complex and expensive. Today, analog VFOs tend on the expensive side! It is similar with amplifiers. In many radios, all, or most, of the PA is in a single brick, instead of a fistfull of parts. Ditto with almost everything up and down the chain.

Frequency is also an issue and again that is changing with technology. A few years ago, it was hard to get directly to VHF. You typically had several oscillators getting mixed up, frequency multiplied, etc. This was especially true if you had an analog VFO because it is very hard to get stability at VHF, and multiplying the frequency also multiplies the drift in an analog VFO. There are still reasons you might want to do some mixing up to get to VHF with a DDS VFO, but DDS parts up into the gigahertz range are now cheap parts.

It was only a few years ago that a DDS VFO cost hundreds of dollars. Today you can buy a chip with a VHF synthesizer and amplifier and modulator for less than the tuning capacitor in an analog VFO.

> 2. other than frequency range, what characteristics are you concerned
> about when trying to match a transmitter to an amp?

If you are buying commercial, you are looking at price, of course, and expected reliability, along with power consumption. For SSB, you need the amplifier to be linear, which implies lower efficiency. For FM/CW you don't need linear, so the amp can be a lot more efficient. If you are designing the amp, then you are worrying about impedance mathcing, as well.

> 3. without an amp, couldn't you still run the signal to an antenna and
> it would be a weak transmitter? all the amp does is increase the
> voltage and current supplied to the antenna, correct?

Yes of course. There are times when you want a lot of power, but most of the time it really isn't necessary. Also, it is a lot easier to get antenna gain than power to the antenna, especially at higher frequencies. The need for power depends a lot on what you do, what frequencies you operate, and to a degree, what "floats your boat". If you are doing EME or HSMS, you need a fair bit of power - hundreds of watts, anyway. If you are chatting on the local repeater, typically a watt is as good as a kilowatt. Lots of folks called QRPers like to use very low power. For them the "legal limit" is five watts, but many try to see what they can do with milliwatts. The current miles/watt record is held by a guy who operated 40 microwatts over a 500+ mile path.

> 4. for an FM transmitter, does the modulation occur to oscillator
> directly, or is the oscillator's signal modulated after "leaving" the

> to the oscillator, or is it just an "output only" frequency generator?

Typically you would modulate the oscillator, although these days, the audio may well be simply data to the synthesizer. However, because FM is typically done at VHF and higher, there may well be additional oscillators mixed with the modulated signal to get up into the VHF/UHF range.

Hope this helps

..

Good info to know. I was kinda looking around to make a (mostly) IC transmitter like that... (anything 70cm and under). Are you aware of any chip PN's or schematics I could dive into to learn?

Thanks,
Dave

Analog Devices' parts are favored by hams. The greatest number of projects out there use the AD9850, but that part is a little older, and does not provide modulation input. Also, it is really only good up to about 30 MHz, you can push a bit past that but the power requirements explode and the noise goes up. Without any component changes it will go down to 1 Hz. Newer AD98xx parts are starting to get more attention, and some of those are useful up into the low 100's of MHz. The 99xx parts have more features yet.

TI has a TRF4400 which is a 440 MHz synthesizer with modulation and an amp (not much of an amp, tho!), and the almost identical 4900 for 900 MHz. Some folks have used these down to 6 meters. The TI parts have greater channel spacing than the AD parts, but that also reduces the frequency of the crystal or oscillator, which has a big effect on the power consumption. TI also has a 2050/1/2 which are synthesizers (I don't recall if they have modulation) up into the gigahertz range. I've been toying with using one of the TI parts as a VFO for an HF rig by using a prescaler to divide down the frequency (and consequsntly the spacing).

The AD parts are pricey, but AD is very good about samples. The TI parts are all in the five buck neighborhood. There are a zillion projects/kits out there based on the AD parts.

If you've ever built an analog VFO, these DDS parts are like black magic. They take little in the way of support circuitry, no fretting about layout, no spending weeks trying to work out the temperature compensation, no moving around because you breathed on it, you just dial in the frequency you want and you are spot on.

..

LRod Hubbard, did you say irrational? Clinton-hating? Those two concepts simply cannot be used in the same sentence. Having a low regard for Clinton is very, very rational.

Anyway, it was Saddam who agreed to the weapons searches, under the Bush administration. Saddam agreed to everything, even a second war for non-compliance, so Clinton wouldn't have been barging in - Saddam had already granted permission. All Clinton did was keep an 8 year log of non-compliance. He da man!

What I do remember of the Clinton Administration was all the news about Lewinsky, and all the news about the weapons inspectors being denied access.

That and him letting the EPA gas-mileage requirements fall flat on the floor putting us in the fuel predicament we currently find ourselves in. Wasn't it him and Algore being referred to as the environmental administration? Hi! Now we've got to go after Arctic Refuge oil years and years before it would have been necessary otherwise.

Hell, I don't even hold a grudge about him making an income tax-hike retroactive to before he took office.

Then there was his boy, Greenspan, saying that he had to put the brakes on the economy. Those words keep ringing in my ears as Ohio keeps

losing manufacturing jobs for burger flipping jobs. And we're sick of burgers in Ohio.

I'm sure you get the point.

From: trip <jotto105@wi.rr.com>
Message-ID: <1110510236.295587.171510@g14g2000cwa.googlegroups.com>
Source record: 53140

MAKING MONEY I found this on a bulletin board and decided to try it. A little while back, I was browsing through newsgroups and came across an

article similar to this that said you could make thousands of dollars within weeks with only an initial investment of $6.00! So I thought, "Yeah right, this must be a scam", but like most of us, I was curious, so I kept reading. Anyway, it said that you send $1.00 to each of the 6

names and address stated in the article. You then place your own name and address in the bottom of the list at #6, and post the article in at

least 200 newsgroups. (There are thousands) No catch, that was it. So after thinking it over, and talking to a few people first, I thought about trying it. I figured: "what have I got to lose except 6 stamps and $6.00, right?" Then I invested the measly $6.00. WellGUESS WHAT!!... Within 7 days, I started getting money in the mail! I was shocked! I figured it would end soon, but the money just kept coming in. In my first week, I made about $25.00. By the end of the second week I had made a total of over $1,000.00! In the third week I had over

$10,000.00 and it's still growing. This is now my fourth week and I have made a total of just over $42,000.00 and it's still coming in rapidly. It's certainly worth $6.00, and 6 stamps, I have spent more than that on the!! Let me tell you how this works and most importantly,

why it works.... Also, make sure you print a copy of this article NOW, so you can get the information off of it as you need it. I promise you that if you follow the directions exactly, that you will start making more money than you thought possible by doing something so easy! Suggestion: Read this entire message carefully! (print it out or download it.) Follow the simple directions and watch the money come in!

It's easy. It's legal. And, your investment is only $6.00 (Plus postage) IMPORTANT: This is not a scam; it is not indecent; it is not illegal; and it is virtually no risk - it really works!!!! If all of the following instructions are adhered to, you will receive extraordinary dividends. PLEASE NOTE: Please follow these directions EXACTLY, and $50,000 or more can be yours in 20 to 60 days. This program remains successful because of the honesty and integrity of the participants. Please continue its success by carefully adhering to the instructions. You will now become part of the Mail Order business. In this business your product is not solid and tangible, it's a service. You are in the business of developing Mailing Lists. Many large corporations are happy to pay big bucks for quality lists. However, the

money made from the mailing lists is secondary to the income which is made from people like you and me asking to be included in that list. Here are the 4 easy steps to success: STEP 1: Get 6 separate pieces of paper and write the following on each piece of paper "PLEASE PUT ME ON YOUR MAILING LIST." Now get 6 US $1.00 bills and place ONE inside EACH of the 6 pieces of paper so the bill will not be seen through the envelope (to prevent thievery). Next, place one paper in each of the 6 envelopes and seal them. You should now have 6 sealed envelopes, each with a piece of paper stating the above phrase, your name and address, and a $1.00 bill. What you are doing is creating a service. THIS IS ABSOLUTELY LEGAL! You are requesting a legitimate service and you are paying for it! Like most of us I was a little skeptical and a little worried about the legal aspects of it all. So I checked it out with the

U.S. Post Office (1-800-725-2161) and they confirmed that it is indeed legal! Mail the 6 envelopes to the following addresses: #1)Dan Warner 2812
W. 1st. St. Duluth, MN 55806 #2) Karen Green 50 Gillinder Street Rockhampton Qld Australia 4700 #3) Ryan Lake 41130 Congerbay Dr Harrison Twp, MI 48045 #4) Zac Inchley unit 82/ 128 Benowa rd Southport

Qld Australia 4215 #5) Carl Baker 2267 N. Kedzie 1st floor Chicago, Illinois 60647 #6) Jason Otto 600 s. 1st st. Waterford, WI 53185
STEP 2: Now take the #1 name off the list that you see
above, move the other names up (6 becomes 5, 5 becomes 4, etc.) and add

YOUR Name as number 6 on the list. STEP 3: Change anything you need to,

but try to keep this article as close to original as possible. Now, post your amended article to at least 200 newsgroups. (I think there are close to 24,000 groups) All you need is 200, but remember, the more

you post, the more money you make! This is perfectly legal! If you have

any doubts, refer to Title 18 Sec. 1302 & 1341 of the Postal laws. Keep

a copy of these steps for yourself and, whenever you need money, you can use it again, and again. NOTE: You may want to retain every name and address sent to you, either on a computer or hard copy and keep the

notes people send you. This VERIFIES that you are truly providing a service. (Also, it might be a good idea to wrap the $1 bill in dark paper to reduce the risk of mail theft.) So, as each post is downloaded

and the directions carefully followed, six members will be reimbursed for their participation as a List Developer with one dollar each. Your name will move up the list geometrically so that when your name reaches

the #1 position you will be receiving thousands of dollars in CASH!!! What an opportunity for only $6.00 ($1.00 for each of the first six people listed above) Send it now, add your own name to the list and you're in business! ---DIRECTIONS ----- FOR HOW TO POST TO NEWSGROUPS---------- Step 1) You do not need to re-type this entire letter to do your own posting. Simply put your cursor at the beginning

of this letter and drag your cursor to the bottom of this document, and

select 'copy' from the edit menu. This will copy the entire letter into

the computer's memory. Step 2) Open a blank 'notepad' file and place your cursor at the top of the blank page. From the 'edit' menu select 'paste'. This will paste a copy of the letter into notepad so that you can add your name to the list. Step 3) Save your new notepad file as a .txt file. If you want to do your postings in different settings, you'll always have this file to go back to. Step 4) Use Netscape or Internet explorer and try searching for various newsgroups (on-line forums, message boards, chat sites, discussions.) Step 5) Visit these message boards and post this article as a new message by highlighting the text of this letter and selecting paste from the edit menu. Fill in

the Subject, this will be the header that everyone sees as they scroll through the list of postings in a particular group, click the post message button. You're done with your first one!
Congratulations...THAT'S IT! All you have to do is jump to different newsgroups and post away, after you get the hang of it, it will take about 30 seconds for each newsgroup! **REMEMBER, THE MORE NEWSGROUPS YOU POST IN, THE MORE MONEY YOU WILL MAKE!! BUT YOU HAVE TO POST A MINIMUM OF 200** That's it! You will begin receiving money from around the world within days! You may eventually want to rent a P.O.Box due to

the large amount of mail you will receive. If you wish to stay anonymous, you can invent a name to use, as long as the postman will deliver it. **JUST MAKE SURE ALL THE ADDRESSES ARE CORRECT. ** Now the WHY part: Out of 200 postings, say I receive only 5 replies (a verylow example). So then I made $5.00 with my name at #6 on the letter. Now, each of the 5 persons who just sent me $1.00 make the MINIMUM 200 postings, each with my name at #5 and only 5 persons respond to each of

the original 5, that is another $25.00 for me, now those 25 each make 200 MINIMUM posts with my name at #4 and only 5 replies each, I will bring in an additional $125.00! Now, those 125 persons turn around and post the MINIMUM 200 with my name at #3 and only receive 5 replies each, I will make an additional $626.00! OK, now here is the fun part, each of those 625 persons post a MINIMUM 200 letters with my name at #2

and they each only receive 5 replies, that just made me $3,125.00!!! Those 3,125 persons will all deliver this message to 200 newsgroups with my name at #1 and if still 5 persons per 200 newsgroups react I will receive $15,625,00! With an original investment of only $6.00! AMAZING! When your name is no longer on the list, you just take the latest posting in the newsgroups, and send out another $6.00 to names on the list, putting your name at number 6 again. And start posting again. The thing to remember is: do you realize that thousands of people all over the world are joining the internet and reading these articles everyday?, JUST LIKE YOU are now!! So, can you afford $6.00 and see if it really works?? I think so... People have said, "what if the plan is played out and no one sends you the money? So what! What

are the chances of that happening when there are tons of new honest users and new honest people who are joining the internet and newsgroups

everyday and are willing to give it a try? Estimates are at 20,000 to 50,000 new users, every day, with thousands of those joining the actual

internet. Remember, play FAIRLY and HONESTLY PLEASE REMEMBER that this program remains successful because of the honesty and integrity of the participants and by their carefully adhering to the directions. Look at

it this way. If you are of integrity, the program will continue and the

money that so many others have received will come your way

need the
> amplifier to be linear, which implies lower efficiency. For FM/CW
you don't
> need linear, so the amp can be a lot more efficient. If you are
designing
> the amp, then you are worrying about impedance mathcing, as well.

i guess what i meant was more along these lines: you need to make sure
the peak-to-peak input voltage and current capabilities of the input is
matched with the amp, right? or does the amp have a lot of leeway in
those regards?

> > 4. for an FM transmitter, does the modulation occur to oscillator
> > directly, or is the oscillator's signal modulated after "leaving"
the
> > oscillator? i guess what i'm asking is whether or not there is an
input
> > to the oscillator, or is it just an "output only" frequency
generator?

audio
> may well be simply data to the synthesizer. However, because FM is
> typically done at VHF and higher, there may well be additional
oscillators
> mixed with the modulated signal to get up into the VHF/UHF range.

just to make sure i have it straight, if i were to transmit a sine wave
at 146mhz, anyone listening in on 146 mhz wouldn't hear anything
(except maybe less noise than usual). if i were to vary the frequency
between 146.0001 and 145.9999 at a rate of 100hz, then anyone recieving
would hear a quiet 100hz tone. now if i were to vary the frequency

between 146.001 and 145.999 (holding all previous listeners constant), then anyone listening would hear a much louder tone...correct? or am i not understanding it yet? ;-)

thanks again for the help!
jason

Actually, no. Typically the amp doesn't have a lot of flexibility there,
but in general the exciter does.

In amateur practice, the impedance of almost anything that connects together
at RF is 50 ohms or converted to 50 ohms. Given that, the power level then
converts directly to voltage and current.

Typically, HF exciters have a lot of range in output power. The FCC
prohibits the sale of HF power amplifiers having a required drive of less
than 80 watts. Since most HF exciters have 100 watts out, the required
input power of HF amps is rarely specified, since it will almost always
match almost all exciters. I don't think other countries have the same
rules, but the FCC also requires that the amps cannot easily be modified to
accept lower drive, so it is expensive for manufacturers to make amps
differently for different markets, since that typically would require a
complete redesign.

On VHF, it's a little different. Most VHF exciters only have a few output
power settings. VHF amps generally specify the input power, and typically,
it will be a fairly wide range. But still, if you want, say, 200 watts at 2
meters, you would buy a different amp for a 5 watt HT than you would for a
50 watt mobile.

> not understanding it yet? ;-)

That is exactly right.

There is a weird behavior of FM receivers called the "capture effect". A
signal of sufficient amplitude at the input of an FM receiver cose to where
the receiver is tuned will totally quiet the receiver. In an AM, CW or SSB
signal, the amplitude is converted to audio almost directly. As a result,

noise on the input appears as noise on the output.

FM is different, though. In FM, we want to hear the frequency modulation. When there is no signal, we hear the detector randomly wandering around trying to interpret the noise as signal, but the amplitude of the noise really has no effect. Once a signal is detected that is strong enough for the detector to follow, the detector follows the signal and there is no more noise. To exaggerate this effect, most FM receivers amplify the signal so much that the amplifiers become saturated and amplitude variation in the input signal is clipped (well, softly clipped), so that the later stages of the receiver see the same amplitude. This is different than AM/SSB/CW where it is the amplitude changes you are looking for.

This is one of the reasons that FM signals have so much higher quality ... any noise is actually a result of noise in the receiver (or transmitter) rather than the atmosphere. With other modes, not only can you hear the atmospheric noise, but at lower frequencies, the atmospheric noise is many times higher than the noise inherent in the receiver.

The other reason is bandwidth. In amateur practice, FM signals are 5 kHz wide, compared to about 2.5 for SSB. In commercial practice, FM signals are wider still.

There is another "gotcha" in your description above. If you vary the carrier at, say, 1000 Hz, from say, 146.999 to 147.001, the actual bandwidth will be somewhat wider than you expect, and it will be dependent on the frequency of the modulation. I know this doesn't make sense, it has to do with some weird math. If you studied Fourier series back in school it was some abstract mathematical thing that had nothing to do with the real world. Well, guess what. Fourier has everything to do with radio! The result is that to stay within the 5 kHz bandwidth, the highest modulating frequency has to be somewhat lower than 5 kHz. This is one reason why the FCC prohibits amateurs from broadcasting music; reasonable fidelity of music requires higher bandwidth than voice.

..

Greetings everyone,

I found an interesting website in Australia that might be of interest to fellow amateurs and SWLers. It has freeware for ham radio. As always, if you choose to download, USE AT YOUR OWN RISK. I haven't tried these yet, so cannot guarantee them. There are a few interesting programs here and a few oldies I have used before like Super Morse. There is also a link from this site to a German website with a freeware program called Prefix which generates a bearing and distance from your QTH on a world map to the call sign you enter.(requires MS EXCEL) I'm going to give this one a try.

Have fun with Amateur radio.

Does anyone here remember the simple CW transmitter that used a 6146 as a keyed ocillator? It would put out about 60 watts. There was a very low current light bulb in series with the crystal to limit the current that could flow in the crystal circuit. I think it was in the 1959 or 60 HANDBOOK. I used a gaseous regulator tube on the screen. It didn't chirp too badly.....Analog VFO's yes now there is a fun project!

Hi Paul. This is from a Yaesu ham radio catalogue I got back in 1979:

YO-901 Multiscope has a high performance oscilloscope, two-tone generator
and optional band scope.

* IF Monitor at 8987.5kHz at 2mV p-p per division

* RF monitor for 1.8 - 54MHz,
10-500W on the Antenna jack and 5-100W on the Exciter jack.

* Vertical input 20mV p-p per division with 1, 10 and 100 attenuators,
frequency range 2Hz - 4MHz (-3dB) 8.5 - 10.7MHz
input impedance 1Mohm, 80pf,
max volts 600 (DC and AC peak)

* Horizontal input 300mV p-p per division
frequency range 10Hz - 250kHz
input impedance 100kohms, 100pf
sweep frequencies 10Hz - 100kHz in four ranges

* Optional bandscope at 8987.5kHz
sensitivity Log 50 microV/4 div, Lin 500 microV/4 div
scanning frequency 10Hz
input impedance 50/5Kohms

Hope this is of some help.
I never had a YO-901. I had a YO-101 which was for the FT-101 line. The
YO-101 had a more useful AF input for the 'scope than its predecessor,
YO-100.

Amen brother! Outstanding signature line. Only thing I can add is the "Cartridge Box" protects all the other boxes and is the one that is on the top of the big government blue state looney liberals' hit list. Democrats SUCK! I fear the federal government but love my country and its Constitution. John Kerry is a liar.

The Ohio/Penn DX PacketCluster
DX Bulletin No. 701
BID: $OPDX.701
March 14, 2005
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1ER, K1XN & GoList, N1DL, NG3K, K3SWZ, W3UR & The Daily DX, KP4BJD, N4AA & QRZ DX, KH6BZF, K8YSE, NE8Z, W0YG, DL1EK & The DX News Letter, F5CWU & La Gazette du DX, F5NQL & UFT, I1JQJ/IK1ADH & 425 DX News, I1HYW, I0MWI, IK1PMR, IZ8BRI, IZ8CCW, J6KVR & JA-IOTA Islands News, JT1BV, M5AAV, OH4MDY, ON5NT, PA7FM, UA4CC, VA3RJ & ICPO, VE3EXY, VK4FW and ZS5BBO for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 6th/March, through Sunday, 13th/March there were 233 countries active. Countries available: 3A, 3B8, 3B9, 3DA, 3V, 3W, 4J, 4L, 4S, 4U1U, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A4, A6, A7, A9, AP, BV, BY, C2, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FR, FT5W, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J5, J6, J7, J8, JA, JT, JW, JX, K, KG4, KH0, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, R1FJ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T32, T5, T7, T8, T9, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK0M, VK9N, VP2E, VP2M, VP2V, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, XW, YA, YB, YI, YK, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZK1/s, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

8Q, MALDIVES. Operators Igor/UA9CDC, Oleg/UA9CDV, Vadim/UA9CLB, Nick/UN4L and Willy/UN9LW will be active as 8Q7DV this week (March 17-29th). The team's main goal is to participate during the Russian DX and CQ WPX SSB Contests. However, look for them outside of the contests on 160-10 meters

on CW/SSB/PSK and possibly RTTY. QSL route was not mentioned.

8R, GUYANA. Craig, AH8DX, has made an early announcement that he will be active as 8R1EA in the CQ WW DX SSB Contest (October 29-30th) as a Single-Op/All-Band/High-Power entry. QSL via AH8DX. His radio will be an Elecraft K2/100 x 2.

9H, MALTA (Activities).....
Operators Andrea/IK1PMR and YL Claudia/K2LEO will be active as 9H3MR and 9H3LEO, respectively, from Gozo Island (IOTA EU-023), March 17-31st. Activity will be on 80-10 meters on all modes using 100 watts with a vertical and wires. Look for 9H3MR to be mainly on CW and 9H3LEO mainly on RTTY. QSL both callsigns via IK1PMR. Also, look for activity in the BARTG RTTY and CQ WPX SSB Contests. Skeds are welcome. Please visit the following Web page at: http://www.ik1pmr.com/dx-peditions/9h3mr/

Karl, OE3JAG, will be active from here possibly as 9H3JAG (or 9H**) between May 2-6th. Activity will be basically QRP with a dipole or long wire and mainly on CW, PSK and RTTY. QSL via his home callsign. See his Web page at: http://www.oe3jag.com

John, G4IRN, was active this past weekend as 9H3RN. He is expected to go QRT on March 14th. His activity was a holiday style operation, mainly CW on 80-10 meters. QSL via G4IRN.

9M6, EAST MALAYSIA. Brett, VR2BG, is currently here until Tuesday, March 15th. He is now active as 9M6BG and is operating mostly RTTY and some CW. He is "down there and making a bit of an effort to give folks 9M6 on RTTY." He was active this past weekend in the 'BERU Contest' and states he will be listening for stateside and Caribbean stations in his mornings.

A2, BOTSWANA. Hans/DL7CM and Sid/DM2AYO will be active as A25/homecall from April 6-20th. They plan to be active with two stations with amps on 160-6 meters CW, SSB, RTTY and PSK. There will be an emphasis on the lower bands and RTTY. QSL via their home callsigns. Visit their Web page which will also have an online log search available, at: http://www.QSL.net/dl7cm/A2.htm

ANTARCTICA NEWS.....
ARDLEY REFUGE (WAP CHL-012). Operators Oleg/UA1PBA and Slava/UA1PAI had a short operation as CE9/R1ANF from Ardley Refuge on Ardley Island this past week. Unfortunately, the conditions were very poor, and they only managed to make 20 QSOs. Also, they had an electrical problem. Activity was on 14033 kHz around 2020z. Last activity from this location was by Thomas, DP1KGI, when the building was still German property. This will be the first ham radio operation since the takeover by the Chilean authorities. QSL via RK1PWA: Nick Shapkin, P.O.Box 73, 164744 Amderma, Arkhangelskaja, Russia. The guys had to leave the island due to a big snowstorm, and they are now back at Bellingshausen Base. The equipment they used on Ardley Island consists of Oleg's FT-900 and the R6000 vertical antenna from Cushcraft and a small Honda generator. They will try to get back to the island as soon as the weather

improves. Egidio, IZ8BRI, has already offered to sponsor the QSL cards for this operation.

MAITRI Station (WAP IND-03). Dr. Bhagwathi, VU3BPZ, states that he still is monitoring 14120 kHz from 1815-1900z and also 14150 kHz daily. He has also been heard on 14245 kHz around 0820z. The QSL Manager and address was announced this past week. The QSL Manager is VU3MKE:
Mr. Manoj Kumar Dhaka,
Trupati Valley No 7, D-Lane,
Kewal Vihar
DEHRADUN
Uttaranchal - 24001 , INDIA
VU3MKE's E-mail adress is: manojdhaka@yahoo.com
Meanwhile, a Maitri Base Web page has been set up, and it is available at: http://www.geocities.com/xxiiae/

The WADA/WACA scores are now available online at the following Web page: http://www.ddxc.net/wap/award.php
(Simply clicking on the big image at left.) The WADA/WACA Awards could be requested through their WAP Award Manager, IK1GPS: Massimo Balsamo, P.O.Box 4, I-12084 MONDOVI' (CN), ITALY.

W.A.P. Antarctic News and Bulletins are available on the WAP Web site at: http://www.ddxc.net/wap/boll_anno.php

DXPEDITIONERS TAKE NOTE! Dr. Rick, NE8Z/HC1MD, informs OPDX that as of March 1, 2005, American Airlines (and possibly others) have new baggage weight restrictions on International travel.
per person: 2 bags "50 lbs" each (vs 70 lbs!!)
1 carry on bag weighing no more tnan 40 lbs
1 camera bag/purse

EY0,TAJIKISTAN. Operators Arkady/UA4CC, Vladislav/UA4LU and Sergej/RX3APM plan to take part in the RDX Contest (March 19-20th) as EY0R. The prefix "EY0" will be used for the first time. They plan to operate on 160-10 meters CW and SSB. QSL via UA4CC. All QSOs will be available on LoTW as well. Before the contest (March 17-21st), the team members will be active on all bands (including the WARC bands) using their own personal callsigns: EY8/UA4CC, EY8/UA4LU and EY8/RX3APM. QSL via their home callsigns. This operation became possible with the support of EY8MM, EY8CQ and another EY HAMs.

FS, SAINT MARTIN. Look for Henry, KR7X, to be active as FS/KR7X in the CQWW SSB Contest (October 29-30th) as Single-Op/All-Band/High-Power entry.

FT5X, KERGUELEN ISLAND (Update). The only update received this past week (on March 9th) was from Edwin, ZS5BBO, which states:
"The Braveheart departed from Durban today at 17H00 (15H00 GMT) local time. Voyage expected to take 9 to 10 days. Team on board: AG9A, GI0NWG, HB9ASZ, M0DXR, N6MZ, N0TT, SP5XVY, VE3EJ, VK6DXI, W3WL, W7EW, and 9V1YC
73 Edwin, ZS5BBO"
The Microlite Penguins DXpedition Team is expected to hit the airwave

before the end of the week (possibly the 18th or 19th). Supposedly, the callsign will not be announced until the time of the operation.

IOTA ISLAND HOPPING DXPEDITION. Karl, N1DL, will be visiting a number of Caribbean Islands in March (Estimated operating period is between March 18-31st -- approximately). His first stop will be the Dominican Republic (HI7), IOTA NA-096. He will be active as N1DL/HI7 and will try to cover most modes - like CW, SSB, PSK and RTTY. Bands will be as conditions permit. Karl will favor the IOTA frequencies and check in daily to the YL ISSB System on 14332 KHz for messages. Look for him to also activate the following:
Antigua - Callsign V25DL, NA-100
St. Kitts - Callsign N1DL/V44, NA-104
British Virgin Island - Callsign VP2V/N1DL, NA-106
Dominica - Callsign J79DL, NA-101
St. Barths - Callsign FJ/N1DL, NA-146
St. Lucia - Callsign J6***, NA-108

Also, look for him to be active as maritime mobile as V73FA/mm. His equipment is an ICOM IC706 MKIIG with all filters, a SEC1223 switching power supply (110 and 220 V), MFJ-1668 Screwdriver antenna with 12 foot rod, MixW Tiny Rigexpert USB and audio interface for the digital modes, Mini Paddle from Palm Radio for CW, Dell M60 PC running Hamradio Deluxe for rig control and PSK, DXBase 2005 for logging and MRP4060 for CW. In addition, he will have with him precut dipoles/inverted vees and a backup Screwdriver antenna with Tripod from Superantennas used last year on his South America trip. QSL to his home callsign: Karl Geng, 695 Embassy Ct, Marco Island, FL 34145. Visit the following Web pages for more information and pictures: http://www.n1dl.com
http:/www.marcoisland.org/2005trip.htm

IOTA NEWS.....
EU-125. Operators Siegfried/DL1AZZ, Lutz/DL3ARK and possibly others will be active as OZ/homecall from Mandoe Island between April 4th and May 7th. QSL via the bureau to their home callsign.

EU-171. Michael/DJ4MG and his YL Ela/DL1TM will be active as OZ/homecall from Vendsyssel-Thy between March 27th and April 14th. Their activity will be on 160/80/40/20/15 meters SSB and on 40/20 meters on PSK31. QSL via the bureau to their home callsign.

NA-128. If you missed Nenad, VE3EXY, from Island of Orleans (CISA QC-007) this past weekend, you will have another chance March 19-20th. He will sign VE2/VE3EXY/P on 40/30/20 meters. Look for him typically 10 or 25 kHz off the band edge on CW and on 14260 kHz for SSB. QSL via VE3EXY. His sunrise/sunset is: 1130/2300z. There will be some activity in the BARTG Contest.

OC-194. (Postpone Again!) Bill, VK4FW, reports: "We have run into a problem. The IOTA HQ has informed me that as far as they can ascertain Little Solitary does not seem to count (they can't find it on their maps) and I have insufficent time to firstly

make sure it does or to make the necessary permit changes
required to go to others that do count for OC-194.....
I have no choice at this late stage but to again postpone this
until I can get permissions necessary to go onto one of the
other islands that will count. Meanwhile, as I have organized
for the time to spend on this operation I may go to another
IOTA area.... possibly OC-137 or OC-142. I will confirm that
in a day or so if I can get transportation to one of them."

SA-020. All members of the Provins F6KOP ARC are now on Salut Islands
(Royale Island, DIFO FY-008 and WLOTA 0911) and will be active
until March 17th. Activity can be found on almost any band.
Visit their Web page for daily updates, pictures, realtime
logs, operating schedules and propagation forecasts at:
http://to7c.free.fr/traficuk.html
QSL via F9IE: Bernard Chereau, Boite Postale 211, F 85330,
Noirmoutier en L'ile, FRANCE. For direct QSLs, please send a
SAE + 1 IRC (or 1 USD for Europe and Africa, and 2 USD for
anywhere else).

JU1, MONGOLIA. Naran, JT1BV, informs OPDX that the JTDXA Contest Team
will be active as JU1DX in the CQ WPX SSB Contest (March 26-27th) as a
Multi-Single entry. QSL via JT1BV (QRZ.com).

KH8, SWAINS ISLAND (NOW QRT -- Quick Wrap-up). The press release was sent
out by John, K1ER, on Friday, March 11th: "We are still merging the logs
from our 4 IBM Think Pads so we don't have a total stations worked status
for every country of continent but KH8SI worked 9460 in just under 3 days.
A few more on SSB than CW, but a good balance. Typhoon Percy crossed over
Swains Island just before our arrival and left a mess very similar to the
Tsunami in the Indian Ocean. Rocks, boats, huge concrete structures which
HAD been on the beach were deposited in the center of the island. In
addition to our radios and supplies we carried food, water, and emergency
supplies to the residents of Swains Island. We were able to provide status
on the residents of Swains Island back to American Samoa in addition to
providing contacts to the world. Typhoon Percy also provided 45 degree
rolls and a remarkably bad ride on the way to Swains followed by high surf
and dangerous beach conditions. Between the weather and solar conditions,
if we missed you, sorry. We were driven by the sea conditions, heat and
humidity, and the conditions at this point in the sunspot cycle. Some bands
were good, some terrible. However 9460 in 3 days provided IOTA OC200 and
hopefully a new one to a good crowd. The openings to Europe were short
and weak with probably polar absorption taking its toll. The openings
to North and South America, Pacific Ocean area and Asia were good and the
runs on SSB and CW fast and disciplined. I hope we worked you, and if not,
NEXT TIME. The cooperation and operating skill demonstrated by most
operators made it better for everyone. Send your QSL to VE3HO our QSL
Manager. If we have more news, check the web pages at www.swains-island.org
DX IS. WFWL.... 73 John K1ER"
QSL Manager's address is: Garth Allistair Hamilton, P. O. Box 1156,
FONTHILL, ON L0S 1E0,CANADA.

LIGHTHOUSE ACTIVITY. Look for DL2VFR/p and DA0GLH (special callsign for German LH-Award - 1st time QRV) to be active from the Eckernforde LightHouse (FED-074/075/076 and GermanLH [GLHA] 079 -- new!), March 24-28th. The activity will be CW and QRP. QSL via the Bureau. Please visit the following Web page at: http://www.lighthouse-award.com

OH0, ALAND ISLAND. Operator Andrius, LY2TA, will be active as OH0Z in the CQ WW WPX SSB Contest (March 26-27th) as a Single-Op/All-Band entry. QSL via OH5DX. He will be active otside of the contest as OH0/LY2TA between March 25-28th.

OX, GREELAND. Members of the Pieksamaen Radioamatoorit (OH4AB) will team up and be active as OX/(own callsign) from March 23-30th. The team consists of Anni/OH4JGE, Lasse/OH4HJI and Retu/OH4MDY. Activity will be on 80-10 meters CW/SSB, but mostly CW. OH4MDY will participate in the CQ WPX SSB Contest on some single band. Suggested frequencies on CW are: 3507, 7003, 10104, 14007, 21007, 24897 and 28020 kHz. QSL via CBA to OH4MDY.

PJ7, SINT MAARTEN. Look for Ken, K7ZUM, to be active as PJ7/K7ZUM in the CQWW SSB Contest (October 29-30th) as Single-Op/All-Band/High-Power entry. QSL info TBA.

PY0S, ST. PETER AND ST. PAUL ROCKS. Joca, PS7JN (aka ZW0SAT and ZW0S), who frequently goes to these islands, reports that he will make 3-4 trips to this group during 2005. He plans to operate on the lower frequencies (160/80/40 meters CW/SSB) this year. Callsign will possibly be PY0SA. However, he is looking for donations to buy a new rig. He states that the weather and salt from these islands damages the equipment.

QSL INFO AND NEWS.....
Please check your database. QSL 9Y4/ZP5AZL via ZP5MAL.

Effective immediately, QSL 9Y4CX6VM via W3HNK.

Glenn, K3SWZ, informs OPDX that Mary Ann, WA3HUP, now has access to the 5A1A logs from years gone by and can provide QSL cards.

KC4/I0HCJ (WAP ITA-01) QSLs are coming! QSLs from KC4/I0HCJ have been printed and are on the way now. Just a reminder for WAP chasers that Fabrizio did operate from Mario Zucchelli Station at Terra Nova Bay during the XIX Italian Scientific Expedition in the Antarctica during 2003-2004. QSL requested go to: Fabrizio Marincola, Via Montepiccolo 1, I 00060 NAZZANO (Roma), Italy.

Graham, M5AAV, informs OPDX that effective immediately he is now the QSL Manager for the following stations: 9H3IC, M2Z, MJ2Z, MU2Z, MW2Z, M5RIC, MJ5RIC, MU5RIC, MD5RIC and MW5RIC.

Steve, I0MWI, reports that the updated T77CD log and the list of cards waiting the printing process are on his Web site at:
http://www.qsl.net/i0mwi
John, TT7CD, was recently active in the CQ/RJ WW RTTY WPX Contest and made 2236 QSOs.

The VU4NRO and VU4RBI logs are now available online. Individuals can now check to see if they received your QSL at: http://www.niar.org/vu4/qsl/

GOLIST NEWS RELEASE. John, K1XN, and "The Golist" have announced a new program for DX and Contest Clubs. This new program provides the members of a Club access to the full Golist Web database and other incentives that the Club may use as features for their members. Club officers are encouraged to contact John, K1XN, for additional information about the Club/Golist Partnership Program, via E-mail at: golist@golist.net

SILENT KEY. It has been reported that long time contester Bruce (Rush) Drake, K7RM, has become a Silent Key (SK) over the past week. OPDX and its reader would like to send out our deepest sympathy to Rush's family and friends.

ST2, SUDAN. An E-mail was received from Fernando, EA4BB, who many of you may remember working him as D2BB, 9Q5BB and TU5JL in the past, reports that he is now in the Sudan. Fernando writes, "D2BB was QRT by mid-February 2004, as I was reassigned to another job in Haiti. I went back to Angola in June 2004, just for a few days to pack my things and dismantle the station, which I did after a few more days of sporadic appearances on the amateur bands. That was the end of 6 years of activity from that country and many memorable QSOs, indeed a happy time of my life. I didn't apply for a license in Haiti, as I was swamped with work and always moving from one place to the next. I hear it is quite easy and straightforward to get a license in Haiti these days, though. I arrived in Sudan a few weeks ago, and I have got a license here: ST2BF. I don't know how long will I remain in Sudan, but I guess it will be at least one year. For the time being I haven't yet set up my station, which consists of a TS50 and a 3 element tribander, probably with some dipoles for the other bands. I am, however, checking the bands with a CODAN NGT utility transceiver and a whip antenna, until I am ready with the main station. My QSL manager is my good friend Joe, W3HNK. I would like to take this opportunity to send you my best regards from Sudan and make this extensive to all the ham community. Best 73 and DX ... Fernando ST2BF"

TT8, CHAD (Update). Ghis, ON5NT, in A6-land, informs OPDX that Michael/PA5M and Pierre/HB9AMO arrived in N'Djamena this past week. They both already have their licenses in hand. Michael is TT8M and Pierre is TT8AMO. Both operators have moved to the eastern part of the country and will be there for approx. 2 months for work (early May), so activity will be on all bands from 160-6 meters mainly during their evening hours and only during their spare time. QSL both TT8M and TT8AMO via PA7FM. Please keep in mind 1 USD does not cover postage outside Europe anymore. Request without enough return postage or SAE will be answered by the Bureau. Their QSL Manager Dennis, PA7FM, also informs OPDX that the operators have operated on 160 meters, but due to limited space for antennas they had to take the 160m atenna down again. Maybe there will be some more activity on that band later. Look for TT8AMO to operate only CW, while TT8M will do SSB and some digital modes later. Logs for both will be available on: http://www.pa7fm.nl

V2, ANTIGUA. Jurgis, LY2CY, will be active from the V26B contest station between March 22-29th. He is hoping to sign V25O for the CQ WW WPX SSB Contest (March 26-27th) as a Single-Op/All-Band entry. QSL via LY2TA.

VK9C, COCOS-KEELING ISLAND. Charlie, W0YG, will be here from November 7-21st. He will be active as VK9CG and will probably cease operations on November 20th so he can pack-up and take some of the antennas down. Charlie states, "I will leave some antennas up for VK2IA who will be operating as VK9AA starting the day I depart." Look for Charlie to be mostly on the lower bands, 160 and 80 meters, but he will also do some HF RTTY and CW. All QSLs go to W0YG, please direct only.

WH8, AMERICAN SAMOA (IOTA Op). Paul, F6EXV, is now active as WH8/F6EXV following the KH8SI operation from Larry's, AH8LG, (ex-KS6DV) QTH on Tutuila Island (OC-045). Activity should last until March 19th. Activity will be on all bands, mostly SSB (some CW) on the usual DX frequencies. He was heard this past weekend on 17 meters SSB around 18127 kHz between 1945-2200z. He was also heard on 14222 kHz around 0400z. QSL via his home callsign (see QSL directions tab on his Web page). His Web is: http://www.f5kbw.org/pagesperso/f6exv

Hi There,
There are alot of software control programs out there,
but if you want a GREAT software interface program that is 100% FREE
then go here> http://www.hb9drv.ch/ This is the Authors homepage for
the program Ham Radio Deluxe, and I believe the newest version is 3.0.
There are links from his site to the download site, and you just
download, and install... VERY Painless... Anyway, if you wish to pay
for a great software program (about $75.00 US) then try TRX Manager
located at> http://www.trx-manager.com You can download a trial
version of TRX Manager to see if you like it... I use both programs
and personally feel that they are the best two programs out there..

Best 73 OM, Tony..

thanks again for the help...your answers led me to a couple other
questions, if i may ask?

xpyttl wrote:

> In amateur practice, the impedance of almost anything that connects
together
> at RF is 50 ohms or converted to 50 ohms. Given that, the power
level then
> converts directly to voltage and current.

so if i were to design a transmitter around an COTS amp, how would i
determine what i needed to "drive" it at, in terms of voltage? if i
have 3 variables (V, I, and R) then i'd need to know 2 of the 3, then i
can solve for the third... as it is, i only know R...?

> This is one of the reasons that FM signals have so much higher
quality ...
> any noise is actually a result of noise in the receiver (or
transmitter)
> rather than the atmosphere. With other modes, not only can you hear
the
> atmospheric noise, but at lower frequencies, the atmospheric noise is
many
> times higher than the noise inherent in the receiver.

so i imagine people can do CW over FM, but does it usually occur on (I
guess what would be called) a simplified AM transceiver? either a
signal's present or not?

also, when people refer to ASK and FSK, is ASK basically an audio
output that's been sent over FM? and FSK is more like CW, only to a
receiver that can monitor both mark and space (0 and 1) frequencies?

thanks again!
jason

The "PileupBuster.com" domain name is For Sale.

For less then the price of an HF RIG you can own the ultimate Ham Radio domain name.

The PileupBuster.com domain offers immediate name recognition to everyone associated with Ham Radio. Being an established Ham Radio term, it is very easy for your customers to remember. Plus, the sales and marketing potential of a name like this is unlimited.

Even if you don't plan to use it, a name like PileupBuster.com can be a great investment.

The price is $1250.00 (U.S. dollars)

For more information or to purchase this domain, please click on the name:

http://PileupBuster.com

The name is being sold through SEDO.com. They will handle all of the ownership change and the escrow details.

If you have any questions, please feel free to contact me at: erfurth@gmail.com

Good luck.

73s,

Bill

I believe he meant AFSK (audio frequency shift keying) vs FSK (frequency
shift keying).

But you just registered it on Feb 23, 2005. If the domain name is so desirable, how come you want to dump it after less than a month?

And then there's PileupBuster.net and PileupBuster.org -- both of which are still unregistered. You can purchase them for $8.95 each at godaddy.com.

Or maybe someone might want to go with the still-available, never before registered, "PileupBusterSucks.com" domain. All are well under the $1250 price tag you've set, and all are available right now!

yes, that is what i meant. i didn't even know amplitude shift keying
existed.

am i correct about afsk being audio tones transmitted over FM, while
fsk is just alternating between two non-modulating frequencies?

That's pretty close, but not exactly on target.

AFSK can be used on top of either AM or FM. In amateur systems it's
most commonly used with FM.

FSK shifts the carrier frequency... a process which counts as a
modulation. The amount of frequency shift (in Hz) and the rate at
which you shift it (also in Hz) vary a lot from one usage to another.
There are both narrow-band and wide-band FSK modulations in use.

thanks! also, i was just reading about mixers... and getting confused.
i've run some matlab programs to figure out how you can take something
at frequency x and frequency y, and end up with an output of frequency
(x-y). one transmitter's mixer i saw took a 160mhz and 14mhz input to
get a 146mhz output. adding or multiplying them together certainly does
not yeild 146mhz. so how does that work?

thanks for the help!
jason

You are partly correct. If audio tones are fed into the microphone input (audio stages) of an AM or FM transmitter you are generating AFSK. If an audio tone is fed into a SSB transmitter it will generate a single output frequency. If the tone is switched off and on , it will be received as a CW transmitter being keyed off and on. Some newer transceivers generate CW this way. If the tone is shifted in frequency , the output will be a carrier shifted the same ammount. This is received the same as a FSK transmitter. You can get the same effect if you have a crystal controled transmiter and switch a capacitor across the crystal to change the frequency.
There is almost no way to tell the differance between the two. If 100% pure tones are used and everything else it 100% correct then there is no differance in the transmitted signals. As always nothing is 100% and you can tell the differance with very close and strong signals. This is still close enough it does not matter.

The Repooblicans did a real spin on Kerry. And you bought it. They were
going to attack the AARP as a *gay* association! Good lord, if it weren't
for the many Bible-thumping modest double-digit IQ types, the Republicans
couldn't get off the ground. Fortunately, for them, there are a *lot* of
Bible-thumping double-digit IQ types and with the endless funding from big
business - well, you will discover what happens.

Since jobs moved to China, I'm thinking of buying from the company that
bought the IBM personal computer division. The profits might as well go
there as well.

Why does a guy with whom I work have a 10% service connected disability and
cannot get VA care (despite an honorable discharge)? They keep cutting VA
funding.
He has no health insurance. He is working repairing digital cameras, so he
is not totally brain-dead. Unfortunately, only contract work is available

these days and wages are not only stagnating, they are going down.

Canada was smart. They knew the U.S. wanted them in on the missile defense so Canada could pay - and Canadians are *not* stupid, unlike many Americans who buy the Repooblican agenda.

With all due regards from Rochester, NY

You need a nonlinear function in order to get mixing behavior, and
create the sum and difference frequencies.

If you just add (e.g.) sin 160x and sin 14x, you end up with a simple
sum of sins, and no other frequencies show up - ordinary superposition.

Run the resulting sum through a nonlinear function (e.g. square it, or
take the square root, or clip it whenever its absolute value exceeds
1.0, or something like that), and take a look at the frequency content
of what you get as a result.

>I believe he meant AFSK (audio frequency shift keying) vs FSK (frequency
>shift keying).

The ITU emission designators for some digital modes and some typical
usage:

* A1A On/Off keying for manual reception (Morse)

* A1D ASK, Amplitude shift keying. The only recent use I have seen
is in some 433 MHz SRD (Short Range Devices)

* F1D Pure FSK (RTTY is classified as F1B)

* F2D Audio subcarrier modulated by amplitude or frequency (e.g.
1200 bit/s AX.25 packet) modulating an FM transmitter

* A2A Audio subcarrier on/off modulated by Morse code modulating
an AM transmitter (e.g. aeronautical beacons in the LF band)

* A2D Audio subcarrier modulated by amplitude or frequency
modulating an AM transmitter

* J2A Audio subcarrier on/off modulated by Morse code modulating
an SSB transmitter (many amateur multimode rigs)

* J2D Audio subcarrier modulated by amplitude or frequency (e.g.
300 bit/s AX.25 packet) modulating an SSB transmitter

On the air A1A and J2A are equivalent.

On the air F1D and J2A are equivalent and can be generated and
detected in both ways.

I hope this clarifies some of the issues.

That is not correct either. AFSK is used extensively with Amateur Radio
digital systems, such as PSK-31, RTTY, even CW can be and is generated
using AFSK. And the modulation METHOD is not important. It can be either
Amplitude or Frequency Modulation.

1207. SERIOUS MONEY OPPORTUNITY-$5 INVESTMENT-HIGH RESPONSE RATE-QUICK RETURNS

Newsgroup: rec.radio.amateur.misc
Date: 2005-03-14 21:31:58 UTC
From: feedbackzz@yahoo.com
Message-ID: <1110835918.814099.225770@l41g2000cwc.googlegroups.com>
Source record: 53179

Follow the directions below and you could
have $5000 in your PayPal account in 2 weeks.
There is a very high response rate in this
program because of its low investment, high
yields, and quick return. If you are a skeptic
and doubt that the program will work, I urge
you to give it a try anyway! It REALLY WORKS-
that is why so many thousands are involved in
programs like it. Don't miss this chance.

If you achieve only moderate success, your
PayPal account will still have several hundred
dollars in it within the next couple weeks.
If you actively promote the program, you could
soon have $8,000 in your PayPal account.

SIMPLE: All you need is $5 and a free PayPal
account. Pay $5 to one person.

SECURE: PayPal (BBB member) handles all
transactions. No one sees your bank or credit
card information.

LEGAL: See Title 18, Section 1302 and 1341,
US Postal and Lottery Laws.
The details of this business make it legitimate.
You are using the Internet to advertise your
business opportunity. You have a mail order
business that collects email addresses from
people interested in home-based online business.
You provide a service-mailing list membership-
in return for a small fee. Treat your mailing
list as a business. Keep accurate records,
declare your income, and pay income tax on it.

INSTRUCTIONS

STEP 1: COPY and PASTE this letter onto a
blank notepad file. SAVE as a TEXT FILE.
Keep it for the next time you need the
program.

STEP 2: Get a free PayPal account
(5 minutes setup time) at www.paypal.com.
Register for a PREMIER account (not a

PERSONAL) so that others can send money
to your account.

STEP 3: Using your PayPal account, send $5
(US DOLLARS) to the email address (PayPal
account) in position #1 of the list below.
PayPal will ask for a payment type-select
SERVICE. In the SUBJECT area, enter
"Please add me to your mailing list"
(this is very important). If you prefer
that your email address not be given to
other mailing list businesses, enter
"Please add me ONLY to your mailing list"
in the SUBJECT area. In order to send
money, you can deposit $5 into your PayPal
account with your own credit card, use
your bank account, or register for the
PayPal credit card.

IMPORTANT: IN ORDER FOR YOUR BUSINESS
TO WORK, YOU MUST BE HONEST AND SEND $5.
The mailing list business remains successful
due to the honesty and integrity of those
involved. $5 is a very small investment,
especially when you are about to receive
many times that much! If we are all honest,
we will all make money.

STEP 4: After you send your $5, remove the
address from position #1 of the list below.
Put the address in position #2 into position
#1. Put your own email address (PayPal
account) in position #2. Some engines will
automatically hide part of an email address
when the letter is posted in a newsgroup.
It may look like this:
yournam...@wherever.com

To avoid this complication, enter your
email address using 2 separate lines,
like this:

2) yourname (press ENTER on your keypad)
@wherever.com

(If you ever encounter the dots, click on
SHOW OPTIONS at the top of the letter, then
click on REPLY. Scroll down through the
original letter to find the full addresses.)

Both people on your list have already bought
mailing list memberships for $5! The program

is working! Note: If you put your name in position #1, you will not receive money from the hundreds that other members find.

CURRENT PAYPAL ACCOUNTS:

1) cwhatton22
@charter.net

2) feedbackzz
@yahoo.com

STEP 5: COPY and PASTE this letter (with your address in position #2) in emails to at least 60 newsgroups, chat sites, discussions, message boards, etc. It takes less than a minute to post the letter. The more you post, the more money you can make. People will see the letter heading as they scroll through the list of postings in a particular group. PASTE the heading below into the subject area of your email (you can also write your own heading):

SERIOUS MONEY OPPORTUNITY-
$5 INVESTMENT-HIGH RESPONSE RATE-
QUICK RETURNS

Use the search engines (Internet Explorer, yahoo.com, google.com, altavista.com, excite.com) to find sites. Search for moneymaking forums, moneymaking message board, money chat, employment message board, business message board, business discussions, etc. You can create your own free webpage (try webspawner.com, cmlb.net), then post links to your site. Try posting a notice on community and college bulletin boards to direct people to your webpage.

THIS BUSINESS WORKS

When your name reaches position #1 (usually in less than a week) it will be your turn to receive $5 deposits. If you personally find 20 interested people, and they each find 20, you make $2000. If you find 40 people, and they each find 20, you make $4000. Remember that the response rate is very high. Since there are only 2 names on the list, you can expect 80% of your profits within 2 weeks.

Participants who actively promote their mailing
list average between $5,000 and $8,000 and
receive the funds within 3 weeks.

Relieve your financial stress NOW!
Become a part of the mail order business and
help people to help people.
This program is about helping each other!

That is a fair question, and one which is frequently asked.

Look up the trig identity for (sin a)(sin b). Let a and b each be in the form wt [w stands for greek lower case omega], so a = 2(pi)f1(t) and b = 2(pi)f2(t) where f1 and f2 are your two frequencies in Hz. Do the substitution & algebra on the identity, and then I think you'll see where the signals at the sum and difference of frequencies f1 and f2 come from. :-)

The name "mixer" can be a little misleading.....it doesn't necessarily just sum the two inputs in a linear fashion (by just adding them, like a kitchen mixer combines the ingredients for a cake) but there is also an element of non-linearity in the electrical network.

Depending on the nature of the non-linearity, mixing can also generate other higher-order products, like signals at 2f1+f2, 2f1-f2, etc. Whether this is good or bad depends on your particular application. For example, do some reading on "intermod".

Hey. Mr Bean;
So amateur radio to the rescue. Eh?
But pray tell; there must be some reasoning to that decision.
Is it possible that everyone rushes to the nearest phone and ......
"Hey mum there's fire somewhere down your way. Call me back when you find
out who it is! OK?"
Or why ..... ?
Interesting! Your comment would be welcome.

Buck: Interesting; thanks for the info.
Hadn't heard of that feature/service before! Sounds like a good idea for critical zones. But imagine just 'driving by' a hospital/medical facility and the cell phone shuts off! :-)
Recently I was walking through a hospital to visit daughter who had just come from an operation, when my pocketed cell phone rang. I had forgotten to turn it off when entering the hospital as required; did so without answering it.
What has worried me a few times is to see someone weaving down the road and then driving alongside observe them engaged in an animated cell phone conversation! Love to have a 'jammer' on those few occasions.
Regulation now, in this jurisdiction, is that one is supposed to at least use a headset, to phone while driving. Not that that IMHO is the whole answer! The idea being that you keep your hands on the controls and your head is not canted over holding the cell phone against ones shoulder. Some statistics indicate, although it's too soon to tell, that accidents involving cell phone use are 'somewhat' reduced. That makes sense because despite the increased awareness the regulation is broken more often than observed, due to lax enforcement.
Its amazing how well cell phones work; even inside steel framed and metal clad buildings. It's not uncommon to see husband inside s.market/Wal-mart/COSTCO etc. phone in hand asking wifey "What size/brand/how much of ... is it that you want etc.".
And now cell phones even take pictures! "Did I show you my new tattoo ..... ". I'm afraid we've become a society of push-buttoners. On one occasion, here, a cell phone rang during a funeral; and the owner answered it! Now there's a good use for a jammer. Attach it to the casket and keep it switched on until the memorial service is over!
Thanks to all for the info in this thread.

Robert wouldn't that be OK? Much the same, say, as discussing something first hand with someone right at your elbow while waiting in line. Could be good use of your time and one more chore taken care of?
Seems more like it's 'inappropriate and cell phone use that disturbs others or disrupts the purpose of whatever is going on in that venue, that is being criticised here?
Of course there are always people who like to show off how important they are (or not) to talk loudly about their business or just have no consideration or manners anyway. They, like the poor, will always be with us; just feel sorry for their uncouthness!
I vividly recall a woman, with a so called 'Upper class British accent' telling a whole train carriage load of people, via the use of her cell phone "Yes darling; we are on this quaint little train and ..... please will you get a car to pick us up at ..... ". Translation; "I'm used to much better things than all this and the people here are beneath me in social station etc. etc. ".
Radio amateurs are not like that. Unfailingly polite and considerate, on the phone, on the air, anywhere. It's requirement of the hobby, is it not? :-)

HOW TO TURN $6 INTO $6,000!!!!!! READING THIS COULD CHANGE YOUR LIFE!

I found this on a bulletin board and decided to try it. A little while back, I was browsing through newsgroups, just like you are now, and came across an article similar to this that said you could make thousands of dollars within weeks with only an initial investment of $6.00! So I thought, Yeah right, this must be a scam,but like most of us, I was curious, so I kept reading. Anyway, it said that you send $1.00 to each of the 6 names and address stated in the article. You then place your own name and address in the bottom of the list at #6, and post the article in at least 200 newsgroups. (There are thousands) No catch, that was it. So after thinking it over, and talking to a few people first, I thought about trying it. I figured: what have I got to lose except 6 stamps and $6.00, right? Then I invested the measly $6.00. Well GUESS WHAT!!... within 7 days, I started getting money in the mail! I was shocked! I figured it would end soon, but the money just kept coming in. In my first week, I made about $25.00. By the end of the second week I had made a total of over $1,000.00! In the third week I had over $10,000.00 and it`s still growing. This is now my fourth week and I have made a total of just over $42,000.00 and it`s still coming in rapidly. It`s certainly worth $6.00, and 6 stamps, I have spent more than that on the lottery!! Let me tell you how this works and most importantly, why it works....Also, make sure you print a copy of this article NOW, so you can get the information off of it as you need it. I promise you that if you follow the directions exactly, that you will start making more money than you thought possible by doing something so easy!
Suggestion: Read this entire message carefully! (Print it out or download it.) Follow the simple directions and watch the money come in! It`s easy. It`s legal. And, your investment is only $6.00 (Plus postage)

IMPORTANT: This is not a scam; it is not indecent; it is not illegal; and it is virtually no risk - it really works!!!! If all of the following instructions are followed exactly, you will receive extraordinary dividends.

PLEASE NOTE: Please follow these directions PERCISELY, and $50,000 or more can be yours in 20 to 60 days. This program remains successful because of the honesty and integrity of the participants. Please continue its success by carefully adhering to the instructions. You will now become part of the Mail Order business. In this business your product is not solid and tangible, it`s a service. You are in the business of developing Mailing Lists. Many large corporations are happy to pay big bucks for quality lists. However, the money made from the

mailing lists is secondary to the income which is made from people like you and me asking to be included in that list. Here are the 4 easy steps to success:

STEP 1: Get 6 separate pieces of paper and write the following on each piece of paper; PLEASE PUT ME ON YOUR MAILING LIST. Now get 6 US $1.00 bills and place ONE inside EACH of the 6 pieces of paper so the bill will not be seen through the envelope (to prevent thievery). Next, place one paper in each of the 6 envelopes and seal them. You should now have 6 sealed envelopes, each with a piece of paper stating the above phrase, your name and address, and a $1.00 bill. What you are doing is creating a service. THIS IS ABSOLUTELY LEGAL! You are requesting a legitimate service and you are paying for it! Like most of us I was a little skeptical and a little worried about the legal aspects of it all. So I checked it out with the U.S. Post Office (1-800-725-2161) and they confirmed that it is indeed legal! Mail the 6 envelopes to the following addresses:

Mailing Addresses

1. P. FREY, 4577 W. PONDS CIR, LITTLETON, CO 80123
2. E. DE LEON, 14014 Rosecrest, Houston,TX 77045
3. A. Lopez, 810 Ave.J, South Houston TX 77587
4. L. Pacheco, 812 Ave.J, South Houston, TX 77587
5. K. Bat, 9335 Alcona Street, Lanham, MD 20706
6. B. Scruggins, P.O. Box 845 Port Barre, LA 70577

STEP 2: Now take the #1 name off the list that you see above, move the other names up (6 becomes 5, 5 becomes 4, etc...) and add YOUR Name as number 6 on the list.

STEP 3: Change anything you need to, but try to keep this article as close to original as possible. Now, post your amended article to at least 200 newsgroups. (I think there are close to 24,000 groups) All you need is 200, but remember, the more you post, the more money you make! This is perfectly legal! If you have any doubts, refer to Title 18 Sec. 1302 & 1341 of the Postal lottery laws.
Keep a copy of these steps for yourself and, whenever you need money, you can use it again, and again.

PLEASE REMEMBER that this program remains successful because of the honesty and integrity of the participants and by their carefully adhering to the directions. Look at it this way. If you are of integrity, the program will continue and the money that so many others have received will come your way.

NOTE: You may want to retain every name and address sent to you, either on a computer or hard copy and keep the notes people send you. This VERIFIES that you are truly providing a service. (Also, it might be a good idea to wrap the $1 bill in dark paper to reduce the risk of mail theft.)
So, as each post is downloaded and the directions carefully followed,

six members will be reimbursed for their participation as a List Developer with one dollar each. Your name will move up the list geometrically so that when your name reaches the #1 position you will be receiving thousands of dollars in CASH!!! What an opportunity for only $6.00 ($1.00 for each of the first six people listed above) Send it now, add your own name to the list and you`re in business!
---DIRECTIONS ----- FOR HOW TO POST TO NEWSGROUPS---------- Step 1) You do not need to re-type this entire letter to do your own posting. Simply put your cursor at the beginning of this letter and drag your cursor to the bottom of this document, and select `copy` from the edit menu. This will copy the entire letter into the computer`s memory.

Step 2) Open a blank `notepad` file and place your cursor at the top of the blank page. From the `edit` menu select `paste`. This will paste a copy of the letter into notepad so that you can add your name to the list.
Step 3) Save your new notepad file as a .txt file. If you want to do your postings in different settings, you`ll always have this file to go back to.

Step 4) Use Netscape or Internet explorer and try searching for various newsgroups (on-line forums, message boards, chat sites, discussions.) Just example you log on any search engine like, yahoo.com,google.com, altavista.com,excite.com then you search with this subject millionaire message board? or money making message
board? or employment message board? or money making discussions? or money making forum? or business message board? etc. You will find thousand & thousand message board. Click one by one then you will find the option post a new message.
Step 5) Visit these message boards and post this article as a new message by highlighting the text of this letter and selecting paste from the edit menu. Fill in the Subject, this will be the header that everyone sees as they scroll through the list of postings in a particular group, click the post message button. You`re done with your first one! Congratulations...THAT`S IT! All you have to do is jump to different newsgroups and post away, after you get the hang of it, it will take about 30 seconds for each newsgroup!

REMEMBER, THE MORE NEWSGROUPS YOU POST IN, THE MORE MONEY YOU WILL MAKE!! BUT YOU HAVE TO POST A MINIMUM OF 200
That`s it! You will begin receiving money from around the world within days! You may eventually want to rent a P.O.Box due to the large amount of mail you will receive. If you wish to stay anonymous, you can invent a name to use, as long as the postman will deliver it.
JUST MAKE SURE ALL THE ADDRESSES ARE CORRECT.

Now the WHY part: Out of 200 postings, say I receive only 5 replies (a very low example). So then I made $5.00 with my name at #6 on the letter. Now, each of the 5 persons who just sent me $1.00 make the MINIMUM 200 postings, each with my name at #5 and only 5 persons respond to each of the original 5, that is another $25.00 for me, now

those 25 each make 200 MINIMUM posts with my name at #4 and only 5 replies each, I will bring in an additional $125.00! Now, those 125 persons turn around and post the MINIMUM 200 with my name at #3 and only receive 5 replies each, I will make an additional $626.00! OK, now here is the fun part, each of those 625 persons post a MINIMUM 200 letters with my name at #2 and they each only receive 5 replies, that just made me $3,125.00!!! Those 3,125 persons will all deliver this message to 200 newsgroups with my name at #1 and if still 5 persons per 200 newsgroups react I will receive $15,625,00! With an original investment of only $6.00! AMAZING! When your name is no longer on the list, you just take the latest posting in the newsgroups, and send out another $6.00 to names on the list, putting your name at number 6 again. And start posting again. The thing to remember is: do you realize that thousands of people all over the world are joining the internet and reading these articles everyday?, JUST LIKE YOU are now!! So, can you afford $6.00 and see if it really works?? I think so... People have said, "What if the plan is played out and no one sends you the money? So what! What are the chances of that happening when there are tons of new honest users and new honest people who are joining the internet and newsgroups everyday and are willing to give it a try? Estimates are at 20,000 to 50,000 new users, every day, with thousands of those joining the actual internet.

Remember: Play FAIRLY and HONESTLY and this will really work.

Beware it's not nice to arrest Mother Nature let alone he/she that commands
it.

Hi All,

I am going to be using an ADI 247 as a temporary link radio and am wondering
if anyone has used one of these in the past.

If you have, can you give me any tips on where the best point to pull COS
from may be? hi or lo... either will suffice.

Thanks!

Jim...

1240. Low Power AM Broadcasting

Newsgroup: rec.radio.amateur.misc
Date: 2005-03-17 16:20:02 UTC
From: WCRV@webtv.net
Message-ID: <10699-4239AE32-497@storefull-3317.bay.webtv.net>
Source record: 53062

The Low-Power AM station hobby has become more popular over the past 2 years.
In the U.S, it is legal to broadcast over the AM band 540kHz-1700kHz using a 3
meter antenna and a 100mW transmitter.
Until recently, building a small AM radio station was very complicated and very expensive, until now.
Using a SSTRAN AMT-3000 transmitter, which comes as a kit for under $100.00US, or a built version which comes assembled and tested for under $200.00 US, and a 3 meter, coil loaded and tunable antenna for around $225.00 US, anyone can get on the air right now!
I get questions about range: the system I am describing has had reports from 1/2 mile to over 4 miles! Range totally depends on these factors: location, scope of the land, conductivity, choice of frequency/adjacencies, and use of this antenna.
If the transmitter and antenna are installed correctly in a proper area, several miles are possible. Many people are interested in a good, solid local signal and this system does it for a fraction of the amount of money you will spend for a comparable system.
If you are interested in low power AM Broadcasting, I invite you to visit this site:
http://antenna18431.tripod.com/antenna.htm
In this site you will find information on the 3 meter antenna, pictures of it, information and pictures of the transmitter and a link to email questions, comments and inquiries to.
If you would like to be on the air, this is an excellent choice to do it well, and at a very affordable price!

QST:

International IRLP Contest starts at 1101 AEDT (0001z) today, March 18,
2004. Over 100 nodes worldwide now participating with more joining
daily..details, contest rules & regs can be found at
http://kg4zxk.com/index.php or http://www.qsl.net/vk3irl/ as can a
pre-formatted log sheet and what contacts equal what points.

Join in this new and fascinating way of communicating. The contest concludes
at the closing of the IRLP Conference in Las Vegas, April 17, 2004.

Supported by the Bass IRLP Group, WIA, ARRL & Chesapeake AR Club, USA.

It will burn up except on low power with a fan on it.
All Amateur radios are NOT designed for 100% duty cycle.
But a Motorola maxtrac or radius. they are almost 80% cycle and if you
turn the power down 20-25% will run cool!!

If you plan on using it for IRLP I will help you with the programming.

Source record: 53079

Hi Group,

I just picked up two ham II controllers and one CD-45 rotor. I got the manual on the ham II and the CD-45 controller. Looking at the schematic, I see that the controller for the CD-45 is a little different than the one for the Ham II.

The ham that sold them to me said that the rotor would work with the control box.

Is this true?

> ke6cqk

What would you use if not coax? A string? I would think with even the
best coax, a thousand feet would be more loss then what you would gain
by the height of the antenna.
If you have power on the hill, using two duel band radios might get you
what you want!

You might consider cross band repeat or a remote base arrangement
Both would require power on the hill.

Source record: 53087

Well I did it..

I simply took the time with an old analog VM and I found exactly what I was
looking for..

On the ADI AR-247, I was able to locate both COS Hi and COS Low.

Pins 10 (SQ) & 12 (SM) on CN4 will provide Active Low and Active High
respectively.
It's only about 4 Volts on my meter but that's more than enough to trigger
my IRLP v3 card.

I simply pulled my COS from the leg of VR1 for my active high.

J..

WHAT IS ARMAD ?

Url:http://www.freewebs.com/kb9ibw/

ARMAD is an annual Amateur Radio Special Event project that stands for Amateur Radio Military Appreciation Day. We work with National Military Appreciation Month during the month of May. Amateur Radio Operators from around the world team up during this joint effort to allow the people from our communities to gather at public locations such as shopping centers, parks, VA hospitals, and sporting events to express verbal positive support "LIVE" over the radio for members of the Military, Veterans, Reserves, National Guard, and military support groups. It is also a chance for those at each location to hear and exchange messages of appreciation with each other over the radio. Many of us have friends, relatives, and neighbors that are active duty, and past members of the armed forces. ARMAD gives us the chance to support one another, and to express our thanks and appreciation to those that sacrifice and serve in the Armed Forces.

ARMAD 2005 will be held on May 28. The Saturday of Memorial Day Weekend. Visit the link "INFO" for updates and information for ARMAD 2005.

Please pass the word!

I just downloaded and tested the program at the above link. It is a
Great Circle Map in Excel. I changed the coordinates for my QTH and
the angles changed appropriately, however, what I need now is that map
in the background on which the beam headings are plotted.

If anyone knows how to add this, I would appreciate knowing.

Thank you,
Buck

I found the readme. I was looking for an external file. I haven't
figured out how to get GCMwin to center on my QTH yet, but I am sure I
will figure it out soon.

Thanks very much for the links. I have been looking for something
like this.

:)

March 21, 2005
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, KA2AEV, K3LR, NG3K, W3HC, W3UR & The Daily DX, K4UJ, N4AA & QRZ DX, K5LBU, WK6I, K8YSE, 4Z4KX, 9A7K, CE6TBN, DL1EK & The DX News Letter, DL2VFR, DU1EV, EA5ON, EC8AUA, F5CWU & La Gazette du DX, F5NQL & UFT, F5NZO, HA0HW, I1JQJ/IK1ADH & 425 DX News, I1HYW, IN3XUG, IZ8BRI, IZ8CCW, J6KVR & JA-IOTA Islands News, JA3AAW, JA3USA, JA0SC, M5AAV, OE3JAG, OH4MD, OZ1LQH, SM0DTK, SP5UAF, VA3RJ & ICPO, VK4AAR and VK4FW for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 13th/March, through Sunday, 20th/March there were 227 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 4J, 4L, 4S, 4U1I, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5W, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FR, FT5W, FT5X, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HC, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KH8, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, T9, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK0M, VK9N, VP2E, VP2M, VP2V, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, YA, YB, YI, YK, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZK1/s, ZK3, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2, FIJI (IOTA Op). Brian, N6IZ, will be active as 3D2IZ from Namotu Island (OC-121), March 26th through April 5th. Activity will be on 80/40/20/15/10 meters and entry in the CQ WW SSB Contest (March 26-27th).

His activity will also be scheduled around his main purpose which is surfing. Visit his interesting Web page to view his posted schedule and operating frequencies at: http://www.n6iz.com
QSL direct to N6IZ (QRZ.com).

9A, CROATIA (Croatian Islands DXpedition). Leon, 9A2KL, will be active from many Croatian Islands between March 21-23rd. The islands will be good towards the "All Croatian Islands Award". QSL via the bureau or direct via his home callsign. The list of all the Croatian Islands that Leon is going to activate can be viewed at: http://www.9a7k.com

APDXC 2005. "DXers and Contesters are cordially invited to the Asia Pacific DX Convention (APDXC), which will take place November 18-20th, 2005, as the first Asian international DX event. In addition to the presentations of recent DXpeditions, technical sessions, displays, etc. that you find at most large DX conventions, this convention offers something special such as a tour to the Icom factory, a technical session led by the Icom IC7800 design team, a tour to the electronics district, and more, since it is being held in the country in which most of the amateur radio equipment is developed. For the non-hams accompanying you, there will be activities in which they can enjoy Japanese culture. Activities like a tea ceremony and flower arranging are being prepared. We would appreciate your introducing this convention to your DX/contest club members. See our website for more details at: http://www.ja3.net/apdxc
For convention updates, please visit the Web site and send an E-mail to subscribe to the APDXC newsletter. We look forward to welcoming you at the APDXC in Osaka, Japan....." APDXC Committee / JA3USA

C6, BAHAMAS. Duncan, EA5ON, will once again be active from Freeport as GM7CXM/C6A. His provisional dates are from May 26th to May 30th. As in previous years, this is a business trip, but he hope to be fairly active on 80-10 meters, mostly on SSB but also some digitals, and perhaps participating a bit in the CQWW WPX CW Contest. The IOTA reference is NA-080 (Grand Bahama Island). QSL via EA5ON, direct or via the bureau.

CONTEST DINNER (Dayton HamVention). Tim, K3LR, reports that the North Coast Contesters are pleased to announce their 13th Annual Dayton Contest Dinner will be held on Saturday, May 21st, at 6:30 PM (Cash bar opens at 5:30 PM), at the Crowne Plaza Hotel located at 5th and Jefferson Streets (Next to the Convention Center) Dayton (Downtown), Ohio, in the VAN CLEVE BALLROOM. Menu: Prime Rib of Beef, Potato, vegetables, rolls, chocolate fudge cake, choice of beverage, coffee, tea or iced tea. *** Vegetarian menu available by request at the Contest dinner. Price is 33.00 USD per person (SEATING IS LIMITED TO 300, SO ORDER YOUR CONTEST DINNER TICKETS EARLY). Guest speaker is successful book writer, contest operator and all around great guy, Ward Silver, N0AX. Master of Ceremonies for the Contest dinner is John Dorr, K1AR. The 2005 Contest Hall of Fame Inductions will be formally announced by the CQ WorldWide Contest Director and CQ Contest Hall of Fame member, Bob Cox, K3EST. All Contest dinner ticket orders are handled exclusively by Craig Clark, K1QX, at: Radioware and Radio Bookstore, PO Box 209, Rindge, NH 03461 (http://www.radio-ware.com). You can place

your order for Contest dinner tickets by calling: Monday through Friday from 10 AM to 6 PM eastern USA time: 1-800-457-7373 or 1-603-899-6957 for International or by FAX 1-603-899-6826 (24 hours). You can also E-mail your orders for Contest dinner tickets to: jcclark@worldpath.net Visa, Mastercard and American Express are accepted. Sorry no COD orders. E-mails must include charge card + number, callsign and return address information. Contest dinner tickets will be sent via First Class U.S. Mail no later than May 10, 2005. Please allow plenty of time for your dinner tickets to arrive before you leave for Dayton. Deadline for ticket orders is May 7, 2005. NO EXCEPTIONS. There will be no Contest dinner tickets at the door.

CONTEST DINNER (Visalia DX Convention). Reservation are now being accepted for the 7th Annual Contest Dinner at the International DX Convention in Visalia, CA. The dinner will be held Friday, April 15th, with serving starting at 7:30pm. The speaker will be Veijo Kontas, OH6KN, with a presentation of his monster contest station (one 42m tower, three 60m towers and one 150m tower plus many antennas) built in Oulu, Finland. Cost is 25 USD per person (in addition to the convention registration fee) PAID IN CASH AT THE DOOR! Reservations are required, so please reserve your seat at the dinner and make your menu selection at: http://www.twistedoak.com/wk6i/contestdinner.html
See you there! - 73 - Jeff, WK6I & Steve, K6AW

CORRECTION DEPARTMENT. In last week's OPDX.701, under "SILENT KEY", there is a "typo". Long time contester Rush Drake's callsign is W7RM and not K7RM as reported.

DXCC NEWS.....
* DXCC HONOR ROLL DEADLINE. "Just a reminder that the deadline to be shown in the next DXCC Honor Roll list is March 31, 2005. Submissions must be postmarked March 31, 2005, for your submission to count for this listing. The DXCC Honor Roll list will appear in August 2005 QST. There are 335 entities on the DXCC list, and you must be within the numerical top 10 DXCC entities to qualify. The current minimum requirement for Honor Roll is 326 current entities.....73 es DX! Bill Moore, NC1L, ARRL DXCC Manager"

* Bill Moore, NC1L, ARRL DXCC Manager, informs OPDX that the following operations are approved for DXCC credit:

6O0CW - Somalia, from February 3, 2005 to February 17, 2005
A52CDX - Bhutan, October 24, 2004 to November 12, 2004
T6KBLRM - Afghanistan, current operation
TT8M - Chad, Current operation effective March 14, 2005
YI9GT - Iraq, from May 7, 2004 to February 8, 2005
YI9KT - Iraq, from May 7, 2004 to February 8, 2005

DX0, SPRATLY ISLAND. Operators Gil/4F2KWT, Ed/4F1OZ and Eddie/DU1EV were expected to leave for Palawan Island this past Friday, March 18th and take a plane (if available) the next day to Pag-Asa Island (in the Spratly Island Group). Apparently, the plane was not available because no DX0K

signals were heard this past weekend. The team anticipates taking a ship on March 25th, and will arrive on the island on March 27th. However, they expect to leave the island by the end of March. These trips to the Spratly are not commercial ships, and they have no control over the scheduling because these are military transports. Since they are civilians, the ride to Spratly is only on a space available basis. Eddie/DU1EV informed OPDX that this operation will be a DXpedition and a medical mission at the same time. Gil/4F1OZ is a doctor, Ed/4F2KWT is a nurse and Eddie/DU1EV is a lawyer (he jokes.. just in case there is a malpractice suit). Activity should be on 160-6 meters. Their special project this time will be 6 meters EME during the moon rise and moon set using digital mode WJST. The team will work with a six or seven element beam and 300 watts. QSL Manager is 4F2KWT: Gilbert Lappay, P.O. Box 89, 2500 San Fernando City, La Union, Philippines. For online logs and more details/updates, please visit their official Web sites at: http://www.geocities.com/f2kwt
http://www.geocities.com/dx0kkalayaan/

E21, THAILAND. Champ, E21EIC, will be active in the CQ WW WPX SSB Contest (March 26-27th) as a Single-Op/All-Band/Low-Power entry. QSL via E21EIC. For JA stations QSL via JR5XPG.

FG, GUADELOUPE. Jean-Louis, F5NHJ, will be active as FG/F5NHJ/P from March 25th to April 2nd. Activity will be on 40-20 meter CW/SSB. QSL via his home callsign, either direct or by the bureau.

FT5X, KERGUELEN ISLAND. The Microlite Penguins DXpedition Team is now active as about 0630z March 20th. The following was a press release sent out by George, K5TR, dated Sunday, March 20th:
"Port Jeanne D'Arc, Kerguelen
The Microlite Penguins DXpedition Team will be QRV today on the Kerguelen Islands, located in the sub-antarctic region of the Indian Ocean. The New Zealand based R/V Braveheart, used during ZL9CI, VP8THU, VP8GEO, and VP6DI expeditions, is again be supporting the team for the duration of this 30 day trip. Departure was from Durban, South Africa, and the end destination is Fremantle, Western Australia. The team expects to be operational here from the 20th of March through the 1st of April.

Callsign is FT5XO.

A team of twelve operators representing seven nations will be participating in this month's long trip. Operators are AG9A, HB9ASZ, GI0NWG, M0DXR, N6MZ, N0TT, SP5XVY, VE3EJ, VK6DXI, W3WL, W7EW and 9V1YC. All team members are experienced contesters or DXpeditioners, and 7 out of the 12 are veterans of at least one previous Antarctic regional DXpedition.

In order to maximize band openings, we will have the ability to run up to 7 stations at once. Operations will take place on all bands from 160m-6m using CW, SSB and RTTY. There will also be operation on PSK-31 and EME.

The team has two "Battle Creek Special" verticals for 40, 80 and 160m, single 1/4 wave verticals each for 30m and 40m, plus a full set of monoband vertical dipoles for 20m and up. All 1/4 wave verticals and vertical

dipoles were constructed and supplied in South Africa by ZS4TX.

Just like the 2002 DXpedition to South Georgia and South Sandwich, there will be no websites, pilots, or on-line logs. We feel that a DX QSO made by the hard work of knowing propagation, listening, skillful calling and paying attention to the DX station's pattern is more meaningful and fun. We have purposefully advanced minimal publicity about our DXpedition in the spirit of putting the operator instead of the technology back into the forefront of the DX chase.

Logisical support in South Africa was provided by ZS5BBO, ZS5NK, ZS5VE, ZS5GMW, ZS5HV, ZS5IAN and the members of the H.A.R.C. Equipment and logistic arrangements in New Zealand were provided by the crew of The Braveheart,and ZL2BSJ.

The QSL manager for this DXpedition is Garry, VE3XN.
Many thanks in advance for any extra contributions received with your QSL envelopes.

This DXpedition is funded by the twelve team members and an exclusive grant from the NCDXF - The Northern California DX Foundation. There are no other organizational or commercial sponsors for this trip..

Sincere thanks to the NCDXF for their continued support of DXpeditioning to the world's most remote destinations."

FY, FRENCH GUIANA (Fort Activity). Members of the FY5KAC ARS will be in the Cayenne area to activate Fort Ceperou during the Easter weekend. The activity will start March 26th in the morning and end March 28th in the evening. Operations will be on HF, SSB, CW and may be PSK. (2 stations are expected to be on the air.) The activity is also valid for the French Forts and Castles Award (DFCF FY002). QSL via the REF French Bureau or direct (SAE+Postage) to: A.R.C.G. (Association Radio Club Guyane), BP 9271, 97392 Cayenne cedex, FRENCH GUIANA.

HOLYLAND CONTEST 2005. The Israel Amateur Radio Club (IARC) invites all Radio Amateurs and Short Wave Listeners around the world to participate in the annual Holyland DX Contest 2005 on the 16th of April starting on 0000z until 2359z. There were 241 certificates already sent to last year's participants from 58 countries. More information can be found on the IARC Web site at: http://www.iarc.org

IOTA NEWS.....
AF-019. Operators IK8HCG, IZ8DFO, IZ8FBU and IZ8GCB will be active as IG9R from Lampedusa Island during the next CQWW SSB Contest as a Multi-Single entry. QSL via IK8HCG.

EU-023. (Update) Karl, OE3JAG, will be active from Gozo Island between May 2-6th. His callsign will be 9H/** or 9H3JAG. Activity will between (about) 1200-1600z. Operations will be QRP with a dipole or long wire and mainly on CW, PSK and RTTY on the WARC bands. QSL via his home callsign. Visit his Web page at: http://www.oe3jag.com

EU-031. Walter, IN3XUG, will operate from Ischia Island as IC8/IN3XUG
now through April 2nd. Activity will be on the IOTA frequencies
(mainly 40/20 meters). He will probably operate in the CQWW WPX
SSB Contest. Listen for QSL info.

EU-045. Members of the MDXC, Roberto/IK8BIZ, Alfredo/IZ8DEP and
Luciano/IK8RRY will be actived as IB0CW from Ventotene Island
(MIA: MI-118 and IIA: LT-011), April 2-4th. Activity will be
on 80-6 meters, CW, RTTY, PSK and SSB. QSL via the bureau or
direct to IK8RRY: LUCIANO LUONGO, Via Degli Innamorati No. 143,
80014 GIUGLIANO, NA, ITALY. Also, visit the following Web page
at: http://www.mdxc.org/ib0cw/

EU-065. A multi-national team from France, Scotland and Belgium will
be active as TM4Z from Ouessant Island (DIFM AT-001) during
the IOTA Contest (July 30-31st). QSL via F6KHM, direct or by
the bureau.

EU-127. Members from the DF0CB will activate Helgoland (GIA N-14),
April 15-17th. Activity will be SSB on 80/40/20/2 meters.

EU-129. Operator Andreas, DL5CW, will be active as DL5CW/p from Usedom
Island (GIA O-13), March 29th through April 1st. QSL via the
Bureau.

EU-131. Nicola/IZ3EBA and Enrico/IZ3EAY will be active as homecall/p
from Lido Island (IIA VE-032, MIA MI-052 and DCI VE-009),
April 9th. QSL via their home callsigns. For more info,
visit: http://www.iz3eba.it

OX, GREENLAND (Updated). Retu, OH4MDY, who is a member of the Pieksamaen
Radioamatoorit (OH4AB) team, informed OPDX that he has received his own
callsign for the upcoming March 23-30th operation (See OPDX.701). His
callsign will be OX3RZ. The other team members Anni/OH4JGE and Lasse/OH4HJI
will still sign as OX/(own call). Remember, Retu will be in the CQ WPX SSB
Contest. QSL via CBA to OH4MDY.

OZ5, DENMARK (Special Activity/Event). Since the year 2000 the callsign
OZ5HCA has been used one week in April to mark the birthday of the world
famous fairy tale writer "Hans Christian Andersen". On the 2nd of April,
this year, he would have become 200 years old, and therefore, the callsign
OZ5HCA will be used during the entire month of April. The callsign will
be used by members of the EDR Odense Branch, OZ3FYN. The EDR Odense Branch
has been issuing the "Hans Christian Andersen Award" since the year 2000.
This year will be the last chance to make QSOs for this award because it
is the last time the callsign will be used. The rules can be found on the
Web page at: http://www.oz3fyn.dk/diplom-hcaGB.html
Aplications for the award must be received before December 31st, 2005. The
reason for the deadline is that each award is specially made and signed
by the mayor of Odense.

QSL INFO AND NEWS.....
3DA0 QSL CARDS. Frosty, K5LBU, has just returned from ZS and 3DA0 land.
He wants all DXers to know that there is no QSL Bureau in Swaziland.

He states, "Andy, 3DA0TM, does pick up the mail that shows up at the post office box. I have here in my hand about half a kilo of cards. I just brought them home to Houston, Texas. I will keep them and then take them to the Friedrichshafen Germany hamfest in June. Most hams that have operated in Swaziland do not live there. So you need to look for the correct route and listen to what the operator says. There were at least 25 cards for me as 3DA0CF in the box. I will reply to those this week. I have sent the ones that were for 3DA0WPX and 3DA0SV on to them in NC."

6O0CW QSL CONFUSION. Graham, M5AAV, informs OPDX that there seems to be some confusion over the QSL routes for 6O0CW. Graham handles "BUREAU CARDS ONLY" for this operation. Any and all DIRECT requests should go to I2YSB.

QSL ROUTE CHANGE. Mike, KA2AEV, will now handle the 9Y4/N3BNA QSL duties for Dales, N3BNA, due to health concerns. So please, QSL 9Y4/N3BNA via KA2AEV direct. If you sent Dale a QSL request, Mike states, "Don't sweat it. I'll get it eventually. Please be patient I do not have any QSLs for him yet."

AY1ZA QSL. Following an agreement with Horacio, LU4DXU, a large batch of outstanding AY1ZA direct cards for European stations has been sent to and received by the Mediterraneo DX Club. These cards are being posted right now and should reach their destinations in a few days time. Horacio operated as AY1ZA from the "Orcadas del Sur" Base (LU-14 for the Antarctica Award) on Laurie Island, South Orkneys, in January-February 2004. QSL cards have been donated by the MDXC.

QSL CE6TBN/7 via CE6TBN: P.O.Box 1234, Temuco Chile. Operator was Marco from Ascension Island (IOTA SA-043 and DICE ICE-704) this past weekend. He told OPDX that this was his last DXpedition for the summer of 2005.

Tom, SP5UAF, reports online logs are now available for V5/SP6IXF and/or V5/SP7VC. All contacts have been uploaded to: http://www.sp5zcc.waw.pl/dxpeditions/v5/

NEW ADDRESS FOR VK4AAR. Alan, VK4AAR, wants to inform OPDX readers that his postal address will change in APRIL 2005. Box 421 closes on 31st of March 2005. PLEASE USE ONLY THIS NEW ADDRESS FROM 1st APRIL 2005 and on: Alan Roocroft, 376 Old Toowoomba Road, Placid Hills 4343, Australia. Alan is the QSL Manager for the following stations: 9V0A, 9V1DX, C21RH, KH2VM, P29RH, V63PD, VI0ANARE, VK0MM (Macquarie), VK6AN (OC-266), VK6BM (OC-234), VK6BSI (OC-243), VK6LI (OC-071), VK8AN/6 (OC-154), VK8AN/8 (OC-229), VK8AV/3 (OC-136), VK8DP, VK8MI (OC-173), VU3RSB and VP2V/W3HQ. (Logs are closed for ... YJ8AA, ZK2JJ and ZK2PJ)

Bill, VK4FW, reports that QSL cards are still avalible for his VK4CRR/2 operation to North Solitary Island at the old lighthouse outpost buildings from March 31, 1994 to April 3, 1994. QSL direct with 2 USDs or 2 Euros or IRC to the following address: Bill Horner, P.O. Box 612, Childers,

4660, Australia.

NEW ADDRESS FOR XW0X AND XW2A. Here is Hiroo's new direct mailing address for his XW0X and XW2A operations: Hiroo Yonezuka, Baitong Mansion, Room 811, 354/2 Rama 9 Rd, Bangkapi Huaykwang, Bangkok 10310, THAILAND.

SILENT KEY. Mac, W3HC, informed OPDX that he has received an E-mail from Allen, BA1DU, stating that Mr. Park (Ping Ke Cheng), BA1CO, became a "Silent Key" (SK) on March 9, 2005. Mac was his QSL Manager. OPDX and its readers would like to send out our deepest sympathy to Mr. Park's family and friends.

SPECIAL EVENT. Some members of Canary Islands DX Society will activate the special event station EF8CID to celebrate the "Canary Islands Day" between May 27-30th. All QSLs will be sent through the URE Bureau after their operation by Edu, EC8AUA. It is not necessary to send your QSL via the Bureau (for confirmation). Direct QSLs can be sent via the normal way. Activity will only be on 15 meters band. Members are restricted to only operate below 21200 kHz.

TS8, TUNISIA. Operators YT1AD, S56A, 4N1EA, 4N1NM and possibly others will activate the 3V8BB club station as TS8A in the CQ WW WPX SSB Contest (March 26-27th) as a Multi-Single entry. QSL via YT1AD.

XX9, MACAO. Hirotada, JA0SC, informs OPDX that he will be visiting here and will be active on the digital modes as well as paticipate in the NVCG SSTV Contest during the first weekend of April. He will also operate before and after the contest between April 7-11th. Hirotada will receive his callsign after his arrival in Macao. Look look for him on 20, 15 and 10 meters SSTV and RTTY. QSL direct to his home callsign (address on QRZ.com).

YB0, INDONESIA. Operators Sanyi/HA7VK/YU9VK and Gyuszi/HA2VR will go to Jakarta to visit some friends and operate. Look for Sanyi to sign YB0/HA7VK between March 20-29th, and Gyuszi to sign YB0/HA2VR between March 23rd and April 5th. QSL YB0/HA7VK via HA0HW. QSL YB0/HA2VR via HA2VR.

YV5, VENEZUELA. Dario, YV4GMG, is expected to sign YV4GMG/5 from March 23-27th, only on 40 meters and on 145.800 MHz SSB (Satellite ISS). QSL via his home callsign.

ZF2, CAYMAN ISLANDS. Paul, K4UJ, will be active from Grand Cayman as ZF2UJ, April 1-9th. Activity will primarily be on: 80m-CW, 40m-CW, 20m-CW/SSB, 17m-CW/SSB, 12m-CW/SSB and 10m-CW/SSB. He will only use 100 watts into a wire antenna on the north side of the island. QSL via his home callsign.

What are you trying to do? If it is just local repeater access? if so then try a trick a local ham here is using a passive repeater. Place two antennas on the hill one pointing at the repeater and one pointing down at your location.

The local ham is using a 3 element beam at the house and on the hill for the up/downlink and a larger beam pointing at the repeaters of interest. The repeaters of interest are all n the same general direction.

Since the antennas on the hill are both tuned to the same frequencies you have a 1 to 1 match in both tx and rx directions.

It is for any country that has an IRLP node, not just the USA and Australia.

It is called the "1st Aussie-American IRLP Contest" because of the
Australian Club & US Club sponsoring it. Some web sites have been updated to
read "1st International IRLP Contest"

There's plenty of UK nodes in the contest, the list is on the website

Not my LOCAL Node

Local OP says there's enough contest on HF where SOME SKILL is needed and says
he's on holiday until the end of April.

To have contest on TWO DAYS a week is TOO much , for SEVEN Days its insufferable.

Cheers

I don't understand why cell phones aren't included.

They should be , after all they can be used to control an EchoLink or IRLP Node .

I Should also add that this contest is on for a FULL MONTH , that's a full 28 days
or more .

If I remember MattD had some suitable comment a day or so back.

There would be no reason why you can't use CW over IRLP. Stop bagging IRLP, if you don't like it then don't use it!

WAKE UP! There are so many different things you can do on Amateur Radio, there is room for everyone.

I just checked, there are a total of 1591 IRLP nodes, 1034 active, 879 idle and 105 in calls. This indicates the following to me:

1. IRLP is a popular way of communications on Amateur Radio.

2. This contest is going to have very little impact on any one local node. Big deal someone is going to dial it up, put out a call either they will make a contact or they won't and then they will close the link!

Get over it! Go back to your CW if you want, who bothers you or bags you for using it, I know I certainly don't.

WAKE UP! You *MUST* use your radio, the person at the other end *MUST*
use their radio. Last time I checked that was Amateur Radio.

Like I said before there are *MANY* parts to our hobby, I don't knock
what you do in Amateur Radio, so leave people alone that like IRLP.

Without new innovations in Amateur Radio we will not get new people into
the hobby. If we don't get new people into the hobby then Amateur Radio
will die a natural death and then we will have to find another hobby!

Simon

I'm not bagging IRLP or Voip

A contest running for 24 hours perhaps or at a push 1 weekend but 24 / 7 for 28 days no way.

Ofcom / the RSGB have put in the conditions of issuing a Notice of Variation , that the holder of the Nov MUST be on site at all times the node is running , if he's not then the can rescind his Nov if caught.

I would be surprised if any UK amateur providing a VoiP Gateway would be at home for 24 / 7 for 28 days .

It there fore puts the UK amateur at a dis-advantage as soon as the licensee walks of the property , the node should be turned off.

I certainly wouldn't expect anyone to go against the regs. But what has
that got to do with the IRLP contest? My point was with so many active
nodes out there the load would be spread out and traffic I would expect
be very minimal on any given node.

It certainly doesn't make the "PLAYING FIELDS LEVEL"

Our local Node op has been away this weekend helping at the Blackpool Rally so his nodes been down since Friday , its just gone up.

In some respect we're lucky as he's an elderly bloke with mobility problems , he doesn't get out much , so when he's up its on , he's still p***ed off with this 24 / 7 x 28 day contest .

The Next comment you make is that its radio to radio , that's not 100 % correct , I know of at least 3 VK's , 2 VE's and at least 5 G / M stations that don't have a radio connected to their node . Its quite easy to confirm that comment about G / M stations if you know where to look.

Are you sure you are not confusing IRLP with echolink? I personally
don't agree with using your computer to access the the network like
echolink does, but I am not going to stop any licensed person from doing
so if the regs. allow it.

"Diesea" is not confusing anything with anything. He is talking about
IRLP. ie. the system which is supposed to be radio > radio only.

Sounds like you have as much relevance to Amateur Radio as
a foreskin at a Jewish Christening.

And pray tell what do you know about IRLP ? Have you bothered
to understand the technology or are you the typical Armchair
dickhead Amateur that trolls these groups ?

Simon

If had meant EchoLink , I would have said EchoLink , you as I were talking
about IRLP and my response was in that vein.

I have been around before the inception of IRLP by Dave Cameron even before the
demise of IPhone and the I'll fated ILink.

If you know how to look you will find a number of IRLP nodes on air in the UK that CAN NOT be attached to a radio.

DieSea.

Thanks Chris

As for EchoLink and its "USERS" (Please Note the words Users and EchoLink) I
Wonder how many "ON AIR PROVIDERS" are heartily fed up with a USER connecting with
out identifying and then disconnecting after 5 minutes and still have not
identified .

I KNOW several UK EchoLink on air providers where USERS are banned with certain
exceptions , one is a VK4 , a very pleasant "OLD GENT" of 85+ that Chris and I
have known for years.

Sorry to Hi-Jack your reply Chris .

OK, I stand corrected there. In that case I am surprised Dave allows
them on the system as I understood the philosophy behind IRLP was to
USE the radio.

I am hopefully setting up a node for my local club later this year and I
have *NO* intention of operating it from the console, if or when I do
use it, it will be via a *RADIO* the way it is meant to be.

Another moron on my shit list! Ignorance.

Just because I don't work CW doesn't mean I want it banned, in fact I
would like to see CW allocations retained as it is a valid an historical
part of our hobby. Just as IRLP is valid and *NEW* part of our hobby.

Thanks for bringing this up Mate!.

My major problem is folks refering to interconnecting "hams" over the
internet as "ham radio". Ham radio is R A D I O . Not INTERNET connected
to Nodes then to a radio somewhere. Call it whatever you want, but it is
NOT ham radio.

Dan/W4NTI

No doubt similar utterances were made when spark transmitters were phased
out.

Technology moves on, that is the nature of things. No one is forcing you to
use ILRP or any of the other modes.

Missed the point there Brian, Dan is complaining about what the mode is
called, not the fact that it exists..

I fail to see the difference between using an FM repeater that is linked to another repeater on a different band, which is commonly done, and using IRLP.... Yet using the repeater is perfectly acceptable?

IRLP is, usually, vastly different than EchoLink.. If stations at both ends are using radio, then does it really matter how the link between is established? Using linked repeaters is fine, some of which use links outside amateur bands, yet nobody here is suggesting that we put crap on those operators!

Yes, DX contacts via HF are nice, and may be what many consider to be true amateur radio, but not everyone can get on HF bands and if IRLP helps increase activity on radio bands then how can it be a bad thing?

I do, however, agree that a 24/7 contest for a whole 28 days is starting to get a bit much! 24/7 for 1 or 2 days should be enough, just like most other amateur contests.

Cheers

Here is what the difference is.

There is very little difference between IRLP and people using the
internet for making telephone calls.

If a person made a gateway for IRLP using FRS radios, it would be the
same thing. For CB radio, same thing.

There are voice chat rooms for people on the internet already. They are
probably more reliable than IRLP. THey cut out the weak link - the radio.

The whole setup eliminates every interest and challenge of Amateur
radio, except for the talking. There is as much technical acumen needed
for me to talk around the world using IRLP as there is for me to pick up
the telephone.

> Like I said before there are *MANY* parts to our hobby, I don't knock
> what you do in Amateur Radio, so leave people alone that like IRLP.

Um, no thanks. Seriously, if you want to do IRLP, then have at it. But
if you do silly things like have contests, then I think I'll voice my
opinion if ya don't mind.

> Without new innovations in Amateur Radio we will not get new people into
> the hobby. If we don't get new people into the hobby then Amateur Radio
> will die a natural death and then we will have to find another hobby!

And here is the real kick. Do you actually *think* that IRLP is some
kind of "innovation"? It is the internet equivalent of a phone patch.
Like I say, if that is your think, then fine. But to actually have a
contest for such things is silly.

Of course, last time I checked, there was no law against being silly! 8^)

Up until now I haven't made comment on the contest, that is probably
because I have no real interest at present for contesting, although that
does change from time to time.

I suppose a month long contest is a long time, although I would have
thought that being spread over a large network such as IRLP it wouldn't
have really created a great deal of traffic on any given node.

Besides, how many operators are going to be contesting all month? Most
I would expect will just jump on in their spare time, just as they would
for normal operating.

That depends. The idea of using Handi-talkies to talk across the world
by IRLP is interesting after a fashion, but in reality not a lot
different than using a phone patch to do the same.

Using linked repeaters is fine, some of which use links
> outside amateur bands, yet nobody here is suggesting that we put crap on

Under no circumstances is it "like" other amateur contests.

This is what is a little bothersome about the whole thing. For me to participate in an HF contest, (excluding that I have to do this stuff to get on the air anyhow) I need to erect an antenna system that works fairly well, I have to hone my receiving skills so that I can pull weak signals, and to learn general good operating practices.

Now, what do I need to do with IRLP?.....

The bothersome part is that it seems like too many IRLP'ers and Echolinker's, just don't "get " that.

Kindly indicate how IRLP is a moving on of technology?

I can do EVERYTHING that IRLP or Echolink can do by eliminating the
silly Handi-Talkie on the end.

It would all work better if the radio part was eliminated.

True, but even a phone patch at one stage in history was popular and they
both still use radio to some degree. Maybe not everybody's 'cup of tea',
but still neither is CW, or SSTV, or RTTY, etc..

I agree, and while I would much prefer to run DX on 50MHz SSB, that isn't always possible so what happens during other times? Do I just switch all the radio gear off and give up, or resort to using repeaters and the like???

Voice was a dilution of Amateur Radio way back in the early days where CW was all the go, yet here we are removing CW from the entrance requirements. Rather than criticise those using IRLP, shouldn't we just 'understand' that maybe they use it for a reason and then encourage them to experiment with other modes??? On the other hand, I know of many long time hams that use HF often for DX contacts, even using CW, but at other times (e.g. when mobile, when portable, or when conditions are very poor) they use IRLP to keep in touch with overseas stations AND encourage newcomers to the hobby to chat with people outside their city....

Erect an an antenna system that works fairly well (depending if you use a repeater or simplex node), learn general good operating practices, get DTMF working on your radio!!!!

>
> The bothersome part is that it seems like too many IRLP'ers and
> Echolinker's, just don't "get " that.

I agree EchoLink is just not amateur radio, although I use it sometimes from inside the house where the XYL wont let me bring my radios! But again, rather than criticise and make fun of their chosen mode, wouldn't we be much better off encouraging the use of other modes????

So you've moved on "even further".

Personally, I like the radio bit and, to me, Echolink (or the other VOIP
systems) aren't "real amateur radio". However, I don't feel the urge to tell
you how you should enjoy your hobby. If Echolink does it for you, please
enjoy the hobby in your own way.

So what, are you saying IRLP is a phone call or what is it ?
Infact who gives a damm what it is, it allows HAMS to
communicate when they want to. IRLP demonstrates whats
possible so if you dont like it, dont use it.

>
> If a person made a gateway for IRLP using FRS radios, it would be the

> radio, except for the talking. There is as much technical acumen needed
> for me to talk around the world using IRLP as there is for me to pick up
> the telephone.

eh eh , the standard answer from an Armchair Critic. You Sir have
no idea how IRLP operates and is structured. You even think that
picking up a VOIP phone is a simple exercise. If you've bothered
to investigate how SIP, H323, MGCP and other protocols work
and how this is hooked together to provide VOIP, then I and everyone
else here would love you to make it wonderfully simple...
>

I would prefer if you shut your mouth actually and let those
that are interested, have spent the time organising and promoting
get on with it and for you to pursue your own interests, though
your own interests seem to be related in flaming people doing
things you have no interest in....

> contest for such things is silly.

YOu really need to get out more....IRLP has been around for many many
years, 6 to be exact. Its not a phone patch, a phone patch
connects to an analogue circuit. IRLP was one of the early VOIP
systems, you know, those systems that are **6 YEARS LATER getting
press coverage....

Let them contest, collect your stamps and let those that are
interested in their aspect of the hobby get on with it. You
could do **MUCH** better to remain silent and get on with your
OWN aspects of the hobby
>

Bollocks. That rules out repeater linking and remote shacks using any form of landline. I hope you can convince the DXCC committee to reject all those QSL cards from peole using remote bases.

QSL cards can be exchanged for any sort of radio contact. There are no
rules. Perfectly ok to QSL after an eQSO/Echolnk/IRLP contact. The
problem will arise for DXCC when the card does not make it clear that
the QSO was not 100% radio, and these cards are used to claim awards.

Oh I don't think so Brian. Spark was a MODE not a different system of
sending the information.

CW is continous wave. I.E. still sending information by the same method.
I.E. over the airwaves now called RADIO.

Do you see the difference yet?

I do. And so does anyone else with a brain.

Look...new technology is fine. Old technology is also fine. But these two
things ARE NOT INTERCHANGABLE. Radio is Radio. Internet is Internet. Get
it?

What I don't 'get' is why people get so 'up tight' over such things?

If people enjoy VOIP systems fine, if they don't, fine. Ditto Morse, Packet,
Phone, Repeaters, ...

I've yet to see a facet of the hobby that has adversely impacted my
enjoyment- even if is a facet that leaves me cold.

What is this urge to insist everyone does it 'your way'?

I believe Dan and myself are *not* insisting that people do things
our way. IIRC, Dan is mainly CW and at least some SSB.

I do probably 90 percent PSK31, a VHF net check-in, and some SSB
contesting.

Have he or I been insisting on people using our favorite modes?

I know that my objection to the internet modes is *not* their existence, but that so many of their adherents want to call them "radio". And having a contest only exacerbates the silliness.

And yes, a person uses their radio to access the network injection point. Not much of a challenge, that.

Dan, why are IRLP fans so quick to tell people to shut up and go away when someone disagrees with them. Are people like you and "concerned amateur" typical of what we might meet if we sample the mode?

Hmm, and what someone else calls it bothers you? AND they want a contest.
The cheek of it!

This a akin to "How many angels can dance on the head of a pin." Take a
chill pill.

So don't do it yourself, seek out something you find rewarding rather than
worry how others get their kicks.

Oh I agree that it isn't much challenge but so what? Who are 'they' harming?

I don't think anyone is saying "shut up" etc. I'm saying unless ILRP impacts you, why worry?

Over the years I've come across many amateurs who hated some aspect of the hobby- packet, anything computer based,..... Not one ever seems to have found a niche they really do like.

Only the nominated Participating Nodes may be used for the contest. However, nodes that are connected to Reflectors that are Participating (ie a UK Nov node) still count, but only the Participating Nodes may be connected to by contesters, therefore it is fair to all stations, as only those nominated in each country are participating nodes. Note that new nodes are added daily to the participating list.

The argument I see here is some appear to be *AGAINST* IRLP therefore it should not be allowed on the Amateur Bands, and that is what is annoying me the most.

My attitude is that any Amateur should be free to operate what ever band, mode, etc. they wish provided they are not interfering with others without being hounded by others simply because they don't believe that mode (or what ever you want to call it) should not be on Amateur Radio.

There is plenty of spectrum for us to *SHARE*, to pursue the hobby in the way each of us want to. Although I have not operated CW myself I hope that allocations remain for those that do make use of this part of our hobby. Just because I don't operate a given mode does not mean that I should believe it be abolished.

The great thing with our hobby as I see it is that there are so many different aspects of it to explore, IRLP is just one of them!

9250 Western Reflector Please refrain from using sub-channels
9500 Sydney Reflector NSW Australia
9870 Denver Reflector Please refrain from using sub-channels

THE CONTEST IS FOR IRLP MODE ONLY

RULES:

The contest will be held starting MARCH 18 at 0001 GMT and ending APRIL 17
2359 GMT

POINTS WILL BE AWARDED AS FOLLOWS-

1. 1 point for a contact with someone not in the contest in your own
country
2. 2 points for a contact with someone in the contest in your own country
3. 2 points for a contact with someone in another country who is not in the
contest
4. 3 points for contact with someone in the contest in another country
5. 5 points for contact with single node countries and special event
stations such as the International Space Station etc

6. The following information must be included in your log
NAME
QTH
NODE #
CONTACT NUMBER-I.E.- You are number 001

Any contacts without this information will be counted as a single point
contact.

7. At present the logging program that will be used will be DXKEEPER, which
is available free, on line.
8. For those without computers, paper logs will be sent to BRUCE DEHN
306 CRIPPLE CREEK CT.
V.A. BEACH, V.A. USA
Logs should be sent in within 30 days of the end of the contest.

9. No duplicates allowed. one contact per callsign.
10. All nodes and reflectors may be used as long as the node/reflectors allow. persons who abuse this privilege will be disallowed from the prizes.
11. Only voice communications allowed. (Maybe next year we will allow other modes)
12. Electronic logs are to be emailed to apostle465@netscape.net for disposition.
(keep a copy of your logs for your own records)
13 Please include as much information as possible in your logs if you want an accurate count. again, please note with each entry, what you think the point count should be for that contact.
14. All amateur radio rules and regulations apply especially any involved with nodes/reflectors.

TRY AND KEEP TO THE RULES AND DON'T ABUSE THE NODES/REFLECTORS.
HAVE FUN AND HELP PROMOTE IRLP 'KEEPING THE RADIO IN AMATEUR RADIO' AS A VIABLE METHOD OF COMMUNICATIONS

I'm up to contact #30, others have reached the 100+ mark

1358. Re: IRLP Contest

Newsgroup: rec.radio.amateur.misc
Date: 2005-03-23 02:02:29 UTC
From: Ashley VK3HAG <vk3hag@nerg.asn.au>
Message-ID: <V640e.8281$C7.4062@news-server.bigpond.net.au>
Source record: 53010
Cross-posted to: aus.radio.amateur.misc,rec.radio.amateur.misc,uk.radio.amateur,rec.radio.amateur

I choose to use IRLP as it allows me to connect to hams interstate and overseas, until I can get HF gear put up, which seeing as we are moving, not much point until at new QTH later this year. Personally, as a newbie to ham radio, (but long time cb'er and scanner user) it is a great way to get one interested in amateur radio. When I have a HF set-up I will have a list of contacts overseas I have made via IRLP and try to contact them on HF.

As a newcomer to ham radio IRLP has made me want to get my HF gear, hf antennas etc sooner, ie IRLP has encouraged me to make international contacts on HF one day

As for the IRLP contest I think it's great, because I've never been in any AR contest, although after listening for a while I did give out some numbers for the John Moyle Field Day. To me the IRLP contest is a great way to have fun and at the same time learn about contesting, as a newbie to AR I've never being in a contest before, nor did I know what they were all about. Yes, I do read, but if your new to ham radio, all that information on the various AR contests in AR magazine didn't make any sense until I started participating in the IRLP contest, now I've got some idea of how a contest works, instead of having to learn in the middle of a pile-up. (Like the one at the beginning and end of each three hour block of the JMFD, here in Melbourne the 2m/70cm FM call channels where very alive, to say the least) Note also that I intend to try many different aspects of ar besides FM repeaters, FM simplex and IRLP.

As a newcomer to ham radio the IRLP contest meant that I participated (gave out about 15pts as Home Station) in the John Moyle Field Day, which I wouldn't have done without the previous two days practice at contesting on the IRLP mode, as I didn't have a clue about contesting.

So, IRLP is bad because it's introduced a new ham to contesting and international contacts. I'm so disappointed that IRLP taught me these skills. Not.

Now, I'm looking forward to the next Australian contest that includes V/UHF FM and I'll participate, as I will in HF contests when I have HF gear. The IRLP Contest has provided the opportunity for me to be introduced to, and learn about contesting in a contest that is relaxed-pace one, so unlike a 'pile-up' on HF with a newcomer trying in vain to get through, I've got some practice at calling "CQ Contest" and responding.

And the last one for a 'newbie'. No I don't know CW. Will I learn CW? Yes. After a while, once I have been a ham for a while I will start to practice CW. I do have a key and I do listen to CW practice transmissions from time to time.

The contest goes for a month so there would be no 'pile ups', so the end would co-incide with the IRLP Conference in Las Vegas, and the operation of Node 6392 by VK3JED in Las Vegas! Further, the Node Owners of all the Participating Stations have given the Bass IRLP Group permission to use thier nodes for the contest. If the knockers took a look at the Participating Nodes list they would see that the UK and USA have many more nodes listed than other countries.

Should I try packet and satellite work? How about ATV? I'd ask, but too many people in here will say "that's not ham radio" so I'll try them all anyway and see what takes my fancy :)

PS:Any VK3's with a packet TNC to sell or know where to get one from?

VK3HAG@NERG.NOSPAM.ASN.NET.

Certainly. One of the major reasons that I got into Ham radio *was* the
phone patch. One of my other hobbies is off road 4WD'ing. North of my
QTH is a great place for that. Unfortunately, I sometimes get stuck, and
extricating myself can take anywhere from a few minutes to half a day
(and I think you IRLP'ers have some odd ideas on how to have fun!!)
hehehe but I digress. My XYL gets a bit worried when I don't show up for
dinner, and cell phones just don't work that far out in the woods. But I
can patch in with either my handheld or truck radio, and let her know
I'll be late. All this much to the amusement of my local Ham bud's.

Well, I don't know what your situation is for the lower HF bands. But
remember, my issue isn't with the mode, even though I don't care for it.
I just think things like contests are silly.

Well, I can see a difference when most of the transmission is via fiber
rather than the air.

Or, will it encoiurage newcomers to simply stay at the lowes level,
because if chatting to people around the world is their goal, then they
have achieved it. As I have said, if that is what floats their boat,
then so be it.

> I agree EchoLink is just not amateur radio, although I use it sometimes from
> inside the house where the XYL wont let me bring my radios!

hehe, my XYL was also pretty critical. I did eventually tell her that
I was thinking about taking up a new hobby in place of amateur radio.
The new hobby was going to bars and chatting with loose "wimmin". I
retrospect, the ham radio didn't seem so bad. Now as long as my antennas
aren't too obvious, she doesn't complain too much.

But again,
> rather than criticise and make fun of their chosen mode, wouldn't we be much

> better off encouraging the use of other modes????

Oh, heck, when you put it *that* way..... 8^)

Right. II understan you, but at least two peopple here have told me to
shut up. Or go away, or something like that.

Considering that this is a Usenet group, wouldn't shutting up and going
away deprive them of a good row?

oh!! yes it is

let's take it one bit at a time

R = repeater = radio, receiver of repeater linked to
transmitter of a repeater in another country
the reverse is true.

I = internet, no problems here

L is for linking, no problems here

P is for protocol, to enable the two repeaters
to be able to be linked to gether, it is
radio at both ends.

what problem do you have with this

Well, perhaps.. Then again *I* think that CW contests are silly!!!! ;-)
(now watch as I am slowly flamed by all the CW operators!!)

No, seriously, I agree that perhaps "contest" was a poor choice of titles
for it, although I see what they are trying to do - just the same as we are
all trying to do and get people active in some way. I also think the 28
days was a tad too long, for *any* 'contest'. Maybe if it only included
simplex nodes, or at least a special category to encourage these, that
would've been better as then at least there is some additional skill needed
to erect an antenna suitable for simplex contacts (a piece of string often
suffices for repeaters!!).

Yes, so can I, but amateur 'radio' encompases many, many different
technologies. The days of "wireless" are long gone, decades ago the thought
of connecting a computer to give Packet or SSTV would no doubt have also
been frowned upon as 'not amateur radio'.....

I think that depends a lot on several factors, including the attitude of fellow amateurs and how much encouragement we give them to try other bands. Of course, if money or space limits your abilities then perhaps IRLP will be the only option used, but I would much prefer in that case a licensed amateur use IRLP rather than see them just give up their licence and leave the hobby!

For those that can set up other bands, it is up to fellow amateurs (I believe) to 'spark their interest' and encorage them. I have seen young Scouts and Guides amazed at how they can chat via radio to people all over the world, but often the lead up to them experiencing that is to get them on Packet and show them how a computer can be linked to another computer without using phone lines.. By sparking their interest using something they know (computers), we get them to try radio...

I have no problems with antenna's from the XYL, just none of those damn
noisy radio's inside! Has something to do with not enough room I guess.....

> But again,
>> rather than criticise and make fun of their chosen mode, wouldn't we be
>> much better off encouraging the use of other modes????
>
> Oh, heck, when you put it *that* way........ 8^)

I fully understand your feelings about IRLP, but I just don't think that
publicly criticising those that choose to use the mode is of any benefit, to
anyone! If you (or anyone) truly felt strongly enough about the length of
the contest, then I'm sure that politely worded notes to the organisers
would've gotten much further than some of the whinges we have seen on here!
Otherwise, for those that simply don't like IRLP, for whatever reason, is
there really any benefit to telling everyone this? I don't like CW, but I
don't make a big fuss everytime a CW contest is announces - I simply don't
take part in it! Likewise for those that don't like Packet, or RTTY, or
SSTV - I guess they just avoid those modes. So why should we start a debate
about IRLP that just ends up making us all look rather childish?????

Anyway, have fun and don't get too bogged in that 4WD!!!!

That's probably because no one in the UK has enough working brain cells to figure out what the IRLP actually stands for...

Bloody whinging poms - if YOU personally don't have an interest, or the abilities, to use IRLP then please do the world a favour and just SHUT THE HELL UP!! The entire world does NOT bow down to the wishes and desires of the UK, despite what you may think.... It isn't the good old days of the colonies when people actually gave a rats what pommies had to say...

And, it may be nice if you actually quoted accurate information rather than looking like the typical brain dead whinging pommie dickhead you are when you refer to IRLP, a mode limited to the Amateur Radio Service, as "CB trash".

And believe me, there are many of us out here that aren't remotely interested in the nonsense that constantly comes from the UK either.....

As I Australian living in the UK, I personally can't understand the "Dial-A-Contest" principle, so Ashley it's not just "whinging poms" that can't understand the need to have this pointless contests on the Internet.

>"It isn't the good old days of the colonies when people actually gave a >rats what pommies had to say"

Didn't Australia just vote to keep the monarchy? I believe we did and voted to continue to be ruled by the UK.

I personally voted against, but the majority voted to continue being ruled by the UK, so in a way Ashley our Country agreed to "give a rats" what the UK poms say"

Sorry just had to throw that in the lighten the mood :)

I didn't vote for the system to be altered because they didn't offer a directly elected option, and if the claytons republic option had gotten through then no second chance would have been available.

This way the republic is still on the agenda and there is likely to be another referendum in the medium term (say the next 20 years), with a good chance it'll include a directly elected president (or Judge Advocate General) or whatever you want to call the re-named directly elected replacement for the govenor general.

I know of a few amateurs (G3's to boot) that have made a good living out of CB in the HAY DAYS during the 80's , as well as picking up some more of the colourful expressions as well , they can still to be heard to-day with their Personals ,Twigs and Twenty's or even the name would be .

Come to think of it , why when they are working a local why cant they speak their mother tongue ands have to pretend they're in a convoy.

1373. Trouble with motorola P080

Newsgroup: rec.radio.amateur.misc
Date: 2005-03-23 16:27:24 UTC
From: Jacek <a_jaco@poczta.onet.pl>
Message-ID: <d1s576$ig6$1@node2.news.atman.pl>
Source record: 52895

Hello!
I'm Motorola P080 tranceiver owner. The one I use went probably broken - it gives a short beep afrer powerin on and displays "EPM ERR" message.
Possible cause of this malfunction is application (Tuner32 for Motorola programming) failure during the programming procedure.
Some parameters of my TRX were changed, but this application doen't allow me to restore their last values. My attempts to restore some older configuration files don't give any results.
I also tried to use EntryLevelProgramming application - it also gives no positive results. I'd appreciate any suggestions, how to repair it.

Best regards, Jacek.

Martin

Don't let the predictable nonsense of a few of the resident idiots on this group make you think that we are all the same over here.....

Regardless of the content of your post, they would have sniped at it, if they couldn't snipe at the content they would have found a typo or a spelling mistake... They are sad old men who have no other way of getting any attention...

The one idiot in particular 'Walt' (who wears a dress by the way) is the biggest moron here, he has a very limited
repertoire which mainly consists of.....

My license is bigger than yours

I'm really old and therefore better than you

And the old favourite...You must be a CBer.....

The bloke is a complete worthless idiot....Don't waste your time..... Good luck with your contest, not my cup of tea but if we all liked the same things wouldn't life be dull...

1376. Re: Connecting radio to antenna over long distance

Newsgroup: rec.radio.amateur.misc
Date: 2005-03-23 19:28:38 UTC
From: Jim <k0jkj@arrl.net>
Message-ID: <1111606118.379473.198850@f14g2000cwb.googlegroups.com>
Source record: 52898

Remember that you want a one to one match between the "feeding" antenna and the "transmitting" antenna. That will require a splitter combiner to insure a match.

That splitting/combining device will result in an over 3 db drop in signal strength. The passive repeater "works" using the gain of the antennas to overcome the loss between the base stations and the antenna farm on the hill.

If you must cover two repeaters in different directions to make up for the "loss" in the splitter you may have to go to a larger number of elements in the uplink/downlink antennas and or the repeater link antennas.

The uplink/downlink (to your site) antenna pairs can be either horizontal or vertical polorization. The repeater link antennas must be vertical polarization to match the repeater's antenna polarization.

The 20 db loss by using horizontal polarization in the uplink/downlink pair will reduce the risk of multipath signals at the repeater sites.

The other issue with having two repeater link antennas pointing in two directions is that you are passively "rebroadcasting" the transmitting repeater and are distorting (adding to), it's coverage area. You might want to talk to each of the repeaters owners about that, just to be safe.

Just some thoughts on this intriguing idea. I have a clear line of sight to my local repeate and can hit it with my handheld so I have not implemented this idea myself. The ham that is working on this has proved it works with tests but wants to upgrade his uplink/downlink antennas but due to job constraints will be holding off that for a while. Please let us know how this works for you and I'll post back after my buddy upgrades his installation.

Simon

The sad old man is far worse than a hypocrite, don't give him the attention he craves...Apart from the sheep who for some ungodly reason seek his approval by agreeing with his moronic dinosaur comments, no one else gives him a second thought.. He is repetitive beyond belief with perhaps only his predictability being slightly more staggering.

Like most here, they are just all hot air, they can give it from behind a keyboard but that's all......

I had him and his sheep killfiled for a nice amount of time but since a format I now have that pleasure all over again

Gawd Almighty you Ausies are a thick headed bunch, ain't ya?

Ham RADIO is communications with a RADIO or a RADIO system.

INTERNET is communications with a NETWORK of interconnected computers
organized in such a manner to send "packets" of data world-wide.

Do you see any mention of RADIO there?

Next.

What I don't like is the way you are putting down a legitimate part of
the hobby. Whether you like it or not it IS a legitimate part of
Amateur Radio.

I've got bad news for you, with a quick check of
http://status.irlp.net/statuspage.html showing a total 1595 IRLP Nodes
within the IRLP network and 139 currently engaged in use as I post this
message, that IRLP is a popular and *VALID* part of Amateur Radio.

Just because you do not see it as part of Amateur Radio that it isn't.

It might not be part of YOUR hobby, but that is a different story.

So what are X25 "packets" then?

> Do you see any mention of RADIO there?

Well If I use IRLP (and I don't contest btw) then I talk into my "radio" and
someone else talks into thier "radio"

The middle bit is "packets" like my old VFH "packet" radio

What is there to debate, there is a large network of IRLP nodes all over
the world on Amateur Radio which proves it is a popular and valid part
of the hobby.

Yes, as a matter of fact, because the correct name for IRLP is Internet
Radio Linking Project. See www.irlp.net Note that is a USA website
describing IRLP, not an Aussie site...

A quote from the irlp.net website:

"The aim of this project is to reliably and inexpensively link amateur radio
systems without the use of RF links, leased lines, or satellites."

So, next question?

You really have some complex about what constitues Ham radio dont you.
Your so caught up in its definition, have you forgotten how to
actually enjoy the hobby ?

Let me ask, is a repeater on the ISS Hamradio ? We had to use
a rocket to get it up there, does that make it anything less worthwhile ?

When repeaters first started, I bet you said "thats not hamradio".

Digital modes use computers, does that make it any less Hamradio ?

Get over your complex and leave IRLP to those that want to use it

I am an unrestricted call (any A, B, C, D or E after the number is), I have built and used radios, power supplies, tuners, antennas, computers (using linux os's) and other sundry bits and pieces.

I also continue to talk into my radios and type into my computers.

Operate is much too general a term to refer to the act of speaking into a microphone. Operate refers to the station as a whole.

I used them and continue to use them alongside my store bought gear.

>>The middle bit is "packets" like my old VFH "packet" radio
>
> A VFH packet radio? Is that some kind of CB rig?

A VHF packet radio... it's a radio I _built_ specifically for packet operation.

Actually I very seldom use IRLP, I just dislike people trying to split our hobby into so called real amateur radio operators and the others.

Which is why (despite having passed the full speed morse requirement when it existed here) I was a strong supporter of the removal of the morse requirement for HF.

Actually what is normal or what is part of society (or subsets like amateur radio) is decided on consensus.

If the consensus of the majority is that IRLP is amateur radio then it is valid, if the consensus is that it is not then it is not valid.

Over here at least anecdotally IRLP is supported by the majority of amateur radio operators.

However, to use IRLP you must be a licensed amateur AND be using amateur
frequencies. Those facts alone make it just as much a part of the amateur
radio service as Packet, RTTY, SSTV, repeater linking, etc, etc, etc, etc...

If you so strongly disagree then perhaps you need to take your debate to
those that regulate the service, rather than just those that use it......

The problem I have is understanding the bitterness I see over something
that, for most people, would rank below picking tomorrow's breakfast
cereal. . If someone wants to call VOIP 'amateur radio' so what?

All I can assume is that you sole status in life is rooted in your
'position' as a radio amateur and you see the use of the term amateur radio
applied to VOIP some how devalues that status. If that is so, you have
more important things to worry about.

Aussies haven't had an automatic right for that for quite a while now
(except for those with parents who have citizenship in the UK).

Whether it is radio or not, if you are not a fan of contests, (and I am
not), then those contesting via IRLP may well result in a decrease in HF
radio traffic, leaving the DX clear for others. Which I appreciate...

So, long live IRLP !!!!!

Cheers and 73,

Stan, G4EGH.

Not a question, a statement. If it is linked by ANY means other than
radio, it is not ham radio. End of discussion.

Firstly I don't agree that VOIP systems brings a "CB element" to the hobby,
any more than any other facet does.

Secondly, if I look across all the bad elements I've come across in the
hobby, only a few entered it via the CB route.

There are mighty linked repeater networks across the USA. These are Ham Radio?
If I choose to link two Ham Radio Repeaters via a landline - This isn't Ham Radio? Even though two Ham Radio service areas may be served?

I've been using my computers on PSK31, but one is in the family room, connected to this computer via CAT5 cable, and then to my HF radio. Is this NOT Ham Radio?

You guys have a very NARROW view of what constitutes Ham Radio. It appears that NOTHING less than a 100% Radio circuit is good enough for you, yet if you analyse systems around the world, MANY are not 100% Radio.

Brad.

So basically, what you're saying is that if you have a few repeaters linked
together by a landline, then those ham repeaters aren't ham radio? Or if a
club likes to control a repeater site via a phone line, then that too isn't
ham radio?

I used to be very active on the TCP/IP packet nets, using my VHF radio and TNC to link to a gateway and on into the world wide converse net. Again, the very thing you say isn't ham radio.

I'd say your definition is way too pure for the rest of us hobbyists, and we'll all keep right on enjoying the part of our *hobby* that we find we like the best, and if that just happens to be IRLP, Echolink, SSTV, CW, ATV or whatever other mode/method then, sorry, that's the way it is. Deal with it.

You are a *FOOL*, what has that got to do with *LICENSED* operators
using IRLP?

You really are clutching at straws now. Piss off and leave IRLP alone,
it does *NOT* interfere with your use of Amateur Radio in anyway what so
ever.

You *MUST* be a licensed Amateur to use IRLP, you *MUST* use a radio to
access IRLP. Therefore it is getting *LICENSED AMATEURS* on air.

It in *NO* way interferes with your on air activities so leave it alone
and enjoy your hobby without *INTERFERING* with others.

You must really think you are better than everyone else around you, you
really are a SNOB!

Get over it, whether you like it or not Amateur Radio is evolving, it is
changing. You can still play with your spark gap transmitter if you
want, nobody is going to stop you. So you are wasting your time trying
to stop others to enjoy the hobby of *AMATEUR RADIO* in the way they see
fit within the *GUIDELINES*.

Not true. You are making an assumption that only *LICENCED* amateurs
ever press a PTT and transmit. IRLP is no more secure from unlicenced
transmissions than amateur radio itself.

>IRLP does *NOT* interfere with your use of Amateur Radio, so piss off

Sure, anyone could key up and talk but that does *NOT* make them a
licensed Amateur though.

They can't just log in on a computer and start talking, that side is
VERY Secure.

But if we look at it from that view then the whole of Amateur Radio should
be considered nothing more than CB...

looks outside at his antennas in the back yard

looks at the computer in front of him

looks towards the shed where the radios are

So... becuase I remote control my radios from the house via Cat5E computer link and use the on screen computer control in the house (where it's warm!) it _isn't_ ham radio...

Doesn't sound very logical to me Dan *grin*

1. It doesn't demean the hobby, it widens it's appeal to a more inclusive
group.
2. CB isn't better or worse than amateur radio, it's just less technically
orientated.

So... no... not only does it not bother me, I approve of people calling VOIP
amateur radio.

Simon

When your IRLP or EchoLink Node or even EchoIRLP node is up and running PLEASE let us all know .

IF at the moment you are active on either EchoLink or IRLP you could also advise us of the node numbers you use.

Finally SHIT Listed , a QUAINT turn of Phrase being a dim and ignorant POM I'm having problems fathoming that one out.

With Very Best Regards

DieSea

No the defining issue is if it's a licenced amateur sending lawfully, the
method of sending is irrelevant.

First off....with your example of a repeater linked to another via land-line
AND NOT VIA THE INTERNET THAT CAN BE ACCESSED BY OTHERS is perfectly fine.
Narrow view or not. You sir, are attemting to confuse the issue and
comparing Apples and Oranges. Sorry, that won't play. Again...stick on
the subject.

You know dang well what the differences are. If you don't then you need an
education.

Your right to a point Kate. I'll give you that LL linking of repeaters are indeed ham radio, so would be control of a repeater or say a remote base. Thats also fine.

However using the internet where anyone on the net can access the system is not ham radio. Its a radio connected to the WWW. Thats not ham radio.

I am not saying the idea and the system is not good, or it's bad. I'm saying stop calling it ham radio. How about a new term...such as INHAM....."Internet Ham" perhaps?

Local Node OP has Pulled "PLUG" until late April , says he's got better things to do than listening to "you are 001599 in Timbuktu your report pse om gd lk in the contest " .

By the way aren't all contest reports 599 .

Now if it was a bit more skilled rather than punching buttons and 27 days less then he may have a different idea.

Still interested in finding out the node numbers Simon is using

Regards to all (Well Almost)

The IRLP CANNOT be accessed by others. It is STRICTLY designed for radio to radio access only.
ECHOLINK can be accessed by others and is NOT the topic of conversation.

Since, by design, IRLP has radios at each end, as does a landline system or a CAT5 system, where does it differ?

Brad.

I am on topic. I want to know just where you draw the line as to what does and does not constitute Ham Radio, because I fell you actually have the systems mixed up! I believe it is you who needs the education.

Again, you are mistaken at this point Dan. No-one on the net can access the IRLP system via the internet. It is NOT a radio connected to the WWW, it is indeed the LL linking of repeaters and simplex radios using a digital protocol. Check your facts. Don't confuse it with Echolink.

Brad.

Well, applying USA logic, if I had a phone patch from a cellphone to a 2m radio, then yes, it would still be Ham Radio. Just as their LL phones patched into their repeaters are classed as Ham Radio. There is NO difference.

Brad.

You can make a "passive repeater". This requires 2 directional antennas.
At the top of the hill, hook up both antennas (to each other) and aim one at
"the world" or the repeater
and aim the other at your house. run a cable between them.

When they built the Georgia Railroad Bank Bldg in Augusta (years ago) the
phone company had to install a passive repeater on it because the building
interrupted line-of-sight for a microwave shot.

I've never tried this myself, but I've heard that the technique is very
useful in mountain terrain.

The next 64 Repeater Group Bi- Picnic is planned for Saturday April
9,2005 at Starkey Park in New Port Richey starting at 10:00 AM. This
date falls on the 2nd Saturday of April.
All are invited and you need not be a ham radio operator to attend. All
we ask is that you bring something to share with the Group. Whether it
be hamburgers or hotdogs,plastic plates , utensils or ice, soda,cups
etc... We need it all.
For location map please click on Yogi Bear at: www.the64newsline.net

Talkin will be on the 146.640 Repeater.

I need to get a idea of who is bringing what so PLEASE, let me know of
your planned attendance as soon as possible.

Please contact me thru email or radio or phone call... (Phone number
below)
I need to know NO LATER THAN APRIL 8TH ON MY 8:00 PM NET.........

Looking forward to seeing all of you there !!!

Thankyou...

>
> Dan/W4NTI

The same way any valid licence is checked when you use any ham frequency -
by "self regulation".

Using IRLP is no different than firing up on your local repeater that is
linked to some other repeater in the distance. There is the exact same
potential for unlicensed users on IRLP as there is on any other amateur
frequency, no more, no less. Yet you don't seem to be claiming that 2m is
open to CBers, or that 40m is not a valid ham band.....

If you accept that linking amateur repeaters via land line is OK, then you
have no basis upon which to reject IRLP - it is the same, linking repeaters
via land lines, except it uses internet technology to make that affordable
for anyone rather than the expense of a dedicated leased line.. Without the
VOiP linking repeaters by landline can be rather costly, so the number of
repeaters you could link would be limited. Now that expense has been
removed so that any local club, or local ham, can establish a node and allow
the repeater to be linked to any one of thousands of other ham repeaters
worldwide. Seems that all they have done is expand existing technology -
isn't that what ham radio is all about??????

Then again, we faced this kind of narrow minded, arrogant discrimination when they proposed access to amateur frequencies by operators that hadn't learnt CW... Seems it is just another example of the old timers stomping their feet because times are changing - must've been real hard when valves were replaced!

You are wrong, wrong, wrong, WRONG!!...

IRLP does NOT allow ANYONE on the internet to access the system, it is NOT connected to the WWW, you are mistakenly thinking of EchoLink, which we are not debating here... Again you show your ignorance..

The ONLY reason IRLP uses 'the internet' is to make the linking of repeaters via landline affordable to the average ham, rather than an expensive exercise obtaining a dedicated leased line. There is the exact same potential for unlicensed users as there is on your local 2m repeater, or on 40m....

If you support the landline linking of repeaters then you MUST also support the IRLP system, it is the exact same concept except using technology that makes it affordable to almost every ham....

If you wish to argue against systems that allow access from the internet rather than from & to radio, then please go pick on EchoLink..

Your right to a point Kate. I'll give you that LL linking of repeaters are indeed ham radio, so would be control of a repeater or say a remote base. Thats also fine.

However using the internet where anyone on the net can access the system is not ham radio. Its a radio connected to the WWW. Thats not ham radio.

I am not saying the idea and the system is not good, or it's bad. I'm saying stop calling it ham radio. How about a new term...such as INHAM....."Internet Ham" perhaps?

Dan/W4NTI

....

For what it is worth? I agree with Dan on this one. INHAM is entertaining and has merit. I, however, am of the opinion that 'real' Amateur comms take place when two or more stations use transmitters, antennas and communicate via the airwaves. Echolink and clones can be enjoyable, but it is not nearly as rewarding as using the airwaves.

Exactly martin! I do have to say though that things have gotten somewhat
better in the last 25 years I've been licensed.

Back then new Novice licenses were pretty much scum of the earth to the old
timers.

I got my full call pretty quickly and it was amazing the difference in the
way I was treated (for no _real_ reason).

Although that often changed when I voiced opinions about how morse shouldn't
be a requirement for HF (even though I'd passed the fast morse) or that
this new fangled packet radio was the first wave of the future.

Your so called arguements are **trolling**. It all started with a posting about an IRLP contest. No, you added nothing about wishing to join the contest, all you and your buddies have managed to do is make total assess out of yourselves, pissing about with definitions.

IRLP and Echolink have demonstrated how Amateur Radio and the Internet can work together in harmony.

All you and your **Trolling mates** have done is act like total Pratts.

IRLP is an **extension** of Hamradio, get over it....

Morons are like you Jock....cant accept a broader concept of radio.
If it doesnt meet your **SPECIFIC** interpretation, out come the labels.

You really should go back to your Black Model-T ford

Now we see the true problem with IRLP... If it isn't HF, spark-gap and pedal powered it just isn't amateur radio, is it! I guess you also build your own radio gear, totally, don't you? I mean, using commercial built gear just isn't what amateur radio is all about, is it!

So, satellites, ISS, space shuttle, packet, ATV and SSTV should all be removed from the hobby as well? Just good old CW and spark-gap or valve gear only, home built on a piece of ply-wood.....

People like YOU are the main reason newcomers decide to dump ham radio or not even start in the first place. Stuck up, pompass, arrogant old fossils stuck in the past and unwilling to even consider new or changing technology. I guess you also have your very own group of fellow hams (those that haven't been moved to a nursing home yet) that you regularly chat to on HF, refusing to admit any newcomers to the QSO because, let's face it, if they didn't have to totally build their own radio using nothing but safety pins, paperclips and the wire from an old AM wireless, AND have a written reference from Morse himself, then they just aren't hams, are they....

Oh, and by the way, you really need to keep up with the thread - some of your fellow 'debaters' have already admitted that repeater linking by landline is perfectly acceptable, so you can't even manage to get your own side to agree with your opinions!! What a JOKE!!!

Sorry Walt, but IMHO (In My Humble Opinion for the oldies) ham radio would be far better without YOU, and those like YOU. Otherwise, the hobby will no doubt die as operators like you constantly alienate new technology and newcomers alike. Hope you enjoy the onset of BPL!!!

Your correct with your posting, olle **GRUMPY** here has finally
shown us the colours of his bloomers and we can see, its not IRLP thats
the problem, he's just unhappy he's continued breathing beyond 1970.

You cant expect more when life is boring and it always rains, you get
crotch rot and it appears olle Walty has a bad dose of it.

It was only a matter of time before we worked out what was **REALLY**
driving him....and I thought he was a **TROLL**.. just a plain
unhappy POM......

It was when voice repeaters were introduced on the 2m and 70cm bands that
amateur radio finally began to realise it's true potential!

Well, I don't normally side with the grumpy old b****r, but this time . . .
. . .
Of course Walt's using a computer and the internet, but to contribute to a
NG.
He is not using VoIP instead of a radio, and then calling it amateur radio.
Granted IRLP requires a radio at each end, but the other VoIP modes do not,
and that is what is the issue with many of us.

That won't happen. What will happen is that the old dinosaurs who have held back amateur radio from advancing into the 21st century will finally die off and then we won't have to listen to the whinging from them anymore :-)

Just for the record, everyone on Echolink (links and individuals alike) have been validated by one of the Echolink validation team. I'm not sure that it is really necessary, but it happens. So, like it or not, there's very little chance of a non-licenced person using Echolink.

... and (lest we forget) what does it really matter anyway? ...

This is a hobby. There are authorities whose job it is to ensure only those with licences transmit. We are just end users of the service.

I for one don't really care whether the chap at the other end actually has a licence or not providing he sounds and behaves like a radio amateur. I will not hesitate to talk to someone who gives a callsign and sounds like an amateur. I pay my licence, and leave it to the authorities to sort out if he is bona fide or not.

Here, we pay to renew our licences every year. How is someone supposed to know whether someone who was a bona fide amateur has paid for the forthcoming year. Of course, we don't know, but if he behaves like an amateur, we assume he is licenced.

But we're NOT talking about the *other* VoIP modes, just IRLP. I am not
trying to debate EchoLink..

So, are you saying that IRLP *is* part of Amateur Radio as it uses radio
linked using internet protocol, but EchoLink (etc) isn't as it uses NO
radio at all??? Can we assume that is correct?

Until the IRLP 'contest' started and then you'd all be sitting there in your rocking chairs, wondering what the hell was happening and then whinging that nobody had even bothered to tell you that it was on!

At least now you know, and can switch off your hearing aid and ignore all those 'non-amateur' type people, or even pull the plug on the IRLP node, which I know you in the UK wouldn't have anyway as it really isn't amateur radio, and we all know that the Brits never do anything remotely controversial, don't we!

What a familiar refrain!

If newsgroups and the internet had been about when the repeater
network was started in the early 1970s, I bet you'd have said exactly
the same thing about them too!

The frequencies of internet links and repeaters are well publisised,
and it is easy for anyone with even a small brian to avoid using those
frequencies and get on with whatever parts of the hobby turn you on.

And what makes you think I lack sufficient technical expertise to operate a radio or build a radio or accessories? I have done all those in the past. I have demonstrated those skills... I choose to use a more modern method because it is simply better and more efficient!

You really have a bee in your bonet about CBers don't you!

They are simply not relevant to amateur radio or the issues being discussed
here.

Hee Hee, do I smell a deflection tactic here?

Before you go and pick on Echolink, and if you don't want to appear a
total prat, be sure to comprehend that everyone using Echolink has
been validated by a team of people, and in many cases, have been asked
to send a scan of their licences before getting access to the system.

Certainly, the Echolink system has it's weeknesses, but it isn't under discussion here, IRLP is. And that's part of the issue, the confusion, or lack of understanding of the vital security differences between the two systems.

No, the rot set in in the 1960s when many newly licenced G3R and G3S
stations started flouting the rules by flagrantly exceeding the 400
watt output power limit on top band. Lets ban Top Band instead. <g>

I've been licensed over 25 years, full call for almost that long. For almost that long I've been lobbying and arguing for the changes that you complain so much about.

I am pleased that the amateur community is finally coming to it's senses and implementing some of the measures that I and other forward thinking amateurs have been arguing in support of for so long :-)

I must say that I have to disagree with you on this point OM. If we, as the
hobbyists, have little interest in the use of the bands by 'pirates', then
why should the authorities be concerned. Amateur Radio has, in most parts
of the world, always been largely "self regulating" which means it is
primarily up to us, the users, to ensure the bands are used properly and
report any unlawful operations to the authorities. This is largely because
we, as licensed amateurs, are supposedly "responsible persons" that are more
than capable of taking care of "our hobby"

If we show little interst in this, you can be assured the bands will fall
into disarray and the authorities will start to regard us as no more than
CBers with more frequencies.

>
> Here, we pay to renew our licences every year. How is someone supposed
> to know whether someone who was a bona fide amateur has paid for the

Callbooks, databases, common knowledge. I do not mean to say that we should be 100% certain of all contacts, or that we should go 'out of our way' to check every single contact, but by the same token we should NEVER adopt the attitude "it's not my problem" and "I don't care if he is licensed or not". They are very dangerous attitudes to have and will, eventually, spell the end of Amateur Radio. What reason do we give newcomers to study and sit their exam if they know you will talk to them anyway? We might as well just change the bands to CB now and open it up to anyone - that is basically what you are advocating.

Now, open the debates!!

So, if you don't support repeaters, so supposedly don't listen to them, and IRLP is primarily linking repeaters, then WHY THE HELL ARE YOU CRAPPING ON???

You obviously are NOT affected by IRLP - you don't use repeaters, and by the sounds of it probably nothing above HF bands either, so IRLP is NOT a concern to you! You are just a typical whinging dickhead that has to stir as many people as possible - in short a TROLL. I think the best bet is to killfile you AND list your callsign amongst those to ignore on air, but then I would not be able to laugh at the continuous rantings you keep coming up with in a futile attempt to justfy your own shortcomings.

That is so much bollocks Walt, it defies reason. That is trolling at it's finest.

This country is 31.5 times larger than the UK, those vast distances require much better systems for any sort of coverage and repeaters are the way to do it. Whilst I operate 40m mobile a lot, it isn't the total solution, nor is the simplex VHF coverage due to hilly terrain.

Brad.

Nowt to do with me, Walt. I've nothing to do with the Echolink
validation team. You'd better ask them that. I know, however, that
newly licenced amateurs have to send off a scan of their licence to
one of that team.

>
>How do you know my licence hasn't expired?

If you give a real callsign, and sound like a real amateur, then I
don't really care.

I wish the authorities monitored on-air, and checked rather more than
they do, but AFAIAC it is not my (or any amateur's) job.

What's "vital" about security? Is someone going to get hurt?

As has been said many times before, anyone with or without a licence
can invent a callsign and go "on-air". Once they done that, the IRLP
network is just as easy to access as any other frequency. All this PGP
authentication between nodes is just a spin-off from the fact that
Dave Cameron invented the system primarily as a VOIP system to replace
land-lines for commercial applications. It is quite unnecessary on the
ham bands.

Yes, and the security was designed in so that services like the RCMP could use it without fear of internet hackers entering the linked system. Since Dan kept raising the issue of WWW users appearing on air, then it is pertinent that he should understand his error.

Brad.

Yes, and I am one of those that have been validated for EchoLink. But that
is irrelevant to the debate about IRLP....

The argument is that IRLP uses radio linked by internet protocol, and as
such is still amateur radio. IMHO Echolink, if used PC to PC, is definately
not amateur radio. Perhaps if used PC to Radio, or Radio to PC, then it is
still amateur radio, but EchoLink PC to PC is nothing different than Yahoo
or MSN Messenger...

IRLP is not the same... That is the debate..

The entry level to pirate on an IRLP node requires a radio. PGP
is equally used in the Commercial IRLP systems as on Amateur Radio.

Unnecessary, thats one point of view. The other is, another good demonstration
of how PGP can be used to authenticate computers on the internet.
IRLP uses bi-directional authentication with PGP...so your not going
to masquerade...

Would you prefer PGP authentication or a QRZ database lookup ?
You decide.............

Thats where **YOU** have missed the point. Amateur Radio has demonstrated
it can co-exist with the internet and has actually embraced it.

Have you embraced Television, Gasoline Engines, the Global Economy ?

I find it hard to understand how a **TROLL** like you can function in
the 21st century...

Go back to 40m and play with your pill poppin, haemoroid bound friends
and leave the newer and more interesting technologies to people that
can accept and accomodate them...

Message-ID: <JqY0e.10288$JK1.866857@news20.bellglobal.com>
Source record: 52811

It sits on the surface of a wood stove. When the stove heats up, a d.c. fan blows hot air around your house. The temperature difference between the base and the heat sink and fan on the top generates enough current to power the d.c. fan. It is called an EcoFan and is made in Canada. Every time the unit is dropped, the glass like PN semiconductor device goes NFG. (Like breaking a piece of glass) The manufacturer wants $48.00 plus tax and shipping to fix a unit. This is a bit much when a new unit costs about $100.00. THEY WILL NOT SELL A SEMICONDUCTOR SEPARATE NOR WILL THEY PROVIDE A PART NUMBER. I suspect it is some kind of house unit manufactured in the Orient. It has no part number on it. This is a very Canadian way of running a business. Anyone know where to get a replacement part? I believe the device could be called a PN Thermoeletric Generator.

You are missing a detail. You can't access the systems with a PC. That's what Dan, Walt and all the others who are ignorant of the facts are confused about. Perhaps the title "contest" is a misnomer, "QSO Party" might have been more appropriate.

But anything which gets hams out of the sofa and back on air can't be a bad thing.

Brad.

If you think it isn't then _you_ have missed the point. Amateur radio has been instrumental in the introduction of many new radio technologies over the last 100 odd years.

As for not using repeaters do not forget you live on a green postage stamp sized country where simplex VHF is likely to cover a significant proportion of your country.

I have an easy simplex 2m range FM range of about 100km to the north and West and about 50 km to the south and east. That covers an amateur population of about 200. Anecdotely about 50% are active sometimes and about 25% use VHF sometimes. That leaves about 50 amateurs most of whom are not very active.

Repeaters provide a means of increasing the available amateurs for such activites as the local on repeater technical discussion night, organising the local swap meet and many other useful amateur radio related functions.

To continue - I recall an article (I believe it was in QST) that described
using 2 rhombic antennas (uhf) at a mountain top. One was pointed to a
distant repeater, and the other was directed into the valley where they
could 'finally' hear and talk to the repeater.

Passive repeaters are used at microwave frequencies all over the Snowy Mountains in Australia. They are the size of drive-in theatre screens with tilt adjustments.

Remember, when the signal is retransmitted there is an additional path loss of something like 130dB. The signal being received by the repeater antenna must be very strong or the transmit antenna will only have a few nanowatts to deal with.

You would be advised to do a few path loss calculations before putting in a lot of effort which may be wasted. The exercise is well worth it as the process is very educational. You will need to know either the available signal strength from the distant repeater at your proposed site, or it's ERP and distance. Also, your distance and ERP up to the remote site. Then you have a few figures to begin working with.

Or you could try hiding a small dualband HT in crossband mode with a small solar panel on a hilltop and working through it.

Nana

****
Cool - I guess dishes that size must have lots of gain.
****

****
I assume the signal is being retransmitted because of obstructions in the
line of sight,
so they're not done as a whim. Both antennas need to be high-gain, I
assume, because
the signal is not being amplified electronically. The loss of 130 db is hard
to believe. What about the 'gain' from the receiving antenna and the 'gain'
of the retransmitting antenna ? I concede some loss in the cable connecting
the two, but not 130 db, is it?? The loss would be more when it hit the
mountain obstacle, right?
****

****
But its more fun to go ahead and build it and see if it works.
I once argued with a guy who told me hot water would freeze faster than cold
water.
I explained the differences in btu needed and even dug out the old slide
rule with a bunch of supporting calculations.
--then we just 'tried it' - I was wrong - he was right - and neither of us
could explain why

1554. How to deal with SSB in the 40 mtr CW band

Newsgroup: rec.radio.amateur.misc
Date: 2005-03-26 01:34:41 UTC
From: GeorgeF <av8tor@licensed4funREMOVEBEFOREFLIGHT.com>
Message-ID: <R_21e.3991$z.1307@newsread2.news.atl.earthlink.net>
Source record: 52826

How are the rest of the CW operators dealing with all the SSB that is showing up in the 40 meter CW portion of the band?

Here it is the weekend and there's some contest going on and there is more SSB in the CW portion of the band then there is SSB in the SSB portion of the band. What gives with this?

On HF I'm a 99% CW operator, only been licensed about a year and love CW, don't care much for SSB. But I'm starting to wonder why I paid $1800 for a Yaesu FT-1000Mk V Field as it looks like I won't be able to use it for what I bought it for this weekend...

Help
George

No, that is one point I will fully agree with you on. Every amateur has a right, and duty, to help keep the hobby 'pirate free'. Anyone that thinks their respective authority (FCC, OffComm, ACA, etc) has the resources to keep a watch on amateur bands for unlicensed operators (or on any other frequency) is dreaming - they rely on reports from licensed stations to track down such users. This is why amateur radio has always been "self regulating" in most countries.

IRLP - www.irlp.net

EchoLink - www.echolink.org

They are two totally different concepts. IRLP only links radio/repeater to
radio/repeater.

Echolink lets you link PC to PC, PC to radio/repeater or radio/repeater to
PC.

Tis the CQ WPX SSB Contest. URL: http://home.woh.rr.com/wpx/

A lot of countries outside the USA have phone privileges in the lower part
of 40 Meters.
Example - Canada -- see URL:
http://www.eham.net/newham/bands

Click on

Canadian HF Band Allocation

Get 7.050 to 7.100 -- SSB

CL

HT might overheat significantly if on full power for an extended
period of time. Such as during a net.

If you are just transmitting yourself that's nowhere near as
continuous duty as cross band repeating.

Tony

1566. No radio access via browsers

Newsgroup: rec.radio.amateur.misc
Date: 2005-03-26 12:48:13 UTC
From: Tim Walters <tim.walters@subterra.es>
Message-ID: <d23lpa$f6p$0@pita.alt.net>
Source record: 52738

I can access BBC radio channels through both RealPlayer and Windows Media,
but when I try to access the BBC through a web browser (either Opera or IE),
a pop-up screen entitled BBC Radio Player appears, but then nothing happens.

Some option seems to have been wrongly ticked and I've been through the
preferences sections of everything I can think of, but all in vain.

Any suggestions?

Thanks in advance.

Tim

: a spell-checker, perhaps you need to try it.

Dear Dear Dear "Walter" or whatever your real name is ...

Since we are on the subject of SPELLCHECKERS which seems to be the
only item that you and several others can have a go at me over...

And given that those who previously had a go also fell on their faces
by mis-spelling something themselves....

I decided that it was time to go back in to the archives of google
to see for myself just how good you really are...

And of course...
right away...
your ability to make mistakes came up without too much filtering.

So you see "Walter" dear chap....
even those who think their spelling is brilliant can make mistakes...

As a second time winnner of the 12wpm morse TEST, I know i'm not perfect.
And on this newsgroup as elesewhere, I never claimed that I was.
But you won't see me running away from a morse test or encouraging others
to run away either and you certainly will not see me congratulating people
for running away.

Please note that these postings are from MAY 2004 ONLY !!
I shudder to think what other glaring spelling mistakes I might find
and to save you the embarressment, I decided to only point out a few.

here we go... (Ref: COLLINS ENGLISH DICTIONARY)

Absolute rubbish and squirming of the highest order! You do it merely as a
feeble attempt at insult,and a sexually descriminatory
one at that. The very fact that you seek to justify it only enhances the
validity of your intent.

SPELLING MISTAKE: SIMILIAR SPELT WRONG
SPELLING MISTAKE: MISCHEVIOUS SPELT WRONG

= = = = = = = = = = = = = = =

I doubt that you will be able to claim that every one of these mistakes
was as a result of an unfamiliar keyboard but I expect you might!

If you have been on this newsgroup for as long as you claim you would
remember others falling foul of their own mistakes too and by criticising
my spelling but you obvously dont remember which leads me to doubt your
length of presence here.

The list of exposed failed-spellcheckers
gathers another member to its tail.

So, as you see "Walter" or whatever your name is (hiding in the shadows),
slagging off someone for their spelling errors isn't very nice.

Do have a really really really nice day.

Considering the WPX is on, the USA hams are operating splits like 7024/7220,
why not put that nice rig to work earning a few qso's instead of complaining
about the rest of the world? (and learn a bit more about it too)

I think Jim's angst was that I didn't cut the post I replied to
down to only a couple sentences, or a paragraph at most.

Normally I try to do that. Especially when Lennie goes into his
umpteenth re-telling of how he and ADA, passing 2.2 million messages,
saved the Free World from Communism and Amateur Radio.

I guess this one post was the proverbial straw for Jim, and he
snapped. It happens.

> radio at all??? Can we assume that is correct?

I'm not overly enamoured with the way that the internet is being used in amateur radio as it seems to be converting our hobby into nothing more than a mobile phone system. However, my opinion is as you have stated. At least IRLP demands the use of a radio at each end, and simply uses the internet as a means of propagating a signal. The other systems - Echolink etc. - do not work like that, and you can have someone using a radio talking to someone using a computer, and to me, that isn't amateur radio.

The point I was making about Walt is that he was being unfairly labelled a hypocrite. His objection seemed to be not about using the internet at all, but about using computers and the internet and calling it amateur radio.

His objection, like Dan, was based on his complete ignorance of the way the
system functioned.

Of course, you also need a kind Amateur who has a computer and a broadband
internet connection, and who has donated his/her own time, equipment and
knowledge to provide a service for the rest of us.

I have four computers in my shack/living room, one of which is connected to
the HF radio and is currently providing an SSTV repeater on 7033KHz.

The point is that it isn't so bloody hard when you are running 1500 Watts.
Try running 100W like the rest of the world and watch the difficulty factor
rise.

Did you get into it only for 40 Meters? Because 40 is the only band
where you run into the problem to the degree that it might be
difficult to operate. And you never run into that problem on 30 or 80.

> Dave S.

It seemed (at first) that Walt just didn't want to listen and understand
that IRLP used radio at each end - he seemed to be confusing EchoLink with
IRLP and just didn't want to take notice of the many people trying to
explain that IRLP was no different than linking repeaters via landline,
which seems to be widely accepted in the amateur community.

But then Walt showed his true colours when he said that even repeaters
aren't amateur radio in his eyes, so I suspect it isn't IRLP he is objecting
to, it's actually anyone younger than 50 with an amateur licence! It's a
sad fact that one thing pulling amateur radio down are the old operators
like Walt that just can't accept (or undertsand?) changing times and believe
that all operators should stick to the bands and modes they choose as
suitable. Most of the older operators have a wealth of information and
experience they could share with the newer operators, helping them to become
better hams and advancing the hobby. But instead they sit there, forever
grumpy that times change, throwing abuse and ridicule at those entering the
hobby and at the same time wondering why amateur radio is slowly dying!

Funny thing is, many of the old timers probably wouldn't be able to pass the lower grade tests these days if they were made to re-sit the exams! How many have kept up on the regs? How many still have all the technical knowledge? I know some VK Full Calls that got their licence in 'the old days', that couldn't for the life of them construct a dummy load or string up a simple wire antenna, or build a SSTV/RTTY interface, or even get one to work without help from a 'newcomer'. These are tasks that even the lowest grade newcomer are performing every day.... (yes, I know this doesn't apply to *all* "old timers" or full calls, but it does apply to many of them - and if it were a lower grade operator that couldn't do these things then the old timers would be the first to jump up and say they shouldn't have a licence, etc..)

Personally, I accept that there are many different aspects to amateur radio, and while (to me) IRLP will never be as good as actual DX contacts via RF, at least it gives some operators the chanve to talk outside their local area and hopefully that will spark their interest a little more as they hear stories and experiences from overseas operators. And besides, if you don't like IRLP there is nobody holding a shotgun to your head and forcing you to listen - there are plenty of other frequencies to use!

Cheers

Well, yeah, but from the users point of view all you need is a radio (on the
appropriate band) and power supply, antenna and co-ax, and something that
generates DTMF tones. The user doesn't need a computer or internet
connection, or even a phone line for that matter!!

>

Ahh - wasn't the removal of the HF restriction of us limited's the best
thing to happen to us of late!!! Of course, the Walts of th world still
think we shouldn't even be on any band, we didn't have to do CW....

With the recenty thunderstorms which moved through the area QRN is very high on 80, about S9. On most nights my 80 meter noise level is S1 at most.....

My antenna doesn't work very well on 30 meters, got to put something else up for 30 meters. Currently using a W5GI Mystery Ant (www.w5gi.com) and it does well on most bands but not 30 Meters.

The AMT-3000 is an excellent Part 15 AM transmitter and well worth the price. I have one and it is a first class kit and gives great audio. As far as the $200 for a coil and 3 meter antenna, I'm not so sure.

K0CKB and I just returned from an 8-week RV vacation. During the 8,500 mile trip we continuously monitored 146.52, and had our calls and the statement "Monitoring 146.52" prominently visible on the rear of our coach. Most of our travel was on busy Interstate highways, and in/near populous areas including Minneapolis, DesMoines, Kansas City, Topeka, Wichita, OKC, DFW, Waco, Austin, San Antonio, Corpus Christi, Brownsville, ElPaso, Las Cruces, Globe, Phoenix, Flagstaff, Tucson, Las Vegas, and points between.

Not once were we called on 146.52.

At every population center we announced "K0HB (or K0CKB) monitoring Five Two", often more than once.. On only one occasion (thanks WK5C) did we receive a reply.

Is .52 broken?

> :-(

According to the VK band plan the recommended (not regulated) CW sub band
extends from 7.000Mhz to 7.030Mhz.

The digital sub band extends from 7.030Mhz to 7.040Mhz.

The SSB sub band extends from 7.040Mhz to 7.100Mhz (primary) and 7.100Mhz to
7.300 Mhz secondary.

So at 7033Khz the SSTV signal is in the _correct_ sub band. [1]

If you had followed all of the thread you would be aware that he objected to VHF and UHF repeaters, IRLP, Echo Link, CB-ers, ex CB-ers, non morse code tested amateurs and a number of other procedures and groups _without_ giving supporting arguments.

When people started to refute his arguments with logic and refused to accept 'his word from on high' he started to get upset.

When he refused to debate the _issues_ people starting regarding him in various less than complimentary ways I suspect :-)

This is after all usenet... people _will_ challenged unsupported statements (and rightly so!).

As already explained, the difference between Echolink and IRLP (and eQSO for that matter) is minuscule. The whole question of whether amateurs using computers are not amateurs when they use their computer, but are amateurs when they use their radios is absurd.

I am a radio amateur. When I talk to another amateur, whether I'm using Echolink, eQSO, my rig, or even talking over the telephone - if I'm talking about amateur radio - then I'm having a QSO.

But, here in the UK, there is a new breed of "amateur" gaining licences, a breed that is incapable of recognising the difference between a direct contact over radio, and a QSO assisted by either a repeater or by the internet.

Worse still, some of this breed openly admit to not caring to learn how it all works. "I'm not technical here, but I can copy you ok".

Well, this *is* a technical hobby, and I have very little time for those who openly don't wish to learn about "how it works".

There *was* a time when, if you didn't care to learn about propagation then you weren't adequately qualified to gain a licence. The UK's Foundation Fiasco Licence (M3 prefix) has moved the goalposts, and now this tier of licence is available to anyone with a brain equal or greater than that of an amoeba.

The hobby is not dying. The hf bands are as full of enthusiastic
amateurs as ever before. The hobby is dumbing down. In addition to the
genuine enthusiasts, we now have people who only want to chatter.
Perhaps its time for a new type of CQ call. One four for a copy
anyone?

I did do the CW and I have been running SSTV on 7033 for a few months now.
Since you are such a great HF operator you should know that it is a popular
SSTV frequency in Asia. The web page regularly shows pictures from Japan,
Taiwan, China, Mongolia and Korea which are received on 7033 overnight.

By day there is no propagation from these areas. By the way, out here the
QRP frequency is 7030.

Well, in this country the CW sub-band runs from 7000 - 7030, digital from
7030 - 7040 and SSB from 7040 up. I'm not stopping operating allowed modes
within MY regions bandplan to help you justify the cost of your radio.

With the recenty thunderstorms which moved through the area QRN is very

I suppose you want to complain about us running SSB on 30m too?

Perhaps they forgot to disable thier K0HB filters?

Had you been in SE Tennessee and I had seen you, you would have
gotten a call. But on the same note, there's been quite a few
occassions where I've passed/been passed by a vehicle with Amateur tags
(or some other "callsign" display), and had my hails go unanswered.

On the other hand, I've gotten several calls, mostly from
18-wheeler Amateurs. Lots of those big rigs are Hams...guess they got
tired of the 10-4 good buddy crowd.

Glad you're home safe, Hans.

There are no contests on the WARC bands, 30M, 17M, and 12M
And 30M is all CW or Data -- no phone.

A DXer reported working the FT5XO Dxpedition on 30M with just three calls
last night.
If you are going to work CW -- get some good antennas in the CW bands.

If noise is a problem on 80 or 160M, make a low noise receiving loop.

Glad you're home safe, Hans.

73

Steve, K4YZ

This is just a guess, but "maybe"

1. Any amateurs mobile that may have seen you, missed reading the bumper sticker because they're too busy watching the road? I know when I'm on the road and see a ham call sign bumper sticker or plate, I sure in hell am not going to detract from my driving to play guessing games trying to find them. That would be like a needle in a hay stack - IF they are even on the air at all.

2. They're on the "repeater" pairs - perhaps trying to get directions from a local person - because they didn't think they would have any luck monitoring 146.52!

For much of the rest of the world, 40 meters is 7.000 to 7.100.

It may come as a shock to you but there are other places in the world where there are amateur radio operators and their bands do not always match up with ours -- 40 is a good example.

I've never dealt with them, but since the card has yet to be charged, maybe there's no worry. Perhaps they misplaced the order? You could call your card company to tell them NOT to honor the charge, call Lentini and cancel the order and order elsewhere. So far, it seems you're ok..... except for the disappointment of not getting your much awaited gear.

Poor Hans, so typical of today's ham radio ops, stuck in the archaic world of 52 simplex, while the rest of the world is using Advanced Mobile Technology.

"Why aren't young people interested in ham radio"? duhhhhhhhhhhh, lets demonstrate 52 simplex for them, maybe that'll get the kids interested.

Well sir in Southern California, in the last year or so, we have trained
about 30 school kids who obtained their license.
Donations have been made to set up complete Ham stations at the schools.
In our repeater club there are well over 75 members age 25 and below.
At our field day, we had two troops of boy scouts who got on the radio.
Several went on to get a license.
Ditto for the JOTA day (if you know what that is)
The kids loved PSK31 - no internet they asked.

How many youths have you trained ???

Well sir when theSAN DIEGO COUNTY was ON FIRE:
CEDAR FIRE LARGEST IN STATE HISTORY
16 dead, 2,342 single family dwellings & 383,657 acres burned
I repeat 16 dead, 2,342 single family dwellings & 383,657 acres burned
It was a disaster of unimagined proportions.

I can assure you that Amateur Radio was quite relevant -- to the tune
of over 500 Amateurs participating. Won accolades from local officials and
the media.

Are you a member of ARES or RACES ?

Are you prepared for the BIG one that will surely come your way?

Well are you?

When the cell phones are out, telephone lines are toast, power is
lost, you will wish you had a battery operated mountain top repeater. Ours
was on battery power or portable generator power for 3 days after the
commercial power was lost.

Do you support such a repeater, are you even a Ham?

Support Amateur Radio or rely on your silly phone - the choice is
yours.

You need to do some research before you blather out this stereotype
nonsense.

If Phil is a Ham I'll bet he will be the first on the air when the disaster
hits his area.
His silly phone and internet of "Advanced Technology" will be deader than a
dodo.

When I went to reply before, the message was sent by a slip of the hand, faster than I had intended. I can't speak for all, but I know myself - around here, there used to be a group who didn't like repeaters, so - they talked on Simplex. Many of them have since moved away from the area and apart from each other - to be able to do FM simplex. Maybe they still talk on h.f., I don't know. Many operate simplex when they're close by and don't wish their conversation broadcast over many miles - such as a husband and wife - where the wife may be shy and not care to use repeaters as often. Still, you have the "repeater" clubs, where the members tend to congregate on the repeater frequencies more so than Simplex. Then too... with amateur radio "seeming" to drift downward in popularity (one reason the youth aren't involved), there are fewer to listen to simplex. Fewer on repeaters as well. These may be some of the reasons simplex isn't so busy. Even the repeaters around here don't seem so active as they once were. Is it because of computers? I doubt it - though it is possible. I think it is that people are more hurried in life to make a living and to enjoy any fragments of time with their families anymore - to take the time to enjoy a hobby which may have been once endearing and is now more so a dust collecting hobby.

I've not been on any repeaters myself for about a year or more. I've not been on H.F. either. Just don't seem to find the time for it much anymore. Too busy doing other things. That is sad, considering I was "very" involved in it. I suppose, once you get out of the habit, it is hard to get back into it. Actually, it feels good not toting a radio everywhere, even a small one. A cell phone is more than enough. When I do my other job, I have a radio

with me. I don't care to look like Batman with a utility belt and a hundred radios. I carry only what I need.

I'm sure there are myriads of reasons why folks don't talk Simplex. Just as there are for no one taking exams anymore - never mind - passing it.

Like I said, learn more about the other regions, the rest of the world does not use the same bandplan as the USA (thank God for that!) VK have phone privileges on 30m. Excellent band for 600km range communications mobile, by day, which is about the distance from Sydney to Brisbane and Sydney to Melbourne. SSB from 10115 - 10140. Main calling on 10120, secondary 10125.

The Ohio/Penn DX PacketCluster
DX Bulletin No. 703
BID: $OPDX.703
March 28, 2005
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1ER, K1XN & GoList, NC1L, NG3K, W3UR & The Daily DX, K4VUD, N4AA & QRZ DX, KM6HB, WA6LIE, K8YSE, W8AUV, DL1EK & The DX News Letter, DL5AOJ, DU1EV, F5CWU & La Gazette du DX, F5NQL & UFT, F8BBL, G3SWH, G3VOF, HA0HW, G0OIL, I1JQJ/IK1ADH & 425 DX News, IT9EJW, J6KVR & JA-IOTA Islands News, LU6EF, MM0DFV & Scottish Ham Portal, OZ5MJ, PS7AB, VA3RJ & ICPO, VE2TKH, VK4FW and ZS4BS for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 20th/March, through Sunday, 27th/March there were 231 countries active. Countries available: 3A, 3B8, 3B9, 3DA, 3V, 3W, 4J, 4L, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5W, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A4, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FT5W, FT5X, FT8W, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J6, J7, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S0, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T33, T5, T7, T9, TA, TF, TG, TI, TK, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK0M, VK9L, VK9N, VP2E, VP2V, VP5, VP6, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4U1U, UNITED NATIONS HQ. On their way to the Dayton HamVention, operators Mustapha/DL1BDF and his friends Karl-Heinz/DL1BAH, Manfred DK1BT and Stefan/DG2BDB will stop in New York, and operate 4U1UN as guests of the 4U1UN ARC. Activity will take place between May 12-15th. QSL this operation

"ONLY" via DL1BDF, the DARC bureau prefered. ADDED NOTES: At the Dayton HamVention they will represent both the DARC Club NORDEN (DOK I09) and the ASTRA which is the National Ham Radio Tunisian Scouts organization. Also, from NY to Dayton and back, they will be active from their mobile home as /DK0FI/m, and the U.S. prefix according to the call area that they will be in. QSL via DL1BDF, the DARC bureau prefered, too.

5Z, KENYA (New Bands). Ted Alleyne, 5Z4NU, the Chairman and Secretary of the Amateur Radio Society of Kenya, reports that the Kenyan licensing authority (the CCK) has granted Kenyan amateurs the use of two new bands:
160 meters -- 1810-1850 kHz
30 meters -- 10100-10150 kHz

9A0, CROATIA. During the Preparatory Central European IARU Region 1 meeting, April 15-17th, look for the special callsign 9A0IARU to be activated from the Island of Murter (EU-136). Activity on what bands/modes was not mentioned. QSL via Emir, 9A6AA.

9G, GHANA. Sigi, DL7DF, will be active from here on a one man operation between April 18-25th. Activity will be on 160-10 meters CW only with a little SSTV. He will have a 700w amp with a beam and dipole antennas. QSL via DL7DF. Watch the following Web page for updates:
http://www.DL7DF.com

9Q, DEMOCRATIC REPUBLIC OF CONGO. Mike, ZR5MGK, is now active as 9Q6MGK until mid-April. Reports indicate that he will be active on SSB on the WARC bands but mainly on 20/15/10 meters. Over the past week QSNs show he was active on 20 meters between 1800-1900z. Mike is only using 50 watts into a dipole. QSL via ZR5MGK.

AC4TT (Interesting Station For The WPX). According to Charles, K4VUD, the Tibet Radio Club obtained a new callsign of AC4TT in honor of the old Tibet callsign prefix of AC4. The AC4TT callsign appear during this past weekend's CQ WW WPX SSB Contest. PLEASE NOTE that the new AC4TT callsign is a USA callsign. It was obtained in rememberance of the old Tibet AC4 prefix of eons ago, for the Tibet Radio Club of which Charles was the founder.

C21, NAURU (CW Ops Needed!). Bill, VK4FW, informs OPDX that the Oceania Amateur Radio DX Group (ODXG) will be embarking on an operation from here before Christmas. They will predominately be a CW and RTTY operation with some SSB. They are looking for more CW operators for this operation. If interested, send an E-mail to Bill Horner at: vk4fw@westnet.com.au

C6, BAHAMAS. Dave, G4WFQ, will be active as C6AWF from Treasure Cay, Abaco Island (NA-080), April 15-29th. Activity will be on 80-10 meters, including the WARC bands, but mostly CW and RTTY, with some SSB. QSL via G3SWH. Logs will be available online at:
http://www.g4wfq.btinternet.co.uk

DX0, SPRATLY ISLANDS (Update). Eddie, DU1EV, informs OPDX readers that unfortunately, they were not able to get a ride to the Pagasa Island last March 20th (there was no ride available). The next possible trip

is on the 30th. They do hope this trip will materialize and that there will be transportation space for them. He mentioned that 4F1OZ has gone back to the mainland and now there are only two operators awaiting the next trip (4F2KWT and DU1EV).

DXCC NEWS. Bill Moore, NC1L, ARRL DXCC Manager, informs OPDX readers: "Just a reminder that the deadline to be shown in the next DXCC Honor Roll list is March 31, 2005. Submissions must be postmarked March 31, 2005, for your submission to count for this listing. The DXCC Honor Roll list will appear in August 2005 QST. There are 335 entities on the DXCC list and you must be within the numerical top 10 DXCC entities to qualify. The current minimum requirement for Honor Roll is 326 current entities. (A submission is not needed if you already meet this requirement)." ADDED NOTE: Do you have questions regarding DXCC program issues? Visit the DXCC Web site. A new feature has been added called DXCC FAQ's. This link should answer most of your questions on DXCC program issues. Here you will find the program rules, the current and deleted DXCC lists and all of the forms needed to participate. Also, the ARRL DX Bulletins can be found here. If, after reading the information here, you still have questions regarding the DXCC Program, contact the DXCC Desk. The DXCC Web page is available at: http://www.arrl.org/awards/dxcc

EI, IRELAND. Richard, G3CWI, is on holiday here between now and April 8th. While there he intends to activate some of Ireland's unactivated hills for the Summits on the Air (SOTA). Operation will be between 1100-1500z on 40 meters CW around 7030kHz. His primary radio objective is to activate Carrauntoohill, at 1039 metres Ireland's highest mountain.

FORT ACTIVITY. Ramon, PY6KY, will be active as ZW6FSM from Fort Sao Marcos (DFB-BA-05) between April 17-18th for CW and April 20-21st for SSB. QSL via PY6KW, direct or by the Bureau.

FT5W, CROZET ISLAND. Jean Paul, F5BU/FT5WJ, is now QRT. He made his last QSO on March 21st. He mentions that during his spare time he made 2114 QSOs with 1913 different stations. Jean Paul states, "I apologize for not having made more QSOs. I know that Crozet is a rare country, but I've done my best. I would thank all of those who sent me their congrats."

FT5, KERGUELEN. The FT5XO operation is expected to continue until April 1st. No updates have been reported by the operators, so we do not have much to report on. There has been activity on RTTY this past weekend. QSL via VE3XN.

IOTA NEWS.....
AF-NEW. Ivan, OM3CGN, and other 7X operators will activate Sanja Island (Algerian island part of the Mediterranean Sea Coast Centre Group), from May 1-5th. More details later.

EU-NEW. An amateur radio team led by Dave, MM0ALM, assisted by well-known and experienced island activator Seamus "Jim", MM0CWJ, will leave from the Orkney Islands on June 11th, and will travel over 300 miles to activate Rockall Island between June

14-21st. They will rely on a member of the SAS to get them
onto the rock from an inflatable and hope to put up a small
tent on a tiny ledge a few metres square. Operation will be
primarily SSB (all bands, as appropriate). The callsign will
be MS0IRC/p, the Hebridean Island Radio Club callsign. The
DXpedition's QSL manager will be G0HXN. Jim also hopes to
operate 50 MHz, even during the sea voyage, signing MM0CWJ/MM.
This is expected to be a hazardous operation. Read the article,
"The complete history of Rockall by Kieren McCarthy" on the
following Web page at:
http://www.therockalltimes.co.uk/rockall/history.html

EU-010
EU-059. Alan, G0RCI, will lead a small group to St. Kilda (SCOTIA DI23)
to operate as GB0SK from May 2-6th. Operation is expected to
be from a designated camp-site, and they plan to have 2 separate
stations active with a variety of antennas. All QSOs will be
acknowledged via the Bureau. G0RCI will also answer all
appropriate "direct" requests addressed to his "home QTH".
The team may also activate Bernera (IOTA EU-010 and SCOTIA HI15)
as GM0GRC (callsign of the Grantham Radio Club G0GRC in GM) on
the outward and return journeys on May 1st and/or 6th. This is
a long sea-crossing with constant Atlantic swell. Success
will be, as always, very much WX-dependent.

EU-057. Seven German operators will activate Ummanz Island (O-06 for
the German Islands Award) on May 2-8th. They will operate on
all bands CW, SSB, RTTY and PSK31. Operators mentioned are:
DL1APR, DL1APW, DL1NUF, DL5AOJ, DL7NFK, DL9NDS and DM3BJ. QSL
via their home callsigns.

EU-123. Andre, GM3VLB, hopes to activate the Isle of May (SCOTIA CS01
and WLOTA GM-0521) between April 2-9th. Transport to this
uninhabited 2-lighthouse rock/bird sanctuary is by R.I.B.,
so food, water and generator fuel supplies may need to be
rationed. QSL direct only, via home callsign. ADDED NOTE
FROM ANDRE: For confirmation, a simple chronological list-
DATE/UTC - of all previous QSOs is enough - save your cards
- he no longer collects them. If you NEED this one (by the
Bureau), send him an E-mail stating day/time/band...

NA-224. Operators XE1XOX, XE1ZJR, XE1KOF, XE1ZAO, XE1YJL, XE1IH,
XE1VC, XE1XNH and XE1XTK will be active from the lighthouse
on Sacrificios Island as XF2ZEX between March 30th and April
3rd. Activity will be on 160-2 meters on CW/SSB/RTTY/PSK31.
QSL via the bureau or direct to QSL Manager IT9EJW:
Alfio Bonanno, P.O. Box 18, 95028 Valverde (Catania), ITALY.

OC-217. Mediterraneo DX Club DXpeditin on Kangean Island as YE3K has
updated their Web page at: http://www.mdxc.org/ye3k

LIGHTHOUSE ACTIVITY. Look for Ed, WA3WSJ, to activate a couple of light-
houses during this week. As he heads down to Atlanticon (QRP Conference),
in Maryland, he will activate Turkey Point Lighthouse (ARLHS USA-857) on
Thursday, March 31st. He will also activate on April 1st, the Concord
Point Lighthouse (ARLHS USA-186) in Harve de Grace, MD. QSL via his home
callsign, direct preferred, bureau is OK.

NEW DIA SPONSOR. Jens, OZ5MJ, reports that the Danish Island Award, which
was orginally sponsored by the local branch in Odense of Experimenterende
Danske Radioamatuer (OZ3FYN), will now be taken over and sponsored by the
Danish DX Group (DDXG). The new awards will have the same layout as the
originals and are currently being printed. The only difference is that
the DDXG logo will be on the award. The profits from the award will be
used to support DXpeditions. The new Award Manager is OZ1ACB:
Allis Andersen, Kagsaavej 34, DK 2730 Herlev, Denmark. For more details,
please visit the Web page at: http://www.ddxg.dk/awards/island.htm

PIRATED CALLSIGN. Laurent, F8BBL, informed OPDX that his callsign is
being PIRATED. The individual is using it on the PacketCluster to put
out false information and also on the air (CW/SSB/RTTY/SSTV) to QRM
DX operations.

QSL INFO AND NEWS.....
QSL 4L8A via OZ1HPS. Activity was during the CQ WPX SSB Contest this
past weekend.

QSL CN2BC via the bureau to DL7BC. Activity was during the CQ WPX SSB
Contest this past weekend.

QSL FO0/F8UFT (from Clipperton Island) via F5NQL, by the bureau or
direct (w/SAE+Postage - 1 IRC preferred. - USD is 1 for EU and AF
and 2 for elsewhere).

QSL FY5KE via the address on QRZ.com. Operator was F5MZN in this
past weekend's contest.

After many years, the Mediterraneo DX Club (MDXC) operated as IR8M,
and now the MDXC HQ received from Italian Ministery of Communications
the callsign IQ8MD. QSL via IZ8BGY. MDXC Web page is at:
http://www.mdxc.org

The log for the recent KH8SI Swains Island DXpedition is now available
online at: http://www.swains-island.org/
You'll find the Log Search link near the bottom. There were 9460
contacts made.

The TO7C DXpedition log is now online at:_http://to7c.free.fr/logsuk.php
There are a lot pictures from the crew and of the Salut Islands.

QSL YI9VCQ via N3ST. Activity was during the CQ WPX SSB Contest this
past weekend. Operator was Korey from Al Taji, Iraq.

SPECIAL BIRTHDAY ACTIVITY. On April 25thm Tito, LU7EE, will celebrate his
60th birthday. To celebrate his birthday and his 42 years on amateur radio,
Tito has set a goal to be active for 60 hours, one for each year of his

life, using the special callsign L73E. His activity on the air will begin at 0000z, April 23rd and end at 1200z, April 25th. Suggested frequencies will be:
CW - 1815, 3515, 7015, 10110.5, 14015, 18085, 21015, 24915 and 28015 KHz
SSB - 3550, 7050, 14150 and 28910 KHz.
He will also QRV on local 144 MHz band repeaters. QSL via GACW, P.O.Box 9, Wilde, B1875ZAA, Argentina. For skeds, info, etc.. send E-mail to: ay7ee2002@yahoo.com.ar

SPECIAL EVENT. During the Rotary's International Centennial Convention this June, the Rotarians of Amateur Radio (ROAR) will operate a special event station, W9R, beginning June 18th and concluding June 22nd. This station will be based within the Lakefront parking area of Chicago's Soldier Field immediately adjacent to the McCormick Convention Center. The equipment that will be used is being loaned to ROAR by the Chicago Chapter of the American Red Cross. The station equipment is part of the Emergency Communications Response Vehicle which will also be on display. Suggested frequencies are: 3955, 7280, 14293, 21310 and 28560 kHz (as band conditions dictate). Visit the following Web site for additional information and operating schedule: http://www.ifroar.org
ADDED NOTE: Rotary International is a worldwide organization of business and professional persons. They are united to provide humanitarian service and encourage high ethical standards in all vocations which helps build goodwill and peace in the world. Rotary International has 31,936 clubs in 159 countries.

SPECIAL EVENT. To commemorate the 60th anniversary of the "Battle of Okinawa" in WWII, the Anaheim Police ARC (W6APD) will operate special event station K6O between 1800-0200z each day from April 1-15th (2005) Suggested frequencies are: 7250, 14253, 18150, 21350, 24950 and 28450 kHz. QSL via KM6HB: Mark McMullin, P.O. Box 27271, Santa Ana, CA 92799 (send a SASE for a picture QSL card, no certificate). For more details, contact Mark McMullin via E-mail at: km6hb@arrl.net
Mark states, "This is my 3rd and final World War 2 special event for the year. It has been a privilege to 'honor and remember those that have served'. Also, cards for the K6I 60th anniversary of the Battle of Iwo Jima special event are in and cards are being processed. Copies of the card can be viewed at: http://home.pacbell.net/km6hb/.NET.doc

SPECIAL EVENT. Look for special event station CF3VEDAY to be active from May 5-11th, to celebrate the official opening of the new Canadian War Museum in Ottawa, the national capital of Canada, on May 8th, and the 60th anniversary of Victory in Europe Day (VE Day) which, on May 8, 1945, officially ended the Second World War in Europe. Please visit the CF3VEDAY Web site for station information and QSL info. Web page will also have times, frequencies and names of operators. The CF3VEDAY Web site is: http://www.qsl.net/vc3vday/

VE3, CANADA. Bela, HA8FW, is in Toronto until June 10th. He will be active as VE3/HA8FW. QSL via HA QSL Bureau.

VO2, CANADA (Zone 2). Steve, VE2TKH, is now in Labrador City and will operate the club station as VO2ZT until March 30th. He states that this will be a mini DXpedition in duration but with nice equipment. See his Web page for details at: http://www.qsl.net/ve2tkh

WINDMILL ACTIVITIES (WOTA) AND AWARD. Martin, G3VOF, informs OPDX readers that this year the Havering and District Amateur Radio Club (G4HRC) will be taking part in the National Mills On-The-Air weekend, May 7-8th. This event is for the Society for the Protection of Ancient Buildings (mills section). The HDAR Club will be activating no less than four mills on-the-air. The windmill locations, and the callsigns of the windmills, and operators are as follows:

GB2UW - Upminster, Essex. This mill will be run by operators M0MAC, G3JSR, G3SVK, G0PIA, M3DOQ, M3DOV and help from SWL Chris Lester. The suggested frequencies are:
CW - 3510, 7010, 14010, 18075, 21010 and 28010 kHz
SSB - 3735, 7055, 14155, 18120, 21255, 28455 and 50160 kHz
FM - 145.400 and 433.400 MHz

GB0MW - Mountnessing, Essex. This mill will be run by operators M0JKA, G4UNS and G0BOF. The suggested frequencies are:
CW - 3515, 7015, 14015, 18080, 21015 and 28015 kHz
SSB - 3745, 7065, 14165, 18130, 21265, 28465 and 50165 kHz
FM - 145.425 and 433.425 MHz

GB2ARW - Aythorpe, Roding, Essex. This mill will be run by operators G3TPJ and M1MOG. The suggested frequencies are:
CW - 3520, 7020, 14020, 18085, 21020 and 28020 kHz
SSB - 3755, 7075, 14175, 18140, 21275, 28475 and 50170 kHz
FM - 145.450 and 433.450 MHz

GB5SW - Stock, Essex, this mill will be run by operators G3VOF, G3RJI and M0BOB. The suggested frequencies are:
CW - 3525, 7025, 14025, 18090, 21025 and 28025 kHz
SSB - 3765, 7085, 14185, 18150, 21285, 28485 and 50175 kHz
FM - 145.475 and 433.475 MHz

The Havering and District Amateur Radio Club will be running its own award program for working the windmills run by the club. This will be the Essex Windmill Award. This award is offered not only in the UK, but to EU, and the rest of the world. The requirements for this award in the UK only is as follows: Work any two of the Windmills (GB2ARW, GB2UW, GB5SW or GB0MW) on any band any mode. For EU and the rest of the world, just one Windmill will qualify for the award. In future years there will be silver, and gold endorsements (once the basic award has been obtained) for achieving a more difficult operating goal. Details will be given before the next year's Windmill event. The Awards Manager for this Certificate is Fred, G3SVK (32, Elgin Ave, Harold Park, Romford, Essex, RM3 0YT). The cost of the award will be UK =A33.00 inc p&p..... Check logs is all that is nessessary. SWLs can send also send for the award on a heard basis. EU is 14 IRCs or 5 EURO. Rest of the world, 16 IRCs or 8 USDs.

XE, MEXICO. Scott, WA6LIE, plans on crusing MM/2 from Long Beach to Puerto Vallarita, Mazatland and Cabo San Lucas between April 17-24th. He will use his FT-857D and plans on some Satellite operations (no digital) along with 6 and 20 meters activity too. Scott hopes to activate a few more grid square.

ZD8, ASCENSION ISLAND. Operators Carlos/EA1DGZ, Roberto/EA1DBC, Oscar/EC1KW and Fernando/EA1CNF will be active as ZD8C in the CQ WW DX SSB Contest (October 29-30th) as a Multi/Multi entry. Antennas to be used are: a 6 element beam for 20/15/10m, a 3 element beam for 20/15/10m, Inverted "V" for 40/80m and a G5RV for 40/80m. QSL via the bureau or direct to EA1URS.

ZL6, NEW ZEALAND. The Quartz Hill Use Group station will be active as ZL6QH in the CQ WW WPX CW Contest (May 28-29th) as a Multi/Multi entry. QSL via ZL2AOH. Operators mentioned are: Brain/ZL1AZE, Tony/ZL2AGY, Wilbert/ZL2BSJ and Chris/ZL1CT. Visit the Quartz Hill's Web page at: http://www.zl6qh.com

ZR, SOUTH AFRICA. Dennis, ZS4BS, SARL HF Manager, stated that with the change to the South African Radio Regulations in February 2005, all the restricted licencess now have access to the HF bands. So during the CQ WW WPX Contest this past weekend, there were plently of ZR callsigns available.

The only simplex that I hang out on is 144.2 USB.
Heck, all the repeaters around here use a tone, and I don't have a tone
capable radio :)

Yes, Jock, I guess I am a fool for thinking I could help people like you. OK, time to turn off the radios, take down the antennas, turn off the computers, hand in the licence and sit down and vegetate in front of the telly for the rest of me natural.

Kate

Of course it's harder on HF, but given I don't yet own any HF gear, except the 27MHz CB, I can only make contacts using 2/70cm amateur band. Without IRLP I would have only made contacts woth VK3, VK7 and maybe VK5, with IRLP I've worked VE, ZL, K, JA, YI, and I look forward to working them on HF in the future.

Of course, making a DX Contact on CB 35 LSB would be harder than making an IRLP contact, but as IRLP is the only method I have of accessing hams outside VK on the air, then I will use it.

Or I could try making contacts with hams via HF, using CB..wonder how many hams I'll find there?

Actually I'm kinda surprised that you didn't get anything in OKC. I always monitor .52 when on the road, and practically every time I pass through OKC there are at least a couple of hams on the air, chatting away. But I find the same thing on the highway, even the hams that have a ham tag don't seem to monitor .52. Coming back from HamCom in Dallas a couple of years ago I had a ham call me on .52, he said mine was the first response he'd gotten.

However, I find the same thing on the local repeaters when I pass through, although I maintain up-to-date programming in my radio and I can hear the repeaters unkey, I don't get any answers to my calls. So it's not just simplex.

Well Walt, you idiot, you OBVIOUSLY have NO idea of the efforts Ashley is putting into getting CBers away from CB and into Amateur Radio in the Melbourne Oz. area.

Keep up the good work Ashley your efforts ARE appreciated - my nephew's been in my ear trying to borrow a receiver for the broadcast on UHF. I _hope_ you put it out on 27MHz because he's got away with my old but good FRG-100...:-)

It is a misguided effort. Anyone with a natural interest in technical
things like amateur radio will discover amateur radio for themselves.

The best place for CBers are the CB bands, and the best place for
radio amateurs are the Amateur Radio bands. Whether it be in Oz or UK.

It's funny, I started out 27 years ago on CB, never having heard of amateur radio and never having any interest or knowledge about radio whatsoever. Then through CB I learned a bit more about radio, started building antenna's and got bitten by the radio bug! So I ventured out and looked at amateur radio..

Because of CB I ended up going to TAFE college and completing a 3 year electronics trade course, and got my VK Limited licence (just never got interested in CW). I also sat my ROCP (marine) certificate and ended up a Communications Officer and Subject Matter Expert for a State Emergency Service Division in NSW.

If I had never started on CB way back then, I probably wouldn't have the interest in radio and electronics I have today, nor would I be a licensed VK amateur. I know of many other VK amateurs that started out on CB and then progressed to amateur radio as well, most of which owe their continued interest in radio to the spark first triggered by CB.

So, your narrow minded, mis-guided, and childish opinion seems to have been proven wrong, once again. May I suggest that if you are unable to tolerate today's CBers becoming tomorrows Amateurs then it is high time that you handed in your licence (if you have one) and did both hobbies a big favour...

I disagree Chris. UHF CB in this country is a totally different animal to anything that you may have seen in the UK. Every farm, Rural Fire Service, National Parks, State Forest, Emergency Service, Vet etc in every country town uses UHF CB as it is a practical and affordable system. I've installed dozens of these units over the years in helicopters for mustering in the outback.

They use it in their day to day lives and businesses and will NEVER be heard saying 10-4 or using any lingo. The exposure to this system for the general public is automatic and they are highly aware of it. Not so Amateur Radio which just has to be one of the biggest secrets around. CB'ers operate AM, FM, SSB, packet, telemetry and even SSTV legally in this country. They are only going to "discover" Amateur Radio IF someone goes out there and introduces them to the service and enlightens them to the appeal of Ham Radio.

Standing on a box and shouting "CB'ers piss off" is about the most self destructive behavour I can imagine.

Brad.

Thank you. You have vindicated exactly what I said. For your benefit,
I will repeat it again:

"Anyone with a natural interest in technical
things like amateur radio will discover amateur radio for
themselves."

... as it seems you did.

Incidentally, I have said nothing in this thread which could be
construed as derogatory about CBers. If you can find any such remarks
by me about CBers, then please post them here for all to see. I have a
CB radio, and thus, by definition, I am also a CBer, using that
service for a specific purpose in connection with offroad motorsport
marshalling.

I have noticed the same thing about repeaters when traveling. On one occasion, I was persistent and a local came back and sed "Lots of folks here sonny, we just don't have the time to entertain travel folks, Mostly we talk about corn prices and hog disease."

And I am aware of some Mom and Pop repeaters -- set up for them and they never answer others.

Message-ID: <d29g75$ki3$0@pita.alt.net>
Source record: 52733
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy

My friend Lennie Schwartz owns a radio store and was stuck with close
to a hundred 52 simplex radios he could not sell. As his Rabbi & chief
Sanhedrin, Lennie asked me for advice. Now Lennie has three gorgeous
college-age daughters, so I had Lennie get them some cute little outfits,
tight tops and tight short-shorts, similar to what the Hooters girls wear.
We had the following message boldly printed on the butt end of the shorts
and across the bust area of the tops:

"I MONITOR 52 SIMPLEX"

In less that 24 hours, Lennie sold all his 52 simplex radios at five times
the
original asking price and had to order more. Every male ham of any
age swamped Lennie's radio store and demanded a 52 simplex radio.

NOTE FOR HANS: It is not the message that is so important, as how you
communicate the message.

Probably when he found out he couldn't muster what it took to pass an exam!
I've seen quite a few of them. The "hand it to me" types. Afraid to put
forth a little effort in life. I knew a lady once who bombed a test like 3
times, blamed everyone but herself. It wasn't our fault she didn't study or
was too slow to be able to comprehend the material.

It is in International Morse. It says:

N4LOX ? W6LLO ? ZXZ

Perhaps they forgot to disable thier K0HB filters?

Had you been in SE Tennessee and I had seen you, you would have
gotten a call. But on the same note, there's been quite a few
occassions where I've passed/been passed by a vehicle with Amateur tags
(or some other "callsign" display), and had my hails go unanswered.

On the other hand, I've gotten several calls, mostly from
18-wheeler Amateurs. Lots of those big rigs are Hams...guess they got
tired of the 10-4 good buddy crowd.

Glad you're home safe, Hans.

73

Steve, K4YZ

I remember whenever you passed a ham or saw his tag that if you sent four beeps spaced and two more beeps on your horn you would get a friendly response.

I don't bother anymore.

Umm, not to start another debate, but Packet and SSTV is still illegal on CB
in Aus (SSTV is still illegal for VK Novice grades too), although there are
those trying to change that due to the growing interest in those modes
amongst many CBers. Te;emetry is fairly limited too, restricted to a duty
cycle of 3 seconds every 60 minutes....

Yes, but you also said:

>The best place for CBers are the CB bands, and the best place for
>radio amateurs are the Amateur Radio bands. Whether it be in Oz or UK.

To which I pointed out that I started as a CBer, and it was CB that sparked
my technical interest and, therefore, my interest in Amateur Radio. By your
theory though, as I started as a CBer that's where I should've stayed...

>The best place for CBers are the CB bands,

>

Then why make the comment you did? It seems a rather natural progression for tomorrows Amateurs to come from todays CBers. It is far better that we educate them in the proper way to operate, rather than abuse them or tell them they don't belong then whinge when they operate contrary to the customs that we never bothered to teach them!

Date: 2005-03-29 00:48:07 UTC
From: Ashley VK3HAG <vk3hag@nerg.asn.au>
Message-ID: <bB12e.16038$C7.8947@news-server.bigpond.net.au>
Source record: 52640
Cross-posted to: aus.radio.amateur.misc,rec.radio.amateur.misc,uk.radio.amateur

I'll put down why I have chosen to educate my Melbourne CB friends about Amateur Radio and rebroadcast WIA & other Amateur Radio News

1. I became aware of ham radio through articles in CB Action, Amateur Radio Action, Radio & Communications. This magazine was bought by VK scanner and CB enthusiasts and included advertising and info about ham radio. This is how I learnt about ham radio. If I started over today, I too wouldn't discover ham radio as those commercial magazines are no longer with us.

2. It took months of searching to find any Aussie radio magazine, and I discovered AR magazine by accident. (I had been looking intensely for months for an ESR replacement, when all I found was USA or UK magazines at McGills.). If it wasn't for that accidental discovery I still wouldn't be a ham. Of all my long-time cb friends we all used to buy R & C or CB Action. Today, although we are still all on the air, only I buy Amateur Radio (WIA). I have written to AR twice with regards to why Amateur Radio is a dying hobby and recieved many positive responses. The outcome being that to allow CB'ers to get some idea of what Ham radio is, (which they used to get through CB Action) I have, with WIA permission, begun to re-transmit the WIA News on UHF CB 18 in Melbourne, Sundays@11am & 8pm. (HF 18 SSB coming soon) so those listening can find out where to find information for themselves. (Along with ARRL News, Newsline)

3. What I am doing is allowing others to 'discover' ham radio by listening to the WIA Broadcast and explaining to CB'ers just what is ham radio. That way, if they are interested any further, they'll write down the links etc given out on the news and look them up, just like I did. But without that initial 'contact' point, whether a ham magazine, a ham radio news bulletin etc, just how are CB'ers going to know ham radio exists?

4. Others are right in stating, that those that want to take the hobby further than cb will discover ham radio. I ask then how and where will they discover ham radio if they don't use the net, are cb'ers (who don't know any hams) and never buy a copy of AR magazine. (Which is hard enough to find at best of times) CB'ers don't know that these even exist, so where I discovered ham radio through CB Action, a potential new ham doesn't 'discover' it at all, and misses out on becoming a ham.

5. It's my opinion that there are plenty of CB'ers who would become amateur radio operators if they knew ham radio existed, what it was and how to go about getting an Amateur ticket. This information, or where to find it, is not available to the CB community. By providing WIA News I am providing an 'entry point' for CB'ers into the ham community, something that CB Action used to do.

6. The majority of the CB community is unaware (apart from those in the aus.radio newsgroups) of the Foundation Licence, which will make Amateur Radio more accessible to them.

7. When I was at school all we had was CB radio to chat with mates after school, there were no internet chat rooms or mobile phones back then. Ie, less kids today using CB than there was a decade ago.

8. I am referring here to good, educated, operators who've been on CB for many years. Only two other people I know out of a group of 12, who all have operated CB nightly since 1988 know what Amateur Radio is.

9. For the Foundation Licence to work and attract cb'ers and others to the hobby the first step would be to let these people know that it exists. How many cb'ers buy AR magazine and will discover that it exists. Almost none is my guess. For CB'ers to discover the Foundation Licence and take the test they first need to know about the WIA Website and AR Magazine, neither of which many (or any) cb'ers read. How else can cb'ers be kept informed, the CB. Those that want to hear can listen in, those that aren't interested, change channels. For the Foundation Licence to work you either need to get AR magazine bought by many more cb'ers, get a new commercial radio mag going or transmit to the potential hams, this being the easiest, and most likely to work method.

I mean seriously how can the new licence be a success, and ham radio grow, without many cb'ers (where the majority of future 'radio nuts' will come) knowing what ham radio is or that exists, let alone that a new Foundation Licence has been introduced.

Not one of my CB friends knows what ham radio is, that it exists or that they have the right to operate ham radio on the passing of some tests. You'd be amazed how many cb'ers don't know this, what we call 'basic information'

There are a generation of UHF CB'ers, mostly kids & teens using 1/2w h/ts from DSE. Could these kids (like we were a decade ago) be the next generation of potential hams? That's why I'll continue to promote AR on the CBRS, so those that haven't discovered ham radio, have the same (if not better) chance to discover it as I did. There wouldn't be many cb'ers around whose jaws (like me) don't (didn't) drop in awe at ham radio operation. There are plenty of cb'ers out there who would become hams if they knew what it was and how and where to obtain a licence.

Please read my articles in AR's "Over To You" (Oct 2002) and AR "Over To You" (March 2005). Or email me for a pdf copy.

Summary:
There are not the resources around that were around ten years ago that advertised amateur radio to it's main potential market, the CB community. What I am doing, is not forcing people into ham radio, but helping those CB'ers that have the 'radio bug' discover amateur radio by providing them with information about it and the WIA News Bulletin. Without magazines such as CB Action to bridge the gap between the CB and Amateur radio community and take it to Australia, then it must be taken to the CB community so they can be made aware of it and become a ham should they choose to do so.

Also note that many cb'ers don't have computers and can't access the web, about the only repository of ham radio information left. (Or library used to have a few radio books, but are all gone today.....ARRL Handbook for the reference section I say :)

The above is based on my actual experience of being on CB in the late 80's, scanning through the 90's (haven't scanned much since having ham ticket), to today, moving into ham in January 2005 and what I encountered along the way to becoming a VK.

The best place for potential hams is CB. (In months leading up to ham exam, I changed from writing "FM", "AM" or "LSB" in the Mode section of my log book (yes, I have logs going back to 1st transmission in 1988) to "16K0F3E" for UHF CB FM, 6K0J3E for sideband and "A3E" for AM shortwave)

All I am doing is providing today's CB community with the same kind of information that used to be available to me as a young cb'er via printed media, which put me on the path to amateur radio. Should today's CB'ers not be told about us for some reason?

Isn't helping others part of our hobby? (The Amateur is Patriotic, Friendly, Loyal, Progressive, Balanced & Considerate) All I am doing is offering a news re-broadcast and amateur radio information-after the news-to cb'ers on air. (I had no 'elmering' as I became a ham, I flew solo and it was very difficult, it would have been nice to have a 'ham friend' to help me on my way, but I didn't, so I went about myself.), and to offer assistance to those that ask about ham radio. If they ask a question like "What is ham radio" I point them to the WIA website, or if they don't have the web, to give them info another way. And besides, I enjoy being able to help others out. (The potential to let cb'ers know what ham radio is went with the demise of CBA, ARA, R & C, ESR, where everyone of my generation discovered it.)

The ARRL promote Amateur on CB bands, FRS bands and even commercial radio and television.

Note also, that from Wednesday, March 30, 2005, check-ins for the WIA broadcast on UHF 18 will be taken after the news, as will questions and comments.

Hello ashley

the AR is available from any news agent
all potential amatuers have to do is to ask
the news agent to get for you, this is how
i get my coppy every month on regular order

Alf VK5ZKL

1670. Re: IRLP Contest Update

Yep, but many cb'ers stopped looking for radio mags when R & C died, and I didn't know there was a magazine for hams until I discovered it, by accident whilst buying smokes, from a newsagent.

If I hadn't have bought those smokes in Oct 2002 and found AR magazine I wouldn't be VK3HAG today.

Remembering that in cb's and radio's heyday, AR magazine was subscription only, and not available in newsagents until well after the demise of R &C, when many cb'ers had stopped going to newsagents for their R & C magazine.

Now, as a WIA member, mine arrives nicely wrapped every month.

VK3HAG.

That doesn't help any if you don't know it exists or that you can get it at a newsagent! I think Ashley's point is, many years ago CB Action was very popular amongst CBers and contained just enough Amateur information to let the newcomer know that there was more than just CB. Then, if they were interested, they could follow up through one of the contacts mentioned in CB Action, or even by contacting CBA themselves. Amateur radio was also widely discussed amongst CBers on air or at CB club meetings, so there was another way for newcomers to become aware of ham radio and find out more info.

But now, there is no such magazine popular amongst CBers so, unless you have prior knowledge of AR or are told about it, chances are you wouldn't even know it existed and hence, would never read the mag.... And many of the newcomers have no idea of Amateur radio (heck, most don't even know that CB is governed by regulations!), so the on air discussions are far fewer, as are the old CB clubs and gatherings of the 80's!

To inspire people to become amateurs we must first of all tell people about amateur radio, and where they can get more info even if that is just the AR magazine. We have to tell them about the benefits and why it is worth their time and money studying and getting a licence, when they can play on CB for free! And finally, we have to lose the arrogant attitude shown here by *some* overseas operators and encourage CBers (the 'sensible' ones) to learn more about ham radio and get their licence.. If that can be achieved by broadcasting WIA news over CB freq's, then I think it is a great idea!

Only if there's no radio link anywhere. Otherwise, by your own
logic, any amateur using a microphone connected to a radio (ie
a non-RF link) isn't really engaged in Amateur Radio. An absurd
argument to prop up absurd logic.

Joe,
I bought a radio from Lentini and they were great in terms of delivery and phone support. They have been around for at least 13 years and I think of them as one of the old reliable ham radio stores.

Give their 800 number a call - maybe they are waiting on the manufacturer to ship your item so they can send it to you.

Good Luck
Ed

does this also mean we cannot place the receiver
for 10M some distance away(1Km) to stop desensitisng
the receiver as the of set is narrow, the receiver and
transmitter are connected by landline ?????????.

tonight on the 146.640 repeater we had a conversation between KD7IVR dan, and bruno KG4SBW, IVR was commenting on how he had recently moved out from arizona. jim WA8JSC jumped in to say hi. wa4gch talked to jim too. KI4IAC called for pete KA1WBE
bruno and jim got into it big time tonight, yelling at each other, i didnt hear the beginnig of jim and brunos fight, but it appeared jim was defending himself on accusations. finally WA4GCH broke it up.
also heard N4HPN called for jim too.

we had a very entertaining saturday evening here on the 64 repeater, sandy KD4SBX (bruno's girlfriend) had been drinking noticabally and went off on jim WA8JSC about how she was a blonde and proud of it, and that jim was wrong for saying all blondes are trouble. jims comment was part of a conversation about HIS dating expierences, sandy just took it personal, and she went on and on and on and on about it for about half an hour, she used numerous ammounts of profanity, $HIT,A$$ WHOLE, etc. then DEL (forget his call) got in there using profanity against jim too, i think dell sounded like he was drinking too. sandy then went on a rant about how she used to be on 11 meters and that she got her licence to get away from the CD enviroment. but she was turning the repeater into CB.

Dans' main problem was that he did not fully (or even partly) understand the
operation of IRLP and the security systems designed to prevent access. I
don't think he understood Echolink either and had the two confused as being
one and the same animal.

Walt was just plain ignorant.

Brad.

A good rule of thumb (as I have seen the same thing happen here in Az):
alchohol and equipment (of any kind) do not mix.

>
"... very Canadian way of running a business." Uh-huh. Ever try to research replacement parts for a laptop or mobile telephone? Ever wonder why nobody seems to use the same battery in their devices, even from the same manufacturer? Curious why all the major car manufacturers seem to change consumables like headlights and engine-control black-boxes on the same model from year-to-year?

I hate to break it to you, but no company has an obligation to share any design details with you when not compelled by local law. No company is compelled to supply you with discount replacement parts out of their own manufacturing stock.

They even tell you this in the warranty (see the FAQ at <http://www.caframo.com/ecofanfaq.htm#5>):

"... Simply put -If you overheat your fan or drop your fan your warranty will be voided."

Vendor lock-in and built-in obsolescence are not limited to any one country. It is a hallmark of modern transnational companies which don't care at all what country you happen to be in. The fact the little guys are emulating them should be no surprise.

I don't like this any more than you do, and sympathise with you to a point. However, your problem has hardly anything to do with some perceived "Canadian Way." The product has a warranty, and you are free to not buy it. The company does not even appear to have a patent on the tech in the device, so some enterprising American or Chinese company should be able to cheat you as easily.

Ain't capitalism grand?

FWIW I'm a new ham and called on 146.52 frequently when out of
repeater range on a recent trip from Edmonton to Vancouver and
Seattle. I chatted with one ham in the Jasper National Park on the
Yellowhead highway and we met in person at the Mount Robson viewpoint.

I also chatted with another ham at a small town, Golden, BC, which
didn't have any repeater.

I almost would've like to have a tape recorder spitting out my call
sign every 10 minutes. <smile>

Folks...sex, or the suggestion of it, sells everything in this
country...Even those who argue AGAINST "sex" are using it to thier
advantage by the mere suggestion of it. (Before "NYPD Blue" ever hit
the airwaves, Jerry Falwell and his ilk were protesting it. The
producers said the best advertisement they could get was Jerry railing
against it!)

I think the idea was cute.

Also, we have people fussing about the "greying, all white male" demographic of Amateur Radio in the United States...so maybe this gave it a kick in the rear...? We're not talking about child pornography here...Young ADULT women, the same like of which adorn the sidelines of any NFL game on Monday Nights, showing some booty and cleavage to get YOU to look twice. It works. Deal with it.

Of course there will always be the "we could do it without that" contingent...But that contingent hasn't done a whole lot to promote the program either. So...given your choice between a poster with Fred Maia or Gordon West promoting Amateur Radio, or a diverse selection of scantilly clad cheerleaders holding HT's I am sure none of whom are licensed to operate...which do you think would garner more "check-outs"...?!?!

Source record: 52671

Has anyone tried to use the conduction cooled 8560 tube (common in older Motorola Micor,
etc VHF repeaters as a replacement for the conduction cooled Eimac 8873 tube?

Both have similar specs and I'd like to keep the conduction cooled feature of my SB-230.

tnx,

Doug/WA1TUT

Hamshack Hack is a 're-master' of the KNOPPIX Linux distribution made especially for Amateur Radio Operators (Hams) who have no prior experience with Linux. It provides a complete Operating System (OS), software for the hobby, web, and word tasks. All contained in an .iso file ready to burn to CD.

FREE downloads and instructions are available at:

http://hamshack-hack.sourceforge.net/

Download the .iso image file and burn it to a CD and it becomes a 'Live CD' system.

Put the CD in the drive and re-boot your machine and you'll boot up with a fully functional Linux system. Your usual operating system will remain on your hard drive and all its files will be accessable but untouched until you say so, Linux will be running the show. When you quit and reboot, the Linux system will 'vaporize' and you'll be back with your regular system from your hard drive.

The CD contains a wide and varied selection of Ham software ... everything from PSK, RTTY, Packet, MFSK, and SSTV, to programs for weak signal, aurora, and moon bounce. There are programs for the International Beacon Project and APRS. XLog and the XDx dx-cluster terminal. Even a Smith Chart computer and EchoLink.

In addition to the Ham software, there are web browsers, several text editors, AbiWord for word processing, the GNUmeric spreadsheet, and gLables for making QSL card or mailing lables.

If you've been wondering about all the Linux 'chatter' lately, here's a chance to find out whats happening with that 'other OS'. And, no need to install it ... just re-boot your machine.

LINUX! Not just for Guru's anymore!

Harv, AI9NL

Why does the world, and thouands of hams worldwide, need to know about this dispute about a repeater in Tampa Florida??

This junk gets posted frequently, yet continues when it is clear that it is not proper, or needed for worldwide distribution.

Don't you have a local club through whom you can communicate these problems ?? Do you think that someone in India or California either cares about it, or if they did care, could DO anything about it??'

Please grow up !!!

Oh, well. I have been absent from this NG for 20 months and return to find
the same children still calling each other names over the same nonsense.
Time to drag the cooler back into the stands and wait a while longer.

It's known as "arrested development" -- some folks just never get out of the
6th grade.

My frind is going to the Czech Republic and wants to know if he can
take his ham radio, HF, VHF, or UHF.
He has a general US ham licence, N7TSK.
TIA
Clark KC7FGB

Self-declared 'pope' dies
23/03/2005 11:37 - (SA)

Madrid - A self-proclaimed Spanish "pope" who claimed the Vatican was
controlled by the devil, has died at the headquarters of his "Church" in
southern Spain, city authorities said on Tuesday.

Clemente Dominguez Gomez, otherwise known as Gregorio XVII, considered
current Pope John Paul II to be the "anti-pope" having declared himself
head
of the Roman Catholic Church on the death of the latter's predecessor Paul
VI
in 1978.

The 58-year-old said he had received a message from the Virgin Mary in 1969
telling him to prepare to proclaim himself Catholic Church chief under the
title of Gregory XVII of the "Carmelite Order of the Holy Face."

Influenced by integrist French priest Marcel Lefebvre, he became ordained
priest and then became a bishop in 1976, being ordained by Vietnamese
bishop
Pedro Martin Ngo-Din Thuc.

Gomez had a high-walled basilica built at Palmar de Troya with his order,
estimated to include several hundred worshippers, being recognised as a
religious association by Spanish authorities in 1988.

He liberally canonised those he judged suitable, including the late Spanish
military dictator General Francisco Franco as well as Christopher Colombus.

In addition, Gomez 'excommunicated' the Spanish royal family.

Targeting vigorous reform of Catholic doctrines Gomez accused the Vatican
of
having been infiltrated by Marxists and freemasons.

****

I dunno about the rest of you hyenae, but IMHFO, any ordinary lunatic who dubs himself Pope, declares the guy in the funny hat in Rome to be the "anti-Pope," makes General Franco into a saint, yet still manages to garner himself "several hundred worshippers" deserves *some* place of honor.

Oh, and "Order of the Holy Face" is funny. I'm not quite sure why, but it is.

-- Daze

"May I kiss your ring, Holy Father?"
"As long as you employ your tongue well, my child."

Hearing no further whining from Roger about *random retesting*, based on
the above letters, we now know Wogie was retested because of his repeated
deliberate malicious jamming of ham radio operators on 20 meters.
Case closed.

The Ohio/Penn DX PacketCluster
DX Bulletin No. 704
BID: $OPDX.704
April 4, 2005
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, WB2RAJ, NG3K, W3UR & The Daily DX, K4VUD, N4AA & QRZ DX, NI6T, K7LAY, K8YSE, DL1EK & The DX News Letter, EA5RM, F5CWU & La Gazette du DX, F5NOD, F5NQL & UFT, F8BBL, I1JQJ/IK1ADH & 425 DX News, JI6KVR & JA-IOTA Islands News, LZ1OT, OZ1LQH, OZ5AAH, PY5EG, SP2FAP, UA4CC, VA3RJ & ICPO and YL2MU for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 27th/March, through Sunday, 3rd/April there were 228 countries active. Countries available: 1S, 3A, 3B8, 3B9, 3D2, 3V, 3W, 4J, 4L, 4S, 4X, 5B, 5H, 5N, 5R, 5U, 5V, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9U, 9V, 9Y, A2, A3, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E4, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FP, FR, FT5X, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J6, J7, JA, JD/o, JT, JW, JY, K, KG4, KH1, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S0, S2, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T5, T7, T8, T9, TA, TF, TG, TI, TK, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9L, VK9N, VP2E, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZK1/s, ZK3, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4U1U, UNITED NATIONS HQ (Correction to OPDX.703). Mustapha, DL1BDF, apologizes for a QSL mistake in his last communication. QSL their 4U1UN operation "ONLY" via HB9BOU (not DL1BDF as mentioned last week). Their activity will take place between May 12-15th. As the German team travels

and operates mobile from NY to Dayton, QSL only QSOs with W#/DK0FI/m through the DARC Bureau.

60 METERS. Start looking for club stations in Norway to be active on 60 meters as of 2200z, March 31st until December 31st, 2007.

A5, BHUTAN. Stig, 9N7JO (LA7JO and HS0ZGD), will be active as A52JO from April 4-12th. Activity will be SSB and CW on all bands outside his working hours. QSL via 9N7JO (Thailand address on QRZ.com): Stig Lindblom, Regional Telecoms Officer, UNICEF Regional Office for South Asia (ROSA), PO Box 5815, Lekhnath Marg, Kathmandu, Nepal.

ANTARCTICA NEWS.....
NEW WAP. Following the activity of FT5XO, the "Worldwide Antarctic Program" found it necessary to give "Port Jeanne d'ARC" station a new WAP reference number. It is WAP FRA-05.

Mirny Base (WAP RUS-07). Mike, RW1AI, is now the radio operator of Mirny Base as R1ANT for this season instead of his previous plans to operate from Progress Base (WAP RUS-11) as R1ANP. However, it is very likely that Mike will participate in the supply convoy from Mirny to Vostok Base in October 2005 to January 2006 via Pionierskaya, Vostok I and Komsomolskaya Bases. Let's keep our fingers crossed that he will be able to activate these extremely rare Antarctic bases. QSL via RW1AI.

WAP SOFTWARE 1.0. The WAP Staff is pleased to announce the WAP Software (ver 1.0) which is the best solution to manage your Antarctic Bases (WADA/WACA). The program was made by Carlo, IK6CAC, one of the best Ham Programers. Please try it and get your free download now at: http://www.ddxc.net/wap --or-- http://www.ddxc.net

The WAP Antarctic Bulletin written by Max/IK1GPG and Gianni/I1HYW is now available through the WAP Web site at: http://www.ddxc.net/wap
Just click on the bulletin link.

CP, BOLIVIA. Rene, DF9GR, is now active as CP6/DF9GR until April 15th. Activity will be on 80-10 meters. However, over the past weekend he was on 30/20/17/15 meters mainly on CW, with some activity on RTTY and PSK. QSL via DF9GR, by the Bureau is OK.

CY0, SABLE ISLAND. A DXpedition is tentatively scheduled to last 7 days in July 2005 (July 27th-August 3rd). Operators Joe/W8GEX, Wayne/K8LEE and Phil/W9IXX will be active on all bands 160-6 meters, CW, SSB PSK and RTTY. They plan to be active in the IOTA Contest. Callsign will be CY0AA and the QSL Manager is K8LEE. They will try to have online logs during the operation. Visit their Web page at: http://www.wb8xx/sable
The team is still look for funding.

DAYTON DX DINNER BANQUET (Reminder!). Jay, K4ZLE, reminds everyone the Dayton HamVention® is fast approaching. If you have not ordered your ticket for the 20th annual SWODXA DX Dinner to be held in conjunction with the HamVention®, you need to do so very soon. Tickets are on a first come, first served basis and seating is limited. The dinner will be Friday

evening, May 20th, at the Crowne Plaza Hotel, located in Dayton City Center. This is the same venue as in years past. Tickets are 32.00 USD per meal, payable in U.S. funds to SWODXA, and may be ordered from Jay Slough, K4ZLE, at his CBA. SASE would be appreciated. They will attempt to honor group seating requests when tickets are ordered together. The program has not been finalized yet; however, they expect to have a program to match the quality of their past programs. Further information may be obtained from Jay at: k4zle <at> arrl <dot> net

DXCC NEWS. Bill Moore, NC1L, ARRL DXCC Manager, announced the following operations are approved for DXCC credit:
6O0X - Somalia, from November 18, 2004, to November 26, 2004
TT8AMO - Chad, current operation effective March 9, 2005

Correction: TT8M was shown as approved starting of March 14, 2005. The correct start date should be March 9, 2005.

DXCC CARD CHECKING (Visalia International DX Convention). DXCC QSL card checking at the 2005 Visalia International DX Convention will take place on Saturday, April 16th from 2-4 PM in the Plaza room. All DXCC type cards can be checked including deleted entities, QSLs over 10 years old and 160 meter cards. For further information, contact Gary, KI6T at: ki6t@arrl.net

E5A-E5Z, COOK ISLANDS (Cook Islands DXCC Status Change!). From the ARRL Web page, the issuance of a callsign prefix block for Cook the Islands has made them a DXCC political entity. "It has come to our attention that the International Telecommunication Union Table of International Callsign Series now contains an entry for the Cook Islands," said ARRL Membership Services Manager Wayne Mills, N7NG. "New Zealand has been issued the E5A-E5Z callsign prefix block for the exclusive use of the Cook Islands. As a result, the Cooks become a political entity for DXCC purposes." Mills says the impact on the DXCC List will be minimal, however. "In reviewing the distances, it appears that the first 'separation' from the South Cooks likely will be Palmerston Island, which is just over 350 km northwest of Raratonga," he explained. "The remainder of what has been known as the North Cooks is not sufficiently distant from Palmerston to become an additional DXCC entity." Mills says the main effect of the change will be for Palmerston to count for North Cooks instead of South Cooks. The change also may clarify a situation with the North Cooks. "Since the addition of the Manihiki Islands (North Cooks) in January 1959 was not based on a specific distance, Palmerston has counted as South Cooks," he said. "DXCC Rule 5a comes into play now, keeping both North and South Cooks on the list, but moving Palmerston to the North Cooks because it is more than 350 km from the South islands and becomes the first separation." Under the circumstances, Mills said, it might now be appropriate to rename the entity "Palmerston and the North Cooks." For more updates/details, please read the ARRL announcement at: http://www.arrl.org

EA8, CANARY ISLANDS. Operators YL2KL, YL1ZF, YL2LY and ES1AJ will be active as EA8AH during the CQ WW WPX CW Contest (May 28-29th) as a Multi-2 entry. QSL via YL2KL.

FT5XO QRT. The FT5XO Microlite Penguins DXpedition to Kerguelen Island reportedly went QRT around 0200z on March 31st.

HB0, LIECHTENSTEIN. Ed, HA5BWW, and group of HA operators will be active from here as HB0/homecall, May 14-20th. Activity will be on 160-10 meters, including the WARC bands, mostly CW with some SSB. Look for HB0/HA5KHC on 144 MHz. QSL via their home callsigns (Bureau is OK).

IOTA NEWS.....
AF-NEW. (Update) Acording to Afif, 7X2RO, activity from Sanja Islands will not include 160 meters operation due to poor propagation. Operations will be from May 1-5th. Reports indicate the callsign will be 7V2SI.

OC-220. The operators who activated OC-251 (September 2002), OC-261 (April 2003) and OC-228 (April 2004), are now planning to activate OC-220, South Australia West group, St. Peter Island, Nuyts Archipelago the second weekend in April, commencing early Thursday, April 7th and concluding Monday at 2100z, April 11th. This will be a special event commemorating the 350th anniversary of the death of Pieter Nuyts, the Dutch East India Company man and sometime explorer, who died in 1655. St. Peter Island and Nuyts Archipelago, which is located off the coast from the seaport, Ceduna/Thevenard, was named after Pieter Nuyts in 1627 whilst exploring the southern ocean area of Australia, now known as the Great Australian Bight. St. Peter Island is part of a closely protected Conservation Park and also part of a greater Ecological Restoration of Endangered Species Program by South Australia Parks and Wildlife. A permit has been obtained for 4 operators to land and operate for a limited period. Operating dates/times are dependant on weather conditions which can be unpredictable at anytime of the year. Expected operators are Peter/VK3QI, Keith/VK3FT, Jack/VK3WWW and Max/VK3WT. Activity will be on the usual IOTA frequencies, both CW and SSB. Emphasis will be on 30/40m CW and 20/17/15m SSB. Long Path to Europe which is around 0500-0800z will also be emphasized. OC-220 has only been activated once before in March 1997, by Mal (VK6LC) as VK5ISL, for a total of 2200 QSOs, making it a relatively rare group. CW QSOs will be available and special arrangements put in place to maximize contacts with African and South American stations who have an entirely polar path through the auroral zones to contend with, both long and short paths. A special commemorative callsign has been applied for, and they are particularly interested in having contacts with as many Dutch stations as possible. QSL details are as follows: via VK3QI Direct (any callbook) or via VK3 QSL Bureau. Any questions about the proposed operation can be E-mailed to: Peter Forbes, VK3QI - prforbes@bigpond.net.au

JW, SVALBARD. Remember to look for Francois, F8DVD, to be active from the town of Longyearbyen as JW/F8DVD, April 4-11th. Activity will be on all bands, mainly SSB. QSL either via the French REF Bureau or direct.

OZ200, DENMARK (Special Activity/Event Update). Rene, OZ1LQH, informs OPDX that the special callsign OZ5HCA will not be used during the celebration of "Hans Christian Andersen" birthday, but the callsign OZ200HCA has been issued to be used between April 1-30th. The QSOs with OZ200HCA will, of course, count for the H.C. Andersen award. For more details, visit the Web page at: http://www.oz3fyn.dk/diplom-hcaGB.html
Rene thinks this is the first time ever that an OZ callsign has had more than one number in the prefix.

P4, ARUBA. John, W2GD, will be active as P40W during the CQ WW DX SSB Contest (October 29-30th) as a Single-Op/All-Band entry. QSL via N2MM. Look for activity prior to the contest on 160m and the WARC bands.

QSL INFO AND NEWS.....
QSL 5B/LY1DF/LGT via LY1DF. Activity took place over the past weekend. Visit the following Web for more details: http://www.qsl.net/ly1df

Toni, EA5RM, reports that the CW5R (SA-039) QSLs just arrived from the printed, and direct QSLs are starting to be processed.

NEW QSL MANAGER. Vladimir, LZ1OT, informs OPDX that he is now the QSL Manager for Yury, 4L4CH.

NEW LOGS FOR LZ2TU. QSL Manager WB2RAJ confirms that he has again acquired new logs from Dobri, LZ2TU. The logs now span from February 15th, 2001, through February 6th, 2005. A new color QSL cards will be used. Please do not QSL for any contact after February 6, 2005, until newer logs are received. To confirm contacts with LZ2TU, QSL DIRECT ONLY to: Kash Kashdin - WB2RAJ, 4591 West Overlook Drive, Williamsville, NY 14221.

Ark, UA4CC, informs OPDX that their EY0R and EY8/UA4CC expedition to Tajikistan is now finishied. They made over 6000 QSOs with more 100 countries on all continents. He also mentioned that Bill, NC1L, informed him their opertion is good for DXCC credit. The logs for EY0R and EY8/UA4CC are now aviable online at: http://dx.qsl.net/logs
QSL via UA4CC; cards will be sent out soon (bureau and direct). Look for the logs to be uploaded into the LoTW in the future.

VU4 QSLS. The VU4 QSLs are now being received. However, if you have not sent for your QSL, Charles, K4VUD, wants to remind everyone: DO NOT SEND CASH TO NIAR IN HYDRABAD. Charles states, "Yes, I know it is legal for NIAR to receive U.S. dollars, but why risk the money getting into someone else's hands on the way to NIAR? THERE IS AN EASY WAY TO DONATE.... Read NIAR's web site for instructions to donate via DERA in Colorado (DERA even takes credit cards). THEN, in your QSL request to NIAR, put a note saying "donated via DERA." NO CASH BY MAIL TO NIAR; how many ways can I say it?" Charles also mentions that he hopes to be at Visalia or Dayton and put on a slide shows about VU4.

SPECIAL EVENT. Operators Karlis/YL2MD, Serge/YL2MU and Andris/YL2GQT will be active as YL740C, YL740M and YL740T, until June 28th, to celebrate the 740th anniversary of the Latvian City of Jelgava (former Mitaw, the Capital of the Kurland Duchyin XVII Century). QSL via their home callsigns.

SV, GREECE. Ben, OZ5AAH, will be in Athens and be active as SV/OZ5IPA from April 5-13th. Activity will be on all bands including the WARC bands on CW/SSB. QSL direct ONLY via Ben Jakobsen, Gjethusparken 25, 3300 Fr.vaerk, Denmark.

VP5, TURKS AND CAICOS ISLANDS. Operators Bob/K7LAY (father) and Harry/K7LAZ (son) will be on a mini DXpedition/ham vacation to here between June 12-24th. Activity will be on all bands 160-10 meters with an emphasis on CW. Callsigns will be VP5/homecall. QSL via their home callsigns

WARD 2005. AWARD. Sylwester Jarkiewicz, SP2FAP, Editor-in-Chief of MK QTC Magazine, states the World Amateur Radio Day 2005 Award (WARD) is designed to commemorate the World Amateur Radio Day celebrated by IARU on April 18th each year. This year's award celebrates the 80th anniversary of IARU. The AWARD 2005 is issued by the MK QTC, "The Polish Radio Amateurs' Journal", with support of PZK, "The Polish Amateur Radio Union". The WARD 2005 will be issued for the following numbers of contacts: either 10 QSOs on HF bands, or 5 QSOs on VHF bands. All contacts must be made between 0000 and 2400z on April 18, 2005. Send a standard application form (log extract), including the list of QSOs, to: MK QTC, The Radio Amateurs' Journal, Suchacz-Zamek, Wielmozy 5b, 82-340 Tolkmicko, Poland (on or before June 31st, 2005). The price of the WARD 2005 Award is 5 USD or 5 EURO. The full-color award's size: 210 x 297 mm. The WARD 2005 Award is also available to SWLs for the same numbers of reports. Also, visit the following Web pages for more details: http://ward.radio.org.pl/
http://ward-award.prv.pl/
Also, you can send (for more details) via an E-mails to: qtc@post.pl

WRTC 2006 (Update). Oms, PY5EG, reports that the rules for the next World Radiosport Team Championship to be held in Florianopolis, Brazil, on July 7-10th (2006), can now be downloaded from the following Web page at:
http://www.wrtc2006.com
During the next 30-60 days they will announce the following documents:
Referees Selection Criteria and Team Selection Criteria.

He bought a handi from me months ago and he paid promptly via PayPal.

Now, PayPal has placed a hold on MY ACCOUNT because of the recent complaints about his activity.

I'm not sure who to blame here! Him or PayPal.

I would blame PayPal for this one. If the guy paid for something, it's paid for. PayPal probably froze your account so they could steal the money back from you to pay some of his victims.. (makes about as much sense as anything else PayPal does).

1732. Can you measure and post your DTMF Twist?

Newsgroup: rec.radio.amateur.misc
Date: 2005-04-04 05:57:19 UTC
From: Rick <post-replies@noemail.com>
Message-ID: <4250d855$1_2@127.0.0.1>
Source record: 52604

Twist = 20*log(FMhi/FMlo) where FMhi is the FM deviation of the DTMF high tone (1209, 1336, 1477 or 1633 Hz) and FMlo is the FM deviation of the DTMF low tone (697, 770, 852 or 941 Hz). FMtotal = FMlo + FMhi. Typically, FMtotal is adjusted on amateur HTs to be 3.0 to 3.5 kHz. Twist should be about 2 dB. For example, pressing and holding the "1" key should result in a 697 Hz tone with 1550 Hz FM deviation and a 1209 Hz tone with 1950 Hz FM deviation. (FMtotal = 1550 + 1950 = 3500 Hz, twist = 20*log(1950/1550) = 2.0 dB.)

If you have access to test equipment that can measure FMlo and FMhi of your FM transmitter, could you please post the results? I have access to such test equipment and my Kenwood TH-G71A looks like this:

(Hz) (Hz) (Hz) (dB)
Sym FM Low FM Hi FM Twist
=== ====== ===== ===== ======
1 2223 1862 = 4085 -1.542
5 2202 1750 = 3952 -1.996
9 2173 1640 = 3812 -2.446
D 2108 1502 = 3610 -2.941

The 3.6 to 4.1 kHz FMtotal looks reasonable, but the twist values should be around +2 dB, not -1.5 to -2.9 dB.

A friend's Icom IC-W2A produces a "1" symbol with FMtotal = 2.6 kHz (a little low) and Twist = 6.5 dB (4 dB higher than expected). I would like to find out if we both have misadjusted transmitters, or all Icoms and Kenwoods show the same error, or perhaps that twist is just a neglected spec and all radios vary widely.

Those are the ARRL reports, not the official letters, dumbass. And where in the letter does it say "malicious interference" was the cause of the retest?

SUBJECT: Amateur Radio license KC8JBO

Dear Mr. Wiseman:

Pursuant to Section 97.519(d)(2) of the Commission’s Rules, 47 C.F.R. Section 97.519(d)(2), the Commission has the authority to re-administer any examination element previously administered by Volunteer Examiners (VE’s). The Commission may either administer the examination itself, or under the supervision of a Volunteer Examiner Coordinator (VEC) or VE designated by the Commission.

Accordingly, we are requiring you to re-take the General Class Amateur Examination, (Elements 2, 3(A) and 3(B)) under the supervision of an American Radio Relay League Volunteer Examiner Coordinator. This examination must be completed on or before September 11, 2000. The required code speed that you must demonstrate is 5 words per minute.

"Allegations" = "assert without proof"

Perhaps with some "manufactured" evidence?

Funny, Wiseman never had his license suspended or revoked, nor
has he ever been fined. A "retest" as a form of punishment? Hmm,
let's see he passed the test and upgraded to Extra. Yeah, that's
some "punishment." You are a moron, Davies.

> Enough said.

Lardass following up to himself...speaks volumes.

In this short life we all make a lot of friends,

.... some casual friends
.... some good friends
.... some lifelong great friends

.... and a very small handful of uber-friends

Today I learned of the loss my uber-friend, Stu Greene, WA2MOE.

Beyond a good friend or a great friend, an uber-friend like Stu is your friend ALL the time, without condition. An uber-friend doesn't need to agree with you to be your friend --- Stu and I disagreed (sometimes deeply) on a few items, but it was during those disagreements that his friendship shown through more brightly than ever.

Suddenly I treasure those disagreements.

Goodbye Stu, DXer, war hero, and uber-friend. May you have a brisk tailwind and a good starfix on your way Home.

73/88,

Hans K0HB & Colleen K0CKB

4 April 2005

Lat 42'49"S Long 88'13"E
South Indian Ocean

The 2005 Microlite DXpedition to The Kerguelen Islands is now history.
11.5 days of operating netted almost 68,000 QSOs using the callsign FT5XO.
The operators for this DXpedition were AG9A, GI0NWG, HB9ASZ, M0DXR, N6MZ,
N0TT, SP5XVY, VE3EJ, VK6DXI, W3WL, W7EW and 9V1YC.

In an effort to equitably cover the variety of openings, bands, and modes
available, the team actively reviewed the QSO stats each day and adjusted
the operating plan accordingly.

The final numbers are as follows:

CW: 45687 68%
SSB: 19903 29%
RTTY: 2358 3%
EME: 6

TOTAL: 67954

Band-Mode breakdown

Band CW SSB RTTY TOTAL

160m: 1173 16 0 1189
80m: 3578 957 0 4535
40m: 9643 2774 160 12577
30m: 9683 0 616 10299
20m: 4012 4640 327 8979
17m: 5144 2168 497 7809
15m: 4485 3964 758 9207
12m: 4411 3499 0 7910
10m: 3558 1885 0 5443

6m EME: 6

Continental breakdown

Europe: 53%
Japan: 21%
USA: 17%
Other Asia: 5%
All others: 1% or less each

The journey began in Durban, South Africa on the afternoon of March 9 aboard the R/V Braveheart. Kerguelen was reached on the morning of March 19, and camp assembly was started that same afternoon. The first QSOs began at about 0700 UTC on March 20.

The operation took place from an old abandoned whaling station at the center of the island called Port Jeanne d'Arc, which is approximately 30km southwest from the French base at Port Aux Francais. The operating site was close to the seashore with good take-offs in most directions.

Antennas consisted of half-wave vertical dipoles for 20m and up, quarter wave verticals for 30m and 40m (with 2 elevated radials each), and two Battle Creek Specials for 80m and 160m. With the exception of the Battle Creek Specials, all antennas were designed and built by ZS4TX. Radios consisted of three Kenwood TS50s, a Yaesu FT897, an ICOM 756 ProIII, and one Yaesu FT1000MP. We also had several small amplifiers for the low bands.

Because we broke from tradition and chose the Austral mid-autumn for this DXpedition we were able to take advantage of excellent 10 and 12 meter equinox openings which would have otherwise been impossible during the Austral summer (when most of these types of Antarctic DXpeditions usually take place). The drawback is that Kerguelen drops far below the Antarctic convergence at this time of year bringing with it a noticeably cooler and harsher climate.

The weather during our stay was typical for islands below the convergence, with strong wind, rain, sleet and even heavy snow alternating throughout the day. In fact, during the space of just one hour the weather changed many times from calm and sunny to a 45 knot howling blizzard. Winds could come from any direction, but the prevailing trend was usually from the southwest.

Static from snowstorms often produced S9+40 noise, forcing us to abruptly stop operations until it died down. The intensity of these snowstorms also caused the antennas to develop kilovolts of static voltage across the coax connectors (something we learned the hard way when a large voltage spike from one of the antennas destroyed a power supply and transceiver during an antenna switchover).

The last QSO was made at approximately 0200 UTC on 31 March. With calm weather throughout the morning the teardown went smoothly and on schedule. The ship is now on its way to Fremantle (Perth) Western Australia and should arrive on the morning of April 11. The total sea travel time for both legs of the journey is about 22 days. Operating time was just over 11 days, which works out to a 2 to 1 ratio of travel to operating.

We purposely advanced minimal publicity about this trip in the hope that the chase would be more of a challenge. With good operating skills combined with attentiveness to both propagation and band openings it is our belief that FT5XO should have been available to all who wanted a QSO. For our part, a great effort was made to work the weakest of stations and cover as many openings as possible within our limited time frame. Reading some of the feedback and looking at the final QSO stats we stand firmly behind the belief that it is mainly skill, not hardware, that makes a successful

DXpedition. Small teams, light gear and strong operators are the key. We hope that your call made it into our log on at least one band.

With the extremely high expense and travel time necessary to reach these remote Antarctic islands we wish to say thank you in advance for all contributions sent with your QSL cards.

Special thanks to ZS5BBO and all the members of the Highway Amateur Radio Club in Durban, South Africa who made our air to sea transit exceptionally smooth. Thanks also to TAAF (Terres Australes et Antarctiques Francaises) for their kind support for our adventure.

And finally, we would especially like to thank our sole organizational sponsor, the Northern California DX Foundation. Their continued support for DXpeditions to the far reaches of the world helps to keep one of the most exciting aspects of amateur radio alive. Without the NCDXF, this trip would not have been possible.

73, and see you on the bands.

The Microlite Penguins DXpedition Team

Hello,

I just got a pack of two Audiovox GMRS7001-2CH two-way
radios and had an unpleasant surprise after opening the
package - "USE OF THIS RADIO ... REQUIRES FCC LICENSE".

Some research showed that, yes, transmitting on a GMRS
frequency requires license. However, the radio have
7 "FRS-only" channels (freq. 467.5625-467.7125). Do I
need license is I use ONLY those channels?

I expect to need the radio once or twice per year when
camping, and I don't want to spend money and time on
FCC license, if not needed for the FRS channels.

Regards,

Gonzo

GMRS and FRS are both citizens band allocations. GMRS is a licensed radio service, authorizing higher power and flexibility. FRS is unlicensed, with significant restrictions.

FRS frequencies are interleaved with GMRS frequencies. GMRS radios are also authorized to transmit on FRS channels 1 to 7 with no more than 5 watts and using 5 KHz deviation. GMRS uses 467 MHz frequencies as repeater input channels. All FRS channels are simplex, with 3 Khz deviation and 500 milliwatts.

Thanks for the answers. Now I start to see what should I do,
but still would like to check with you if this is OK.

According to the manual, if I switch to low output power mode (it
has two modes) the maximum output power is 0.5 watt. This should
mean, according to my understanding, that if I use it only in low-
power mode and only on the FRS channels I should be fine.

So, I plan instead of returning the radios to the shop, to go on
using them with those limitations. I still prefer to have the
high power option, in case of real emergency, that's why I prefer
not to switch to FRS-only radio. Also, I would like to start
listening from time to time on the GMRS channels (no transmitting),
just to see how are the things there and decide if I would like to
get GMRS license or not (I probably would).

Is this OK?

Thanks,

- Gonzo

Hi Gonzo ,
That is what I would do. I have read the related laws. I know some people
will say you will be breaking the law because of FCC type acceptance.

No. Since the radio is a type-certified GMRS radio, you will require a
license regardless.
>

Nope. See above, and see my original followup to your original post, as
well as the links I offered you.
A license is REQUIRED to use that radio, under any and all conditions.

One comment. GMRS is absolutely NOT a citizen's band service.

No where in the CB regulations does it list GMRS. GMRS *did* develop
from the old "Class A CB" service, however. It is one of the personal
radio services.

So far as the letter-of-the-law is concerned, John is correct.

As a practical matter SO LONG AS YOU TRANSMIT ONLY ON FRS channels and ONLY AT THE LOW POWER SETTING then you are unlikely to upset anyone nor invite the attention of any radio police.

People use radios including amateur radios for purposes other than they were type accepted everyday . Some police use amateur radios that tranmit on police frequencies, they cost less than Motorola equipment. Some amateurs use police radios that have been modified to work on amateur frequencies etc. etc.

Amateurs can use any type radio they want to use on amateur frequencies,
Ham radios don't need to be type accepted, I've converted many CB's to
use on 10 meters and that's legal. I also understand that anybody can
own any type of radio as long as they listen and don't transmit, lots of
amateur equipment is sold everyday to people that only want to listen to
short-wave. I guess some get put on the cb band, but oh well, life goes
on. I don't see anything in the law that says I can't own GMRS radios
without a license, only I need a license to transmit on GMrs frequencies.

Yep you sure can, I have two units that cover both FRS (license free)
and GMRS frequencies. I can use the FRS frequencies without a license
but not the GMRS, but I sure can listen to GMRS freqs all I want.

That information is wrong. You need to read the CB regulations as stated
in part 95:

[Code of Federal Regulations]
[Title 47, Volume 5, Parts 80 to End]
[Revised as of October 1, 2000]
From the U.S. Government Printing Office via GPO Access
[CITE: 47CFR95.401]

[Page 533-534]

TITLE 47--TELECOMMUNICATION

COMMISSION (CONTINUED)

PART 95--PERSONAL RADIO SERVICES--Table of Contents

Subpart D--Citizens Band (CB) Radio Service

Sec. 95.401 (CB Rule 1) What are the Citizens Band Radio Services?

Source: 48 FR 24894, June 3, 1983, unless otherwise noted.

General Provisions

The Citizens Band Radio Services are:
(a) The Citizens Band (CB) Radio Service--a private, two-way, short-
distance voice communications service for personal or business
activities of the general public. The CB Radio Service may also be used
for voice paging.
(b) The Family Radio Service (FRS)--a private, two-way, very short-
distance voice communications service for facilitating family and group
activities. The rules for this service are contained in subpart B of
this part.
(c) The Low Power Radio Service (LPRS)--a private, short-distance
communication service providing auditory assistance to persons with
disabilities, persons who require language translation, and persons in
educational settings, health care assistance to the ill, law enforcement
tracking services in cooperation with law enforcement, and point-to-
point network control communications for Automated Marine
Telecommunications System (AMTS) coast stations licensed under part 80

of this chapter. The rules for this service are listed under subpart G of this part. Two-way voice communications are prohibited.
(d) The Medical Implant Communications Service (MICS)--an ultra-low power radio service for the transmission of non-voice data for the purpose of facilitating diagnostic and/or therapeutic functions involving implanted medical devices. The rules for this service are contained in subpart I of this part.
(e) The Wireless Medical Telemetry Service (WMTS)--a private, short distance data communication service for the transmission of patient medical information to a central monitoring location in a hospital or other medical facility. Voice and video communications are prohibited. Waveforms such as electrocardiograms (ECGs) are not considered video. The rules for this

GMRS is not listed.

The purpose of the Deep South 2 Meter SSB Net is to promote 2 meter SSB activity in the region by bringing 2 meter SSB enthusiasts together. It also serves as a vehicle for arranging skeds, obtaining new grid squares and new states for it's participants. The net meets nightly on 144.240 MHz USB at 8:30pm CST and is open to all. Net is called by Charlie,AD5TH from EM52kn. The Homepage for the Deep South 2 Meter SSB Net is www.deepsouthnet.net An attractive certificate is available for free to those with at least 100 successful check-ins. For more info contact Charlie at ad5th@direcway.com

1. www.deepsouthnet.net - Check us out this Friday!!!

And there is no type approval for amateur radio. It's the one radio
service that is pretty open ended, because of its very nature.

Since amateurs can build their own equipment, it would be pretty silly
to require type approval of equipment. There is absolutely no
restriction against modifying equipment to work on the ham bands,
though if you modify it chances are good that it no longer meets
the original type acceptance for the other service so you can no
longer use it there.

And just because people use amateur equipment illegally in other services
does not make it right. One reason amateur equipment is cheaper
than equivalent equipment for other services is because it's not
type approved, so at the very least the cost of getting it approved
is not there.

In case your question is serious and for others who may not know, in the days of telegraph before radio, operators would tell stories and jokes along an idle circuit. Since 4 dits followed by 2 dits sounds like a laugh -- and 4 beeps is H and 2 beeps is I

Sending HI HI in Morse was a telegraphic laugh and it naturally carried over to radio by CW ops. Used by many today in CW and indeed has carried over to phone as well.

Well in passing a another Ham car -- sending HI in Morse is a Ham motorists Hello.

So much in Amateur Radio jargon is from the telegraph days.

Lets see if any one knows the origin of ES in Morse in lieu of the word AND ???
Answer tommorrow from CL -- I doubt, therefore I might be !

Help to anyone who has renewed the ham radio license!

I sorting thru the paperwork from the FCC form 605. I can't determine if there will be a fee to renew my non-vanity license. I think, from what I can tell, the fee is $20.80, but I can't tell if this is just for an initial vanity application.

Can anyone help??

If you don't have a vanity call, then there is no FCC charge for renewal of your
license.

If you are renewing a vanity-call license, then the fee is charged.

Hello again. I may be out of my league here, but here is something
I found in the FCC permit for the model I own, that should put an
end to this debate:

FCC IDENTIFIER: PDHGMRS7001
Name of Grantee: TTI Tech Co., Ltd.
Equipment Class: Part 95 Family Radio Face Held Transmitter
Notes: FRS/ GMRS Combination

[...] This device is authorized to operate in the following radio
services: FRS (Part 95B) or GMRS (Part 95A). There must be an
informational insert inside the box (product package) or the User's
Manual must include information that clearly informs the consumer
(buyer/owner) when the radio is transmitting on GMRS frequencies,
that operation on GMRS frequencies requires an FCC license and such
operation is subject to additional rules specified in 47 C.F.R. Part
95. [...]

I think FCC here clearly states that FCC license is required only
"when the radio is transmitting on GMRS frequencies". Note that

the devide is described not as GMRS radio, but as "FRS/GMRS Combination" - this may explain the different oppinions expressed in this thread.

I noticed also, that when a FRS frequency is selected, the only allowed mode is low power, "up to 0.5 W". Probably this is why they can classify it as FRS/GMRS combo. So, I'm going to use this without license on the FRS-only frequencies, and will listen only on the GMRS channels to see how it is and do I want to get GMRS licensed. If FCC says this is OK, who am I to object?! :-)

Sorry that I didn't find this info before asking the question.

Regards,

- Gonzo

P.S. I think FCC here did a sloppy job in requiring the manufacturer to put the license requirement INSIDE the box or in the manual, but not OUTSIDE the box. Thaty's crazy! Actually, I found the licensing requirement OUTSIDE on the box, but this was just after reading the manual and carefully inspecting the packaging to look for it - it was there, in one corner of the box, below some other text and probably with the smallest font they could find!

1769. Re: FCC Renewal

Thanks. The wording on the fee form 1070Y says that the fee is for
INITIAL VANITY LICENSE or RENEWEL. I guess that means renewel for a
vanity license. But it's confusing. Thanks for your help.

I have the following tube and radio literature for sale:

1. Radio Craft Radio Reference Annuals from 1937 and 1938 Very Good condition $10 each

2. Radio Handbook 7th edition by the editors of "Radio" 1940 Good condition $20

3. RCA Tube Handbook HB-3 Volumes 1-2, 5-6,7-8 Excellent condition $60

4. RCA Receiving Tube Manual RC-26 (2 copies) Very Good condition $20 each

5. GE Essential Characteristics 1963 and 1964 version Very Good condition $15 each

6. Marconi Radiotron Characteristics Manual

7. Set of 3 books a) Allied Radio Data Handbook 1943

b)Practical Radio Circuits by RadioCraft 1938

c)Public Address Installation 1934

<>All are in very good condition with complete covers $25 for all 3

8. Binder of Raytheon Tube info from 1955 to 1960 $15

Email for pics or more info if desired.

> invite the attention of any radio police.

I don't see how it's not ok to use the radio at 500mw in the FRS freqs. I'd like to see where it says that.

What does this say to you?

FCC IDENTIFIER: PDHGMRS7001
Name of Grantee: TTI Tech Co., Ltd.
Equipment Class: Part 95 Family Radio Face Held Transmitter
Notes: FRS/ GMRS Combination

[...] This device is authorized to operate in the following radio services: FRS (Part 95B) or GMRS (Part 95A). There must be an informational insert inside the box (product package) or the User's Manual must include information that clearly informs the consumer (buyer/owner) when the radio is transmitting on GMRS frequencies, that operation on GMRS frequencies requires an FCC license and such operation is subject to additional rules specified in 47 C.F.R. Part 95. [...]

There is no mention of needing a license to operate on FRS.

Boy has this turned into a rats nest of smart answers. I use an Autek QF-1A filter cranked in real tight and the SSB is so well cleaned up I still can copy most CW signals through it. I'm sure that the newer DSP rigs do a much better job but are out of my price reach. Good luck and may CW live forever.

1774. 12 Volt HF Transceiver For College

Newsgroup: rec.radio.amateur.misc
Date: 2005-04-07 00:32:22 UTC
From: RST Engineering <jim@rstengineering.com>
Message-ID: <1158vspcueb8r39@corp.supernews.com>
Source record: 52496

Our Sierra Community College ham station is starting to come together. We graduated our first two enthusiastic student hams last month, and the three hams on staff have come by a 2-meter TM-261, a homebrew low power 2-meter repeater, and a 1296 video repeater. We ought to have enough student hams by the end of the Spring Semester to form the Club.

We have a creaky old Yaesu vacuum tube HF transceiver that was donated to us, but it is way too large for the small space allocated to us by the department (and since it was donated, we can't sell it to buy something else). I've been using a TS-130 here at the home station for the last 20 years and find it perfectly adequate for the occasional HF CW or SSB contact using a Telex 80-10 vertical.

However, everything else that we have works from a 12 volt supply, and we have a limitless supply of 12 volt batteries courtesy of the local phone company's surplus out-of-code-date junkyard.

I don't mind buying a decent HF rig for the school (no, I'm not asking for your charity) but the stuff on ebay seems to be a bit overpriced. I also don't mind donating my extra Telex vertical to the cause.

Anybody got a decent solid state (12 volt) HF rig that they would be willing to sell to me for a reasonable price?

BS, the instructions that came with my radios plainly state that the FCC requires GMRS users to have a license, FRS users do not and there is an application blank included for the GMRS license.

Not sure I understand why you want to run the HF rig from 12 volt
battery power. Even with a good supply of batteries a 100 watt rig will
run them down pretty quick so you will spend a lot of time changing
batteries.

DSP would do a poor job of cleaning out SSB signals for CW copy. You would
do bunches better with using your Autek as you are doing.

Actually, Dan, the DSP engine in my IC775 blows the Autek away. Stagger-tune the twin PBT to attenuate the crud, turn on the APF, and then gently fondle the RIT. Since you're doing all of this up inside the IF chain, you make your peace with the AGC-pump syndrome, a tack impossible with the Autek.

Oh, but don't be so quick to dismiss this as the work of Christian Kooks.
Right here on rec.radio.amateur.policy we have N9OGL inventing the very
transmitters that the ELF God is using. He makes incredible claims for
transmitting these hidden messages by compressing voice signals into digital
signals and transmitting them on ELF. Scary stuff!

Here's a sample of his "work"

I think we should be afraid, VERY afraid!

For those who aren't sure they want to commit a machine (or even just a partition) to an unknown OS, but would like a "look see" at Linux, this is an excellent chance to have a peek outside of Windoze without risk of farkling your current system. He's included a surprising variety of very nice applications in the package.

The download is kinda long, but Harv will send you a CD if you ask nicely.

Nice to know.....I have MP and I haven't seen it helping much on a SSB signal on top of a CW one. Maybe I need to play with it some more.

I think we should all chip in and help this great american out, In my humble opinion Mr. Baxter has done a lot for amateur radio, and with our help he can continue his work to give the amateur radio community REAL hardcore information, unlike that W1AW.

1803. FCC Announces Lottery for Extra Class Licenses

Newsgroup: rec.radio.amateur.misc
Date: 2005-04-09 04:30:08 UTC
From: "Mel A. Nomah" <Hightower@cosmos.net>
Message-ID: <kTI5e.3013$An2.2610@newsread2.news.pas.earthlink.net>
Source record: 52525
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.misc

Citing the success of the its licensing restructuring of May, 2000, the FCC has announced an impending shortage of the top-grade "Extra" licenses, and that only a limited number of these prestigious licenses remain available.

"The positive response to our restructuring caught us completely off guard, and the supply of these licenses is almost exhausted. Only 15,000 remain to be issued." said Riley Hollingsworth, a top insider on condition of anonymity.

"The only fair way to distribute these remaining licenses if via a lottery, so that all citizens have an equal opportunity for this coveted honor." he said.

Registration for this lottery will be via usenet newsgroup rec.radio.amateur.policy, with registration opening immediately and ending on June 1st 2005. Each registrant is required to send a message to any USENET newsgroup stating "I deserve to be an Extra because (_____)" filling the blank with 25 words or less. (Note: Any newsgroup can be used except alt.binaries.pictures.erotica.penguins and rec.radio.amateur.arrl-sucks)

On June 2nd the lottery will be held, based on the following fairness criteria:

--5,000 Extra licenses will be sent to those who register correctly, randomly drawn with a 15 point preference to residents of Belgrade Lakes, Maine.
--5,000 Extra licenses will be sent to those who register incorrectly, provided that they currently hold a Technician license and have not passed a Morse code test.
--5,000 Extra licenses will be sent to a random selection of persons who did not register at all, ensuring all citizens even those without an interest in ham radio can participate.

NO SKILL IS REQUIRED.
NO ACTION IS REQUIRED.
REGISTER NOW.
THERE IS A STRICT JUNE 1ST DEADLINE.
THE TIME TO START IS NOW!!

If I connect to my blog on a windows machine I can spell check and
grammar check, the only problem is I'm not on a window machine.....I'm
on a iMac G5.

I don't know which makes you look more assinine, Todd...

(1) The fact that you claim to be a pending college graduate yet
are functionally illiterate

or

(2) The fact that you try to blow it off on your iMac system!

Personally, I think you're just lying about it. (Actually, I KNOW
you're lying!) Even if the spellchecker DID flag errors for you, you
wouldn't know what the CORRECT spelling was to clear the error!

I think we should all chip in and help this great american out, In my
humble opinion Mr. Baxter has done a lot for amateur radio, and with
our help he can continue his work to give the amateur radio community
REAL hardcore information, unlike that W1AW.

TODD N9OGL

You just keep showing your ignorance, don't you Toad? All Baxter did was
plagerize ARRL and Newsline audio and put it out on his distorted Collins
junk. Except when was ''editorializing'' by slandering anyone that didn't
follow his "party line". Get a life Toad.

<editor@netpath.net> wrote in message
news:1113106287.553979.283420@g14g2000cwa.googlegroups.com...
: My view - as a longtime ham-radio operator who used to diss CB - and
: who has actually has used 2-meter simplex during a major area disaster
: to locate one of the very few area gas stations still with electricity
: to pump gas - is that a good mobile CB setup is better for emergencies
: than a good mobile 2-meter setup. That's because the CB will go
: further simplex (no repeater) than the 2-meter rig will when repeaters
: are either down or tied up due to an emergency - or if you are in some
: locale either lacking repeater coverage or where you don't know the
: active local 2-meter repeater. The "idiot days" of CB - when every car
: had one - are long over here in North Carolina; only truckers, hunters,
: and farmers seem to have mobile rigs here now. I now use CB almost to
: the total exclusion of 2-meter - though I have excellent setups for
: both in my car.
: FRS does have its uses. Like keeping in contact with others on
: campouts, skiing, or in limited areas in Iraq (now a major use). A
: major downside of FRS is the total inability to attach a good antenna.
:

Long term one needs to be on HF, thus at least a General class ham license.
VHF (2 meter ham), UHF (440 ham, GMRS/FRS) have their uses for local commo.
That is why the Army just purchased 20,000 ICOM F43G radios (440 MHZ) for
squad level commo. But the Army also purchased a lot of Harris HF radios as
well (AN/PRC-150).

Even SatCom has its uses. What one needs is all of it....

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 3rd/April, through Sunday, 10th/April there were 229 countries active. Countries available: 1S, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4S, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J6, J7, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T5, T7, T9, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V5, V7, V8, VE, VK, VK9N, VP2E, VP2M, VP2V, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, XX9, XZ, YA, YB, YI, YK, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK1/s, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3A, MONACO (Special Event). Look for members of the Council of Europe Radio Amateur Club (CERAC) and the Amateur Radio Association of Monaco (ARAM) to be active as 3A0CE between May 4-8th. Activity is to celebrate

the Council of Europe's anniversary, as well as the admission of Monaco as the 46th member of State in the Council of Europe. QSL via F5LGF.

3B8, MAURITIUS. Mart, DL6UAA, will once again be active as 3B8MM between mid-April through possibly May 10th. QSL via his home callsign, direct or by the bureau. Visit his Web page at: http://www.dl6uaa.com

4X/4Z, ISRAEL (Special Event). The "2005 Holyland Contest", organized by the Israel Amateur Radio Club, will be held on Staurday, April 16th, from 0000-2359z, on both CW and SSB. It will provide a good opportunity to work many 4X/4Z stations toward the "Holyland Award". Full details are available on the Web page (under contests) at: http://www.iarc.org
The Contest Manager is Mark, 4Z4KX (E-mail: <mailto:4z4kx@iarc.org>)

9K, KUWAIT. With the help of the Kuwait Amateur Radio Society (KARS), operator David, M0AYL, has obtained a licence and will be operating as 9K2/M0AYL beginning April 28th. His length of stay and activity is not sure, but very long. In addition to KARS's help, they have also offered him an open invitation to their Society HQ and shack. He will be active regularly on the "Royal Signal Amateur Radio Society's" (RSARS) recommended calling frequencies and Nets. Visit the RSARS Web page for information on their activities at: http://www.rsars.org.uk/rsarsqrg.htm

A52, BHUTAN. You still have a few more days to work Stig, 9N7JO, as A52JO until April 12th. He had a very nice signal on 17 meters SSB around 1430z. QSL via 9N7JO.

ANTARCTICA NEWS. The Mediterraneo DX Club reports that the Antarctica Award has issued their 100th certificate to Piero Marino, IT9ZGY, one of the leading DXers in Italy. Visit the following Web pages for more details: MDXC - http://www.mdxc.org/antarctica/award.asp
IT9ZGY - http://www.qsl.net/it9zgy/biografy.html

C6, BAHAMAS. Duncan, EA5ON, will once again be active from Freeport as GM7CXM/C6A. Expected dates are from May 26-30th. As in previous years this will be a business trip. However, Duncan hopes to be fairly active on 80-10 meters, mostly on SSB but also some digitals. He may also try to participate in the CQWW WPX CW Contest. The IOTA reference is NA-080 (Grand Bahama Island). QSL via EA7JX.

CY0, SABLE ISLAND (URL Correction). The correct URL for the Sable Island DXpedition Web page is: http://www.wb8xx.com/sable

DX0, SPRATLY ISLANDS. Eddie, DU1EV, informs OPDX that he is back in Manila as of last Thursday. However, Gil, 4F2KWT is still operating from DX0K and is waiting for the next available trip back home. He has been operating six meters into JA and HL last Thursday and Friday. Gil shall be DXing until the plane arrives, which is of an uncertain date. Eddie mentions that this time around the antenna for HF is just a dipole, but they used a 500 watt ALS 500. QSL DX0K via 4F2KWT.

E-MAIL UPDATES. Bob Schenck, N2OO/9M6OO, suggests that (Just a thought..) once in awhile everyone out there should check their E-mail addresses

listed on QRZ.com and HAMCALL.net to make sure it is current. It is truly amazing how many are dead E-mail accounts which cause bounced messages. (Just a thought..... ed. A good thought Bob!)

FM, MARTINIQUE. Operators Berthold/DF5WA and Gunter/DF7GB are expected to be active now as homecalls/FM. Their length of stay is unknown. No QSNs have been reported as this was being typed. Their expected activity is to be on all HF bands, and possibly 160 meters if the location is suitable, using mostly CW but also some SSB, RTTY and PSK31. QSL to their home callsigns.

FT5XO DXPEDITION WRAP-UP. The Microlite Penguins DXpedition Team sent out a wrap-up press release early last week. OPDX InterNet subscribers will receive the complete release as an additional bulletin. Excerpts from the press release indicate that the DXpedition to the Kerguelen Islands lasted for 11.5 days and netted almost 68,000 QSOs using the callsign FT5XO. QSO break down is as follows: CW 45687 (68%), SSB 19903 (29%), RTTY 2358 (3%) and EME 6. The total was 67954.

HB0, LIECHTENSTEIN (Update). Some members of the Radio Club Tivadar Puskas (HA5KHC) will once again go here for a week between May 14-21st. Their QTH will be at Chalet Wanni (JN47SD), Masescha 1350m ASL. The operators are: Laci/HA5MA, Pisti/HA5OJ, Ed/HA5BWW, Karl/HA7PC. Operators will sign HB0/homecall. Their equipment: FT-990 + 400 watts PA, FT-1000MP MARK V., dipoles for 160 and 80 meters, and verticals for 40-10 meters including the WARC bands, too. On 2 meters they will try to do something with a FT-100 and an IC-271+1 kW PA and 9 el Yagi. (maybe some WSJT will do too) All QSLs can go to the operators' home addresses or via the HA QSL Bureau.

IOTA NEWS.....
AS-151. Operator Fan, BA1RB, will be active as BA1RB/2 from Ju Hua Island, May 1-4th. QSL via EA7FTR.

EU-008. Members of the South Chesire ARS will be active as GM6TW from the Isle of Jura (IOSA NH-21 and SCOTIA CS-28), April 16-23rd. Operators mentioned are: Pete/G4RRM, Chris/G0RDK, Ken/M0DQS and Geoff/2E0UNI. Activity will on 160-20 meter CW, SSB and some digital modes. The main frequency will be 14260 kHz.
Other suggested frequencies are:
SSB - 28560, 28460, 24950, 21260, 18128, 7055 and 3755 kHz
CW - 28040, 24920, 21040, 18098, 14040, 10115 and 3530 kHz
No specific frequency has been announced for 40 meters CW, but it is recommended that operations should include a frequency above 7025 kHz where the band is open to North America. QSL via G0UZP (QRZ.com).

EU-023. Mathias, DL4ZJ, will be active as 9H3ZJ from Gozo Island, Malta, May 3-13th. Look for him on CW and SSB. QSL via his home callsign.

EU-029. Stefan, DB3LSP, will be active as OZ/DB3LSP from Sjaelland Island (DIA SJ-001 for the Danish Islands Award), May 1-14th.

Activity will be mainly CW, but he will also use SSB and
PSK-31. QSL via his home callsign.

EU-038. Alfons/ON4AWT, Hugo/ON4CF, Geoffrey/ON6JK, and Stefan/ON4OSA
will be active as PA/homecall from Texel Island, April 15-17th.
Activity will be on 80/40/20/15/10 meters SSB, with some digital
modes. The Texel/Eierland lighthouse (WLH PA-004, ARLHS ARLHS
NET-024 and WLOTA L-0003) will also be activated. QSL via their
home callsigns direct (QRZ.com), bureau is preferred.

EU-048. Francois, F5JNE, will be active from Belle Ile (AT015) from
May 16-24th. During this stay, he has also scheduled to be
active from the Poulains Island and Lighthouse (AT-089,
WLOTA: 0872, ARLHS: FRA-059, TWLH: F-058 and PB 066) on May
17th and 19th. Activity will be mainly on 40 and 20 meters,
CW and SSB. QSL via the Bureau or direct (+ Postage) to:
Francois Robert, 4 rue d'Orbandelle, F89000 Auxerre, FRANCE.

EU-056. Operators Trond/LA9VDA, Bjorn/LA5UKA and Andreas/LA8AJA will
be active from Gossen Island, April 15-18th. Activity will be
on 80-15 meters, CW and SSB with some RTTY. QSL via QRZ.com.

EU-070. Operators Laurent/F5MNK, Eric/F5LOW, Fabrice/F5NBQ, Jacky/F5OIU,
Bertrand/F6HKA, Jean Philippe/F4EEK and Christian/F1SDQ will
be active as TM0L from Levant Island (DIFM ME-12), May 21-28th.
Activity will be on 160-2 meters on CW/SSB/RTTY/PSK31. QSL
via F5OIU.

EU-086. Alex, RX3AJL, will activate some islands in the Kara Sea
(Vaygach Island [RR-0601/EU-086] and Tsinkovy and Karpovy
Islands [RRA new ones]), April 12-22nd. Activity will mainly
be on 20 meters with 5 watts (100 watts possibly on the new
ones). QSL via his home callsign.

EU-125. Operators Siggi/DL1AZZ, Peter/DL4AMK, Lutz/DL3ARK and possibly
others will be active as OZ/homecall from Mandoe Island
between April 30th and May 7th. Activity will be on 160-10
meters, 6 meters and on May 3rd 144 MHz in the NAC Contest.
QSL via the bureau to their home callsigns.

EU-127. Operators Olaf/DL4HG, Andreas/DL7AT, Joachim/DH9JK, Thorsten/
DG7TG, Andreas/DG3XA and Karl/DJ5KK will be active as DF0CB
Helgoland Island (GIA N-14), April 15-17th. Activity will be
on 80-10 meters using a dipole and a 20 meter GP, with 100
watts. QSL via DF0CB (QRZ.com).

NA-067. Chris, K2HVE, will be active from Hatteras and Okacroke Island,
NC, as well as the Cape Hatteras Lighthouse (USA-119), from
April 11-15th. Activity will be QRP on 40/20/15 meters as time
permits. QSL via operator's instructions.

JD1, OGASAWARA ISLAND. Operators Joe/JR1AGC and Nobuyoshi/JH1WCD will be
active as JD1BLZ and JD1BLW, respectively, from here, May 5-8th. Activity

will be on 80-6 meters, (focusing on 17 and 15 meters.), using mainly SSB. QSL requests should be sent to their home callsigns via the bureau or direct.

KH7K, KURE ISLAND (Update). It was announced this past week that Ann, WA1S, has been added to the DXpedition to Kure Island K7C (OC-020) in September and October 2005. It is #10 on the DXCC most wanted list in the world. More information can be found on their Website at: http://www.cordell.org/htdocs/KURE/

KP2, U.S. VIRGIN ISLANDS. John/K3CT and his wife Susan/N3DVF will be vacationing and operating from St. Croix between April 19-26th. They will be able to operate on all bands CW and SSB. The callsigns will be KP2/K3CT and KP2/N3DVF. QSL both callsigns via K3CT, either direct or by the bureau.

LIGHTHOUSE ACTIVITY. Dov, 4Z4DX, will be active as 4Z4DX/LH from the Jaffa Lighthouse (ARLHS reference ISR-005), April 16-17th. QSL direct to his home calsign or e-QSL. Logs will be uploaded to LoTW. See Dov's Web page at: http://www.qsl.net/4z4dx

P4, ARUBA. Operators Gerard/KE9I (P40QX?), Eric/K9GY (P40GY?), Mike/AJ9C (P40C?), Phil/N9LAH (P4/homecall) and Nancy/KB9NSC will be here August 6-20th. They will be active in the WAE CW Contest (possibly as P40QX in remembrance of Leo/N9QX who passed away this year [father of KE9I]).

PIRATE ALERT. David, VK2CZ, reports that the station signing VK9XX during the CQ WPX SSB Contest was a PIRATE and not operating on Christmas Island. Any beam headings or recordings, please forward directly to David. The real VK9XX is off air until the end of the year. David's E-mail address is: k3hz@ieee.org

QSL INFO AND NEWS.....
5X1GS QSL STATUS. If you are wondering where your QSL is for Graham, 5X1GS, for a QSO from October or November 2004, his QSL Manager Bob, WB2YQH, reports there is a problem in not receiving the logs for that period or any time after. He has tried several attempts to contact Graham by E-Mail, and no reply has come back. He even had a UK station who needed a card find him again and relay the need for sending the logs to WB2YQH. The last time logs were delayed was due to Graham's work schedule out in the bush away from his Kampala location. One other time his telephone wire connection was stolen, and he could not E-mail until it was replaced. Please be patient. If you happen to contact Graham on the bands, ask him to send his logs to WB2YQH as soon as possible to reply to the backlog. Logs are on hand up to September 12, 2004. Also, all logs are available for Graham's other callsigns, 5Z4GS and VP2MGG.

FSDXA QSLING STATUS. Don Field, G3XTT, FSDXA Publicity Officer, reports the following: "The Five Star DXers Association is pleased to announce that all 9M0C, D68C and 3B9C logs are now on LoTW. This has taken longer than originally anticipated due to some problems in uploading the very

large logs (the D68C log alone was 30MB of data). FSDXA has 387,279 QSOs loaded to LoTW, making us probably the biggest single LoTW user. Of these QSO records, there are 30,916 matches against other LoTW logs. Interestingly, and perhaps a reminder that LoTW is by no means an alternative to paper QSLing, but rather a complement to it, we have received proportionally as many traditional QSL requests for 3B9C as we had for D68C at the same stage. To date, we have confirmed 80,413 3B9C QSOs direct and via the bureau, including electronic requests made via our Web page. We are fully up to date with QSLs requests received."

NEW QSL MANAGER. Frank, EA5RD, is the new QSL Manager for CX1BAC.

QSL SP0PAPA via SP3IQ. Activity by the Polish Amateur Radio Society (PZK) and the SP DX Club to commemorate the pontificate of John Paul II, the Pope.

S9, SAO TOME AND PRINCIPE. By the time you read this, Tono, EA9CP, should be active from here until April 17th. As of presstime, his callsign is unknown. He will be active on 10, 15 and 20 meters SSB only, and will transmit also from Sao Sebastiao Lighthouse (ARLHS SAO-002). QSL will be via EA9CP/1, via the bureau or direct. (Also see TI below).

SILENT KEY. Well known DXer Stuart "Stu" Greene, became a Silent Key (SK) last week. Many may remember working Stu from the following locations: 6Y, DL, G5, KH5J, KH5K, KH5P, KP1, KP5, PY0 and SM. OPDX and its readers would like to send out our deepest sympathy to Stu's family and friends.

SPECIAL EVENT (Visalia DX Convention). Look for special event station N6V to be active April 15-16th, between 1600-0200z, from the 56th annual International DX Convention in Visalia, California. Convention attendees are invited to operate the station. Activity will be on 14190-14240 kHz during the daytime hours and 7175-7250 kHz during the evenings hours. QSL via operator's instructions, and include an SASE with all QSL requests.

SPECIAL EVENT. Special event station LZ8IARU will be active on all bands and modes between now and December 31st to commemorate the 80th anniversary of IARU. Over the past week activity has been on 20 and 30 meters CW. QSL via bureau to LZ1BJ.

SPECIAL EVENT. Industry Canada has issued an authorization to Bob Cooke, VE3BDB, to operate May 7-14th inclusive, using the special event callsign CF3VEDAY. The authorization is to mark the opening of the new Canadian War Museum on May 8th, a date that coincides with the 60th anniversary of VE-DAY, which ended World War Two in Europe. The special callsign is historic in that this is the first time that an Amateur Radio callsign having a five-letter suffix has been issued in Canada. VE3BDB and other members of The Wireless Set No. 19 Group will alternate modern equipment with vintage WW II era military radios during the seven-day operation. Full information can be viewed on-line at: http://www.qsl.net/cf3veday

SPECIAL EVENT PREFIXES (Canada). At the request of Radio Amateurs of Canada, Industry Canada has authorized all Canadian radio amateurs to

use special event prefixes for the month of May, 2005, to mark the opening of the new Canadian War Museum in Ottawa on May 8th, coincident with the 60th anniversary of VE Day. The official opening of the new Canadian War Museum in Ottawa, the national capital of Canada, on May 8th, coincides with the 60th anniversary of Victory in Europe Day -- VE Day -- which, on May 8, 1945, officially ended the Second World War in Europe. The year 2005 has been declared "The Year of the Veteran" by the Canadian government in recognition and commemoration of the determination, service and sacrifice of Canada's WW II veterans. Canadian radio amateurs are authorized to use the following special event prefixes during the period May 1-31st, 2005, inclusive: * CF for VA stations * CI0 for VY0 stations
* CG for VE stations * CI1 for VY1 stations
* CH for VO stations * CI2 for VY2 stations

SPECIAL EVENT. The Panazol Hams and the F6KTW ARC will activate the special event station TM6PIE (Peace In Europe) between May 1-14th. QSL Manager F6KTW: Chez M. COISNE, 10 rue Rene, DESCARTES 87350 PANAZOL, FRANCE. QSL via the bureau or direct (+ postage).

SPECIAL EVET (Polish). Look for the following 21 special events stations to be active from Poland between May 1-15th. A special "Victor Day Award" is also available. Please see the following Web page for details: http://www.ot25.pzk.org.pl/htm/Victory%20_Day.htm

3Z1VD by SP1PBW SN60VD by SP4KSY HF7VD by SP7FBQ
HF1VD by SP1GZT HF4VD by SP4ZHT 3Z7VD by SP7PGK

3Z2VD by SP2WN TBA by SP5NZN 3Z8VD by SP8MI
HF3VD by SP3PMA HF60VD by SP5PSL HF9VD by SP9KJM
3Z3VD by SP3ZBY HF6VD by SP6ZDA 3Z9VD by SP9PDG
3Z4VD by SP4KHM 3Z6VD by SP6ZJP SQ60VD by SP5ZRW

SV5, DODECANESE. Operators Wolfgang/DL3DRN and Joachim/DJ5AA will be vacationing on Rhodos Island (EU-001 and WLOTA L-0045), from May 2-16th. The callsigns and bands/modes of activity were not provided. QSL via operators' instructions.

TARA SKIRMISH (Digital Prefix Contest). Bill, NY2U, President of the Troy ARA, wants to remind everyone that the "TARA Skirmish" is coming up on April 16th between 0000-2400z. The particulars are as follows:
Frequencies: 160-6 meters, work stations once per band.
Categories : High, Low (<100w), Great (<20w), QRP (<5w) and SWL.
Exchange: Name and Prefix.
Score: QSOs x WPX prefixes x power multiplier. (High x0.5, Low x1, Great x2 and QRP x3) Multipliers count once per band.
For more information: http://www.n2ty.org/seasons/tara_dpx_rules.html
or send E-mail to (mailto:skirmish-manager@n2ty.org)

TI, COSTA RICA. After his S9 operation (see above) Tono, EA9CP, will be in San Jose, from May 29th to June 5th. As of presstime, his callsign is unknown. He will be active on 10, 15 and 20 meters on SSB only. QSL via EA9CP/1, by the bureau or direct.

TO5G, GLORIOSO ISLAND (DXpedition Postponed!). Dany, F5CW, Technical Coordinator for the 2005 Glorioso DXpedition, announced this past week that the French Army, Navy and Air forces have strongly discouraged the landing of the radio team on Gloriosos at the end of May due to security reasons. The DXpedition has now been postponed and is rescheduled until next October or November 2005. Dany states, "Even if solar conditions are falling down, this late 2005 period could be better for low bands since noise level will be a bit lower and low absorption will be better for Northern Hemisphere. We are going to meet all our sponsors to ask them their choice, either they can wait for next start and keep their support or they prefer we send back support amount and we ask them again next August. However, we will hold our web site in the current configuration with latest news updated soon. All current sponsors will stay in good place. Be sure we are a bit upset with this situation, but we never give up! We are very confident with the next opportunity." Watch the following Web page (in French) for updates: http://glorieuses2005.free.fr/index-fr.htm

TZ, MALI. The members of the International Amateur Radio Volunteers (IARV) are active as TZ6U until April 13th. Their activity over the past weekend has been on 20 meters SSB (around 14190 kHz) and 30 meters CW (around 10103 kHz). However, watch other bands. Suggested activity is expected on 160-10 meters meters using CW and SSB. QSL via JA1UT.

WAZ CW AWARD MANAGER. Floyd Gerald, N5FG, wants it publicized that he is the WAZ Manager for CW WAZ Award Program, has been since January 1st, 2004. The former manager, Paul, K5RT, continues (after over one year) to receive applications sent to him. Some even come registered mail which he has to go to the Post Office to sign for. Floyd states that it is time for the applicants to: 1) Use the proper forms. 2) MOST IMPORTANT: Send them directly to him, and not Paul! It would help the people wanting to receive the WAZ Awards to see that they are sending it to the proper manager! There will come a time in the NEAR future that Paul will have to refuse to accept those that come his way. PLEASE help him spread the word that ALL WAZ applications should be sent to ONLY Floyd at: Floyd Gerald (N5FG), WAZ Manager, 17 Green Hollow Road, Wiggins, MS. 39577 USA. Feel free to contact him. Send any questions via E-mail. ALL this info and ALL the correct forms are available for free download from the CQ WAZ Website at: http://www.cq-amateur-radio.com/wazrules.html

: >than a good mobile 2-meter setup.
:
: And neither of which is as good as even leased space on a commercial
: repeater or trunk system, with high-level sites that have emergency
: power backup.
:
: You can run low-cost used commercial equipment, and even encryption if
: you want.
:
: With the widespread adoption of Nextel, there are a LOT of quiet
: leased systems, even in urban areas where you can negotiate a VERY
: cheap monthly rate for a few users.
:
: Oh and BTW, the government's plan to "turn off" civilian GPS in the
: next major incident has the unintended consequence of killing any
: Cellular/ Nextel or even Simulcast radio system that relies on the GPS
: time clock for synch.
:
: oops.

You information on the ICOM program is out of date. The soldier intercom
has been replaced by the F43G

This is basically a 400 to 450 Mhz radio, with a more power than the FRS
radios that many of the troops are uing on their own. It is basically a
squad level radio, not meant for long range commo. However I do not think
that 20,000 is going to be enough.

BTW, you could purchase your own radio for about $400.

Icom America Wins Large U.S. Army Order for New Radios

F43G Series Offers U.S. Army Soldiers Sophisticated Two-Way Radios

Bellevue, WA - The U.S. Army has selected the Icom F43G series portable
transceiver for in-the-field soldier communications. "We are honored by the

U.S. Army's selection of Icom's two-way radios for soldiers in the field," says Hiro Nakaoka, President of Icom America Inc.

The Icom F43G radios are part of a package known collectively as the Military Bundle. Other elements of the Bundle include a headset, an encryption module, and the accessories needed to complete the custom package. But it's the F43G radios that are the core of the Bundle. These radios were tested extensively by the Army's Battle Lab before a purchase recommendation was made.

The GSA purchase deal is for over 20,000 Bundles and represents the largest government order in Icom America's 25 year history. This order follows on the heels of an earlier, high profile U.S Army order from Icom America - the Soldier Intercom. The new order uses Icom's new, next generation F43G series portable radios. These radios offer more power for today's urban-patrolling soldiers. The extra power helps radio signals "wiggle" around buildings, vehicles and other obstacles.

"We have over 5 years of experience supplying radios to first line Army units," said Chris Lougee, Vice President for Icom America. "The Icom Soldier Intercom was the first use of two-way radios at the squad level. It proved the viability of radios to replace hand and arm signals for coordinating squad actions on an objective." These new models increase transmission security, reduce size and weight, and supply improved battery performance, he added.

The largest previous government order was in 2000, for the U.S. Army's Soldier Intercom portable radio. This new radio differs from the Soldier Intercom in numerous ways. The previous Soldier Intercom was ordered by the Army with specifications for lowering the power level to 1/10th of a single watt.

Icom America's parent company, Icom Inc., was founded in Osaka, Japan. Icom is a publicly held Japanese corporation; its stock is traded on the Osaka and Tokyo Stock Exchange. Icom began as an engineering and manufacturing company, making advanced, compact solid-state radio equipment for use by amateur radio enthusiasts. Icom has since grown to become an industry leader with a product line that includes state-of-the-art communications equipment for land mobile and marine use as well as avionics. Icom America's headquarters are in Bellevue, Washington.

http://www.icomamerica.com/land_mobile/portableuhf/icf43gt_gsmain.asp

Wide frequency range and large channel capacity
The IC-F43G series covers a wide frequency range in one version (Two versions available, 400-470MHz or 450-512 (520) MHz). The 256 memory channel

capacity with 16 memory banks allows you to divide and store a variety of ?exible channel groupings. Easy memory channel selection with a simple rotation of the rotary channel knob.

Small and lightweight body
The IC-F43G series sheds size and weight compared with previous models, weighing just 300g (including BP-231) and measuring only 53(W)×120(H)×32.5(D) mm*. The aluminum die-cast chassis and polycarbonate casing combination meets MIL standard speci?cations.
* 10.6 oz, 23/32(W)x 423/32(H)x19/32(D)

1833. K1MAN GONE FROM THE WWW AND FROM THE AIR

Newsgroup: rec.radio.amateur.misc
Date: 2005-04-10 21:35:19 UTC
From: channel391@juno.com
Message-ID: <1113168919.492076.315960@o13g2000cwo.googlegroups.com>

K1MAN seems to have lost his website and his will to continue fighting the ARRL and FCC. This is posted on qrz.com:

Posted: April 07 2005,04:48

So.. first I don't hear him on the air any more. I assumed that maybe Riley finally did him in.

Then, I do a lookup of his www.k1man.com website and it's no longer there. In fact, I can't find a remnant of the AARA anywhere.

He always made it out to seem as if the AARA had a large amount of members in its ranks. If this was the case, how come they aren't backing him up; i.e. getting his website back up and getting him back on the air. Did his entire "empire" go bankrupt?

Sorry for the re-hash.. but honestly, I felt this too funny not to post about.

Any info out there... let's hear it.

It is with great misgivings that I am about to sell my precious tower.

I am moving and also getting older and not going to put up the tower at he new location.

I have a Telex 55 foot, fold-over, MOTORIZED, self-supporting tower that is in excellent shape. This is a SERIOUSLY HEAVY-DUTY TOWER.

This has a commercially built rotor control box that controls a prop pitch motor that would turn a tank. The prop-pitch motor is included and already mounted. For a few bucks more, I will include the t-6061 mast and even a fiberglass cross-mast.

This jewel is in my backyard and is currently up.

After I take it down, it will be ready to put up and get on the air. I have everything with it including the in-shack control box (HAM_M).

I NEED TO DETERMINE if anyone is seriously interested in this because I have other things that I need to do rather than take down a tower that there is not a serious prospect for.

The tower is in Houston, Texas but is well worth a drive to Texas

I am expecting to offer this for around $2500.00 FIRM.

Thanks

Nice try, Anonymous Lying Coward.

No threat, veiled or otherwise was made.

And I never said anything about "bypass(ing) the authorites"...My only comment was to ask Toiddie "who said anything about the FCC?"

Perhaps we should have YOU tracked down and taken to task for this not-so-subtle effort to suggest an act of lawlessness where no such act or intent existed?

BTW...Why the subterfuge? Didn't have the guts to address this to me directly?

Oh...wait...I forgot myself...You ARE an Anonymous Lying Coward...What was I thinking?????

I have no idea what that rambling BS particular post was trying to say, but I am still waing to hear what exploitation this so-called "smart businessman" engaged his poor, ignorant daughters in in an attempt tomake afe buck trying to sell some cheap radios.

That story is so pathetic, I DARE that miserable piece of sh*t to e-mail me directly (not post on a newsgroup like a chickensh*t) and tell me how much profit he generated from his ignorant daughters' asses. My guess is that if he tells the truth, I can generate that from my friggin' pocket, send it to him, and save 2 or 3 girls that happened to be born to one of the dregs of society from at least a little embarassment.

Let's hear it, BIG-TIME OPERATOR!!!!!!!

Many of the Eimac power triodes and tetrodes are rated for use at AF.

The 3CX400A7/8874 is a compact high-mu power triode
intended for use in zero bias Class B amplifiers in
audio or RF applications. Operation with zero bias
simplifies circuitry and cathode driven operation is
attractive since a power gain as high as twenty can be
obtained.

The 5CX1500A is designed for use as a Class AB1 linear
amplifier in audio or radio frequency applications. Its
characteristic low intermodulation distortion makes it
especially suitable for single sideband service. The
tube is also recommended for use as a Class C RF power
amplifier in CW, FM and AM service.

The 5CX1500A is good for 3200 Watts as a class AB1 audio power amp:

MAXIMUM RATINGS TYPICAL OPERATION
Class Type of Service Plate Voltage (Volts) Plate current (Amps) Plate Voltage (Volts) Screen Voltage (Volts) Plate Current (Amps) Drive Power (Watts) Output Power (kiloWatts)
AB1 AF Amplifier or Modulated 4,000 1.0 3,800 500 1.3 -- 3.22

A look through the catalog at <http://www.cpii.com/eimac/index.html>
is very instructive.

Adding insult to injury, you have to PAY to see those junk.

That's an interesting assertion.

I've been selling stuff there for a couple of years now, and I've never sold a single CB radio, junk or otherwise.

Computer parts, Macs, synthesizers, audio equipment, video production gear, unix systems of various sorts, and various cables, sure, but not a single radio.

Do you guys have to pay to go to ham fleamarkets as BUYERS ?
(Here, you pay as a vendor, but buyers get in free...mind you it pays
to be a vendor as you get a headstart of a couple of hours)

No doubt MIT's charge for using the parking lot and garage is
cosiderable. I suppose by charging the buyers the seller's
fee is kept low, which results in lots of individual sellers
with weird interesting stuff, who as it happens don't sell
much, and wouldn't be there if the seller's fees were higher.

There is an admission charge for buyers. Not sure if there is one for
vendors. When and where is Harvard's flea?

Just my 2 cents...

Just about every hamfest and fleamarket I go to here in PA and NJ
charges an entrance fee for the "ham" only. Kid's and wives are free.

Have fun,

Doug

Yes. The Flea at MIT charges a nominal admission. Other area flea
markets do too.

You can tell them anything you want, Todd.

Making such an accusation, even in Illinois, is known as "Making A False Police Report". It's a crime. But then you really don't have a hard time with breaking the law, now do you? Your posts here clearly indicate you feel completely at ease violating whatever law you want to.

Feel free to give me the name of the filing police officer and I will gladly give them my home number and have them do a call dump.

Did you really think that a silly stunt like this was going to work?

You're more stupid than you look.

Steve, K4YZ

Todd...I know this has been addressed to you before, but since you refuse (or don't know how) to show attributes, who can tell who you're trying to be obscene to?

As for you not wanting to be "inbred"...Oooops...Too late.

I also point out that the Civil War was over 140 years ago. You weren't around for that conflict. You didn't kick anything. You obviously can't kick whatever it is you're taking tonight, either.

Sober up and come back later.

My, oh my, Toddie. You seem to be slipping.

You seem to be suffering from IBS, Irritable Bowel Syndrome.

There ARE professionals to whom you can go for counseling, Todd. It may
behoove you to seek out one of these counselors before you blow one or more
veins in your 'abraham Lincoln' head and start seeing double. Ruptured veins
can also cause Tourette Syndrome, which you seem to be on the verge of.
http://members.tripod.com/~tourette13/

Get help quick, Todd!

(1) If that was your intent, Todd, then I can offer you a very narrow apology for that...However if you were attributing like myself and others have been prodding you about all along, the confusion would have not occured.

(2) You have one name on your legal documents then "sign" another to your posts, yet insist you'd never pretend to be someone else.

(3) I was born and raised just "south" of Cleveland, OH, which if you'll take the time to look is farther NORTH than YOU are, Todd.

Now sober up and try again.

Therein lies MY dilemma.

It's bad enough that Todd has grammar and spelling issues, but his
organization and lack of attributes makes it even worse.

And that with intoxication on substances unknown, and it's really
a challenge to know WHO he was talking to, what he was saying, or what
he what he was trying to accomplish.

To his credit this time, I >>THINK<< he was trying to show that
someone was parroting my screen name and he was being up front about
it...But I am not sure...

Of course if he REALLY wanted to be "stand-up", knowing those
posts are bogus, he'd remove them. He know's the difference between my
posts and others. I'd cetainly remove posts to any "blog" I had that I
knew weren't his...But that's just me...

It's real easy steve, go to the top of the tread and click the link
that says show tree and from there you can see which message is
directed to who. I know with little mental capacity you have it would
be hard for to click that link and show the message tree.

"...top of the tread..."...???

No, Todd, the "tree" has nothing to do with it. And the "tree"
does not show who a message is directed "TO", only "FROM".

What DOES have anything to do with my comments is YOUR failure to
use proper attributes WITHIN THE TEXT of your messages.

For example, in THIS message the very first line is "N9OGL
wrote:". No one has any doubt that I am quoting and responding to YOU.

That link supposes that the fcc will delete the Morse requirement.

Other insiders suggest fcc will NPRM will delete Morse only for General
license, and will INCREASE the test to 20WPM for renewed Extra class,
downgrading all current "Extra Lite" licenses to resurrected Advanced
license (the second time this license has risen from the ashes). ARRL
giveaway program will be denied.

This is the confusing post by you. There is no "tree", this was all written by you toady. I can't tell if you are saying that K4YZ is telling you to stop calling or you are telling him to stop calling? You didn't put any "quotes" anywhere. By the way your other post have been and your 20 or 30 replies here and you starting this thread in the middle of another thread, well toady to put it in a language that only you can understand You Fat BAST*** C*** S***** MFER #*##*!@#$ GET BACK ON THE C***S****** MEDS YOU F***** AS***** MFER!
There is no way to know where you start or stop or what the hell you are saying or even trying to say, even though it doesn't matter what you say as most of it is lies anyway!

Todd N9OGL

Let me get this straight.
Todd says, "if you are google" go to the top.

Toddie...get it right. Use a spell check. Failing that, it may behoove you
to simply shut up.

Your spelling, or lack thereof, is already legend, and your inability to
post cohesive sentences is painfully apparent.

You really should grow up, Todd. Your airheaded comments, poor spelling, and
otherwise disjointed meanderings are becoming the laughing stock of the news
groups.
You should:

1. Grow up
2. Learn to spell, or at least use a spell checker.
3. Shut up.
4. Did I mention the spell checker?

Sorry, Todd, but you just aren't making it.

All it really says is that the FCC is working on an NPRM that may be
out as soon as next month or as late as July. That NPRM will obviously
contain what FCC wants to do as a result of WRC 2003 and the 18
restructuring petitions.

Once the NPRM becomes public, there will be a comment period, then a
reply comment period. Couple of months at least, maybe longer. Probably
the end of 2005 before comments close.

Then FCC will decide what to do and formulate a Report and Order. Last
time they did this it took almost a year. Which translates to fall
2006. Then a couple months before the new rules become effective -
maybe end of 2006.

Of course it could take even longer, or maybe a bit less. But I
wouldn't expect any changes before summer 2006 - and wouldn't be
surprised if it were summer 2007.

Those who defy wanting to learn the code jump at any chance to perpetuate
rumors of code being eliminated. You're right, it will take a while, even if
they were to decide to write a NPRM to do such. If these people jumped into

Alligator infested waters as fast as they do rumors, the population would take a sudden drop. I'm not a "lover" of code, but I have hold a license which required code. 5 WPM is not impossible to learn. It only takes a few minutes a day and about 2 weeks at least to get enough to pass a test. 2 weeks is not long, you probably drove longer on a permit before being allowed to drive on your own. Probably studied the book longer too! It takes little effort. The biggest problem with most is "laziness". Maybe you never will use it again. There are many things you learn in life and may never use again, unless you plan to play on Jeopardy. Many people learned the skeletal system in health class, microorganisms in Biology class. It doesn't mean they use it now. Probably forgot it as soon as they graduated. But, it was "required". It's not a big deal people. Once you get past the "do I have to" and start doing it, you'll amaze yourself at how fast and easy it can be. I DO use code now and then, but not daily like many others do. Everyone has their own thing. Some are into Packet, RTTY, AMTOR, etc, I'm not... To each his own. But we all had to learn "something" about those modes to pass an exam.

SSB off and on from noon to 5p calling CQ.
CW from about 5pm for 1/2 an hour calling CQ with no takers.
SSB from about 10:30 to midnight with a couple of short 10 minute excursions
to CW.

When I and the OM work together, it's SSB as he doesn't work CW.

Sorry to have missed you.

No, of course not. Skeds are considered poor sportsmanship in contests.

You must have been on a band that I had no propagation with then.
Conditions were pretty sorry except for 40, and that wasn't spectacular.

Yes indeed....basically laziness.

I have been thinking back to the late 50/early 60s when I started on my trek down Morse Code lane.

You know what THE MAIN reason was that I learned it? Because I was curious as to what all those beeps and bops were saying that I was hearing on my Zenith.

And it has been a blast ever since.

Look at it this way......how many people do you know that can talk with their fingers?

Speaking of keyboards, that is a perfect example. MANY who are online now - otherwise would never know how to type. BUT to own a computer and/or get online, they "had" to learn - OR - at least they're in the process of learning. It becomes "automatic" after so many hours of use. Same with code.... All it takes is the application of it. Sure, just in computers, many may not become proficient in computer programming, etc (just like not "wanting" to use the code), but they're still learning at some point along the way.

Guess that explains Creationism. They either forgot or just
never did get biology class. And get upset when science
contradicts a trivial off topic section of the Bible.
But there is hope that some people will "get it" and
be able to do something with it. Of course the school
or FCC has to pick and choose what the kids should try
to learn. Spending less time on European medieval kings and
more on Vietnam would make sense, as modern governments are
no longer kings sitting around in castles getting bored
and deciding to have wars for the fun of it. Well, today kings
are called "dictators" anyway. Now to bring this back to
ham radio, is requiring code worth the time prospective
hams would have to spend on it, or maybe more theory should
be asked for today?

I seriously doubt that the FCC would increase code speed for
extras. The medical wavier issue would crop up again, and
the FCC found that to be a PITA. Besides it would be hard
for the FCC to tell old extras from newer extras as IIRC they
didn't keep track of who was who as old extras came up for
renewal.

Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, AD1C, K1XN & GoList, W1EBI, NG3K, W3UR & The Daily DX, W3YY, K4VUD, N4AA & QRZ DX, K8YSE, NE8Z, DL1EK & The DX News Letter, DU1EV, EA5KY, EA7FTR, F5CWU & La Gazette du DX, F5NQL & UFT, F8DQZ & HFDX, G3SWH, HA0HW, I1HYW, I1JQJ/IK1ADH & 425 DX News, I2YSB, IT9DAA, IZ8BRI, IZ8CCW, JI6KVR & JA-IOTA Islands News, M1BYT, PA7FM, PY5EG, SP5UAF, VA3RJ & ICPO, VE3BDB, VK2YJS and VK4FW for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 10th/April, through Sunday, 17th/April there were 224 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E4, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, FY, G, GD, GI, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, R1FJ, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T7, T9, TA, TF, TG, TI, TK, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK0M, VK9N, VP2E, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XX9, XZ, YA, YB, YI, YK, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK1/s, ZK2, ZK3, ZL, ZL7, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2, FIJI. Look for Nao, JK1FNL, to be active as 3D2NA from Mana Island (OC-121), April 24-28th. Activity will be on 40-6 meters CW/SSB/RTTY. QSL via his home callsign, direct or by the bureau.

6W, SENEGAL. Al, 6W1RY (NH7A when stateside), reports that he will be active in the CQ WW SSB Contest (October 29-30th) as a Single-Op/All-Band/ High-Power entry. QSL via F5VHJ or LoTW.

A5, BHUTAN. A report from Sebastien, F8DQZ, indicates that there are two new club stations in Bhutan as per Wangpo Dorji, A51WD. No QSNs have been reported yet, but the callsigns and QTHs were provided as:
1. Shingkhar Amateur Radio Club (A50E)
Shingkhar Primary School, Shingkhar, Zhemgang, Bhutan

2. Bardo Amateur Radio Club (A50F)
Bardo Primary School, Bardo, Zhemgang, Bhutan

ANTARCTIC NEWS.....
During the Mediterraneo DX Club Convention, Antarctic veteran and MDXC member Filippo Corbelli, IK0AIH, reported that while waiting for a special prefix to be issued to the Italian bases in Antarctica, the IR0ANT callsign will be used from the Mario Zucchelli Station (I-01 for the Antarctica Award) during the start of the 21st expedition. The Mediterraneo DX Club will handle the QSL cards for IR0ANT.
ADDED NOTES: If you have not received your card for KC4/IK0AIH's activity from Concordia Station (MN-06 for the Antarctica Award), please E-mail your QSO data to: iz8ccw@mdxc.org
Filippo also reported that the only legitimate amateur radio activities during the latest Italian 20th expedition to Antarctica were those conducted personally by amateur radio operator Mario Pillon (I0QHM) as KC4/I0QHM.

For WAP information and the current WAP bulletin, visit the following Web page at: http://www.ddxc.net

BX3, TAIWAN. Juergen, DJ3KR, is now active as BX3/DJ3KR until June 5th. He was spotted this past week on 30/17 meters CW. Watch these bands between 1100-1700z. QSL via DJ3KR.

DX0, SPRATLY ISLANDS (QRT). Eddie, DU1EV, informs OPDX that Gil, 4F2KWT, took down the antennas at DX0K on Tuesday, April 12th. Eddie states, "It is nice to know that six meters finally opened up last week and Gil was able to work HL and JA stations on the magic band. So now, officially, it is a 160 to 6 meter DXpedition. We did not have any luck with the 6 meter EME attempt." He also states, "What better way to end a DXpedition than by attending the town fiesta. The Municipality of Kalayaan at Pag-Asa Island celebrates its fiesta this week. Gil is a guest of honor at the town fiesta. He shall be taking the ship from Pag-Asa (Thitu) Island to Puerto Princessa, Palawan. Hopefully, he will be back in the mainland by Tuesday or Wednesday next week."

EX, KYRGYZSTAN. Look for Jaak, ES1FB, to be active as EX/ES1FB from April 19-29th. Also, look for Oleg, ES1RA, to be active as EX/ES1RA from April 19th to May 17th. Activity from both operators will be a holiday style operation. QSL EX/ES1FB direct to ES1FB: Jaak Meier, Box 2907, 13102, Tallinn, Estonia. QSL EX/ES1RA direct to ES1RA: Oleg Mir, Box 806, 11702, Tallinn, Estonia.

FT5XO UPDATE. The Microlite Penguins DXpedition Team arrived in Australia at 0000z, Monday April 11th. Robert, SP5XVY, sent Tom, SP5UAF, some pictures from the Kerguelen Island DXpedition and some 24 images can be viewed at: http://www.sn0hq.org/foto/view_album.php?set_albumName=ft5xo

HB0, LIECHTENSTEIN. Remember to look for Gherardo/IZ1DSH, Giovanni/IK1WEG and Riccardo/IZ1GDB to be active as HB0/homecall, April 22-26th. Activity will be on 80/40/30/20 meters CW/SSB. QSL via their home callsigns, direct (QRZ.com) or via the ARI bureau.

HC1, ECUADOR. Dr. Rick, NE8Z, will be active as HC1MD from Tumbaco, April 25th to May 11th. He mentions that Tumbaco is located "just over the hill" from HCJB's massive antenna complex in Pifo, Ecuador. Rick will be using a Kenwood TS-850s/SB200 + Carolina Windom antenna on 80-10 meters CW/SSB. He will be paying special attention to the WARC bands on this trip. Also, look for Rick to be active on 6 meters CW/SSB with a FT-857 and a two element Par Electronics loop. QSL via K8LJG: John Kroll, 3528 Craig Drive, Flint, MI 48506 USA. Rick also suggests to please view the HC-DX Awards at: http://www.octavia.com/qsl/awards.htm

HQ2, HONDURAS. Dan, HQ2DMR, announced this past weekend that anyone needing a QSO and a QSL card from Honduras on 40 meters to look for him during the weekends in April. Watch for him between 2300-0200z, transmitting on 7095 or 7098 kHz and listening on 7225 or 7235 kHz.

HS0, THAILAND. Charly, K4VUD, informs OPDX that he will be active from here as HS0ZCW from April 28th to May 14th. This is a family visit, so his operations will be casual. ADDED NOTE FROM CHARLY: Also note that Charly's Thai wife, Somjit, loves answering QSL cards and has done over 2,000 backlogged bureau cards for K4VUD, HS0ZCW, 9N7UD, A52UD, XW1UD, and KG4FPK. He states, "Gotta love her! She has promised to do the remainder this summer and get all caught up!"

HZ, SAUDI ARABIA. Thomas, HZ1EX, has been very active on 40/17 meters CW. Watch 40 meters (around 7002 kHz) between 2130-0200z and 17 meters (around 18075-18085 kHz) between 1330-1730z. He will be here until June. QSL via SM0BYD.

INTERNATIONAL MARCONI DAY. The International Marconi Day (IMD) is a 24 hour amateur radio event held annually to celebrate the birth of Guglielmo Marconi on April 25, 1874. The IMD event is not a contest. It is an opportunity for amateurs around the world to make point-to-point contact with historic Marconi sites using HF communications techniques similar to those used by Marconi and to gain an attractive Award for achieving the requisite number of Marconi stations worked (5 awards for transmitters, 2 for SWL). The International Marconi Day is usually held on the Saturday closest to Marconi's birthday, when amateur radio stations are established and operated from or near original historic sites. This year, the event will take place on April 23rd. These stations are known as the "Award Stations" and are listed on the IMD Web site at:
http://www.gb4imd.co.uk/awardstns.htm
The list is regularly updated as the various stations confirm their availability to operate. For more information, please visit the Cornish

Radio Amateur Club (CRAC) Web page at: http://gb4imd.co.uk

INTERNATIONAL MARCONI DAY (Station in VK2). From New South Wales, Australia, the Hornsby & Districts Amateur Radio Club and the Wahroonga Amateur Historical Radio Association will be operating a special event station for this day since Wahroonga was the location of the first contact between Britain and Australia - between Marconi in Conarvan, Wales, and Ernest Fisk at Wahroonga, New South Wales. Listen and work VK2IMD the full 24 hours (GMT) on April 23rd, on all bands from 80 to 10 meters as propagation permits.

INTERNATIONAL MUSEUMS WEEKEND 2005. The fifth "International Museums Weekend" (IMW) special event will be taking place this year on the weekend of June 18-19th. Everyone is welcome to join in from their local museum for this very enjoyable and friendly event. The organizer, Harry, M1BYT, asks that all those intending to join in should register their museum. Registration is free of cost via the IMW Web site at: http://ukradioamateur.org/imw/

IOTA NEWS.....
EU-029. Stefan, DB3LSP, will be active as OZ/DB3LSP from Sjaelland Island (DIA SJ-001 for the Danish Islands Award), May 1-14th. Activity will be mainly on CW, but with some SSB and PSK-31. QSL via his home callsign.

EU-032. (Special Event) To commemorate the 60th anniversary of the Liberation of the Oleron Island, Jean-Paul, F5BZK (ex-XE1BZK), will be active as TM6IO from April 25th to May 8th. QSL via his home callsign.

EU-067. Before Tomas, LY1DF, makes his trip to the Dodecanese Islands (EU-001 - see SV5 below), he will activate the Cyclades Islands for one day, April 27th, as SV8/LY1DF. Activity will be 30 meters and up. QSL via LY1DF, by the bureau or direct.

EU-129. Operators DK8MIL, DK7JAN, DO9BS, DG9BTX and DJ9MD will be active April 22-26th as DF0TM from Usedom Island (GIA O-13). Activity will be on 14260 kHz and other HF bands. They will also be on local repeaters and try to operate on 2m SSB. QSL via DF0TM (QRZ.com).

EU-137. Look for Jan/SM7NGH and Fred/SM7DAY to be active as homecall/P from Ven Island (Lighthouse WLH 0780), April 18-20th. QSL via the bureau or their CBA.

J2, DJIBOUTI. Yves, F5PRU/J20FH, is now QRT from Djibouti and is heading to Metropolitan France. All his antennas were dismantled last week. He would to thank all of the hams who made a QSO with J20FH, sometimes in very bad conditions. QSL via his French callsign F5PRU, either by the bureau or direct. He hopes to make another trip to J2 in the near future.

J3, GRENADA. Dick, K5AND, will be active as J3/K5AND during the end of June. Activity will be on 6 meters with a single long yagi and kw and

2 meters with a single 5 element yagi or a group of 4 yagis combined with a kw amp on CW/SSB and 500w on the digital modes. There will be a 2m EME operation. No skeds will be taken. The location is on the far north point of the island giving an excellent take off to Europe and the USA on 6 meters. Several other operators will join, including one YL. More details are to be forthcoming.

JT1, MONGOLIA. Nicola, I0SNY, is expected to be active again as JT1Y between April 21st and May 10th. He also expects to operate as JT1Y/4 from the Gobi Desert. His bands/modes of activity were not provided. QSL via his home callsign, direct or by the bureau.

LX, LUXEMBOURG. Remember to look for Guido/ON4BAG, Frans/ON4LO, Rob/ON6QX and Ivo/ON6UM to be active as LX/homecall, April 22-25th. Activity will be on 160-10 meter CW, SSB and digital modes. QSL via their home callsigns, direct or by the bureau.

NEW ISLAND AWARD. Corrado, IT9DAA, MIA Awards Manager, has announced a new Mediterraneo DX Club project called the "Mediterranean Islands Trophy". The "Mediterranean Islands Trophy" can be earned by contacting stations operating from islands located in the Mediterranean Sea between the period of June 1st and September 30th. For details and rules, visit the Web page at: http://www.mdxc.org/mia

NEW OFFICERS FOR 2005.....
NODXA - On Monday, April 4th, the members of Northern Ohio DX Association elected the following to serve as officers between May 2005 and April 2006: President: Tedd Mirgliotta, KB8NW
Vice President: Dwaine Modock, K8ME
Secretary: Al Moriarty, N8CX
Treasurer: Mary Michaelis, N8DMM
Newsletter Editor: David Autry, WD8IOU

For more information about NODXA, check out the club's Web site at: http://www.papays.com/nodxa.html

YCCC - On Saturday, April 9th, the Yankee Clipper Contest Club held its annual election meeting. The following were elected to serve as officers for the April 2005-March 2006 club year:

President: K1RX, Mark Pride
Vice President: N1IK, Brian Lambert
Treasurer: K1EP, Ed Parish
Secretary: W1EBI, George Harlem
Activities Manager: K1NQ, Dave Jordan

For more information about YCCC, check out the club's Web site at: http://www.yccc.org

PIRATE ALERTS!!!!!!!!!!!!
The following stations have been announced as PIRATE operations: 5T5AFF, 5T5HC, 5T5BAB, 5T5HHN and 5T5LCW.

QSL Manager Fran, EA7FTR, informs OPDX that someone is using ST2NH
on CW, and this is a PIRATE. Nader, ST2NH, has not been active on
CW for a long time. Fran states, "Please DO NOT send QSLs."

QSL INFO AND NEWS.................
6O0CW QSL STATUS. Silvano, I2YSB/6O0CW, informs OPDX that all of the
direct requests received so far have been processed and mailed. Bureau
cards should be sent to M5AAV.

SPECIAL IARU CALLSIGNS AND QSL ROUTES (TNX to Jim, AD1C).
3Z1IARU via SP3MGM HF2IARU via SP2PI LZ8IARU via LZ1BJ

I0QHM/KC4 QSLS. The QSL cards for the last activity from Mario Zucchelli
Station (WAP ITA-01) with the callsign I0QHM/KC4 are now ready and will
soon be in your hands. To see pictures of the QSL, visit the following
Web page at: http://www.ddxc.net/wap
QSLs can be requested through the WAP QSL Manager Luigi, IK8OZZ, direct
or by the bureau.

Online logs for R1ANT, active now from Mirny Base (Antarctica Award
UA-07 and IOTA AN-016), are available at:
http://www.mdxc.org/antarctica/log.htm
QSL via RW1AI: Mikhail Fokin, P.O.Box 13, St. Petersburg, 193312 Russia.

Logs for R1AND, R1ANP, RW1AI/ANT and R1ANT, starting from May 1999,
updated until now, are now available online thanks to Constantin,
UA1AKE at: http://www.qsl.net/ua1ake/logs/

QSL Manager Bill, VK4FW, now has a new E-mail address. Please change
your E-mail address books to: vk4fw@bordernet.com.au
His snail mail address is still the same: Bill Horner, P.O. Box 612,
Childers, 4660, Australia.

Online logs for YE3K, for the last DXpediiton on Kangean Island
(OC-217), are now available at: http://www.mdxc.org
Click on the LOGS link.

S0, WESTERN SAHARA. Luis, EA5KY, Chief Editor of "El mundo del DX",
informs OPDX that activity by S09A last month was legitimate and was
NOT A PIRATE as some individuals have suggested. QSL via EA1BT (by the
bureau or direct).

S7, SEYCHELLES (IOTA Activity). Frederic, HB9CQK, will be active as
S79QK from April 27th to May 8th. His activity will include the activation
of Denis Island (AF-024) and Alphonse Island (AF-033). Operations will
be on the 20/17/15/12/10 meters SSB on the IOTA frequencies. He will use
an IC-706MKIIG with 100 watts, and a 40 meter delta loop antenna. The

log will be uploaded to LoTW. If you want a QSL card, you can QSL via HB9CQK, direct or by the bureau.

SPECIAL EVENT (Interesting Callsign Of The Week). To celebrate the first flight of the A380 Airbus a special callsign will be activated. Look for TM380 (Tango Mike three eight zero - no suffix) to be active from the following cities: Toulouse-Blagnac, Nantes and Saint-Nazaire et Meaulte. These cities are the different places of production of this big plane (south-west France). Activity will be on all modes and bands. Listen for activity on April 18th, the date planned for this flight. QSL via the bureau or direct to F5GNY: 1 rue des Mimosas, F- 31850, BEAUPUY, France.

SPECIAL EVENT. Members of the F6KIF ARC will activate TM8MAI from May 3-17th, to commemorate the 60th anniversary of the treaty signed in Reims on May 7th, 1944, (published on the 8th), ending WWII. Activity will be on HF/VHF/UHF and on CW/SSB/FM. QSL via F4DRC.

SPECIAL EVENT (Update On Dates). Bob Cooke, VE3BDB, reports to OPDX that "operating dates for historic special event station CF3VEDAY have now been confirmed. The station will operate from May 5-12th, inclusive to celebrate the opening of the new Canadian War Museum in Canada on May 8th, a date which coincidentally is the 60th anniversary of Victory in Europe Day (VE-DAY). In addition, 2005 has been declared Year of the Veteran. All Radio Amateurs are asked to observe these important events by working the special event station and inviting Veterans into their radio shacks. This is the first time that a 5-letter suffix has been issued for Amateur Radio in Canada." For more information, including operating schedules, check the CF3VEDAY Web site at: http://www.qsl.net/cf3veday

SV5, DODECANESE. Tomas, LY1DF, will be active as SV5/LY1DF from April 28th to May 4th. Activity will be on 80/30/20/17 meters. QSL via LY1DF, by the bureau or direct.

SV9, CRETE. Rosel/DL3KWR and Hardy/DL3KWF will be active as SV9/DL3KWR and SV9/DL3KWF, respectivelly, now through April 29th. Activity will be mostly on the WARC bands, 80 meters and on CW during their evenings. QSL via their home callsign. E-mail requests for bureau cards can be sent to: dl3kwr@darc.de --or-- dl3kwf@darc.de

T32, EAST KIRIBATI (New IOTA Op!). During the 1st Mediterraneo DX Club Convention held on April 9-10th, plans for a DXpedition to two unnumbered IOTA groups in the Line Islands (East Kiribati) were announced by MDXC members Nando Rubino/IT9YRE (T32Y), Claudio Scaglia/I1SNW (T32SNW) and Alfio Bonanno/IT9EJW (T32EJW). They will operate SSB and CW first from Flint Island (if unable to land there, they will move on to Vostok Island in the same group); the second new one will be Caroline Island (aka Millennium Island). The expedition is scheduled to take place between September 28th and October 15th. QSL direct to their home callsigns (separate envelopes for each operation, please). Donations to help offset the high costs of the expedition will be gratefully accepted and can be sent to IT9YRE: Nando Rubino, P.O. Box 30, 96012 Avola -SR. Italy.

TK, CORSICA (Possible IOTA Activity). Laci/HA0HW and Tomi/HA4DX will be active as TK/HA0HW and TK/HA4DX from Corsica (EU-014) on May 22-29th. They plan to operate on all HF bands on CW, SSB, RTTY and PSK31 with two radios, DunaX and home-made verticals, dipoles on 160/80m. If they find time to go out to one of the small coastal islands (EU-100, EU-104 or EU-164) to operate, they will do it. QSLs are "OK" via the HA QSL Bureau or direct according to the details on QRZ.com.

TM, FRANCE (Special Activities).....
Operator Serge/F5FAB and members of the Millau ARC will activate the callsign TM7VM from the Viaduc of Millaum France, during the following dates: April 19th to May 1st, June 6-18th, July 10-24th, August 14-28th, October 16-30th, November 11th to December 6th and December 17-31st. Activity will be on all HF bands CW and SSB. QSL via F5UJZ.

During the "Printemps de Bourges", one of the biggest "Cultural Week" in France, members of the Bourges ARC will be activate TM5PDB, from April 18-24th. Activity will be on all bands HF and VHF, CW/SSB/Digital. QSL via F8KFJ.

TT9, CHAD. Pierre, TT8AMO (aka HB9AMO, 9Q5BQ and some more...), pleased the "Top-banders" over the past weekend. He replaced his 80 meters dipole with an inverted Vee antenna for the top-band (160m). The apex of this antenna was only at 14 meters high. He used a TS-50 with only 100 watts. NOW FOR THE BAD NEWS. After his top band weekend, there will be no more 160/80m operations. The 80m antenna will be replaced with a 17m antenna. Look for an online log at the following Web page and Pierre said that he will also try to publish a list of the stations he heard on 160m. QSL via PA7FM. The online log is available at:
http://www.pa7fm.nl/logs/tt8amo/logsearch.php

VU, INDIA. Bob, W3YY, will be in Bangalore, India, from April 29th through May 5th, and has received a kind invitation from Miku, VU2WAP, to operate from his station. This is not a DXpedition, so Bob will have to depend on the availability of Miku's station and his own business schedule. Bob hopes to be able to have some significant operating time during the weekend of April 29-31st, and perhaps some brief periods during the remainder of his trip.

WARD 2005. AWARD (Just A Reminder!). Monday, April 18th, is World Amateur Radio Day. There is a World Amateur Radio Day 2005 Award (WARD) available and designed to commemorate the World Amateur Radio Day celebrated by IARU which is on April 18th each year. This year's award celebrates the 80th anniversary of the International Amateur Radio Union (IARU). The AWARD 2005 is issued by the MK QTC, "The Polish Radio Amateurs'Journal", with support of PZK, "The Polish Amateur Radio Union". The WARD 2005 will be issued for the following numbers of contacts: either 10 QSOs on HF bands, or 5 QSOs on VHF bands. All contacts must be made between 0000 and 2400z on April 18, 2005. Send a standard application form (log extract), including the list of QSOs, to: MK QTC, The Radio Amateurs' Journal, Suchacz-Zamek, Wielmozy 5b, 82-340 Tolkmicko, Poland (on or before June 31st, 2005). The price of the WARD 2005 Award is 5 USD or 5 EURO. The full-color award's size: 210 x 297 mm. The WARD 2005 Award is also available to SWLs for the

same numbers of reports. Also, visit the following Web pages for more details: http://ward.radio.org.pl/
http://ward-award.prv.pl/
Also, you can send (for more details) via an E-mail to: qtc@post.pl

WRTC 2006 (Update). Oms, PY5EG, informs OPDX that the "REFEREES SELECTION CRITERIA" for the next WRTC 2006 is now in place. Interested parties can view the details on the following Web page at: http://www.wrtc2006.com

ZL7, CHATHAM ISLANDS. Rick, AI5P, is now active as ZL7/AI5P until April 26th. Activity will be mainly on CW on 40-10 meters. Activity over the past week has been on 30 and 20 meters CW. There has been some 17 meters CW and 20 meters SSB. QSL via AI5P.

ZW6, BRAZIL (Fort Activity). Look for ZW6FSM to be active from Fort Sao Marcos (DFB reference BA-05), April 20-21st. Activity will be SSB only, and on 80/40/20 meters. QSL via PY6KW, direct or by the bureau.

I'm not so sure "more" theory is the answer either. Used to be, you HAD to know electronics when you went for the exams. NO ONE told you what was on the exams. Then some lazy bastard got some political pull and they started to dumb down the theory and put "ALL" possible questions and answers in a book - for someone to read and recall. That isn't teaching anyone - anything. Any idiot can learn that way, to the extent needed. It doesn't do anything to reinforce it in their heads as to what to do with it after. IF they make it more theory, then they'll just make the "idiot" books cover it, and again, you'll have a bunch of people who learned A, B, C or D, not the real meat and potatoes of Electronics. I've seen them come away and not know what a fuse does or some of simplest of schematic symbols they "should" know. Give me a break. Those books today teach them NOTHING. They're nothing

more than the sugar coating of it all. Just enough to get by and HOPE they plan to pursue it further on their own, which MOST - DO NOT. Again, due to LAZINESS.

You're right about the History though, not to lay so much on the past, but work on current affairs. Past is good, but often TOO much time is spent on it. That stuff is building blocks to some extent, history does have a propensity to repeat itself, so you can't "ignore" it as a whole, but spending say a week learning about King Arthur just doesn't get it. I recall our teacher trying to drill shit in our heads about Genghis Khan (sp?). I could give a shit less what he did. What I DID come to ignore and have a need for later in life, was that stuff covered in Health class. I ended up using it a few years out of school.
I wished then I had paid more attention to it. So, I had to "relearn" most of it. Some things DO have their uses.

As to code, actually, it isn't so bad to know - really. Think about it. You have sign language for deaf. IF you plan to talk to a person who is deaf, you better learn it real fast. If you plan to travel - you may need to learn some foreign language, even though most can speak English now. Code "can" have benefits. We had 9 miners trapped about a year ago. They communicated that there were nine, by 9 raps on the pole stuck in the ground. Had someone in the ground and above ground knew code, a more detailed description could have been issued. It could have helped. Before they got the elevator in to get them, they had no idea what "physical" shape the guys were in or any pending dangers under the ground. Maybe you won't use code again once learned, but at some point, it may save a life with the user's intervention. If you're in an auto accident, down in a gully, you have a radio. The mic is broken, so you can't talk. You could key the radio with a key or something and send a message. Hopefully someone knowing code would hear it and be able to let others know. There are many reasons people can give to "not" learn code, but there are just as many as to it's benefits. If it saves only one life, it is worth it.

A few hundred, myself: consider the people who use American Sign Language, for one set, plus all the folks who fingerspell, those who use Signed English, and so on. Not all of 'em are deaf, either: I promised my wife I would learn ASL if she passed Element 1. I'm getting a head start in my promise, because she's doing very well -- and she's working full-time and just a Master's in Education.

Sleep? What's that?

It may be impossible for some. I learned it over a considerably longer
period of time with frequent practice.

> you probably drove longer on a permit before being
> allowed to drive on your own. Probably studied the book longer too!
It takes
> little effort.

I disagree. It took a great effort.

> The biggest problem with most is "laziness".

Was that your problem? If you hadn't been so lazy you could have
learned the code in under a week?

Maybe you never
> will use it again.

Perhaps. I've found little use for it so far. Maybe once I'm an old
fart, have loads of time, and wax nostalgic for things that never were,
I'll take it up and enjoy it, and demand that all learn it.

> There are many things you learn in life and may never use

Indeed. I never had the "do I have to?" attitude as there was no
code-free license when I became a ham. Yet it took me about 9 weeks of
daily practice.

I

I used to teach Novice classes, and I always assumed that anyone could
learn the code if they really wanted to. I found that some people had
difficulty telling the difference between a dit from a dah unless it was
sent very slowy and the dah made a lot longer than the dit, but when
sending a character that contained several dits or dahs or combinations,
they simply could not tell one from the other. It wasn't that they
lacked the skill to learn the code, I could right out characters in dits
and dahs on the board and they could recoginize them, it was an
interpertation problem with the brain of telling the sound of a dit from
the sound of a dah. People with hearing aids often had a difficult time.

Sad that many folks will likely never give themselves the opportunity to bag some of that rare DX that seems to only show up on the bottom of the bands.

Just bagged HZ1EX on 7013 kHz. 99.999% CW op and luvin' it.

I have never been able to see the difference between reading a book
that contains the answers to questions, and reading a question pool.
Both are entered into my memory the same way. Did you know the answers
are often scrambled, that is that the letter answer on the test is not
the letter answer in the pool?

> I've seen them come away and not know
> what a fuse does or some of simplest of schematic symbols they "should"

Wow! I've got a copy of the "Now You're Talking" book. A person would
have to work pretty hard do learn nothing from that.

Morse code is VERY good to know. Good enough that it should continue to
be a part of the test.

Yup, one of so many reasons that Morse code is a good thing. Hams are
all about communication, and communications in all manner of situations.
I love the latest technology, but that technology is sometimes fragile.
Sometimes life and death, health and welfare might just come down to two
skilled operators who can make an old communications method on primitive
equipment sing its simple yet powerful song.

Took me 45 minutes a day for over 6 months, plus one failed test to get
to 5 wpm.

I'm all in favor of Morse code testing, but you guys have to show some
understanding that it isn't that easy for a lot of people.

I aced the writtens, without a whole lot of study by comparison to a
lot of people. I don't go around calling them retards or stupid.

>

Eh - I had the code down in 2 weeks for the Novice exam. AND I'm now an Extra. Been licensed since the early 80s.
Yeah, I probably could have learned it in under a week, if I pushed myself. Most anyone will tell you - it isn't good to do such. Besides, at that time, I was chasing rug rats - so study time was premium. Most recommendations are 15 minutes to a half hour a day. That hardly makes it possible in a week. I used the words " "AT LEAST" 2 WEEKS". Some are faster learners than others, that is a given. BUT my point was, you have to get started to learn ANYTHING. You can't absorb it through osmosis. Back to the timing thing, I hope someone from the military can step in to tell us how much time they were given to get the code down. I think they had to "Cram".

> Maybe you never
>> will use it again.

Probably the same age bracket as me. I do listen to call signs now and then on the scanner to pick out the services they represent - if I don't immediately know who the service is. I do listen some times to code on the H.F. Bands.

And you stuck with it!!!!!!!! You didn't quit, and it got you where you wanted to be. OR had to be - for your class of license. 2 weeks, 9 weeks, so what... you did it. A milestone to be proud of. No one can fault you for that effort.

Funny thing is, we're all arguing pros and cons and in the end, it won't matter. WE do not have control. So, if we're going to debate the issues we have no control over, may as well keep it clean. Hardly any of us know the other and it isn't worth making enemies over. Certainly not worth name calling.... Whether I'm right or wrong, I do value opposing view points. Everyone has a right to his/her own opinion. It sure will be interesting to see how it all unfolds. I think in the end, we both know the answer to that. Pro or con, it is a matter of time. May be a year, may be 5, but it will come to pass.

Testing is one thing, "studying"' is another. Most "tests" don't give you
the answers in a book. Rather it is a conglomeration of books which a person
has had to read to ascertain the knowledge. IF it is coming to that, then it
is no wonder this country is dumbing down.

>> That isn't teaching anyone - anything. Any idiot can learn that way, to

Those books do not cover electronics in great detail. They gloss over
subjects. There was a time you had to "build" a working circuit - to pass.
Yes, I'm well aware that the answers are mixed up in the test pools as
opposed to the books. Back when Heathkit was in business, they had books for
each class of license. Those books had a similar pattern, but they drilled
stuff into your head. They seemed to explain things a lot better and in more
detail. Maybe I'm just too used to the "learning" methods of yesteryear.

I try to help! And yes, as we age, we do forget things. I used to have
several dozen frequencies memorized and as to service. I'm lucky if I can
recall 10 of them - now. I'm sure there are symbols people can forget. But
my example of the fuse, it is sad when you don't know what a fuse is for!
That is like the most basic principle.

The Now Your Talking - Book, is probably one of if not "thee" only in depth books out there at this time. I was referring - and should have been a bit more specific, to the question and answer guides with something like a 2 sentence explanation of a procedure, theory, etc. In my opinion, they don't teach a thing. They just provide the questions and answers. Study it long enough, you'll get enough memorized to pass, yes... but then you're stuck because you know little "background". I believe it used to be, if a person had the minimum of an Advanced license, he/she could use that as somewhat of a credential for a job in electronics. Now, "I" wouldn't dare think of hiring anyone with just having used the Q/A books. That is my opinion - for what it is worth.

You can't be serious! (And here I was under the impression you made you
living in an educational environment.) No wonder "Johnny can't read"!

The purpose of the examination is to determine if the prospective licensee
understands some things about amateur rules, about elementary transmitter
and receiver functions, basic electricity, amateur communications procedure,
and safety.

Knowing ahead of time the VERBATIM questions and VERBATIM correct answer
reduces the test to a simple test of memory. The applicant need not
UNDERSTAND a damned thing, but only have normally developed memorization
skills.

I have no problem with Q&A study aids containing sample questions which
guide the student through the appropriate study material, but the actual
VERBATIM examination material should NOT be available to the student
(applicant), or there is no reason to UNDERSTAND the material --- just
memorize the test.

I have used computers for over 20 years and I still can't touch
type. I wanted to take a typing class in high school bout "Boys"
weren't allowed to take the class back in the '60s at my high school. I
have to look at the keyboard while i type with two fingers. Carpal
tunnel and nerve damage in my wrists doesn't help the situation either.

I was interested in Amateur Radio back in the late '60s but quickly
lost interest in HF. I wanted to work 144, 432 and up, where code
wasn't used so I went into broadcast and CATV engineering, followed by
working for a company that manufactured microwave telemetry equipment.
I discovered I had more fun making equipment work than using it. Now
I'm 100% disabled and I plan to spend some time restoring the old
Amateur Radio receivers in my small collection.

My current project is a National NC183R. I may use it to listen to
some international broadcasts, but I'll probably sell it after I'm done
working on it. I lose interest in most equipment after I have it
working properly.

The local ham club is looking for people to take classes with "Now
Your Talking" rather than try to find people with any electronics
background. I offered to help maintain their club equipment but they
brushed me off because I don't have a ham ticket. I still have a half
way decent RF bench, but nothing compared to the $1,000,000 plus benches
of test equipment I had at Microdyne.

I never had any formal electronics training, yet I ws a broadcast
engineer, and a engineering tech for some products at Microdyne. I
learned it because I wanted to. I went to work part time in a TV shop at
13 after school and on Saturdays. When I was drafted I was tested to
prove I didn't know electronics but it backfired. I not only passed the
MOS test for Broadcast Engineer at Ft Knox, I was told I had received
the highest score on record for the test. These are some of the reasons
for my sig file. :-)

Ok.... It took "me" 2 weeks, I know others who learned it quickly, but I
can't provide a time frame. Yes, code "can" be harder for others to pick up.
I don't doubt that for a minute. Point is, you have to put one foot in front
of the other and stick with it, to get down the path to learn it. Many don't
want to start, and whine about it without ever putting forth effort. Hell, I
know people who bitched about having to look at the "basic" Q/A manual! One
remark was "Do I "have" to learn all this?" Another - "Do I "have" to read
all these questions?" But yet they want a license. Pure laziness. Licenses
should be "earned" not given away. People are least likely to respect
something "given" to them. The bands are already showing signs of
deterioration from people who just don't care.

I broke into computers with a Radio Shack computer. Model III - I think it was. Anyway, I typed using hunt and peck. Given the keyboard lay out, if I had stuck with it, I may have learned to type a lot sooner. I was getting used to it. But, life changed and I had to sell it. Then later on, I got a Commodore 64 and it was a pain in the ass - to me, with all those dumb commands and keyboard functions. Though I used it quite a bit, I despised it. Then I got a desktop 386. I was still using hunt and peck, but now I felt I was in the "real" world of computers. I found the keyboard rather easy to manipulate and understand. It took about a year - maybe a little less - of hunt and peck typing. I am in positions where I do a lot of typing of letters and such. One day I was typing a letter and it suddenly dawned on me, I hadn't looked at the keyboard the whole time I was typing. I was flabbergasted. At some point, it all kicked in. When I was in high school - 9th grade I believe, I took typing, I had no choice - it was given to all. I bombed it. I couldn't type to save my ass - of course, back then, I could care less - I was into girls and other attractions. Now I type pretty well. Not as good as say some secretaries I know, but pretty damned well for how it came to be. USE is 1/2 the battle. If you want it bad enough, give it a little effort, it will come to you.

Yup, I do. And sorry, but I can read the book, or read the pool, and
get the same thing. The answers are just more verbose in the books.

> The purpose of the examination is to determine if the prospective licensee

The concept of "memorizing" the Q and A of say the Extra pool is
amusing. Especially when there is a little scrambling going on for the
answers.

Personally, I took the on-line tests, and those questions that I missed
were looked up. Mostly without reference to the question pool, except
for the ones for band edges. The band edges are rote memorization
anyhow. Then I went back and retook the tests until I aced them just
about every time. That was a lot easier than rote memorization of 800
(IIRC) some questions.

Well, whatchya gonna do? The tests themselves are only the beginning, be they the "super easy" tests administered today, or the "incredibly hard" tests administered under the steely glare of an F.C.C. field agent at the time when hams were real men and women.

I've looked at some of the older questions. The only thing about them that is difficult is that they tend to pertain to operating with equipment and different condition than today.

'Way to go Bert! That's a tough one, there aren't a whole lot of HZs on the air. "Back when" the only HZ on the air for years was HZ1HZ. He was only on 40M CW and usually only in the major DX contests so he was a real "catch". Problem with him was that he had about the worst bug swing most of us have ever heard, absolutely indecipherable. Thank God he wasn't a ragchewer. But that was OK because that swing was his immediate "identifier" and ya knew who it had to be even if ya could hardly copy him in the piles. I have no idea what their rules are today but back then only members of the royal family were allowed to get on the ham bands.

Serious HF dxers aren't serious unless they work both phone and CW, ya have to do both or else yer shooting yerself in the foot.

You hit that part right on the head. My XYL has a deep notch in her hearing response curve, from about 400 Hz to about 2 KHz, due to playing viola in a symphony orchestra for 15 years, sitting right in front of the brass section[1]. She's having the very devil of a time with Morse, mostly because she has problems distinguishing between dit and dah. She has learned not to trust her ears, and now she's trying to learn to read with them. The deep notch right where most people tune to read CW and where the various tapes, CDs, and tutor programs all put the tone, also makes it very difficult for her.

When she passes Element 1, I have to go learn American Sign Language and pass a proficiency test.

[1] I'll bet most people don't think much about hearing damage in people playing in symphony orchestras. It's fairly common.

No, the only thing harder was that those were just samples, and you had to
actually understand the underlying material because the question on the
examination would be different.

From your description of "take the online test until I can pass it, then
rush down to the VE session", I expect that you'd be another Len Anderson
under those conditions, on the outside looking in.

I have yet, a couple samples of the "FCC" study guides from days gone by. They told you what areas "may" be covered on their exams and a "typical" question. For the most part, for each class, they were one side - of a 8.5 x 11 sheet. Not looking at them, I think one or two may have been 2 sides. They did NOT divulge "actual" test content. You "had" to know electronics and any rules and regulations when you went there or else you wasted a trip, pure and simple. One class builds on the other, but back then, the tests got a hell of a lot harder as you climbed the ladder. They were in some cases, as tough as the Commercial exams. You couldn't get away with just memorizing a bunch of answers in a Q/A guide. You were only fooling yourself if you thought you could get away with that.

Not used by whom? I frequently use CW on the VHF, UHF, and microwave bands -
perhaps moreso than SSB and certainly at least as much.

Thanks Brian. I'm havin' gobs of fun and have broken out the K2/100 running
approx. 70 Watts. I'm about a third of the way through toward DXCC and need
an Asian contact for WAC.

I will heed your advice re. using both phone and CW. I do hop on 10 using
phone while commuting to and from work, but in the shack, well... ;-)

To be honest, I suppose I just find the CW itself fun. I'm also a big WW II
buff and was quite honored to work W5E over the weekend, who was operating
from a Boeing B-17 bomber. The op was using the vintage onboard gear. It's
humbling to think of the transmissions that have traveled through that gear.
Tnx agn es hpe c u ota. Take care es...

they
>were given to get the code down. I think they had to "Cram".

"Caveat," I was in the military, the United States Army,
voluntary enlistment beginning 13 March 1953. Went from
Basic to Signal School at Fort Monmouth, NJ. Amount of
Signal School time spent on morse code? ZERO! NO class,
NO "cramming."

At that time the ONLY military occupation specialty
in the Army requiring morsemanship was Field Radio.

Field Radio then required passing 20 WPM, was taught
at Camp Gordon (later Fort Gordon, now the home of the
Signal Corps). Drop-out rate was roughly a quarter of
all starting...that I know about. Those that didn't
make it, but had some apitude for electronics, got to
go to Inside Plant Telephone, Outside Plant Telephone,
Carrier, Teleprinter Operator, Field Wireman...or the
Infantry. :-)

My Signal School classes taught Microwave Radio Relay
(at a time when there was little of such operational).
Radar was also taught at Fort Monmouth, had the same
basic electronics as Microwave. I got assigned to a
Fixed Station Transmitter site in Japan. Got all of
about a day's worth of on-site "training" to operate
one of three dozen HF transmitters having a minimum of
1 KW output. NO MORSEMANSHIP NEEDED THERE. NO MORSE
USED at the third-largest station in the Army Command
and Administrative Network.

>immediately know who the service is. I do listen some times to code on
the
>H.F. Bands.

...or what you think is morse. :-) There's very LITTLE
morse code on HF nowadays...EXCEPT inside the ham bands.

>>> There are many things you learn in life and may never use

>what... you did it. A milestone to be proud of. No one can fault you
for
>that effort.

Riiiight, Coach Lector. :-)

After my release from active duty in 1956, I thought it good to get a Commercial Radiotelephone License. Lots of job opportunities with that then. Couldn't find a Q&A book in town but I got a copy of the entire FCC regulations from a good guy at a local broadcast station, studied that and got my First 'Phone on the first sitting in Chicago, 90 miles away (didn't walk, rode the train, kept my shoes on even if there was no snow). Moved to L.A. at the end of '56, started at Art Center School of Design to become an illustrator. Worked during the day at Hughes Aircraft, found out that illustrators didn't make much money, liked electronics (already spent three years in Army communications) and switched to Electronics Engineering. Took me 15 years to complete that due to job requirements making me miss whole semesters. Got engineering responsibility, title, and pay before any "certificate" (suitable for framing) awarded (sheep did not sacrifice their skins for graduates, regardless of what is said).

In between semesters, I thought it a neat thing to learn this morse code stuff, get a fancy callsign to "sign after my name" (youth can be misleading on what is important). Got to roughly 8 WPM clean copy using practice tapes (magnetic, reel-to-reel, cassettes had not yet been invented in those 60s days). Stopped after that plateau, wondered "whatinhell am I doing spending all this time on morse?" I'd already spent three full years on Army communications at a major station (220 thousand messages a month in 1955), had become a supervisor, did finally work on microwave radio relay operations in the service, was now an employee of Ramo-Wooldridge Corp. in electronic warfare group, and the

Class D CBs had already started. I'd gotten the First 'Phone, worked on HF, was now working on more of the EM spectrum than any ham of today can use, already had a good home workshop and was coming along on professional design. I didn't "NEED MORSE" to GET ON THE AIR. I had already done that, perfectly legal, without fault.

I had tossed the idea of getting a "title" (the callsign) since there was MUCH MORE electronics coming along. The first of the ICs had already hit the market and some of us were tinkering with the first personal computers, rolling our own without benefit of MITs or Apple or SwTP kits (hadn't come out yet). PLENTY of fun and games in electronics AND radio to be interested in.

>>> I DO use code now and then, but not daily like many others do. Everyone has
>>> their own thing. Some are into Packet, RTTY, AMTOR, etc, I'm not...To each
>>> his own. But we all had to learn "something" about those modes to pass an
>>> exam.

Oooooo! "PASS THE (code) EXAM!"

Geez, poor babies, like an amateur exam is "Nobel Laureate" material? Like "rocket science?" Yeah... a "life accomplishment!" :-)

I used to "pass a test" every week...on payday. If I didn't KNOW what was needed on the job, to do the things my bosses had given me responsibility for, I wouldn't "pass that exam." No paycheck. Bye.

I never failed such an exam. I never failed any exam in college courses, either. I just kept on working in engineering design...and having to constantly keep on learning. The state of the electronics arts have NOT ceased to advance...not one iota of stopping.

>Funny thing is, we're all arguing pros and cons and in the end, it won't
>matter. WE do not have control.

NO NO NO!!! WRONG IN HERE!!!

The NO-CODE TEST ADVOCATE extras "HAVE CONTROL!" At least three have "forbidden" any non-amateur to EVER say anything about getting INTO amateur radio! Such folk are, as these gods of radio put it, "NOT INVOLVED!"

Damn the First Amendment (say those three). THEY "rule" on What Shall Be in U.S. amateur radio!

Their clubhouse door is CLOSED to "outsiders." [so are
their minds, BTASE...)

>So, if we're going to debate the issues we
>have no control over, may as well keep it clean.

What is "clean?" Anything done the way the ARRL says
is "clean?" Anything done to show "committment" and
"dedication" to amateurism is "clean?" Does "clean"
mean that ALL must obey the olde-fahrt amateur extras
who cuss at all the (evil) no-coders?

Does "clean" mean the usual Double Standard in this
newsgroup? All the PCTA extras can cuss at others
but everyone else has to be OH so polite, civil,
obediant, and respectful to their MIGHTY personal
accomplishments?

>Hardly any of us know the
>other and it isn't worth making enemies over.

Quite true, but that is NOT practiced in here. Look
at the labels of "PUTZ," "LIAR," "COWARD" that are
tossed out freely by these MIGHTY PCTA extras!

>Certainly not worth name calling....

It MUST be "worth it" to these stalwart, noble, good
and true MORSEMEN. They seem to thrive on it.

>Whether I'm right or wrong, I do value opposing view points.
>Everyone has a right to his/her own opinion.

Commendable and should be the operative ethic in here.

Unfortunately, it is NOT SO.

>Pro or con, it is a matter of time. May be a year, may be 5, but it
will
>come to pass.

Absolutely. But...that will be the END of the ARS
(Archaic Radiotelegraphy Society).

I guess it was too much to ask you to actually comment on
something you KNOW about, is it, Lennie...?!?!

HUUUUUUGGGGGGGEEEEEE snip of usual Lennie reliving his youth by
recounting his "good ole Army days..."...But still without really
answering the original correspondant's questions...

"Now You're Talking" is for folks with no prior background. The
idea being to introduce those who DON'T have that prior background.

> > I offered to help maintain their club equipment but they

I am sure the offer was appreicated, Mike, it it IS an "Amateur
Radio" club. Do you have an aversion to getting licensed?

Actually, not really Mike.

Welcome to RRAP, wherein our resident
"used-to-be-an-engineer-and-know-everything-better-than-you"
representitive, Len "Lennie" Anderson endears himself and makes friends
by calling them Nazis, thugs, elitists, etc, then crying foul when
"called" on it.

> Trust me on that if you haven't seen others' received
> flak.

Trusting Lennie Anderson on ANYthing is like letting Jack
Kevorkian make your health care decisions for you.

Do a Google on "Lenover21@aol.com", "Lenof21@aol.com",
NOCWTEST@aol.com (before winter 2001, I believe...)

Lennie's "reputation" for honesty, trustworthiness and
dependability are less than adequate.

> Still a professional electron pusher (and long-time
> electronics hobbyist) but one doesn't do it during
> regular office hours.

You don't do it during OFF hours either, judging by your complete
lack of evidence on ANY "hobbyist" project other than listening to the
ATIS at LAX on your scanner.

Hope you'll get a ticket at one level or another, Mike...there's
a lot of fun to be had...If some club was rude to you, don't think it's
the whole tamale.

Yup. I must confess that I kind of drew you and some folks into this a bit, because I have some significant hearing defects. Several 60+ db notches,esp at the mid and higher frequencies and two separate tones of tinnitis, a different frequency for each ear. I haven't had a quiet moment for 30 years or more. When conversing with people, I read lips. I understand vey much the situation of the fellow whose wife has notches in her hearing.(conjecture alert) I would also say I suspect that the constant noise in my ears has turned of parts of my brain that process sound. And that is probably why I had such a hard time (conjecture alert off) All I can say for teh folks with hearing problems is that study, practice, and most importantly, relaxation during copying is the key.

Does 6 months of constant hard effort indicate the desire to "stick with it"?

> Many don't
> want to start, and whine about it without ever putting forth effort. Hell, I

Most of what you say , I agree with. If a person doesn't want to study,
they shouldn't have a license

> Radio" club. Do you have an aversion to getting licensed?

No, but If I had to send CW I would have to use a computer keyboard
because my hands are stiff and I have almost no feeling left, other than
a constant dull pain. The ability to do delicate work at any reasonable
speed is gone. I have severe tinitus and get migraines easily so
listening to the heterodynes and static quickly trigger headaches so I
can't even think about long hours of listening to HF signals like I did
as a kid.

I have been around hams and radio clubs since the '60s. Some are the salt of the earth, and others are a pain in the ass just like any other large group of people. One club was strictly for the rich blowhards who did nothing but argue about who spent the most o their radios, had the biggest lightning farm in their back 40 but they never seemed to do anything but argue with each other. A few other small groups were interested in homebrewing a complete station, and had a good grounding in electronics. You could have conversations about equipment, design and operating the equipment and they knew what they were talking about. I helped start the ham radio club at my high school in the late '60s. The school system provided us with a small corner for the radios and a teacher for a couple hours a week so we could be in the school after hours. I got people to donate dead radios and TVs. I repaired them, sold them and raised close to $1000 to buy parts and equipment. As soon as the station was on the air the three licensed hams in the club spent all their time either on the air tying up all the equipment or arguing that it wasn't their fault no one else could use it because they didn't have a license, rather than do like they promised and help others learn the code and get their ticket. Not long after that I was drafted and spent a couple years in the Army. After that I did two way radio repair, broadcast and electronics manufacturing. These days the only mode i would enjoy would be VHF or higher, and I'd probably spend more time building radios than using them. BTW, the board of directors of the local club has a couple retired EEs who look down on everyone else who doesn't have a degree, or hasn't been on the air for teen years or more. I know a number of local hams who dropped out of the club and gave up on ham radio altogether because of club politics. The only thing they seem to do right is have their small hamfest at their club headquarters and not charge people for a ticket to enter to buy or browse. I went to the last one to try to find some old friends and came home with a full truckload of parts and damaged old equipment to repair or use for parts. I ran into a half dozen people I had lost contact with and had a little fun, till my legs gave out.

When I lived in Ohio I sold parts and reconditioned equipment at the Dayton and Cincinnati hamfests. I made a lot of friends and had a lot of repeat customers but I find very few hams in Florida who even know which end of a soldering iron to pick up. I had on guy yelling at me at

the last hamfest I sold at because I had computer cable and connectors, but they weren't assembled. He was yelling, The day I can't buy what I need already assembled, is the day i sell my station. I politely suggested he sell it right away and do other hams a big favor by getting off the air.

Tsk, tsk, tsk, "Melanoma," I've been INSIDE the world of
electronics and radio for the last half century. Slightly
MORE than a half century. As a professional, that is.

Gave up trying to add an amateur radio license to the
old (1956 granted) First 'Phone license collection about
four decades ago (give or take). I thought it might be
nice to take it up again now in retirement, like for fun,
but U.S. amateur radio seems to have evolved into
SERIOUS BUSINESS! Everyone all uptight and demanding
absolute and instant obediance from all the Dill
Instructors swaggering about, trying to whack the
hobbyists into SHAPE for the SERVICE!!! :-)

I don't see where many are into ham radio for "fun" in
here. All are acting like RADDIO KOPS, complete with
shiny badges of RANK, etc. :-)

Good luck on your chemotherapy...

> dah. People with hearing aids often had a difficult time.

You can get special tests and use special accomodations (such as code with longer dahs than normal making for more of a distinction in dits and dahs) if their hearing is truly a problem. My ex had a 70% hearing loss in each ear AND constant ringing in the ears. However, he managed his 5wpm without special accomodations other than using headphones and a very loud volume. Other people might need a different pitch or need the dits and dahs separated by pitch either for their initial learning exercise or even for the test.

People with hearing aids will often have problems with many sounds not just code. The training and test material must be set to a pitch that they can hear.

The number one reason people have problem with code is unrealistic expectations on how quickly they can learn it. They see the "wunderkinds" who can do it in a few days and think they are failures if they can't duplicate it. In reality the average person needs TWO MONTHS OF DAILY PRACTICE FOR 30 MINUTES PER DAY. Until they have done that, they can't say whether they have a problem learning it or not. And of course they must use good training methods. After that period of time, even if they don't yet have it down, they will be seeing the light at the end of the tunnel.

The second biggest reason people have a problem with code is simply not committing to learning it.

I agree with you Mike. I hate it when I hear someone say "it only took me a
few days" as that raises unrealistic expectations on the part of the
students. It becomes very hard to convince them that they will probably
need more time than that and to keep them motivated to keep working on it.
The average person needs 30 hours of study (1/2 per EVERY day for 60 days)
to get there. Some will take longer such as yourself but at least once they
have put in the 30 hours, they will be able to tell that they are making
progress even if it takes longer for them.

Len, I was drafted in 1972. I was working in a TV shop and repairing ham radios on the side. They told me I would either drive a truck or be a cook. I raised hell. I was told by the draft board that if I didn't have a background in electronics they would not only not draft me, but they wouldn't even let me enlist because of my health. So a couple months later I'm yelling at an E8 and a Captain that I was not going to drive a truck, and I was not going to cook. I told them about the conversation with my draft board. The sergeant laughed and told me "I'm going to do you a favor and prove you don't know the first dam thing about electronics" He scheduled a 6 AM for me to take the 26T20 MOS test which was called" Television equipment repairman" It was the Army's equivalent of the FCC first class ticket. They pulled every trick in the book to make sure I failed, including ripping the last two pages from the test so only 88 of the 110 questions were there. I had 2 hours & 15 minutes to take the test. I turned it in 17 minutes later. The sergeant laughed and said, I see you've given up. I grinned and said, No, I'm done. He started grading it and his eyes kept getting larger. He got to the end ant went over it two more times then stuck out his hand and said, "Son, I apologize. You got 82 of the 88 questions right. That's the best score I've seen on this test, even when I had the full copy." I was awarded 26T20 as a civilian acquired skill that was a three year school at Ft. Monmoth. I worked in CATV, CARS, installed a nice PA system for the General's conference room at Ft Rucker, and did a little RADAR before I was sent to Alaska to the AFRTS radio & TV station to work as one of the engineers. I made E4 in 18 months and received a letter of commendation from the commanding general of the three Army bases in Alaska.

Just before I got out of the Army the FCC stopped allowing veterans to convert the 26T20 rating to a First phone without taking the test again. I was bored with broadcast anyway so I did commercial sound and industrial electronics. Later I did early personal computer and monitor repair.

Several engineers at Microdyne wanted to know why I didn't have an EE degree because I knew more about some of our older products than they did. They also knew they couldn't bullshit me when I limped into engineering with a handful of papers. I was there for results. I could walk into the engineering department and the place would go quiet as they looked for any excuse to grab something and leave through the other hallway. It didn't take them long to find out that I not only found a problem, I had found a least one valid solution. My supervisor laughed and told me, "You just won't take no for an answer, will you?" I shrugged and said, No, and I won't take "Yes" if I don't believe them.

After all the early problems with engineering my supervisor was asked to release me to them to be an EET on their newest DSP based telemetry system. They knew I would iron out a lot of problems before the radio hit the production floor. I redesigned several test fixtures and re-wrote most of the test procedures into a form the guys on the floor could follow. Then I went through all the BS of our becoming ISO 9001 certified. I told my bosses that they better keep the UL inspector away from my bench during their quarterly audits because I didn't mind calling an idiot an idiot to their face.

We had basic models that were customized to the customer's needs. I also did a lot of preliminary testing of new components, boards, and modules before they were released to production so I had a lot of data books and marked drawings on my bench. ISO 9001, as they set it up did not let the techs keep any notes or write anything on any drawing for future reference. I was no longer allowed to maintain test software I wrote for an automated test fixture and I didn't want a pencil pushing outsider in my way while I was working. I had a 350 MHz four channel scope on my bench, but if a test procedure specified a 20 Mhz scope the idiots insisted that you couldn't use the 20 Mhz filter in a better scope. Even worse, they sent someone new for every audit so we had to go through the same mess each time. One would insist a process was wrong. We would change it to suit him or her. The next one wanted it changed back.

BTW I worked on almost every board or module for a special broadband telemetry receiver we built for the International Space Station. These days I work on old ham receivers and test equipment when I feel well enough to spend a couple hours at the bench.

Most of the computer programs let you select a pitch you like. Of course
you would have to arrange with the VE team well in advance of the test to
have one set up at that pitch for her testing.

Or just make sure that you can turn the volume WAY up just like my ex had to
(70% hearing loss in each ear and constant ringing of the ears).

The test pools are large enough that it's much easier to learn the material
than memorize all the questions and answers. The Extra class pool is
something like 800 questions even though only 50 appear on the test. I'd
much rather learn the equation and how to use it than try to memorize say 10
different question/answer combinations for the material covered by that
equation.

That's all well and good Mike and no doubt you're a quite competent RF tech, not even a discussion. But I think you're missing some critical points here. Rumors to the contrary ham radio is overwhelmingly a communications hobby, it is NOT an electronics hobby as such. Sure there are any number of high-end electronics gurus who also have ham tickets and exercise their skills on the bands, in the clubs and even in this funny-farm of a USENET group. But they're not the heart & soul of ham radio today for certain and I'm not particularly convinced they ever were. In general the average ham learns as much about electronics as he/she needs to satisfy their enjoyment of the hobby. Which on average ain't much in this day of cheap whizzy plug 'n play equipment. Beast on reality as you might but that's the way it is.

In this sense and given the obvious lack of interest in the arcane details of electronics amongst the average members of the average neighborhood ham radio club you should not have known that your offer to participate was a no-counter. They don't "maintain" their radios, they don't need your expertise, they simply ship their broken radios off to the repair shops to get fixed. In short "Now You're Talking" fits their agenda and your's simply does not. In another sense ham radio clubs are private entities conventionally for hams and prospective hams only. As an analogy what you did was show up at a bow-hunters club with a .45-70 powder-burner and expect any interest in an offer to "help".

Great! But Fort Monmouth changed considerably from
when I was there in '52 to when you were there 20
years later. :-)

A prime example was that there was NO CATV or any
TV courses available nor the curricula for same.
I'm not even sure where the AFRS (later AFRTS) guys
went to get electronics training for their broadcast
stations. AFRS was quite separate from regular Army
communications.

Also, in an odd quirk at the time, ALL rank promotions
were frozen while IN any school. Once one got out
(no "graduation ceremonies"), they started counting
time-in-grade. :-)

Sigh. I didn't know the Army had gotten so generous
with conversions of skills to civilian licenses. :-)

I lucked out on assignments after Signal School, even
though it was overseas. Couldn't have asked for a

better assignment except maybe in Europe as part of
ACAN.

Outstanding that you are still active! My old office
cubicle buddy from RCA days (only a month younger than
myself) suffers from Parkinson's disease (kept down
from deleterious effects, thank God), yet he had
enough soup left that he fixed me up with an HP 608 and
HP 606 generator when I got married (again). He's
on 20 meters every Saturday after fixing up his old
tube clunker transceiver.

I'm still bopping around with only minor problems, none
worth mentioning. But, I come from a family of long
livers (oh...about three feet or so, some would say).
:-)

Most of the hams I knew as a kid were home brewers. They were not
designers but they could build a piece of equipment form a magazine
article or the handbook. I lived about an hour from Mendelson's in
dayton Ohio, and I ran into a lot of hams there, digging through the
unmarked bins of parts to build their latest project or repair one of
their projects.

> In general the average ham learns as much about electronics
> as he/she needs to satisfy their enjoyment of the hobby. Which on
> average ain't much in this day of cheap whizzy plug 'n play equipment.
> Beast on reality as you might but that's the way it is.

The whole idea of a rig that isn't intended to be serviced is what
kills my interest in the hobby. Too many custom parts made of
"Unobtaium" and refusing to release schematics and manuals really don't
inspire any confidence in imported whiz bang rigs. Not that I prefer
tube only rigs, but they were built to do their job for years. Maybe
the rest of the ham's life if he took decent care of his equipment. A
lot of newer rigs end up as parts units because some cheap component is
NLA. Do you think many of these all plastic LCD display radios will
still work when they are 20 years old?

I was told that a couple retired EEs in the local club did all their
repairs and I didn't know enough to be of any help. Then they told me
to "stuff" my offer of free electronic components to help them with
repairs.

> In this sense and given the obvious lack of interest in the arcane

>
> w3rv

Sorry, but that analogy just doesn't work. Several members told me they wanted to do minor repairs on their equipment but they didn't have access to the tools or equipment anymore. I offered them free use of my shop and to give them most of the components from my old repair business if I had what they needed and was laughed at. As far as weapons, I have used a bow but I prefer an M-72. ;-)

A lot of hams in Ohio were glad that I was willing to help out including an old ham in his late 70s that brought me a home brew receiver that a SK friend of his had built 20 years before. He had lost the hand drawn schematics and had a tear rolling down his cheek as he asked if there was any way I could possibly help him. He told me that he had been to every two way shop and ham equipment dealer to try to find someone to work on it and that one of them told him I was the only one in the county crazy enough to even attempt a repair. I tore it down and found a couple burnt resistors and shorted caps. I did a little math, dug around and found the parts. He was crying when the receiver came to life and kept thanking me. I charged him $10 and he hurried home to get back on the air. Helping someone like that is better than spending hours on the air to me. Different strokes?

I was born in '52. :-)

I was never at Ft Monmoth. I was tested at Ft Knox, Ky. I caught a lot of hell for it from other soldiers at my different duty stations because they didn't believe anyone could test out of a three year school. The station manager in Alaska told me "No civilian knows a damn thing about electronics". In fact, someone on another newsgroup was mailing me and calling me a liar because he insists that no one ever tested out of a tech school. I am requesting my full military records package from the archives to shut him up.

> A prime example was that there was NO CATV or any
> TV courses available nor the curricula for same.
> I'm not even sure where the AFRS (later AFRTS) guys

The radio station at Ft Greely, Ak was built in 1948 as the first permanent "Armed Forces Radio Network" station. It was the first site built with commercial broadcast equipment instead of modified military gear used at some sites during WW II. The radio transmitter was a gates BC250 In the early '70s AFRTS claimed to be the only all tube network in the world.

I wish I had a photo copy of the FCC license for the two stations.

The radio station: frequency 980 KHz.
Power: 250 watts, or as deemed necessary.
Expiration date: Until no longer needed.

The TV station: Frequency Channel 8.
Power: 500 watts, or as deemed necessary.
Expiration date: Until no longer needed.

> Sigh. I didn't know the Army had gotten so generous
> with conversions of skills to civilian licenses. :-)

Actually, it was the FCC who no longer accepted the military records in lieu of testing.

There were a few other skills that were convertible. I know guys that worked high pressure steam who said they just walked into the state's licensing office with their military records, paid the fee and left with their state license. There were a couple EEs who worked at the Ft Greely power plant. That was where I first got my hands on the IEEE magazine. Of course, air traffic controllers were in demand in civilian airports. Ft Tucker trained helicopter pilots and Air traffic controllers at Carin Air field, a few miles from the Daleville gate. The airfield was Air Force, but the students were Army and Air Force, as well as some foreign militaries. My main job was to maintain two 12 channel CATV systems and 350 monitors used to distribute educational TV and weather data to student pilots.

My retired dad lives next door. Other than some problems with his hip he's in better shape than I am. I'm 100% disabled due to a laundry list of "Little" problems. I still try to keep busy with some projects. I am trying to set up a program to collect old and dead computers, refurbish them and give them to disabled vets in my area. This part of Florida is full of retired and disabled vets trying to survive on a small pension or Social Security.

Whoa, boy you're moving fast, good show! How much sleep are you getting
these days?

> and need
> an Asian contact for WAC.

Condx from here on the east coast to the north Pacific rim have been
somewhere between lousy and hideous for weeks. A JA or a UA0 will pop
into your sights eventually.

> I will heed your advice re. using both phone and CW.

If the name of your game is building your mixed-mode total, which is
usually the Holy Grail, you really don't have any choice. It's simple
statistics and the immutable math of the decibles. CW gets you an
automatic 10 dB advantage over ssb but if the rarie only runs ssb well
then the ten dB obviously don't mean squat, etc.

I haven't done any "card counting" for years but I suspect that if I
did I'd find that 25-30% of my total are phone contacts. Despite the
fact that I'm a terrible weak-signal phone op and spend 95% of my time
lurking in the lower 25s.

> I do hop on 10 using
> phone while commuting to and from work, but in the shack, well... ;-)

Heh. Keeping an eye on 10 from the vehicle is not a bad idea actually.
If ten opens up you know the lower bands are probably cooking.

> To be honest, I suppose I just find the CW itself fun. I'm also a big
WW II
> buff and was quite honored to work W5E over the weekend, who was

I can only imagine what it must be like with a significant hearing deficit. I can not and will not put anyone down who has such a problem. As to how they can learn code, there are many ways, but I guess it comes down to whatever works best for that person. Not everyone's condition is the same. I've tested folks with some difficulties, I followed the guidelines as given by the VEC/FCC. There are ways to test folks with such problems, but getting them to be able to learn the code - is the first hurdle.

Yeah, I know the bands started going to hell before that. Used to be I bragged about Ham to people who wanted their kids to get into radio but didn't want the CB garbage. I said Ham is clean. Today, you couldn't pay me to advertise ham as being clean. It is NOT. That is sad..... It really is. The exams test for proficiency in code, theory, rules and regulations. They're not psychological tests to weed out all the riff raff. IF such tests existed for Ham and all the other fields, maybe we'd have a better world. There are people in every field, be it a hobby or profession - who ruin it or at the very least - make it look bad for the rest.

NOT EVERYONE - can learn code in a few days or whatever. There are some
things I can't learn in a month where others picked it up right away.
Different strokes for different folks. Each person has to take whatever time
as needed to learn whatever it is they're needing/desiring to learn. Some
fields don't allow a lot of time to learn, while others - such as ham - do.
There is nothing saying that ANYONE has to learn code overnight or they're a
failure. Just because I was fortunate enough to get enough in - in that 2
weeks - to pass the exam, doesn't make me a "CW" king. I use code "rarely".

But, I had a chance once to teach some youngsters the code. One picked it up pretty quick, the others - were a bit slower. If anyone wants/needs to learn the code to get a license, they will - in whatever time it takes - IF they start on it and don't give up.
The last part is the key..... To get started and stick with it. As to time, when they get all the characters down, then they'll have learned the code. Be it 2 weeks or 2 years.

Maybe someone would care to explain to me and to the rest of the world, how Gordon West's mini camps held on a "weekend" - were designed to work to get people ready to pass an exam by the end of the weekend. At least that is the understanding "I" got from reading the ads. I can't recall if some of those weekends were just for NO Code Tech OR if perhaps they also may have been for "code" as well. IF SO, and someone never had code, then how the hell did they do it in 3 days? Two weeks is a reasonable amount of time - as it took me. Three days? I don't know..... Is it possible? Even if it were just for the theory, most I know, can't learn all that in 3 days. You'd have live, eat, sleep, breathe and take the books to the can with you. IF anyone took one of those weekends, speak up. IF maybe "I" misunderstood the ad wordage, someone - anyone - feel free to correct me.

>(I've heard the place is now condos).

When the rats started to outnumber the people in that building,
something had to be done....

A shame - 641 Washington Street was a beautiful example of 1920s
Federal office buildings. A family friend who was my inspiration in
joining the Federal workforce worked there most of her career as a
secretary and then a claims examiner for the pre-OSHA Labor
Department - may she rest in peace.

I was in the FCC facilities there only six times - twice for amateur
exams, three times for commercial exams, and once to the office
(which was at the opposite end of the building from the exam rooms)
to pick up travel orders to my first duty post in San Francisco.

I still can't comprehend those old buildings as upscale condos....

A former subordinate of mine at the FCC, Don Browne, was an EE and ROTC-trained AFRTS officer in the late 1960s and after his three years on active duty with the Signal Corps went Reserve and came to work for me. He spent several years at the field office and several more at headquarters. His reserve billet was abolished in an AFRTS reorganization (even though he was a MAJ) but when a vacancy on the civilian engineering staff of the AFRTS came up he transferred to that. He retired as the chief of engineering for AFRTS several years ago and still hangs around the broadcast business.

It was for no code Tech and students were expected to have read the book
once through before attending the weekend seminar.

A lot of people got caught in RIFS. I worked with an E5 who was
riffed from Captain to E3 a few years before. he decided to stay in the
service so he took the reduction.

I spent more time in the TV end, but I had to take care of the radio
station as well.
>
> AFRTS >>> IS NOT <<< Amateur Radio

I know its not but those old stations were maintained like a lot of
homebrew ham stations. Jury rigged repairs to get back on the air,
running a very marginal signal because you weren't allowed to shut the
transmitter down till scheduled maintenance, which was once every six
months. Repairs done with used parts salvaged from old radios and TVs.
You could see the handiwork and creativity used by former staff and I
always wondered how many were hams. The station manager at Ft Greely
was, but he was a real lid. He truly believed in tuning for minimum
smoke rather than learn how a transmitter worked, but he was the only
one like that I met in the service. Instead of using the station
monitor, he would call his wife to ask how the picture was as he screwed
with the transmitter.

BTW, I was offered a civil service job while at Ft Rucker and turned
it down. I would have finished my active duty there while I filled the
slot, then the slot would become a civilian job again.

My comments with respect to the NPRM were, "What I fear most about changing the Morse Code exam requirements is a lack of enforcement, and what I fear most about maintaining the status quo is a lack of enforcement."

> Yeah, I probably could have learned it in under a week, if I pushed
myself.

That wasn't my point. My point is that everyone is different, and the
length of time it takes to learn 5WPM varies greatly. The time it
takes to learn 20WPM could be lifetimes. Not everyone is even capable
of 13WPM.

> Most anyone will tell you - it isn't good to do such. Besides, at
that time,

I've been told that is absolutely no excuse. Nothing in your personal
or professional life can be more important than learning the code.

Most recommendations are

They've finally left the group. They were paid to learn the code, and
they kept getting paid even if they failed. Of course, insteading of
doing intercept comms, they were peeling potatoes.

I don't dislike the code. It was difficult for me to make the few
QSO's that I did make as a novice. I'd like to pick it up again
someday.

I don't think that's 100% correct. You and me don't write the FCC
regulations, but the FCC looked to the ARRL to put forth modern exam
requirements. The ARRL movers and shakers wrung their hands and bit
"thier" knuckles and said that there was no concensus. So the FCC
plowed ahead with modernization, and the ARRL came up with reductions
in the Morse requirements lickety split. Amazing, all that.

So in the end, if more folks has been exposed to viewpoints other than the ARRL's, there just might have been a concensus.

Just my opinions, of course, but by tomorrow I'll probably be labeled a liar, a homosexual, and maybe even a horse thief.

Navy RM "A" School, the basic school which trained Navy Radiomen, was 13-weeks long. Morse practice was 3 hours per day, 4 days per week, but students could come in after-hours for additional practice. Graduation requirement was to be able to copy 5-letter coded groups at 18WPM for 10 minutes, with 3 uncorrected errors allowed.

Not even to open and close circuits?

NO MORSE
> USED at the third-largest station in the Army Command
> and Administrative Network.

That's when the US Army started it's downward slide and people now have
to go to Canadian war museums to get "thier" morse code fixes.

> What was the wash-out rate?

I don't have any statistics, but it was fairly small, probably on the order of 8-10%. Most washouts were for academic reasons. Very few failed because of the code.

> What happened to the wash-outs?

They were transferred to the fleet, where most of them were immediately snapped up by the Chief Radioman as undesignated strikers. Since we were chronically short of operators, any training at all was an asset, and a "second chance" is a great motivator. Usually these turned out to be above average sailors.

Sorry for the cross posts. I'm trying to locate someone.

I'm looking for a ham living in Calgary who was going to align my
Heathkit SB-401/SB-303 combo last year (or was it two years ago?). I
lost the email address and phone number --- everything. He mentioned he
could also align my Cardon "Spitfire" as well (if that rings a bell).
I'd like to ship the pair off for alignment now that it's warm weather.

Also, if there is anyone else who can do this, please contact me in case
I can't find the above person.

Thanks very much.

It really isn't so bad. In fact, it is sometimes hilarious, when I
badly misinterpret what someone says. My family usually tells people of
my "predicament" before I meet them, when they have the chance, so they
don't think I'm whacked when I give them some off the wall response! 8^)

Though there are some sleepless nights when the ears are really roaring....

So I just wear a headset to Op, and turn the sound up......

Whining doesn't help anything. And I am proud of having learned Morse
code. Yes, that part was more difficult for me than some others.

Big deal - I'm not going to demand that everything be changed to suit
me. I fully support Morse code testing.

I don't know if you do PSK31 or not. But if you want to QSO with
gentlemen and gentlewomen, it is the place to go. I've yet to hear a
curse or even complaining gossip on that mode. The worst I ever heard
was one ham (deservedly) upbraiding another for a horribly overdriven
and powerful signal that was wreaking havoc with the rest of the
segment. But even that was tame by comparison with the rest of the
bands. 20 is great for DX, and 80 is the place to go to ragchew.

And on psk31, I have no hearing problems at all, haha!

Brian, Dee is a VE.....

- Mike KB3EIA -

Hey, are you going to Dayton this year? I have a batch of what promises to be an awesome Red Ale which should be ready to drink about that time......

Exactly.

And as for my testing preparation method, it is effective. THe
questions I got correct, I had no need to go any further with. But the
ones I got wrong were corrected by a trip to the books, or internet
research. By the time I took the real test, I knew the material very
well indeed.

Correct, Dee. Bless those who find it easy, but that isn't what I
needed to hear when I was learning.

But I'm glad I did it, and it was indeed worth it. I feel sorry for
those that have decided to wait for Morse to go away. they still wait......

Different strokes indeed. The ARS has room for many different types. It sounds as if we would get along just fine.

I'll bet you felt just darn good when you got to help that fellow.

Sounds to me as if you *have* found your place in the hobby. Seems like a good one to me.

It's just fine, Anonymous Lying Coward.

You STILL can't name the facility, the town it's in, report what
shift I work or whom I work with.

> >You're STILL an Anonymous Coward, and a lying one at that.
>
> You're still a LIAR, Nursie. And a unmitigated blowhard.

Nope.

Prove me wrong. Fill in the blanks, Anonymous Lying Coward.

STEVE WORKS AT:_____

STEVE STARTS AT: _____ AND HIS SHIFT ENDS AT:_____

His Shift Supervisor is:_____
(I'll give you the point if you can just look in the window and
describe him/her...)

HE WORKS ON: (DAYS OF WK):_____

So, Anonymnous Lying Coward...Yo gonna ante up or just make more "you're a liar and blowhard" statements?

I say your nads are in the vise.

Steve, K4YZ

>

I agree. As I've said, I learned the code well enough in 2 weeks to pass the exam but it didn't / doesn't make me a "CW" king. Time isn't really the factor here. My main point was (and I do know others who learned code quickly), you "have to start". I've heard people spout out - I can't learn those dashes and dots. Problem is, they never even tried. Maybe as kids - they may have had a set of cheap walkie talkies with the code on them or perhaps seen some code characters listed or heard them somewhere on tv or so. Did they "really" try to learn it? Nine chances out of ten - I'm willing to bet - NO. You have to "try". If you can't do it alone, seek out the help of one who has or any of the courses available and give it a chance. I will admit, some of the courses I have heard - sucked. They tended to turn me away from the desire to listen. One reason, one of the course tapes had an "echo" to it. Try listening to that for a while. If you were ever in a sub and heard sonar for 8 hours a day or more, you'd have felt right at home. So, yes - some things "can" drive you away from wanting to learn it. If one method doesn't do it, find one that will. If you're interested enough, you'll do what it takes to get through it.

Time used to be a factor at one time as a license had to be upgraded in a certain time, so it sort of placed those who were lagging - in a bit of a turmoil. I guess that was the FCC's way of saying - you can do it if you put your mind to it. They kind of pushed you along or out of the way.

Not by me, I don't have a problem with opposing view points. You could be right, I could be wrong. It is good to debate.
Name calling doesn't get it done. That is what kills me, many do that because they can't do a good debate. So what if we keep opposing each new point made, who cares? Just makes more to chat about.

As to the ARRL, at one point - "I" thought and perhaps I read it somewhere - the FCC was getting fed up with the ARRL always trying to influence them. I'm not sure what is going on there anymore. The ARRL pissed me off a long time ago and ever since then, it didn't matter to me whether they sank or swam. The local representative was one of the most cocky - arrogant people to walk the face of the earth. He was "supposed" to be at the Hamfest to meet people and to discuss things. He blew off most of those who approached him. Instead - always turning to his friend to talk to him. Well excuse US for the interruption..... With representation like that, who needs them? That wasn't the only issue. Their arrogance got the best of me and some others I know - a few times. I don't follow them anymore - like a dog on a leash. Funny, my brother just got an invitation the other day - to join. First one he got in a long time. I said - must need some money! The ARRL doesn't speak for me. Actually, I don't think they speak for themselves anymore. In the end, unless we continue to get government protection, big business will win. Money talks and bull shit walks.

That's what you ask in here for! There are VEs in here, myself included -
who can give guidance to those who ask.

>

VEs can accommodate you if special testing is needed - BUT - if "special equipment" is needed, it is up to the examinee to provide it - the VEs are not liable for that. All Handicapped applicants "should" call ahead to make special arrangements so that any extra VE team members if needed - can be there to assist, or whatever other needs - can be met. For example, if I have a blind applicant, which I had - I can't read his test to him in the sitting of others taking the exams. That would be distracting. We instead - gave this person - his exam - after the others were done. "We" did not have any "Braille" equipment. I'm not even sure if such equipment exists which would have read the text to him - if fed in. IF so, it would have been up to him to supply it. Another case required an hour or so of prior preparation of materials and equipment. We've had other cases where special needs had to be met, but again - it was by prior arrangement. There is no other way to do it. For them to just show up - we simply wouldn't have been able to accommodate them. I don't know of any VEs who would shy away from testing the handicapped, but you have to work with them too. They don't know your problems until you tell them. Then - they can work with you to get you through the exam process. Even if you failed, they will most likely - now knowing of you and your condition - offer to help you learn it for the next time. Maybe even help set up a station.

IF you have a tone problem as I've seen the example given, it could take some time and equipment to get "a" tone for you to be entirely comfortable with. IF for some reason - the computer can't do it, then perhaps a taped exam fed through a mixer to acquire the proper tone. OR maybe even a test - sent by a code practice oscillator set to a pitch - suitable. The code test may have to be broken down to allow the person to absorb the sound if they can't "hear" it properly. In this case, a CPO would work with a buzzer - to "feel" the characters - as an example. Perhaps - light flashing - if the

tones are not able to be heard at all. Any number of issues could be prevalent and though there are ways to deal with them, it would be hard pressed to try and do it with a "walk in" handicapped applicant. Walk in - in case your not aware - means unannounced - in regard to Ham exams.

> Ohh, you know how newsgroups are.....

>>I<< know how they are, Mike!

They're populated by people who don't have the intestinal
fortitude to sign their names to their posts and they make up
allegations to try and hide behind.

Ask Brain where the Techs went. He insists that they were "chased
away", yet refuses to say who chased them away or where they went.
I've asked him repeatedly after he unequivocally stated they had.

Ask Brain where the "unlicensed devices" are. He insists that
"unlicensed devices" play a "major roll" in emergency communications.
He WON'T provide any evidence of it, but he insists it's true.

Brain has also recently asserted that ARES is "overblown", and
that it won't respond to "real disasters" due to the age of it's
membership. I've posted several news releases, all of them from within
the last 2 weeks, and Brain won't explain how it is ARES is "overblown"

when there's evidence to the contrary.

Those are just the recents ones...The Somalia horse is pretty dead...He could never make that horse trot no matter how colorful a jockey he put on it.

His "I've worked DXCC several times over" stories are cute, too...

Now his most current diversion is adding up non-existant "lies". It just makes him look more feeble, but hey, it keeps him warm.

Keeps me warm too....from laughing so hard!

You have a good point Mike. I have seldom had any problems with written exams, but passing a Morse test was hell. Those of us who have had trouble learning Morse have taken a lot of abuse in this group. You hit the nail on the head when you said you wouldn't do the same if someone had trouble with the theory.

2061. Morse gone in a year

You're being a Jonah again, Jim. the announcement guesstimates all done
within a year, i.e. by spring '06. Sounds about right to me. Granted that
the comments about what the FCC might do (and the title of the post) were
all the poster's own, and not Hamwave's.

My own crystal ball guess is that the FCC will just delete the code test and rearrange some subbands around this time next year. That's still much longer than I originally thought.

Been there, did that. I built my first SW receiver from junk parts I
picked up along Radio Row in Philly. Radio Merit Badge booklet in hand
circa 1950. Things have changed a bit since then though . . . (?!)

> > In general the average ham learns as much about electronics

Maybe it's happened but personally I've never heard of an instance of
anyone with a broken mainstream radio not being able to fix it or get
it fixed because the manuals and/or the schematics couldn't be located.
Parts are another story but that's SOP. Try to buy all the parts for a
1980 Ford from a dealer.

> really don't
> inspire any confidence in imported whiz bang rigs.

All commodity widgets have design lifetimes particularly when they are
based in the fast-moving field of electronics Japanese and otherwise.
But there are tens of thousands of 20-year-old pieces of complex ham
gear still regularly on the air. I can't imagine why you would expect
any more than that for the service life of chunks of entertainment
electronics.

> Not that I prefer

> still work when they are 20 years old?

I have no idea but a buddy of mine has an IC-781 xcvr which cost him
over $6k 18 years ago and it's color LCD display still works as well as
it did out-of-the-box. Boeing is replacing the conventional instruments
in it's airliner panels with color LCD panels which better last 20
years and more or Boeing is gonna get spanked plenty.

Makes no sense at all, I'd leap on an offer like that if I needed acess
to an RF bench because I'm really ill-equipped in this area. Must be
something in their water.

> As far as weapons, I have
> used a bow but I prefer an M-72. ;-)

Yeah, RIGHT . . ! Whoosh: Thud. So re-up, Rumsfeld is offering bonuses.

Nice job. Could not agree more.

In a contorted way it appears that thee and me are basically the same basic breed of radio alley cat. Bear with me here. It's a tale. I got into ham radio over a half century because I wanted to move up from SWLing and just reading National Geographic as a kid to get on the air and communicate with others in foreign places. I'm still at it and in my mind the magic of DXing the HF airwaves hasn't diminished a bit.

Here's part of the convergence: For the most part I simply can't stand most neighborhood radio clubs for all the reasons you've cited recently here and there in this NG. The poltics, the general clulessness, the rambling disorganization, the lack of interest in my particular hot buttons, etc. So I don't bother with 'em.

> Different strokes?

You bet. I found my "cure" for the local radio clubs many years ago. I'm a member of a wide-area regional ham club which is tightly focused of HF DXing and DX contesting, a bunch who have the same narrow interests I have. Works for me, maybe the format would work for you.

There's some huge number of electronics hobbyists across the country including hams who get their jollies from tube electronics. Since you're in what amounts to "geezer alley" in central Florida I expect that there is a higher concentration of "tube huggers"there than one would find elsewhere in the country. If I had your interests and lived where you do I'd seriously consider poking around the area for others of your ilk to clump with and form some sort of club centered on tube

radio, etc.

Maybe one of these days I'll get off my butt and see if I can find the
Philly Custom House where the FCC lived around here in it's glory days.

> I still can't comprehend those old buildings as upscale condos....

Philly is *loaded* with 'em Phil. You'd have to see it to believe it.
The really pricey versions are those which are converted multi-story
waterfront warehouses on piers poking out into the river. When I was a
kid you took yer life into your hands when you went into those
waterfront areas. No more. Another big source of conversion properties
in the city is the huge old 6-10 story light manufacturing buildings
staffed by sweat-shop immigrant labor in the early 1900s. Out here in
the 'burbs the hot ticket conversions are the surviving ancient
(1700s-1800s) textile mills along the creeks most of which have been
chopped up into big bucks office space.

156 hours worth of in-class code parctice and a pretty stiff exam.
Sounds familaiar. I didn't clock it but the 156 hours total is probably
in the realm I needed to get from zero to 20WPM. Which in my case was
stretched out over years between the 5/13/20 WPM exams.

I've heard some weird tales about how the Signal Corps used Draconian
methods to quickly pound Morse into the heads of their WW2 radio ops.
Stories about eight-hours-per-day seven days per weeks drills for 2-4
weeks or some such, nasty punishments for those who "didn't get it",
etc. Have you ever heard any of these tales?

It was a constant battle to find parts to manufacture several models
at Microdyne. Manufacturers would drop parts, whole product lines or
merge with another company and disappear. We had to stop building
several models because to cost to completely redesign the radio was more
than the expected sales. As a stopgap a few boards were converted to a
SMD and through hole mix, but that only bough a couple years.

I don't run out and buy the latest and greatest toy of the week.
Most of the electronics i have are ten years old, or older. This
computer is over five years old but it still allows me to to do what I
have time for.

> I have no idea but a buddy of mine has an IC-781 xcvr which cost him

They would just replace it and the driver with newer designs. On the
other hand Avionics has to meet strict standards so it is in a state of
constant change. No airline will ground a plane because they need
$20,000 worth of new electronics. I saw a news release a while back that
some of the early 747s were being retrofitted with the latest control
systems. On the other hand, there is a limited number of years the
airframe can be used and there is a thriving business in used parts.

They told me they only used parts they could trust and never used any
old stock. What do they think they get on small orders from small
distributors? The parts have been on the shelf, somewhere. Sure you
can get oxidation on leads if improperly stored, but its not like they
are in damp cardboard boxes in my back yard. I think the real issue was
that they retired from Lockheed-Martin, and I had worked for Microdyne.
There was a rivalry, even though Lockheed-Martin was one of our
customers.

Most of the old timers around here have the attitude that they stopped fixing anything the day they retired. There is a HUGE retirement community near here that has spread into three counties. It is full of retirees who think any manual labor is beneath them. They all hire lawn services, they aren't allowed to change their car's oil on their deed restricted property and no antennas so the hams there all use handhelds. They are the most self centered people I have ever met. They also have the highest rate of STDs in senior citizens in the country. Not many electronics people around here. Its the "I built a computer" crowd who wouldn't know which end of a soldering iron to pick up till they smell burning flesh.

I was on the advisory board for the Lake County Vo-Tech Electronics program. It was the highest rated in the state but the school board shut it down. I haven't found anything here in Marion County. One high school had a similar program, but shut it down as well. its no wonder the few technology businesses are down sizing locally and shipping the jobs to other parts of the country.

I gave up on them and decide I don't want to join them. I offered to
help plan the next hamfest and maintain a E-mail list for them. They
asked if I had the money to pay the year's dues first, then told me,
"Real hams will know about it, anyway"

Yes, it was a good day at the bench. Much better than some whining
CBer who bitched at paying $7.50 to put a plug on their third microphone
that month.

> Sounds to me as if you *have* found your place in the hobby. Seems like
> a good one to me.
>
> - Mike KB3EIA -

Yes, I've always enjoyed the equipment more than using it, and I have
lost interest in getting a station on the air so I'll keep collecting
and repairing old gear as long as I'm able to do it. I have a couple
kids who are supposed to help me clean out my shop this summer so i can
see how much equipment I can salvage. I still have the benches wrapped
in plastic from last year's hurricanes. I pray they miss us this year.
Three in my area were just too much.

I have a couple websites, but no good pictures of the three shop
buildings to put up, yet. Maybe I can do it this fall.

I've recently read somewhere (if only I could remember where) of a totally
deaf ham
who operates cw. He was a no-coder until he became deaf. He uses a homebrew
gizmo plugged into the headphone socket that flashes a light. Was allowed to
use it for the test without any problems.
His only problem is that from around 15wpm the light does not come on and go
out fast enough. IIRC his device uses standard tungsten filament bulb. What
would be the best alternative, i.e. "switches" faster, LED or neon bulb?
The article had a schematic of the sound-to-light converter - I remember it
